The United States does have a legitimate interest in helping Saudi Arabia maintain its security and stability. It is in our interest, through friendly relations with Saudi Arabia, to help keep the oil flowing and to influence and moderate other nations in the region. This is the very justification used in seeking our support for the original aircraft sales. But it is also true now, as then, that this relationship must be a two-way street.

We have every right to expect that in return Saudi Arabia would at least suspend their attacks on President Sadat and the Camp David accords and encourage the various parties to seek a moderate solution. Instead, they continue their attacks. At the January 26, 1981, Islamic Summit Conference in Taif, Crown Prince

Fahd went so far as to urge his Islamic brothers to mobilize "their spiritual, cultural, political, and material capabilities in a true and untiring 'jihad' (Holy War) with all the lofty meanings of the Islamic concept of jihad to confront and repell aggression and restore our holy places and usurped land." I ask you, if this is their attitude 2 years after we provided the F-15's, what can we expect 2 years from now?

From a military standpoint, I fail to see how the addition of long-range fuel tanks and sophisticated new missiles will significantly enhance the security of Saudi Arabia. The traditional threat from Iraq has been defused by the Iran/Iraqi war and has even given way to improved ties through Arab solidarity. Any threat from the Soviet Union will remain since the Saudis will continue to be vulnerable to their superior numbers and experience.

On the contrary, I believe that this proposed sale would increase tension and the risk of broad-scale conflict. Israel could not afford to ignore such a potential new threat. The elimination of this threat would undoubtedly become a priority item to any battle plan insuring Saudi participation in future conflicts.

Saudi Arabia has called this proposed sale a test of our friendship. In order to balance this friendship with Israel, we have offered them some $600 million in new arms credits. As Washington Post columnist Philip Geyelin recently pointed out in an article entitled, "A Saudi Quid for the F-15 Quo?"—

And so the Mideast arms race spirals on, with no clear answer as to how the additional arms fit into U.S. strategic planning.

Mr. Geyelin ends his commentary with the one remaining and as yet unanswered question:

What has the United States so far received—or can reasonably expect to receive—in return?

Until that question is answered, I must express my grave reservations about the proposed sale of equipment of this nature to Saudi Arabia.

For the information of my colleagues, I would like to insert the entire March 27 article by Mr. Geyelin at this point in the RECORD:

A SAUDI QUID FOR THE F-15 QUO?

(By Philip Geyelin)

To understand the dynamics of the Middle East arms race—and its essential mindlessness, as well—you have only to put this question to almost any defense expert, in or out of office:

Why did the United States originally agree to sell 60 of its most sophisticated military aircraft, the F-15 fighter-bomber, to Saudi Arabia, and why is it now ready to significantly enhance both the range and firepower of this plane by adding fuel tanks, advanced air-to-air Sidewinder missiles and other support aircraft and equipment?

The answer: Because the Saudis want them.

Next question: Why do the Saudis need this capacity to strike at targets 1,000 miles away? The answer, almost unanimously, is that they don't. So why, once again, are we doing it? At this point the conversation comes full circle: The answer is that the Saudis are insisting on it.

Strictly speaking, of course, that is only part of the explanation. The other part is that the United States, for reasons that make almost no sense in military terms, cannot bring itself to say "no" to Saudi Arabia.

Now it is true that along the way, in the case of the F15s, the United States has said no. President Carter explicitly promised not to sell the fuel tanks, missiles and all the rest when he was fighting a close and bruising battle with Congress for approval of the sale of the aircraft in 1978. Israel and the American Jewish community were violently opposed.

And then again, when the Saudis began pressing for the "extras" last year, some 68 senators expressed their opposition in a letter to the White House. That would have been more than enough to kill the sales under a procedure that permits either house of Congress 30 days to veto such transactions. Just 10 days before last November's election, in what was obviously an effort to reassure Israeli supporters, Carter publicly promised "no change" in his original commitment not to upgrade the F15s' capabilities.

One is left with the clear impression that the Reagan administration in now reversing Carter policy—that this is a partisan matter, reflecting the new administration's greatly enlarged concern for Mideast, and Persian Gulf, security, and consequent willingness to accede to Saudi demands in a way that the Carter administration would not.

That is what the public record suggests. But the private record suggests quite the contrary. According to former high officials in a position to know, almost immediately after the election, the Saudis once again began pressing their case for the extra gear for the F15s with renewed urgency. And the Carter administration was ready, in the middle of the presidential transition, to go along, at least most of the way.

Quiet overtures, in fact, were made to the Reagan transition team. An offer was made to make it a bipartisan affair, with the president-elect giving his tacit approval in a way that would have taken both the outgoing and the incoming administration off the political hook.

But the Reagan camp reportedly was not yet ready to take the plunge, although there was strong support among Reagan's military and foreign policy advisers for upgrading the F15s. The Carter administration thereupon decided against going it alone.

"We never did make a binding commitment to the Saudis," says one former Carter official. "But the written record if published, would certainly imply that we were ready to go forward. If we had been reelected, we would probably be doing pretty much what the Reagan administration is doing now."

The effect of all this is to make the F15s pretty much of a non-issue. What seemed to be shaping up as another battle royal, with Democratic Sens. Kennedy, Cranston and Biden leading the opposition, is likely to be not much of a fight.

The Reagan administration is putting it about, in its dealing with American Jewish leaders, that it is only doing what the Carter administration was prepared to do. The Israelis, sensing the force of that argument and not being eager for a losing confrontation with the new American administration, are registering only perfunctory opposition.

One reason: As an offset to the supposedly new military capacity being conferred upon Saudi Arabia, Israel will receive some $600 million in new arms credits from the United States.

And so the Mideast arms race spirals on, with no clear answer as to how the additional arms fit into U.S. strategic planning to meet what the Reagan administration perceives to be an increasingly dangerous Soviet threat to the area.

There are undoubted Saudi defense needs—for defensive weapons such as the far less sophisticated and more immediately useful F5s, which the United States has furnished Egypt. The question remains what use Saudi Arabia has for the hottest and hardest-to-handle offensive aircraft in the American arsenal. If it is a matter of prestige—of ingratiating a vital oil producer, one with a potentially constructive role to play in the Palestinian issue—a further question remains. What has the United States so far received—or can reasonably expect to receive—in return?

Mr. GILMAN. I thank the gentleman for taking the time to bring this before us today.

Mr. KEMP. I thank the gentleman for his comments. I was particularly pleased that he couched them in very moderate terms insofar as he suggests that Saudi Arabia is a potential friend and ally and force for moderation in the Middle East. That was welcomed by this Member because I think we must influence foreign policy, as the gentleman from Michigan pointed out earlier, by establishing some conditions on those relationships.

I think this administration, frankly, has gone a long way toward reversing earlier trends toward—well, I will not use the word "appeasement"—but in the show the other night on "20-20," I would say to my colleagues, that was so remarkable by Geraldo Rivera, at the end of the hour-long documentary, they interviewed a young Christian Lebanese leader who was fighting off, literally, genocide against Christian communities of Lebanon. He was crying out to the world the fact that there were no Christian nations anywhere supporting his attempts to help his people survive, and the only nation in the world that was helping the Christian Lebanese community was Israel, and how grateful he was for that.

But he told the story of how, when the American Ambassador was murdered by the PLO in 1977 and they dumped his body in a garbage pail and this country protested, causing the PLO to ship the body of the U.S. Ambassador to the United States, we sent a long telegram of thanks for his cooperation to Yasser Arafat. This young Christian Lebanese leader said that is not complacency, that is an act of complicity. I agree.

I hope within the space of the next few days to put the whole script of that "20-20" show into the RECORD to bring to the attention of our colleagues, I would say to my friend from Michigan, that remarkable show.

Mr. BLANCHARD. If the gentleman would yield, I saw that same show and was so moved, as you were.

I do want to mention one thing regarding the new President. I think his offer of friendship and support to Israel should be well received by all of us because Israel is a democratic ally that has proven to be effective in the Middle East, in a very unstable part of the world. But I would not want to let my silence equate my feelings about Mr. KEMP's support of Israel with Mr. Reagan's.

You, sir, have a track record on this issue which is proven as reliable and strong support for Israel. President Reagan has a number of statements. He has yet to prove himself on this point. I think that should be pointed out because I found, in looking at the statements of our new President, that they look very much like those of the previous President, and like him, he did not have a track record here either. They were Governors.

Mr. KEMP. I want to reclaim my time for a moment because the gentleman is going to have an hour, and if he wants to, he can establish his concerns about what this administration is going to do or not going to do in the Middle East or with regard to Israel.

It is my belief that, as I said earlier in my remarks, that this President and this administration will turn out to be very good friends of Israel. I talked to the President about this personally, and I do not now want to get into a debate over what may or may not happen. It is my belief that President Reagan should be taken on his own word, and he has a pretty good record of carrying out his campaign promises.

Mr. ADDABBO. Will the gentleman yield?

Mr. KEMP. I will yield to my chairman. I served on the Defense Subcommittee on Appropriations under my good friend from New York (Mr. ADDABBO) and it is a pleasure to be in a position to yield to someone for whom I have such high regard and respect.

Mr. ADDABBO. Thank you very much. The feeling is mutual. We do miss you on Defense Appropriations. We may disagree, but we disagree with total friendship.

I want to compliment the gentleman from New York (Mr. KEMP) and the gentleman from Michigan (Mr. BLANCHARD) for bringing this matter to the floor and to the public's attention. I think it is very important. It has been lost in the news media by the budget cuts and the other debates and the near tragedy of last week.

I was one among many here in the House who opposed the original sale of the F-15 because we knew this was just a foot in the door for a greater arms buildup and a possible arms race, as we see it.

We commend and support the President's move for greater military aid to Israel. But again, that is only a small part. This is a more serious thing because, again, the F-15 as presently configured is a good defensive weapon, as the gentleman, having served on the Defense Appropriations Subcommittee, knows.

But with the enhancement of the additional weaponry and the tanks, it becomes a great offensive weapon. The enemies of Saudi Arabia are not that far. The only one they will now be able to reach will be Israel. The present configuration gives them sufficient defense against their closest enemies.

So I commend the gentleman from New York (Mr. KEMP) again, and the gentleman from Michigan (Mr. BLANCHARD) for bringing this to our attention. I do hope he will carry the message of this House—and I know he has the confidence in the administration—of the importance and the feelings of many of us in the House.

Mr. Speaker, I rise to voice my disapproval of the proposed sale of additional F-15 equipment to Saudi Arabia and AWACS, and express my deepest concern for the safety and welfare of the State of Israel, due to the Reagan administration proposal of March 6, in which it announced it intended to sell Saudi Arabia certain accessory equipment for the F-15 air superiority fighter aircraft which it had purchased in 1978 from the United States. My concern for the well-being of Israel is heightened because I fear that the related equipment—conformal fuel tanks to extend the range and flying time of the aircraft, and the AIM-9L Sidewinder air-to-air missiles, highly accurate and far more lethal then previously sold to Saudi Arabia—could seriously jeopardize the safety and peace of Israel. For the present Saudi's F-15's are sufficient for its defense. It is a decision by the administration that can only lead to an arms race, an arms race which would only result in needless instability in the Middle East.

Mr. Speaker, I firmly believe that the current political situation in the region precludes any such deals at this time. I also firmly believe the future repercussions of this sale will be most damaging to the economy and security of Israel and that President Reagan should adhere to the Carter administration's assurances to Israel that it "would not sell other systems or armaments that would increase the range or enhance the ground attack capability of the F-15."

It is clear to us present today that the intent of the sale, to provide Saudi Arabia with better defensive weapons, may be totally different from the possible effect if those weapons are suddenly used in an offensive display, seriously undermining the sanctity of Israel, and I respectfully urge President Reagan to seriously reconsider his proposal and urge my colleagues not to approve the sale.

One of my greatest fears is an arms race developing in the Middle East. Israel is in no position economically to enter into a situation in which it will be forced to purchase more and more military equipment to counter similar purchases by Saudi Arabia. An arms race will mean less security and contribute to an already crucial situation in Israel. It is a race that it cannot possibly win, and one in which Saudi Arabia would be most happy to enter.

Some have made the argument in favor of the sale that the United States must sell the equipment to enable the Saudi's to protect their oil resources from internal or external threat. That argument disturbs and angers me because it is obvious that the new weapons will have no discernible effect against the greatest threat to their resources—the Soviet Union—and it is foolhardy, judging from past experiences with Iran, to think that sophisticated weapons could possibly prevent the overthrow of the government.

It is obvious that the administration lives in the fantasy of past mistakes in international affairs in which it was assumed that one could apply military solutions to political problems. There is no one who can guarantee what type of government, pro-United States, anti-United States, or violently opposed to Israel, will be in control of those weapons 1 year or 5 years from now, nor is there anyone who can say with full assurance that current ties to the United States for military security will continue tomorrow or next year, or prevent Saudi Arabia from attacking Israel.

It seems like only yesterday that we gathered at the White House to watch the historic signing of the monumental Camp David accords. As we watched that sunny day, ourselves witnessing history, we all felt that this agreement would be the cornerstone of a lasting peace in the Middle East.

It seems those who approve of the sale have very short memories, for the Saudi's have yet to endorse that agreement or the Egyptian-Israeli peace treaty. Rather than working to encourage stability in the region, a stability which would benefit everyone, and working closely with its neighbors to adhere to the agreements, Saudi Arabia has done just the opposite, joining radical Arab States in denouncing the accords and breaking relations with Egypt. I do not understand the logic in assuming such a nation would not in any way be compelled to attack Israel, perceived

threat or not. It is a chance that at the present time, under the current military and political situation, cannot be allowed to take place.

Mr. Speaker, respected colleagues, I urge you again to study the future ramifications of such a sale. Study before you make your decision to vote yes or no to the sale as to what the past has shown us about past internal instability in the Middle East and how it has affected our Nation. We have arrived at a situation where less is better and more—whether it be planes, missiles, or fuel tanks—can only serve to undermine a peace many have worked so hard for.

Mr. KEMP. I appreciate my friend's statement. I would say I think it is because of the concern registered in the Congress on both sides of the Capitol that the bomb racks were not placed on those F-15's. If you put bomb racks on there, with Sidewinder missiles and the new fuel tanks, you would have had a potent offensive attack weapon that could be used to reignite war in the Middle East.

So I think it is wise that some of us are raising these issues. I know it will be taken in the right spirit down Pennsylvania Avenue.

I yield to my friend from Pennsylvania.

Mr. DOUGHERTY. I thank the gentleman for yielding.

Mr. Speaker, I rise today to oppose the planned sale of AIM-9L air-to-air missiles and fuel and sensor tactical (FAST) packs to Saudi Arabia for the 60 F-15's they purchased from us in 1978. In addition, the proposal to sell some AWACS radar observation planes to this Arab nation is of greater concern to me. These sales are alarming because they undermine the security of Israel, our strongest and most dependable ally in the unstable region of the Middle East.

Some of my colleagues may be of the opinion that Saudi Arabia would never use these sophisticated weapons against Israel. But I ask them: How can we trust a nation that has not accepted the peace treaty between Egypt and Israel, has financed the terrorist Palestine Liberation Organization, has led a financial boycott of Egypt, opposes use of the Suez Canal by Israeli ships, and has called for a holy war to be waged against the State of Israel?

All of these recent actions of Saudi Arabia aside, there exists the possibility in the future, given their instability, of a takeover by radical forces from within or outside the country. Then look where the offensive F-15's and the AWACS would be. Violent enemies of Israel could use the AWACS to detect any troop and plane movements of the Israeli army from hundreds of miles away. Obviously, this enhances the Saudi offensive capability, and with F-15's, they could attack quickly and efficiently the condensed Israeli population. Needless to say, the reason the Saudis could travel the long distances to their targets in Israel would be the fuel tanks we are planning to sell them now.

Certainly we could even things up by selling more advanced equipment to the Israelis. But they already spend an extremely large portion of their budget on defense, and their triple-digit inflation could not likely survive increased spending in this regard. How can we possibly expect Israel to keep pace with the oil-rich Saudis in buying military weapons from the United State or any other nation? It is a race the Israelis cannot win.

Mr. Speaker, there are a number of additional reasons why we should not sell this equipment to Saudi Arabia. For one, it shows that the United States is willing to forgo past commitments when an Arab oil country threatens to reevaluate our relationship with them. What future promises or treaties will we go back on if one of our supposed moderate allies in the Middle East talks of reducing their oil supply to our country? Second, the word of the United States obviously suffers with such an occurrence. Who will believe any commitments we make in the future with other nations? Very few, I would think.

One can also ask whether this equipment will really help the Saudis defend themselves against aggressors when it is their offensive capability that is so drastically increased. How will the sales affect any future peace negotiations in the Middle East, and finally, what benefits will the United States receive from this in its relations with a Saudi Arabian Government that has often joined forces with other countries to fight Israel, and calls now for a holy war against the Israelis?

Mr. Speaker, the United States cannot sell this sophisticated weaponry to such a government. It will result in our ally Israel being placed in a dangerous security position, and could also upset the fragile Middle East peace process that is vitally important to all nations of the world.

□ 1530

Mr. NELLIGAN. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Pennsylvania.

Mr. NELLIGAN. Mr. Speaker, I thank the gentleman for yielding. I wish to compliment my friend from New York (Mr. KEMP) and also the gentleman from Michigan (Mr. BLANCHARD) on the enlightened articulation on this very important subject which I have heard here in the House this afternoon.

Many Americans have voiced skepticism about the proposed sale of the AWACS and offensive weaponry to Saudi Arabia for use with F-15 fighter bombers.

They are wary of the vague assurances by the Saudis that they will hold down the price of oil—and help in the quest for peace in the Middle East—in return for sale of American weaponry.

These promises have remained unfulfilled in the past. But I am willing once more to give the Saudis an opportunity to reciprocate American assistance by playing a positive role in that troubled area of the world.

I am willing to accept that assurance because I believe the overriding American security interests at stake make it necessary to do so.

The fact that I do not plan to oppose the sale at this time does not signal an abandonment of my unequivocal support of Israel. That democratic nation, in addition to being our moral partner, also is an important strategic asset to the United States in the Middle East, particularly if the United States is to counter the escalating Soviet threat there.

I look forward to the time when Saudi Arabia becomes a true force for peace and there is no need to continue this tragic scramble for the increasingly powerful instruments of war.

It is my hope that the sale of this weaponry may help bring that day closer.

Mr. SHAW. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Florida.

Mr. SHAW. Mr. Speaker, I rise today with deep concern and grave questions about the proposed arms sale to Saudi Arabia of Sidewinder missiles and conformal fuel tanks, as well as AWACS (airborne warning and control systems).

Is the Soviet threat to Saudi Arabia enough justification to conduct business that is in direct violation of assurances to Congress and to Israel? As the gentleman from New York (Mr. KEMP) pointed out when the original F-15 sale was proposed, the United States gave assurances that no offensive add-on equipment would be sold to Saudi Arabia.

Is the sale going to affect the staggering price of Saudi oil? How could it lead to moderation of oil prices that have risen from $12 a barrel in 1978 to $37 a barrel in 1981?

We must bear in mind the open hatred harbored by the Saudi Government for President Anwar Sadat and his work toward an Arab-Israeli peace treaty. Saudi leaders have called for a jihad, or holy war against Israel. In the past 32 years, three of the four wars Saudi Arabia has been involved in were against the Israelis.

The Saudis have been, and continue to be, a major opponent of the Camp David accords.

In light of all this, I ask, Are we justified in selling our missiles and fuel

tanks and warning systems to this country?

Mr. KEMP. I thank the gentleman for his comments.

Mr. Speaker, I am delighted to yield to my friend from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Speaker, I thank the gentleman from New York and the gentleman from Michigan for arranging this very important public statement for this most unfortunate situation.

Mr. Speaker, I strongly oppose the proposed sale of offensive enhancements for the F-15 fighters sold to Saudi Arabia in 1978. I am even more vehemently opposed to the sale of airborne warning and control radar planes (AWACS) to a nation that, first, does not need this weaponry for its defense and, second, does its utmost to oppose our peace efforts in the Middle East.

It is incredulous to me that the new administration would consider providing weaponry that could prove devastating to Israel, without the slightest assurance from the Saudis that these arms would not be used offensively toward Israel. The lack of assurance from the Saudis implies that these arms would, in time of conflict, prevent Israel from adequately providing for its defense.

Two years ago, the sale of F-15's was approved by Congress on the assurance that the Saudis would not acquire these offensive accessories and that the Saudis would be a force for moderation in the Middle East. Instead, the Saudis have led the rejectionist states in calling for a jihad against Israel, and have continued to be the major financier of the PLO.

Supplying the F-15 enhancements and AWACS would not only be a mockery of the administration's expressed intention to combat terrorism, but would reward the Saudis for opposing the Camp David peace treaty. Without insisting on a quid pro quo, the perception of a weak United States is inevitable. A coherent overall Middle East policy would help us resist the sense of appeasement that is associated with this sale. Certainly, the expectation of maintaining the flow of oil at a moderate price has not come about in the past.

Having air-to-air missiles and conformal fuel tanks for the F-15's will not stabilize Saudi Arabia. Nor will AWACS eliminate the internal threat to the Saudi regime. Furthermore, we may again find ourselves with neither the friends nor the weapons that were to protect our own national interests.

When Israel becomes militarily vulnerable, the Soviet threat to the Persian Gulf will be strengthened. Reality dictates that both Israel and the Saudis have a common interest to combat Soviet expansionism in the region. The Saudis will realize this only when its best interests will be served by doing so, and I believe that the United States must play a major role in promoting that recognition.

No offer of increased military aid to Israel can adequately reduce the threat that AWACS in the immediate region can pose to Israel's security. These radar planes can detect high-flying objects within a 35-mile radius and low-flying objects within a 250-mile radius. They can differentiate among 600 targets, analyze the data, and relay commands to ground forces and other aircraft. The range and sophistication of the radar would seriously threaten the Israeli Air Force by monitoring Israeli defenses, and would severely diminish or eliminate the strategy of preemptive strikes.

Upon notification of either of these sales by the Department of Defense, I will work toward the passage of a resolution of disapproval to stop these sales that would only result in the further destabilization of this vulnerable part of the world.

Mr. KEMP. Mr. Speaker, at this time I have to attend an emergency budget session, and the gentleman from Michigan (Mr. BLANCHARD) is going to take over the time.

I yield to the gentleman from Michigan so that he will then have an opportunity to make sure that Mr. COURTER, Mr. DENARDIS, and Mr. EMERSON have a chance to speak.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. KEMP) has expired.

ADDITIONAL ARMS SALES TO SAUDI ARABIA OPPOSED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BLANCHARD) is recognized for 60 minutes.

Mr. BLANCHARD. Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. MAVROULES).

Mr. MAVROULES. Mr. Speaker, let me thank the gentleman from Michigan (Mr. BLANCHARD) and also commend the gentleman and the gentleman from New York (Mr. KEMP) for their vision and foresight in putting together this very important special order.

Mr. Speaker, I rise to express my opposition to the possible sale of additional weapons to Saudi Arabia. As expressed by one policy analyst, such a sale represents a litmus test of American-Saudi relations.

How many times have we heard that before?

At least in this instance, the proposed sale of additional weapons to the Government of Saudi Arabia does not make sense. If the Congress is going to have any say in this matter, it should be an emphatic, no.

It is ironic, but while we debate gun control and violence in the United States, we are simultaneously promoting an arms shipment contrary to our efforts to promote peace and stability in the Middle East—an effort made more difficult these days by the events in Lebanon.

If indeed arms sales to Saudi Arabia are a litmus test of American support and good intentions, then surely we have already passed that test. Since 1976, the United States has sold more military equipment to Saudi Arabia than to any other non-NATO country. The total is more than $22 billion in weapons. In 1980, their purchases of our military equipment and construction amounted to about $5 billion.

Where the Saudi Government needs assistance for purely defensive purposes, we have offered our hand and our equipment. However, with the F-15 already in their inventory, we have given the Saudis more than just a defensive weapon.

At the time of the 1978 F-15 sale, the Congress was assured, by then Defense Secretary Harold Brown, that additional components giving the F-15's greater offensive capabilities, would not be sold to Saudi Arabia.

A letter went to the Chairman of the Senate Foreign Relations Committee, Senator John Sparkman, pledging that—

> Saudi Arabia has not requested nor do we intend to sell any systems or armaments that would increase the range or enhance the ground attack capability of the F-15.

Equipped with extra fuel tanks, and the Sidewinder air-to-air missile, as has been proposed, these F-15's would be capable of an offensive thrust anywhere in the Middle East.

While I do not question the integrity of the leaders of Saudi Arabia, should war break out in the region there would be intensive pressure from other Arab Nations upon the Saudis to use these weapons. In such a provocative environment, the ability of the United States to exercise any control over the use of these weapons would be limited at best.

Also discussed as part of the arms sale is the E-3A AWACS advance warning and control system aircraft. The AWACS represents our most sophisticated electronic equipment and radars. Its look-down radars represent the most advanced form of the state of the art and the security of this sophisticated equipment should be a concern.

Mr. Speaker—is history repeating itself with an American President proposing to sell a Middle-East nation sophisticated military technology?

When the F-14's were sold to Iran in the early 1970's, the Congress was assured that the technology of these aircraft would be secure. Yet, one of the first consequences of the Islamic revolution was a compromising in F-14 security. There is evidence that Soviet

agents were able to obtain the highly classified F-14 manuals containing the most sensitive details of F-14 operations capability.

While we all support stability for the present Saudi Government, we have learned from Iran that we cannot assume anything. And so, I must lean on the side of caution in any discussion on the transfer of our country's most sensitive military technology.

To quote the report of some Middle East experts "the strains caused by accelerated industrialization, accompanied by liberalization of the kingdom's social or political institutions, may provoke a violent reaction" against the present Government.

Further, there is concern that:

Many sectors of Saudi society, from religious ascetics to those with rising expectations about the benefits of oil wealth, may end up increasingly dissatisfied with an uneven development program that goes too far and simultaneously not far enough.

As with Iran, a very conspicuous arsenal of Western arms may create a resentment within Saudi Arabia which will prove to be destabilizing for the regime.

All of us in this Congress want to see peace in the Middle East. And, all of us want good relations with Saudi Arabia. The Saudis supply 17 percent of the world's oil production, and I do not question the need of the United States to provide reasonable assistance to that Government.

However, the new round of arms sales is in no one's interest. The assumption that if we sell them weapons, they will sell us oil is based on a simplistic understanding of the region, its economy, and its needs.

For these reasons, the military sales does not make sense, and accordingly our response in Congress must be to reject the sales in the strongest possible terms.

Mr. BLANCHARD. I thank the gentleman for his eloquent observations and his participation.

Mr. Speaker, I now yield to the gentleman from New Jersey (Mr. COURTER).

Mr. COURTER. Mr. Speaker, I believe that it is very important that the Congress take a long, hard look at the proposed sale of AWACS aircraft and additional AIM 9-L Sidewinder missiles and fast pack fuel tanks for Saudi Arabia's air force.

Several questions come to mind. Why do the Saudis need the AWACS aircraft? This airborne warning and control system aircraft is already on station in Saudi Arabia under U.S. Air Force Auspices. Of course, the security of Saudi Arabia is of major importance to us, but I feel that this aircraft can be put to its most beneficial use by remaining under American control while guarding the skies over Saudi Arabia. This aircraft is too valuable to be placed in the arsenals of nations outside of NATO and our own. The fact that the Saudis want them is not strong enough justification. We have and will continue to demonstrate our friendship for the Royal Kingdom, but this must be compatible with our national security. While AWACS is not an offensive aircraft per se, it is a tempting target for saboteurs. I am not convinced that the Saudi Government could give assurances of the planes safety. It must be remembered that we almost sold these aircraft to Iran. Had we done so, almost assuredly that system (AWACS) would have been compromised. With regard to the add-ons to the F-15's, former Secretary of Defense Brown gave Congress written assurances that the F-15's Saudi Arabia sought would be strictly for defensive purposes. While I applaud the administration's decision not to include additional bomb racks, I am concerned about the new fuel tanks that will give the Saudis enhanced range for their aircraft: Range that could take their aircraft well into striking distance of Israel. The AIM 9-L Sidewinder missiles, for air-to-air combat, will give the Saudis an enhanced potential against the air forces of states in the region.

To threaten Israel with these systems makes no sense, for it is Israel who is our most important strategic asset in that region. Oil may be expensive but true friendship is priceless. When we threaten Israel's security we ultimately threaten our own. Mr. Speaker, we cannot and should not accommodate the Saudis for the sake of their fragile pride and vanity. Saudi Arabia's best bet is to permit the United States the full extent of its options in that area, including greater access to Saudi facilities, for our mutual benefit. Second, the Saudis must eventually come to realize that it is the Soviet Union, not Israel, that threatens her security. Israel could be a great friend of the Saudis, if the Saudis would only let this happen. It is a shame that Saudi Arabia has chosen to tarnish its name, by association and direct support of the terrorist PLO, rather than take a constructive role in the peace process.

Mr. BLANCHARD. Mr. Speaker, I yield to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, I thank the gentleman for yielding. I commend him for his initiative, because I think it is essential that we make clear today and in relation to the opposition that exists in this House and in the country, to a further explosion of the arms race in the Mideast.

The administration is making a very grave error in a number of ways. First, they are proposing to send to Saudi Arabia some of the most sophisticated offensive weaponry that exists in the world today. They send it in a manner that makes Israel one of the few clear likely targets. That in and of itself touches off an arms race which is hardly in the economic interests of Israel or other countries in the region. It undermines the very stability the administration says it wants to promote. We are trying through our diplomacy to persuade the forces in the region that have been at swords' points with each other to make the kind of statement that can only come in an atmosphere of mutual good faith.

□ 1545

When we armed the Saudis, despite the fact they have sworn and continue to swear hostility to the state of Israel and most recently hosted a conference where a "jihad" was called for, that was exactly what we ought not to have been doing, if we want to try to force an atmosphere in which negotiations can take place.

It is a very grave error for us to be at this point injecting these arms. It is a particular error because the sale of this offensive weaponry goes directly counter to the solemn promises made by the American Government and made by the U.S. Congress and the promises made on the part of the executive branch to Israel. Having the American commitment not to sell offensive weapons to Saudi Arabia so blatantly disregarded is hardly conducive to permitting the kind of attitude toward Israel that we would like to see in future negotiations. We are endangering the security and peace in the Middle East by this move.

We have the statement that the Government of Saudi Arabia is to be rewarded by its moderation, but in this instance the moderation is entirely on the part of the State of Israel. The degree of moderation on the part of Saudi Arabia is changed not one whit, not at all.

We have been told that they contribute to the process of the peace negotiations. They have obstructed those negotiations to whatever extent they could. They have shown no moderation whatsoever with respect to the Middle East.

It was earlier suggested that Israel should be grateful to the administration and grateful to the Secretary of State. Perhaps we should all be grateful that he went to the Middle East and did not declare himself in line for accession to the Saudi Arabian throne. Certainly there is no precedent in this that offers any security to the State of Israel.

The fact is that Israel finds itself vis-a-vis Saudi Arabia in a state of hostility and belligerence through no fault of Israel's. In contradiction to solemn promises made by the American Government, we now hear that our Government proposes to sell to the Saudis, Israel's enemies by their

own declaration, this degree of weaponry. It is a very grave error. It undermines the peace and security of the Middle East, and I very much hope that the administration will change its mind and cancel the sale of the AWAC's and the air-to-air-missiles, the sale of the tanks, the Sidewinder missiles, and all those elements that will simply further escalate an already unacceptable level of tension in the Middle East.

Mr. BLANCHARD. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. FRANK).

Let me indicate, in response to the question of escalation and the whole idea of being an arms merchant to the world, something that we have been concerned about for quite some time, that it is aggravated by the fact that the people who make the F-15's have actually promoted them in brochures, like they were promoting Calvin Klein blue jeans, to governments around the world who might like the offensive capability and power of such sophisticated weaponry.

At this point I would like to yield to the gentleman from Connecticut (Mr. DENARDIS).

Mr. DENARDIS. Mr. Speaker, as we discuss the decision to enhance the offensive capability of the Saudi fleet of American-made F-15's, I believe we should consider two general principles of politics and policy which are involved here. One is the principle that decisions ought to be reflective of national policy, and hopefully that policy is clear, rational, and consistent. The second principle is that we ought to maintain the ability to distinguish levels of friendship among our friends.

It is clearly the national policy of the United States to support the security of Israel, which is seen as an integral part of our own national security. It is a policy which has the enthusiastic support of a great majority of Americans. The problem with enhancing Saudi F-15's with an offensive capability and the problem with selling that country a sophisticated and effective early-warning radar plane is that no one can offer acceptable assurances that the equipment will not end up in a future Arab-Israeli war.

We know that Saudi Arabia has participated in past wars against Israel, and we know how sensitive Saudi Arabia is to pressures from the Arab world to gang up on Israel.

It would be wrong for the United States to expose the Saudis to the inevitable pressure they would experience to turn their sophisticated equipment on Israel should a war break out. The policy of supporting Israel's security is of a far higher order than trying to make friends of the Saudis, in this Member's opinion. The policy of higher precedence must affect decisions, and this is not the case with the proposed sale of this new equipment.

The second principle of politics involved here, Mr. Speaker, is the clear and precise ability to rank and rate one's friends in the international arena. We need to employ a kind of thermometer so we can record the degree of friendship and make decisions when we have to choose among alleged friends.

The United States should have the best working relationship we possibly can have with Saudi Arabia. After all, we are mindful of the fact that they sell us huge quantities of oil and they spend vast amounts of dollars earned on those sales on American goods and services. Thousands of Americans are currently working in Saudi Arabia on that country's massive development and industrialization program.

However, in a letter to President Reagan which was signed by a number of freshmen Members of the House, we commented on the fact that a reluctant Congress in 1978 was convinced that the original sale of F-15's was going to lead to Saudi concessions in areas vital to U.S. security and interests. We then proceeded to suggest that the record contained no evidence of such concessions, and I quote from the letters:

> The United States has a right to insist, in its own national interest, that Saudi Arabia assume an anti-Soviet leadership role in the Middle East, drop its threats to reduce oil production, support the Camp David agreement, abandon its hostility toward Egypt, cease aiding the PLO, and curb its call for a holy war against Israel.

Mr. Speaker, we should limit the sale of the best equipment we have for our best friends, and we should not be ashamed to demand signs of friendship from those who come to purchase sophisticated weapons.

These, then, are two basic reasons I oppose the offensive enhancement of the Saudi military.

I would sum up by saying that the two basic reasons I oppose the offensive enhancement of the Saudi military are, as stated, that both under the present Government of Saudi Arabia, and certainly under an Islamic revolutionary government, should something like that occur in the future, this enhancement of their offensive capability must be viewed as a threat to Israel's security and in turn to our own security, and second, Saudi Arabia's grades on the friendship test have not been sufficiently high to warrant sophisticated U.S. weaponry.

Mr. BLANCHARD. Mr. Speaker, I thank the gentleman from Connecticut (Mr. DENARDIS) for his concern and his participation.

Mr. Speaker, I might inquire, how much time do I have left?

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BLANCHARD) has 43 minutes remaining.

Mr. BLANCHARD. Mr. Speaker, I yield to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Speaker, I rise today to speak out against the sale of sophisticated offensive weaponry to Saudi Arabia for the F-15 fighter plane.

To sell Saudi Arabia advanced military equipment at this time would be a breach of our commitment to Israel. Even more important, to inject advanced arms into Saudi Arabia would further destabilize an already extremely volatile region.

In 1978 when the original deal to sell the Government of Saudi Arabia 62 F-15's was completed, Congress was given specific written assurances that Saudi Arabia would not be supplied with sophisticated offensive weaponry for these planes. At that time we also assured the Government of Israel that these planes would be merely for defensive purposes. The AIM-9L Sidewinder missile and the FAST pack are state of the art offensive weapons. To sell these weapons to Saudi Arabia would not only violate specific written commitments to Congress, but also would bring into question the credibility of our Government's conduct of foreign policy toward all nations.

Clearly, our very integrity is at stake. Just as seriously, going abroad will further destabilize a region that thirsts for stability.

As events have shown, we must worry about the fate of the people of the Persian Gulf as a whole. The Government of Saudi Arabia is not threatened by any external factors. Afghanistan lies 1,000 miles away. The Government of Saudi Arabia is well enough armed to defend itself against an attack by the only neighboring Soviet-bloc state—South Yemen.

The real threat to Saudi Arabia is internal instability. The better approach to helping Saudi Arabia deal with the instability of its own government is to counsel domestic reforms, and to provide social and economic aid if needed. They do not need greater and greater amounts of military aid.

The lesson we learned in Iran should teach us what not to do. In the 1970's we injected vast amounts of military equipment into Iran hoping that we could create a strong American fortress in the center of the volatile Persian Gulf. The Iranian revolution showed us that military aid does not solve a country's internal problems.

We must not allow the misguided fears of the present administration to cause another debacle for American foreign policy like that which occurred in Iran.

The question we face today is whether more arms—sophisticated, offensive weapons—will speed peace and stability in the Middle East. I think not.

As a country we must work for peace in this valuable area rather than

building up the number of weapons which already exist.

Selling these weapons also violates a commitment. That further diminishes U.S. integrity among friend and foe alike, and makes it more difficult for America to play a constructive role in global affairs; a role that speaks for peace, not contributes to destruction, distrust, and hate.

Mr. EMERSON. Mr. Speaker, will the gentleman yield?

Mr. BLANCHARD. I yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Speaker, I thank my friend, the gentleman from Michigan, for yielding, and I wish to associate myself with the remarks of the distinguished gentlemen from New York (Mr. KEMP), and from Michigan (Mr. BLANCHARD).

Mr. Speaker, I rise to express reservation about the administration's proposed sale of additional arms to Saudi Arabia. I want to be certain, before the sale goes forward, that we are proceeding within the context of a coherent Middle East policy.

I shall leave to those more schooled in the fine nuances of foreign policy the details of how we achieve greater stability in the Middle East, but I would propose two broad guidelines: First, we have every right to expect greater responsibility on the part of the Saudis. Now, this might take the form of more restraint in the pricing of Saudi oil, but it should most assuredly take the form of having them stop bankrolling that pernicious terrorist organization, the PLO.

Second, and most importantly, our historic commitment to the security of our staunch ally, Israel, must not be diluted. Accordingly, I will be watching very closely over the next few weeks to see the administration's spokesmen conclusively demonstrate the clear need for this sale, consistent with our overall policy in the Middle East and that the security of Israel will not be impaired by this transaction.

Finally, I find disquieting the reports that the Saudis are making this sale the litmus test of true "friendship" for Saudi Arabia by the United States. Craven responses to veiled threats must never become the hallmark of our foreign policy. With these considerations in mind, I shall listen with great interest as the administration makes its case.

Mr. BLANCHARD. Mr. Speaker, I thank the gentleman from Missouri (Mr. EMERSON) for his participation.

Mr FORD of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. BLANCHARD. I yield to the gentleman from Tennessee.

Mr. FORD of Tennessee. Mr. Speaker, I too, would like to join with my colleague and associate myself with the remarks of my good friend, the gentleman from Michigan (Mr. BLANCHARD), as well as my colleague, the gentleman from New York (Mr. KEMP).

I would state, Mr. Speaker, that when we examine the President's proposal to sell the F-15's and the air-to-air missiles to Saudi Arabia, this Congress must ask the basic question: At what cost to America?

While the sale of sophisticated military hardware may boost our defense manufacturers and may even lower our export deficits, I believe there are hidden expenses in this proposed arms sale that force us to the question: At what cost to America?

In the face of a crippling American vulnerability because of our dependency on foreign oil, the President has presented Congress with an economic plan which proposes to eliminate the initiatives to spur this Nation's energy self-sufficiency by cutting mass transit funds, scrapping the solar energy research, and eliminating synthetic fuels. And at what cost to America? Are we not even more at the mercy of the OPEC nations?

The administration says that $3 billion is too much money to fill the strategic petroleum reserves. This reserve today holds 118 million barrels of oil. If the Saudis alone decide to embargo their oil shipments to the United States, the present reserve would only last 40 days.

At what cost to America are we abandoning our independent energy supplies? There is little doubt that the Saudis are valuable allies. They face increasing internal problems in their society and are threatened by turmoil and conflict throughout the neighboring region.

□ 1600

But is the sale of some of our country's most sophisticated military hardware really going to help boost the internal security of Saudi Arabia as is the American administration's claim? The President asked us to forgo our most important recent foreign policy achievement in peace, and at what cost to America? At the cost of escalating the arms race in a sensitive region of the world. At the cost of abandoning the Camp David framework. At the cost of asking the Israelis to spend even more money on defense when their inflation rate stands now at approximately 130 percent.

The President even asked us to give up some of the power and prestige of this country that we can wield in the name of peace. At what cost to America does the Reagan administration fail to demand Saudi's recognition of the Camp David accords in exchange for our arms? Have we forgotten less than 1 month ago prominent Saudi leaders renewed their call for a holy war to wipe out Israel from the face of the Earth?

Here, as in El Salvador, we are presented with the Reagan administration's approach to conflict resolution—the military answer. Here, as in El Salvador, we are presented with serious issues which demand more than a military response. At what cost to America does the administration propose to offset the sale of these weapons to the Saudis with $600 million of military credits to the Israelis?

Is this country ready to abandon our national energy policy, to give up our responsibility as peacemakers, and to adopt a role as armed merchants to the world? I say, Mr. Speaker, the cost to America is too high to permit this proposed arms sale to go through. I recommend that this Congress reject the sale of this offensive weaponry to the Saudis and request the President to return with a package designed to meet the defensive needs of the Saudi people.

Mr. BLANCHARD. Mr. Speaker, I thank the gentleman for his remarks on this subject.

I now yield such time as he may consume to the gentleman from Pennsylvania (Mr. FOGLIETTA).

Mr. FOGLIETTA. I thank the gentleman from Michigan for yielding. I also thank the gentleman from Michigan (Mr. BLANCHARD) and the gentleman from New York (Mr. KEMP) for bringing this matter before this body today.

Mr. Speaker, any action by the United States affecting the Middle East must be examined in light of our paramount objectives in that region, that is, insuring the survival of our ally, the State of Israel, and protecting the steady flow of oil from the Persian Gulf.

Now that the Camp David accord has given us hope for a negotiated settlement and a lasting peace in the Arab/Israeli conflict, we must be particularly careful not to undermine the perilously delicate balance of power. I firmly believe that the Reagan administration's proposed sale of AIM-9L air-to-air missiles, fuel and sensor tactical packs, and the airborne warning and control system to Saudi Arabia presents a real and imminent danger to the stability of the region by providing the Saudis with offensive capabilities vis-a-vis Israel.

Saudi Arabia has been urging us to provide these systems in order to bolster their defense against possible Soviet aggression and to provide tangible evidence of our friendship. The Carter administration stated categorically that any direct Soviet military action in the Persian Gulf region would be met with the mobilization of American Forces and an immediate response to the endangerment of our increasingly vital energy sources, hence, the creation of the Rapid Deployment Force. I think my colleagues would agree that the Reagan administration is at least as committed to the protec-

tion of our interests in this area and this fact should be proof enough of our friendship and assure the Saudis of our defense of their security in the face of a possible Soviet threat.

The Reagan administration has also declared its fundamental commitment to the safety of the State of Israel. The Israelis have already requested additional military aid in the form of 15 F-15 fighters to respond to the increment in Saudi offensive capability resulting from this proposed arms deal.

If we go though with the Saudi arms sale we will surely be obliged to comply with this request to bring our ally Israel into parity. Such an unnecessary escalation of an already tense situation would be unwise and I strongly oppose it.

Mr. BLANCHARD. I thank the gentleman for his participation.

Mr. Speaker, at this time I would like to yield such time as he may consume to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Speaker, I want to commend at the outset our two distinguished colleagues, the gentleman from Michigan (Mr. BLANCHARD) and the gentleman from New York (Mr. KEMP) for providing us with the opportunity of addressing this very critical and important issue. I also want to associate myself fully with the very learned and eloquent statement made by the gentleman from Massachusetts (Mr. MAVROULES). I think that, indeed, all of the statements made by Members on both sides of the aisle have so well and so eloquently set forth the factual opposition to the proposed sale of these enhancement materials and equipment to the Saudis, and I do not want to take the time of the House at this point to repeat those arguments. I share those arguments fully.

What I do want to address very briefly is the question of the administration's judgment in this matter, and I raise the issue advisedly. Our good friend, the gentleman from New York (Mr. KEMP) stated earlier that he has no question in his mind but that Ronald Reagan, the President of the United States, is the best friend that the State of Israel and the Israelis could have. I believe that. I share that sentiment fully.

The question that I have is the same question that I had during the prior administration. There was never any question in my mind but that President Carter was wholeheartedly supportive of the State of Israel, its people, and its survival. However, even though he was one of the architects of the Camp David accords, there were times—and the sale of the F-15's to Saudi Arabia in 1978 was one of those occasions—when his judgment and the judgment of that administration were seriously in question and, indeed, were criticized by Members on both sides in this House.

I think that such an occasion presents itself at this time in regard to the Reagan administration, and I think that the Members again on both sides of the House raised this issue.

Those who participated in this debate have served not only the Nation well, but I think are serving the President and the administration well, because I think there was a great danger in their being persuaded that whatever you decide to do is right and is sound simply because you have made it. I think that the President and his advisers may find themselves in that situation now.

Of course, I think it is important to remember that Israel's very survival lies and depends upon the American people, the United States, and its President making sound judgments. I think that this administration is in the process of making a terribly wrong decision if its goes through with the proposal to sell this enhancement equipment to the Saudis. I would hope that the administration would note well that its friends and, indeed, its supporters on that side of the aisle, many of them, have raised the most important questions about this proposal.

I would hope that for all of the good and factual reasons, as well as for the credibility of the administration itself, that it will review and rethink its position and decide that in the best interests of the United States and the best interests of the entire region in the Middle East that the soundest thing to do is not to go through with this proposal.

Mr. Speaker, I thank the gentleman from Michigan in the well (Mr. BLANCHARD) for providing me with this opportunity.

Mr. BLANCHARD. Mr. Speaker, I yield 3 minutes to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Speaker, I, too, want to commend the gentleman from Michigan (Mr. BLANCHARD) and the gentleman from New York (Mr. KEMP) for providing a forum to discuss this very important issue.

Mr. Speaker, the airborne warning and control system E-3A aircraft is the most advanced airborne intelligence equipment of its type in the world. From an altitude of 30,000 feet, this system can detect up to 600 targets from a distance of 250 miles. It can direct sophisticated fighter planes to their targets, and do a number of other things which not long ago would have been considered miraculous.

The AWAC is our system. We developed it, we paid for it, and we are using it in the defense of our Nation and of our allies. we have entrusted this system to no one besides NATO.

Now, the administration is considering the sale of these aircraft to Saudi Arabia, along with F-15 enhancement systems.

Saudi Arabia is a country in a troubled part of the world. How would this military equipment be used? By whom? Against whom? Who would gain access to the operating and repair manuals which can compromise the secrecy of this technology?

We do not know.

Nor do we know the impact another infusion of American arms would have on internal factions within Saudi Arabia, or on the relations between the Arab States and our Israeli allies.

We do know that Saudi Arabia has opposed the Camp David accords. We do know that the Saudis have called for a holy war against Israel. We might assume that the presence of AWACS and enhanced F-15's in the Saudi arsenal could increase pressures on that country to become involved in any confrontation between other Arab States and Israel.

Not long ago we were told that sales of sophisticated American weaponry to the Shah of Iran was no cause for concern. We learned otherwise.

I urge the President to think again before embarking down this road. It is not clear how this arms sale would contribute to peace. It is clear how it might contribute to war.

It is not clear what we might gain. It is very clear what we might regret.

Mr. BLANCHARD. I thank the gentleman for his participation.

Mr. Speaker, I now yield such time as she may consume to the gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Speaker, I rise today in opposition to a proposed arms sale agreement between the United States and Saudi Arabia. If implemented, the agreement would provide the Saudis with sophisticated offensive weaponry for their F-15's in exchange for $600 million in new arms credits for Israel. In addition, the administration is contemplating the sale of Airborne Warning and Control Systems—AWACS, for short—to Saudi Arabia in return for rumored Saudi participation in a regional defense concept with the United States in the Persian Gulf.

All of us in the Congress must be deeply concerned about the escalation of the arms race in the Middle East—an arms race that could ultimately defeat the very cause of peace that we are pursuing. What logic is there to arming Arab allies before they have made concessions on major issues, rather than after such concessions have occurred? Even agreement on the reported regional defense, if true, would not justify the proposed arms sale in light of recent history.

There are those who have argued that the sale of offensive armaments—

the F-15's and AWACS—would be a show of good faith and would lead to major Saudi concessions on Middle East issues. History shows that this is not likely to occur. While President Carter, in his message to Congress in 1978, said that the F-15 sale would advance the cause of moderation and cement the ties between Saudi Arabia and the United States, this has clearly not occurred in the last 3 years. The spirit of the 1978 agreement, approved by a reluctant Congress, has not been met.

The historical record of our relations with Saudi Arabia on matters pertaining to arms sales and diplomatic concessions is not encouraging to our prospects for success. Their government remains adamently opposed to the Camp David peace process. In addition, they continue to provide a major portion of the financial backing for the PLO and its terrorist activities. As recently as January 1981, Saudi Arabia called for a holy war against Israel at the Islamic conference. Is this the policy of moderation that we hoped for in 1978? Clearly, the answer is "No." And that is why the spectre of American-made F-15's pointing toward Israel from Saudi airbases is directly threatening and unacceptable.

There are those who have argued that the sale of armaments, in conjunction with additional arms credits to Israel, would keep the balance of power in the Middle East in Israel's favor. Thus, they contend, the arms sale would not pose a direct threat to Israel's survival. Once again, we must ask ourselves about the logic of such reasoning. How can we justify adding new offensive capabilities to a government that has become more unstable since 1978? The goal of the administration's proposal is to meet the Soviet threat in the Middle East. But at what price?

A well-reasoned editorial in this morning's New York Times notes the problems that the Secretary of State is facing. It says:

A few honest words from the Saudis would certainly improve the Reagan administration's case for the proposed arms sales. Mr. Haig's explanations so far have been extremely vague * * *. The fact is that he, too, is eager to give the Saudis almost anything they want—missiles and fuel tankers to extend the reach of the promised F-15 fighters and now the AWACS electronic surveillance aircraft that can spy over the entire region. He wants Congress to approve these sales for the bonds they may create with the Saudi military and for the basing rights that may evolve for American Forces.

Congress has the obligation, Mr. Speaker, to insist on ironclad agreements before the fact. We need not and should not accept some vague future concessions. We are still waiting for the moderate Saudis to take the lead in pressing for Arab negotiation with Israel—a fundamental goal of the Camp David peace process. We are still waiting for them to stop financing the PLO and denouncing Israel. We look for a larger role by the Saudis in pressing for Middle East stability. I sincerely hope that we shall now see some of these changes. But—in view of the past—let us be realistic about the present.

□ 1615

Mr. BLANCHARD. I thank the gentlewoman for her participation in this special order.

I now would like to yield to the gentleman from New York (Mr. CARMAN).

Mr. CARMAN. Mr. Speaker, I rise to associate my remarks with the previous speakers who have expressed apprehension concerning the proposed sale of arms to Saudi Arabia.

In a region such as the Middle East where we face a frightening degree of instability there seems to be little justification to provide the Saudi Arabian Government with new offensive capabilities.

It is furthermore essential that U.S. policy take cognizance of the significance of a strong and secure Israel. Our commitment to the Israelis should recognize that Israel is a strong block in the defense of the United States.

It is evident the sale of these proposed weapons could prove to be a hazardous addition to an already inflamed situation. It is comparable to pouring gasoline on a combustible material.

In this light, I would like to insert in the RECORD the following editorial published in the Tuesday, April 7, 1981 edition of the New York Times:

DRIVE A BARGAIN WITH THE SAUDIS

By persuading President Sadat to let a thousand American troops join a peacekeeping force in the Sinai Peninsula, Secretary of State Haig has assured the survival of the Camp David accords and reaffirmed American sponsorship of the Israeli-Egyptian entente. Thus he reaches Saudi Arabia this morning as a protector of Israel as well as a suitor for oil. It is time to insist that the Saudis end their scornful treatment of Camp David as part of a wider diplomatic bargain that justifies their purchase of ever more sophisticated American weapons.

The Saudis contend that their growing economic and military ties to the United States represent only an anti-Soviet alignment. But in making their air force dependent upon American supplies and training, they are in fact contributing to American influence in the region and thus to the security of Egypt and Israel. The sooner they own up to that reality, and drop even the pretense of a "holy war" against Israel, the smoother will be their American connection. It is hard to believe that the Saudis' diplomatic doubletalk still fools any Palestinians thus protecting the House of Saud against subversion or revolt. Indeed, if the Saudi monarchy cannot survive open accommodation with Israel, it is hardly a safe depository for all that dangerous hardware.

A few honest words from the Saudis would certainly improve the Reagan Administration's case for the proposed arms sales. Mr. Haig's explanations so far have been extremely vague. His expressed regard for President Carter's "committments" would be touching if he had not enthusiastically kicked over so many other diplomatic traces.

The fact is that he, too, is eager to give the Saudis almost anything they want—missiles and fuel tanks to extend the reach of the promised F-15 fighters and now the Awacs electronic surveillance aircraft that can spy over the entire region. He wants Congress to approve these sales for the bonds they may create with the Saudi military and for the basing rights that may evolve for American forces.

What Congress should also want in return is a Saudi diplomacy that legitimizes Arab negotiation with Israel. The Saudis should be encouraged to continue to mediate regional disputes, as in their defense of Jordan against Syria last year. They have a role in the effort to restore effective government in Lebanon. And they need to contribute more to international aid programs that help poor nations struggling to pay for oil.

The Israelis resent the buildup of Saudi power, but not because they cannot defend against it. What frightens them most is the Western rush to appease the Saudis' oil wealth. An Israel afraid of diplomatic isolation will not in the end negotiate generously with even the most moderate Arabs. If Mr. Haig aims to contain Soviet influence in the Middle East, he needs allies who will at least speak to each other.

Mr. BLANCHARD. Mr. Speaker, at this time I yield to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Speaker, I am greatly concerned over the request by Saudi Arabia for additional hardware for its F-15 fighter planes and value this opportunity to join my House colleagues in this special order.

I remind my colleagues that when the Congress approved the F-15 sale in 1978 it was with the assurance, from then Secretary of Defense Harold Brown, that no additional sales would be made to the Saudis which would improve the attack capability of these aircraft. As one of the strong opponents of this sale, I had great difficulty believing that additional requests would not be made.

Indeed, the legitimacy of these fears was demonstrated last year when the Carter administration indicated its interest in granting additional sales. Today we have reached a very disturbing point because the administration has publicly announced its willingness to go ahead with selling the additional hardware. This decision becomes all the more alarming when viewed in light of recent press reports of tentative plans also to sell the Saudis five AWACS electronic surveillance planes and seven KC-135 aerial tankers.

I believe that this proposed arms deal would give the Saudis a very dangerous one-two punch ability that threatens Israel's security. The proposed sale of fuel pods, advanced missiles and other equipment for the Saudi F-15's would substantially increase the offensive capability of these planes. Beyond the obvious danger of

equipping them with missiles, the additional equipment would extend the range of the F-15's such that the Saudis could attack Israel from any point in Saudi Arabia.

The AWACS would give them the most advanced detection and command aircraft in the world. This plane is capable of isolating defense forces with its powerful range and sophisticated computerized techniques. The New York Times last Friday, April 3, carried the more ominous news that the Saudis might be allowed to keep four AWACS now operating there as a result of the Iraqi conflict until delivery of five such planes could be made in 1985.

The proposed sale of the F-15 hardware is particularly distressing in light of the recent history of congressional concern over this matter. I certainly acknowledge that the new administration has the prerogative to review and alter policies of the previous administration. However, given that Congress approved the initial sale of the F-15's only after strong assurances that they would not be equipped offensively, a strong presumption must rest with rejecting any additional sales. Alteration of this policy would only be justified if international conditions had changed to a sufficient degree to alter previous practices. I do not believe these changes have occurred.

I also do not believe that there are any compelling arguments which justify creating such an unstable condition for Israel, our most reliable ally in the Middle East. There has been great concern over Soviet expansionism in the Persian Gulf area. I am also greatly concerned by these developments. However, I do not believe that additional military sales to the Saudis will end these Soviet efforts. In this very volatile region the equipped F-15 and AWACS would greatly alter the regional balance of power. However, these sales would not significantly reduce any Soviet threat. If the Soviets make the decision to go beyond Afghanistan, these F-15's and AWACS, in the entire scope of the world military balance, would serve as only a minimal deterrent.

What could provide a powerful deterrent and have a very positive effect on the region as a whole, would be a change in policies by the Saudi Government to aid the peace effort. Currently this Government has shown no inclination to back away from its support of the PLO, an organization committed to the destruction of Israel, and the Saudis continue to oppose the peace efforts undertaken as a result of the Camp David Accords. If we are even considering the sale of these powerful weapons to this country, then a definitive change in policy seems to be the minimum that we should expect. The Saudis refusal to make these concessions means that we are selling offensive weapons to a country which is not our friend and is threatening the survival of our ally Israel. An additional consideration is what this sale means for the economy of Israel. The administration has also announced that we will sell Israel $600 million of additional weaponry. This to me is a clear acknowledgment of the additional demands the Saudi sale will place on Israel's defense system. It is important to note that 40 percent of Israel's budget is already spent on defense and further escalation of these demands will only further strain Israel's economy. To risk this, without clear and significant concessions on the part of the Saudis, cannot be tolerated.

One month ago, I expressed my grave concerns over the proposal on the sale of F-15's in a letter to Secretary Haig. At that time, I expressed the hope that on his trip to the Middle East, now underway, the Secretary would receive some assurance from the Saudis of a change in policy toward the Camp David peace process. The text of the letter is as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 9, 1981.

Hon. ALEXANDER HAIG,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: I am writing to express my grave concern over the State Department's recently announced decision to supply Saudi Arabia with additional military hardware for the U.S.-made F-15 fighter planes. As you may know, since coming to Congress in 1978, I have publicly voiced my opposition to providing the Saudis with any such advanced military capability, and strongly opposed the original sale of the planes. When the Carter Administration indicated it was considering the sale of this additional hardware last June, I was among the first Members of Congress to voice my objections on the House Floor. I know that my strong concerns reflect firmly held beliefs of many of my constituents about the peril of this course of action.

You are no doubt aware of the commitment made in 1978 to the Congress by the Carter Administration when the decision to sell the planes was made. Former Secretary of Defense Harold Brown publicly promised the Senate Foreign Relations Committee that a further attack capability for the F-15s would not be requested and the U.S. had no intentions of providing it. On the basis of that commitment, the Congress did not disapprove the sale. While this promise was made by the Democratic Administration, and you have every right to review such a commitment, I do not believe that a Congressional action involving an issue of this magnitude can be lightly overlooked. That promise was made primarily because of the threat perceived by many in Congress which an additional attack capability could have on the security of the State of Israel. Congressional concerns quite rightly were focused on the potential use of these planes against Israel by Saudi Arabia, and the fact that any additional hardware which increased the planes' attack capability would seriously affect Israel's security interests. Thus, the recent determination to provide air-to-air missiles and extra fuel tanks—which has the effect of increasing the possibility of an attack on Israel—thus goes directly counter to the promises made to Congress.

In this regard I am aware that the Department has also announced a proposed $600 million in additional arms sales credits to Israel, presumably so that the Israelis' fears about enhancing the Saudi attack capability might be assuaged. In so doing, it appears that the Administration is acknowledging that the sale of this hardware does bring further security problems for Israel. It is not possible for me to judge at this time whether the additional funds will prove to be sufficient to the Israelis for making whatever security adjustments they will feel are necessary to meet this new escalation and whether their currently strained economy can handle the additional debt such a proposal brings. What this does show however, is that we are now undertaking an action that could have the effect of further escalating the arms race in this volatile part of the world. I am also concerned that one result of this sale will be an adverse effect on the negotiations for a Middle East peace that have been ongoing under the Camp David Accords.

Another strong concern about this policy is that we are supposedly doing this to show the Saudis that we regard them as our friends and that we are wiling to pass a test of friendship by acceding to their request. Certainly, the ever present spectre of their oil reserves confronts us at every turn. However, I think we can legitimately raise the question of how good a friend they are to the U.S. by seeking from them some sign that they are willing to pursue actively a policy of peace in the Middle East to help stabilize the volatile situation there. To date there has been no evidence that the Saudis have ceased to support those groups desirous of destroying the State of Israel through terrorism, or that they see as a legitimate use of their power the strenghtening of the peace process which Camp David has begun. I would hope that you might receive some sign from the Saudi government in your forthcoming trip to the Middle East that they will actively change their current stance on these matters.

Finally, I would ask you to clarify for me whether the Department is also contemplating pressure on our allies to follow the same course of providing military aid to Saudi Arabia. There have been press reports in recent months, for example, that the U.S. would welcome the sale of battle tanks and other weapons systems which the Saudis are seeking from West Germany. I view with alarm the prospect of an escalating arms supply race in the Middle East, and do not believe that it is in U.S. interests actively to urge our allies to undertake such a course.

Mr. Secretary, I am firmly committed to the maintenance of traditional U.S. policy which recognizes the justifiable concerns of the state of Israel, our most reliable ally in the Middle East. I believe that this is the most effective way to assure U.S. security interests in this part of the world, and hope that our future Middle East policies will reflect a similar concern.

Sincerely,

BILL GREEN,
Member of Congress.

Mr. Speaker, I believe these decisions are escalating the tensions and the arms race in the Middle East. This sale would take unwarranted risks with the security of Israel and would only lead to further instability in this

volatile region. The Saudis did not deserve to get these planes in 1978, and there certainly is no rationale for further equipping them in 1981.

Mr. BLANCHARD. I thank the gentleman.

I now yield to the gentleman from California (Mr. LEWIS).

Mr. LEWIS. Mr. Speaker, I thank my colleague for yielding and I rise to express a very strong support for our most important ally in the Middle East, the country of Israel. I personally believe that the issue before us today may very well raise throughout the Middle East the credibility of our country.

If we have a friend in the Middle East, that consistent friend is Israel. It seems to me it is about time we began to establish a new pattern in the world of consistency where our friends know that we can be relied upon.

Mr. BLANCHARD. I thank the gentleman.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore (Mr. ANDERSON). Is there objection to the request of the gentleman from Michigan?

There was no objection.

● Mr. PHILIP M. CRANE. Mr. Speaker, I am opposed to the possible sale of advanced military equipment to Saudi Arabia. Though Saudi Arabia is a long-standing friend of the United States, and ardently anti-Communist, I do not believe that this proposed sale constitutes the proper approach to solving our regional problems. In addition to the fact that the sales will prove destabilizing in a region of great tension, a change of government might result in the seizure and use of the equipment contrary to our interests. Present U.S. capabilities, linked with improved access and basing in the region, provides the best means of countering possible increased threats.

DESTABILIZING

The offer is destabilizing because the equipment is unnecessary. Saudi Arabia does not require the degree of protection afforded by the elements of the proposed sale. The Saudis have neither the population nor the technological base to absorb such advanced equipment. Further, the capability gained may well encourage other neighboring states to acquire more sophisticated aircraft to counter the Saudis and thereby fuel an arms race that would only serve to increase already high tension in the region. Additionally, the question of Israel's security comes to mind. One nation in the region has proved itself a tried and true ally of the United States—Israel. It is this modern day Sparta which serves as a bulwark against Soviet encroachment and Communist subversion in the region. Supply of such equipment as the airborne warning and control systems (AWACS), even if not as well equipped as those aircraft used by the United States and NATO, and even if restricted from operating near Israel, constitutes an erosion of Israel's superiority. Actions by the previous administration made in the name of some ill-defined greater good have already seriously jeopardized U.S. global interests. Reversal of the U.S. position with regard to Taiwan is but one example. Can we afford to weaken an asset of such unique proportions as Israel? Most emphatically, no.

CHANGE OF GOVERNMENT

Who can forget Iran and the ascent of the Ayatollah Khomeini? Considering the demographics of Saudi Arabia and anticipating the impact of increased exposure to Western education, a revolt against the monarchy is not beyond the realm of possibility. Should the Arabian Peninsula's only kingdom fall to a radical regime pursuing policies opposed to our interests, what would become of the advanced and sensitive equipment provided to the present government? In Iran, the Soviets were able to compromise U.S. supplied electronics, missiles, and F-14 aircraft. Soviet access to U.S. equipment used in Saudi AWACS and F-15 aircraft would give them additional research and development advantage. What value is there in providing advanced equipment in a situation where its compromise will only harm our long-range interests and capabilities?

U.S. PRESENCE IS BEST DEFENSE

U.S. capabilities linked with increased access to bases in the Arabian peninsula provide the best approach to address Saudi Arabia's regional security problems. Existing intelligence capabilities allow us to monitor the situation and provide necessary assistance. Increased U.S. presence, in the form of base access or rights in Saudi Arabia, would be the ideal solution. Basing arrangements with the Persian Gulf States are also a viable solution. An American presence will stabilize the area while preserving complete control over military capabilities. If continued flights of the U.S. Air Force AWACS now operating over Saudi airspace are of significant intelligence value to America, we should conclude an arrangement to maintain those operations.

In conclusion, before we embark on the augmentation of another nation's military capabilities, it is essential that we meet three basic criteria. First, we must define U.S. foreign policy objectives. Second, we must develop a strategy to implement that policy. Finally, we must support those nations which will provide the capabilities to carry out that strategy. I must conclude that the proposed sale does not meet these three criteria and therefore it should be withdrawn.●

● Mr. GRAY. Mr. Speaker, I appreciate the opportunity to join with my colleagues on both sides of the aisle today in expressing our concern about the Reagan administration's proposal to sell highly sophisticated, offensive weaponry to Saudi Arabia.

I am concerned, Mr. Speaker, on more than one level.

First, I am concerned because the administration's action is a reversal of U.S. policy as stated when we first sold the F-15 fighter bomber to Saudi Arabia. At that time, the Carter administration, in consultation with the Congress, determined that the F-15's would not be outfitted then or in the future with the sophisticated offensive tools which the Reagan administration now seeks to provide.

It would appear to me that the proposal to sell advanced missiles, bomb racks, an aerial refueling capacity, and the Airborne Warning and Control Systems (AWACS) completely reverses the established policies reached 3 years ago. Such a reversal might very well prove detrimental not only to the security of the State of Israel, but to the general stability of the entire Middle East.

Second, I am concerned because I fear that this proposal is born from the regrettable tendency on the part of the new administration to view foreign policy issues within the context of the East-West conflict. The end result is that we are pouring more and more cargoes of sophisticated weapons into this and other regions of the world, at a time when international rhetoric is becoming increasingly strident, and when such arms can be seen as only a challenge to peace.

Third, Mr. Speaker, I am concerned because although I recognize the administration's claim that this upgrading of the F-15's is necessary to maintain the friendship of Saudi Arabia, we have yet to secure an adequate answer from the administration as to what we are getting in return for this sale.

Are we getting a huge reduction in the price we pay for foreign oil? Are we getting assistance for U.S. peace efforts in the Middle East? Are we getting assistance in combatting international terrorism? Are we getting an end to the call for a royal war, or jihad, against the nation of Israel?

No, Mr. Speaker, I fear that at this time we are getting none of these, and I would suggest to the administration that friendship is a two-way street. It is based on some sort of mutuality which we must continue to build between our two Governments and people.

Whatever the immediate benefits might be, Mr. Speaker, in terms of improved relations with Saudi Arabia,

they will be no bargain for the United States unless we get some positive answers to these questions.

And certainly, Mr. Speaker, they will be no bargain if such alleged benefits come at the expense of Israel's military or economic security.●

● Mr. MARKEY. Mr. Speaker, I would like to join my colleagues in opposition to the sale of military equipment for the 62 F-15 fighter planes in Saudi Arabia. Much has been said about this issue in the past weeks, and I would like to highlight some additional considerations.

The sale of AIM-9L missiles, conformal fuel tanks, AWACS, and aerial refueling tankers is unwise from a foreign policy perspective. F-15's are highly sophisticated fighter planes and pose a serious threat to the State of Israel. The U.S. commitment to Israel cannot be compromised. Though the Saudis are a relatively moderate state in a region of extreme instability, their position vis-a-vis Israel should trouble us all. The Saudis have actively supported the Palestine Liberation Organization, a terrorist group that plays no constructive role in the Middle East peace process. The Saudis have opposed the Camp David accords. The Saudis, only last month, called for a holy war, or Jihad, against the State of Israel. I recognize the need to maintain cordial relations with the Saudis, but these trends disturb me. We should not get caught again in the same predicament we faced when the Shah fell. At that time, the Ayatollah Khomeni used our military equipment contrary to our own security interests.

I would also like to bring to your attention an illuminating section of a recent Washington Post open letter by Hobart Rowen.

* * * the shrewd Yamani told his Arab questioner that the Saudis, with huge reserves, must approach things differently, maintaining moderate prices along with a good supply so that the West won't be driven too quickly into developing oil substitutes. Their policy is based on no special consideration of, or love for, the United States. Rather, it involves a search for a price high enough to reflect "the true price of oil," Yamani said, but not so high as to cause a rush of energy research and investment that might knock the Saudis out of the oil business too soon.

The conclusions of this article are telling. Clearly, the sale of F-15 equipment will not bring further oil pricing concessions from the Saudis beyond their limited self-interest in keeping the price of oil low. It is folly to conduct our foreign policy on the basis of our voracious need for OPEC oil. We need to get conservation on the fast track. We need to develop alternative energy sources now. We cannot wait until Sheik Yamani or his successor raises oil prices once again.

The implications of this sale are far reaching and unfortunate. By such a sale, the United States is sacrificing the security of Israel for illusory gains.●

● Mr. McHUGH. Mr. Speaker, I would like to commend my colleagues who are participating in this discussion of the Reagan administration's decision to sell additional equipment to Saudi Arabia that will enhance its F-15's, and to reiterate my strong opposition to the decision.

There are many reasons for opposing this sale, Mr. Speaker, some of which have already been mentioned. However, there are three reasons for opposing the decision that seem especially compelling to me.

First, as my colleagues will recall, the original decision to sell F-15's to Saudi Arabia in 1978 was only made after extended discussion and debate. I opposed selling F-15's to Saudi Arabia at that time, and I was disappointed that the Senate voted against rejecting the proposed sale. However, important concessions were made by the Carter administration during the course of that debate. Secretary of Defense Brown gave a particularly significant assurance at that time:

Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F-15.

Unfortunately, these assurances have now been abandoned by the Reagan administration. The fuel and sensor tactical (FAST) packs that it is proposing to sell to Saudi Arabia will increase the range of the F-15's significantly, and the new Sidewinder missile which it is proposing to sell, the AIM 9-L, will provide these aircraft with an enhanced attack capability.

In short, the proposed sale would increase the range and firepower of the F-15's that we have previously agreed to sell Saudi Arabia, and will thus increase the danger they pose to Israel. It is very regrettable that the Reagan administration has chosen to ignore previous assurances given to Congress and, at least implicitly, to Israel. The credibility of our word as a nation should not be breached except in the most extraordinary of circumstances, and I see nothing that would justify it in this case.

Second, I am opposed to this sale because of the inherent instability of most Arab governments in the Middle East, including the Government of Saudi Arabia. As we have seen in the past, arms that are provided to unstable governments sometimes fall into the wrong hands. In this connection, the example of El Salvador comes to mind. The Reagan administration has expressed serious concern about the infiltration of arms to leftist guerrillas in El Salvador from countries such as Vietnam and Ethiopia. Yet, most of these arms are of American origin. They were supplied by us originally to unstable governments in Ethiopia and Vietnam, and they are now being used against a government that we support in El Salvador.

Although the United States has an interest in promoting good relations with the present Government of Saudi Arabia, we have no assurances that it will survive over the long term. As the seizure of the Grand Mosque in Mecca last year suggests, there is some popular resentment against the present government. Thus, it is conceivable that these weapons will fall into the hands of a future regime that may prove far more radical and dangerous to Western interests.

Finally, this sale does nothing to serve the cause of peace in the Middle East. It simply continues a massive arms buildup that has been going on for many years in this tense region. This is a dangerous policy, Mr. Speaker, as the Government of Israel itself has noted.

The Reagan administration has agreed to provide additional arms to Israel in order to encourage its tolerance of the proposed sale to Saudi Arabia. As Foreign Minister Yitzhak Shamir has pointed out, however, this does not really represent a solution:

The President, the Secretary of State and the Secretary of Defense believe that it is possible to redress the damage by supplying weapons systems to Israel under special conditions. To our regret, we must state that we do not see this as a solution, or as a way out.

The state of Israel will not be able—even from the economic point of veiw—to withstand such an arms race.

Mr. Shamir deplored what he called a massive flow of all types of weapons, including the most advanced, into this region from every possible source: the United States, the Soviet Union, and the European countries. These massive quantities of weapons do not strengthen the West in this region; they do not serve any positive purpose, but they do jeopardize peace and endanger Israel.

In short, the proposed sale does not reflect a creative policy designed to resolve the fundamental underlying problems of the region. Instead, it reflects a continuation of a tired policy of attempting to purchase friendship in the region through the sale of arms. Yet, as we have seen most recently in Iran, any short-term advantages of this massive arms buildup is likely to be transitory.

For these three reasons alone, Mr. Speaker, it is clear to me that the proposed sale is a mistake, and I would hope that both the Senate and the House will pass resolutions disapproving the sale.●

● Mr. WALGREN. Mr. Speaker, I want to express my deep concern about the Reagan administration's intention to sell certain military equipment to Saudi Arabia. The equipment

in question would greatly enhance the offensive capability of the F-15 aircraft sold to the Saudis in 1978 and the military threat faced by Israel on a number of fronts.

Both the Israelis and the Saudis are our friends, and they deserve our support to safeguard their mutual defense. But there is a great danger that blindly supplying weapons to antagonistic neighbors will result in war and destruction between our friends.

I have serious unresolved doubts about the wisdom of the Reagan administration's proposed sale. We must do all we can to lessen instability in this region, and I fear this sale will add to that instability by making it easier for armed conflict among countries that are considered our friends.

Mr. Speaker, as a Member of Congress who has long expressed misgivings about the advisability of introducing military weapons into political, religious, and economic conflict, I hope we examine this proposed sale with special care.●

● Mr. LEHMAN. Mr. Speaker, the proposed sale of offensive accessories for F-15 fighters and of AWAC's, in particular, to Saudi Arabia raises grave doubts about the security of Israel. It is essential that Israel maintain a strong defense capability. I believe that we must reassess the terms of our foreign military credit sales program to Israel, and have testified to that effect before the House Foreign Affairs Subcommittee on Europe and the Middle East, chaired by my friend and colleague from Indiana, the Honorable LEE HAMILTON. The text of my statement follows:

STATEMENT BY HON. WILLIAM LEHMAN

Mr. Chairman, I appreciate the opportunity to testify before you today for the purpose of expressing my views on the Administration's 1982 foreign assistance requests.

The Foreign Operations Subcommittee of Appropriations, of which I am a member, will later have the responsibility for appropriating the economic and military portion of our aid to Israel and other countries in the Middle East, and will have to do so in the context of the changing regional balance of power in that part of the world.

The intensified arms flow from the United States and elsewhere into the region is cause for great concern. I refer to the recent arms sales to Jordan, and the proposed sale of offensive enhancements for F-15 fighters, and of Airborne Warning and Control System planes to Saudi Arabia. These sophisticated U.S. weapons, with the continuing flow of arms from Europe and the Soviet Union to other nations hostile not only to Israel, but to the best interests of the United States, creates further instability in the Middle East and invites the erosion of the qualitative edge that has been Israel's necessity.

In view of this situation, a realistic adjustment to our foreign military credit sales program for Israel is essential.

Under the foreign military credit sales program, the United States has traditionally offered to Israel a 50% grant. The amount forgiven in past years—$500 million—represented one-half the usual $1 billion in FMS credits. Retaining the 50% grant formula in the Administration's fiscal year 1982 request of $1.4 billion would raise the grant portion to $700 million and provide an additional $200 million. This would not necessitate any increase in the overall FMS level.

In addition to continuing the 50% formula that has been a part of the military aid to Israel in recent years, I urge the Subcommittee to authorize the remaining $700 million non-grant portion in such a way that Israel would receive $400 million as a direct credit loan, and $300 million in off-budget financing through the Federal Financing Bank. The direct loan would then be handled in a similar manner to the budget authority that has been proposed for Egypt.

By taking drastic measures to reduce its own defense expenditures, Israel has demonstrated a willingness to reduce its military preparedness in accord with the peace treaty with Egypt. The introduction of a new class of weaponry into its immediate region will, however, require that Israel reassess its security needs. The improved terms I have suggested will give Israel the chance to maintain its austere monetary policies and still adequately provide for its defense.

Israel continues to give attention to economic stabilization. As a result of eliminating subsidies on basic necessities, imposing a government job freeze, and other restrictive measures, Israel has for the first time in five years, experienced a four to five per cent increase in per capital growth in 1980. In light of these factors, I believe that a degree of economic relief is well earned. It would also serve as a reaffirmation of congressional support for the measures which Israel must take to face its security risks. I would hope that the increased grant that Secretary of State Haig has offered Israel will at least meet the figures I have suggested.

Our support is not a one-way benefit. The strategic importance of Israel to the United States is a fact. Israel is a proven ally, the only democratic nation in the Middle East, and a nation not subject to violent or fanatic revolution.

In terms of the Soviet threat, Israel is our linchpin against Soviet expansion in the region. When Israel becomes militarily vulnerable, the Soviet threat to the Persian Gulf will be strengthened. Until we are able to have a conventional military presence in the Mideast, Persian oil will, ironically, depend upon maintaining the regional security and stability that Israel is best able to provide. The supply of weapons to the Saudis can be a repetition of what happened to our arms to Iran, where now we have neither friends nor the weapons that were to protect our own national interests.

A clear overall U.S. policy toward the Middle East and Persian Gulf would help us all to better address the issues before us. To impose a serious threat to Israel's defense without putting forth any coherent objectives promotes policies contrary to our own best interests.

Supplying F-15 enhancements and AWACS to the Saudis, in terms of U.S. interests, raises grave doubts regarding the Middle East regional balance of power. The request for improved FMS terms for Israel does not remove these concerns but is a necessary measure to support our proven friends and to reduce the risks to our nation's vital interests.●

● Mr. KILDEE. Mr. Speaker, I would like to join my colleagues in expressing my opposition to the sale of FAST packs and AIM 9L's to Saudi Arabia for their F-15's. As has been previously mentioned, there are serious issues involved. I question the necessity of the sale, and I would point out that it can only introduce a further element of insecurity into the Middle East.

I question the necessity of doubling the range of the F-15's. How will that increase the defense capabilities of Saudi Arabia? Is it not more likely that the new capability will be directed externally rather than being used for defense? I would point out that, if nothing else, the increased range will cause grave concern for Israel's military planners. Increasing military aid to Israel cannot possibly counter the feeling of insecurity inherent with the upgrading of Saudi Arabia's F-15's. An escalation of weapons sophistication of both sides of the equation can only contribute to increased tensions and a further destabilization of the situation in the Middle East.

I would also like to bring attention to the fact that the executive branch is going back on a written commitment that was made to the Congress only 3 years ago. At that time, the executive branch assured us that the very equipment that we are talking about today would not be given to the Saudis. The original sale of the F-15's would have been disapproved without those assurances. I personally feel that such a commitment is just as important as any commitment made to our allies. If the executive branch finds it inconvenient to honor commitments made to our own legislative branch, who is to say that it will not renege on commitments made to foreign governments.

This action is indicative of a deeper, systemic problem. The attitude of some of those who make our foreign policy can only be characterized as condescending. They think that the Congress is a superfluous, often bothersome, adjunct to their role. I would hasten to remind them that we have a role defined by the Constitution. We are elected to serve as the voice of the people. Democracy protects us from the abuses of basic rights. Our country was founded on the principle that we would be governed by what the majority felt was in the national interest. I condemn an attitude that says we cannot trust the majority and their elected representatives.

I now wonder what the next request will be 3 years from now. Could it be multiple ejection bomb racks for the F-15's? How would Israel counter such an escalation? We have a strong commitment to the security of Israel. In 1978, I felt that we were compromising that commitment. I feel the same way today and see the possiblity of further

compromises in the future. It is unlikely to happen all at one time but through the type of incrementalism we see today.●

● Mr. DONNELLY. Mr. Speaker, I have grave doubts about the Reagan administration's decision to sell conformal fuel tanks and Sidewinder air-to-air missiles to complement the F-15 strike eagles the Carter administration agreed to sell to the Saudis in 1978.

I believe that such a policy can result in potential disaster for the Saudis, our ally Israel, and the United States. Let me explain my misgivings in this regard.

The royal family in Saudi Arabia face many uncertainties in the years ahead. While blessed with vast petroleum reserves, the Saudi nation suffers persistent tremors of instability. Islamic revivalism, regional in-fighting, and a large contingent of foreign workers on its soil, are reminders of this troubling instability in the Saudi nation. In this context, I suggest most strongly that it is unwise to introduce some of our Nation's most advanced weapon systems into this scenario.

We cannot lose sight of Israel's security as we review the administration's proposal. The ties of religion, culture, and shared history that bind our two nations together must not be dismissed by short-range policy decisions. The Israelis have every right to be concerned with the proposed sale. The fuel tanks for the F-15's give this most sophisticated fighter aircraft in the world an increased range of 1,000 miles. The Sidewinder missiles are also state-of-the-art systems that upset the existing strategic equation in the Middle East and Persian Gulf. We must be sensitive to how such a sale is perceived by other nations, both allies and adversaries. Rumors that the administration is actively considering the sale of air warning and control (AWAC) aircraft to the Riyadh regime inspire even greater concern and apprehension.

These planes, as presently configured in the NATO and U.S. forces, have the potential to pinpoint Israel's troop locations and aircraft paths, thereby effectively degrading the effectiveness of these essential components of Israel's defenses. Even if Saudi Arabia itself did not use such data for malicious purposes, it is not outside the realm of possibility that another nation or political entity could obtain such strategic information by surreptitious means. In such an unpleasant situation, Israel would have legitimate justification to respond with full military force to preempt any such mission hostile to Israel's survival.

It is not in our country's interests to meet the Saudis request for offensive armament for the F-15's already promised. There are more constructive means to further our relationship with the Riyadh regime than by providing sophisticated weapon systems. The proposed sale may harm that relationship if it serves as catalyst for greater instability in that nation and surrounding region.

We must not jeopardize the security of our faithful ally Israel with such a near-sighted policy. On this, the Congress must stand strong and resolute.●

● Mr. STARK. Mr. Speaker, I appreciate this opportunity to express my opposition to the proposed sale of F-15 offensive equipment and Airborne Warning and Control System (AWACS) aircraft to Saudi Arabia.

It seems that the Reagan administration has been lulled, like the Carter administration, into believing that arming Saudi Arabia to the teeth will enchance regional stability and cement our friendship with a valuable oil producer. One has only to look at the history of our involvement with Iran to see that this policy is ill-advised and ultimately detrimental to our national security.

Before approving any type of arms sale to Saudi Arabia, we must ask: Will this equipment enhance the security of Saudi Arabia and the Middle East?

It is painfully obvious that the proposed sale of F-15 equipment and AWACS aircraft will do neither. While it is possible that Saudi Arabia might be threatened by South Yemen, Iran, Syria, or Libya, its present arsenal is adequate to protect against any such attack. In the face of a broad-based attack by the U.S.S.R. all the military equipment in the Middle East would not save the Saudis; the nation would be dependent on the Western powers for protection.

One thing is clear—the offensively equipped F-15's and the AWACS aircraft could be used to attack Israel. The sale of fuel equipment for the F-15's would permit Saudi aircraft to operate out of any base in Saudi Arabia against any target in Israel. The AWACS aircraft, which far surpasses any warning and control system in Israel's arsenal, would permit a sophisticated, coordinated air attack on Israel by Jordanian, Syrian, or Saudi aircraft. Saudi AWACS deployed well within Saudi air space could conduct surveillance on all of Israel.

I do not believe we should risk the security and confidence of Israel, and the stability of the Middle East, in return for the short-lived good will of Saudi Arabia. If Saudi Arabia is truly willing to enhance regional stability and cement its friendship with the West, then Saudi Arabia must show some good will in return—perhaps in the form of support for the Camp David agreements and more reasonable OPEC pricing policies. Until these things occur, Saudi Arabia should not even be considered as a purchaser of advanced F-15 equipment and AWACS aircraft.●

● Mr. ALBOSTA. Mr. Speaker, I rise today concerning the Reagan administration's plans to sell Saudi Arabia conformal fuel tanks and Sidewinder air-to-air missiles for the 60 F-15 fighter aircraft the Saudis ordered from America 2 years ago, and, secondly, concerning reports of late that the administration is planning to sell advanced AWAC aircraft to the Saudis.

My point, briefly stated, is this: Either sale would be contrary to the best interest of all parties; America, Israel, and Saudi Arabia. Not only will the sales fail to increase the security of either Middle East country, but they are likely to lead to greater instability in the region.

The new material being sought by the Saudis and contemplated by the Reagan administration should be balanced not only against its risk to world stability, but against our long-standing friendship with Israel, which is still the only stable democracy in the Middle East.

Mr. Speaker, how can this country, the one that sponsored the Camp David accords, be a party to such a sale?●

● Mr. COUGHLIN. Mr. Speaker, I must reluctantly but firmly take exception to the suggested sale of sophisticated new offensive equipment to Saudi Arabia for its F-15 fighter-bombers. Selling enhanced fuel-carrying tanks and advanced Sidewinder air-to-air missiles for the Saudi fighter-bombers is asking for trouble.

In short, the argument against these sales is basic and sound. The United States has and should continue to provide Saudi Arabia with arms it requires for defense. It should not supply equipment the primary purpose of which is offense, not defense.

In 1978, the Congress and the Israeli Government were assured in writing by the executive branch that the sale of F-15's to Saudi Arabia would not be followed by the sale of offensive systems now in question.

If time and circumstances conspire to negate written assurances—so be it. But let it be for good and compelling reasons. In this instance, however, time and circumstances conspire to warn us that now more than ever it is imperative that we keep this written commitment.

Providing the most advanced version of our Sidewinder air-to-air missile, in concert with the conformal fuel tanks, would make the Saudis' F-15's into formidable offensive weapons. If we are concerned with the Saudis' defensive capabilities, I am certain there are other missiles which can be considered—sold, of course, without the enhanced fuel-carrying capabilities.

I fear we are going off into a new and dangerous direction by this approach. Have we already forgotten the lesson of Iran? Here, supposedly was a

stable country, a nation considered our friend, with a ruler who was being supplied with sophisticated weaponry—some of it much too sophisticated as a matter of fact. Where is that equipment now?

Of course, the Saudis are our friends and our allies in the Middle East. I am disappointed, however, that the Saudis are the ones who, and I use the word guardedly, warned us not to fill our strategic petroleum reserve. I am disappointed that the Saudis, in trying to play the good guy role in the Middle East, have been less than forthcoming in the entire matter of oil pricing and their own specific interests in the actions of the oil monopoly.

If the Saudis really are our friends, they will recognize—however reluctantly—that they are far better off without these new and dangerous offensive weapons. They will realize that the United States, regardless of the administration in office, is still their best friend. They will understand that the Soviet Union will use every pretext, such as the introduction of offensive weapons, to undermine the Saudi Government and promote a puppet regime.

In the final analysis, there is a cardinal rule that too many nations in the world have learned is only too true: Do not give the Russian Bear any excuse or pretext for it to hug you. It is a deadly embrace you never escape.●

● Mr. LANTOS. Mr. Speaker, the time has come to put aside once and for all the illusion that we can enhance our national security by selling our most secret military equipment to the same OPEC nations whose exorbitant oil prices pose a constant threat to our economy.

The most recent and ill-considered such proposal is for the sale of four AWACS radar and command planes to the Government of Saudi Arabia. The AWACS are America's most advanced and sophisticated non-nuclear weapons system. The AWACS radar can detect any airplane within 250 miles, and the AWACS powerful computers can track and display information on the size, altitude, identity, speed, and direction of 240 planes. The AWACS can be equipped with a variety of top-secret devices for enciphering transmissions, signal intelligence, and electronic countermeasures. The Soviet Union has no equivalent aircraft. Our NATO forces will only receive their first AWACS this year, and it will be several years before all the AWACS scheduled for deployment in the United States can be completed and put into operation.

The technological edge that can be provided by the AWACS will be critical to our conventional forces in the years immediately ahead. NATO troops in Europe and outnumbered and outgunned by the Warsaw Pact. The AWACS give us the ability to compensate in part for these disadvantages by maintaining control of the air in the event of war. But the AWACS can only play this vital role in deterring Soviet forces if its technology remains secret. Should the AWACS security be compromised, the value of the plane, and the enormous amount of money we have invested in its development, would be largely lost.

That is precisely the danger posed by the planned sale of AWACS to Saudi Arabia. This sale would place both the planes and the training manuals for their top secret equipment in the hands of a government whose long-term stability and allegiance to the West is at best uncertain. In fact, the Saudis have in the past threatened to turn to the Soviet Union for assistance if their demands for American weapons were not met.

Several years ago a number of my colleagues warned against selling F-14's and Phoenix missiles to Iran. Then, as now, the State Department and Defense Department assured the Congress that the buyer was a reliable and secure ally. Within 30 months, however, the Shah had fallen, and the training manuals for these advanced systems, and possibly the weapons themselves, were compromised. The last administration also agreed to sell AWACS to Iran; fortunately for the United States we learned how mistaken this decision was before the planes were actually delivered.

The General Accounting Office has warned:

> If the Soviets should gain access to the AWACS they could move ahead, in the opinion of the Director of Central Intelligence, some five to seven years in certain technologies. More immediately they could learn how to jam any now contemplated AWACS technologies.

That is a chance we cannot afford to take.

Our continuing failure to deal effectively with the energy crisis has made the stability of Saudi oil supplies, and thus the stability of the Saudi Government, of importance to the United States and the West. But the disastrous recent history of our relations with Iran demonstrates beyond dispute that the acquisition of modern weaponry does little if anything to strengthen such regimes. An AWACS flying at 30,000 feet will not be able to warn the Saudi Government about Moslem fundamentalism or unrest in the oilfields. Neither conformal fuel tanks for their F-15's nor aerial tankers will extend the ability or willingness of the Saudis to eliminate the corruption that pervades their country. Sidewinder missiles would be of no value in defending the Grand Mosque from another takeover by Moslem fanatics. The greatest threat to the Saudi Government and to the continued production of Saudi oil is and will remain internal unrest and subversion. These dangers are very real, but Star Wars technology is not going to solve the social and religious problems of a basically feudal society.

This sale also poses a grave and warranted threat to the security of Israel and to the stability of the already turbulent Middle East. Israel itself has neither planes nor ground-based radar capacity comparable to the AWACS. A single AWACS flying 50 miles inside Saudi Arabia could detect and track every plane flying in Israeli airspace, and could coordinate airstrikes against civilian or military targets in Israel by Syrian or other hostile Arab forces. During the Vietnam war the use of an unsophisticated airborne command center increased the kill ratio of American war planes by 500 percent. A similar increase in the effectiveness of attacking Arab Air Force would be disastrous for Israel. Had the Saudis had an AWACS in 1976, they could have alerted the Palestinian terrorists at Entebbe and prevented the heroic Israeli rescue of the hostages being held there.

I call on the administration to reject, as contrary to American national interest, this latest Saudi demand for offensive weapons.●

● Ms. FIEDLER. Mr. Speaker, the proposed sale of enhanced equipment for F-15 fighter planes to Saudi Arabia would be the wrong weapons, going to the wrong nation, at the wrong time. I would like to stress my strong opposition to an arms sale that is both against U.S. interests in the Middle East and threatens the security of the State of Israel.

Saudi Arabia is a most stubborn opponent of the Camp David accords and has opposed U.S. efforts to being peace to the Middle East. Saudi Arabia has devoted itself to the elimination of Israel since 1948. Saudi Arabian forces have fought against Israel in the many wars in the Middle East. The effect of the sale of this equipment—long-range fuel tanks and long-range air-to-air guided missiles—seems to suggest that the attitudes of Saudi Arabia toward Israel have not changed and that this new equipment may well be used to carry out the same old anti-Israeli aims.

Administration spokesmen have indicated that several E-3A AWACS or E-2C Hawkeye airborne radar and command centers may be added to the sale of F-15 equipment. This would further compound the threat to Israel. Even if all these weapons and aircraft are not used in battle against Israel, the very fact of their existence in the Middle East will force the Israelis to purchase and maintain military equipment to guard against this new Saudi threat. Because of the sophisticated nature of the equipment being offered to Saudi Arabia, it will be expensive for Israel to counter it, further strain-

ing the already troubled Israeli economy. This is a most unfair reward for the risks the Israelis have already taken for the cause of a just and lasting peace in the Middle East.

We cannot say that these weapons will not be used against our friends in Israel. We cannot say that these aircraft will not be transferred to another nation in the future, for in the past, U.S.-designed aircraft have been passed from air force to air force in the Islamic world with barely a change of paint, despite their sales agreements having the same no resale provision as will cover the proposed sale. We cannot say there is no chance these weapons will not be used against U.S. interests or forces—the example of the billions of dollars of sophisticated weapons sold to Iran stands out as a lesson. Above all, we surely cannot say that the sale of this equipment will bring stability and security to the Middle East. That is an illusion, and a most dangerous illusion at that.●

● Mr. BRODHEAD. Mr. Speaker, I join with many of my colleagues in opposition to the administration's planned sale of offensive F-15 weaponry and AWACS to Saudi Arabia. This sale will jeopardize the security of Israel and I feel that there is a serious question whether it is in the strategic interests of the United States.

We need only look at the situation in Iran to see the possible consequences of providing this advanced equipment to Saudi Arabia. The sophisticated planes and missiles we sold to the Shah are now in the hands of the Ayatollah Khomeini. In fact, it is ironic that the previous administration originally recommended selling AWACS to Iran but was dissuaded from doing so by congressional opposition. It is no secret that the Saudi Government is of questionable stability, and if it falls, the weaponry we have sold will be in the hands of people hostile to our country and to Israel. In a region as vital to U.S. interests as the Mideast, we can ill afford to face another unfriendly government, especially one possessing some of the most advanced arms available in the world today.

The sale is being promoted as a means of allowing the Saudis to defend themselves against aggression. Yet the weapons already sold to the Saudis are more than sufficient to permit them to resist attack from other nations in the region, and who could seriously believe that the Saudis would be able to defend themselves against direct aggression from the Soviet Union? However, the new equipment will make Saudi Arabia an offensive power, and in particular will enhance its ability to attack Israel. In fact, AWACS will put every plane in Israel within the scope of Saudi radar, and would make it possible for the Saudis to coordinate air attacks against Israel by Syria, Jordan, and Iraq. It is within Congress' power to prevent this scenario from developing, and we should do so.

In 1978, when the previous administration requested and obtained permission to sell F-15's to Saudi Arabia, Congress approved the sale on the basis of assurances that the offensive equipment now in question would not be provided. It seems to me that the same wisdom which led Congress to insist upon those assurances should guide us in our consideration of the current request. If anything, opposition to this request should be stronger because of the addition of AWACS. I hope that the Foreign Affairs Committee will move swiftly to report a resolution disapproving this sale once it is formalized, and I will look forward to strongly supporting such a measure when this matter comes again before the House.●

● Ms. FERRARO. Mr. Speaker, the Reagan administration is seriously considering the sale of advanced AWAC—airborne warning and control—aircraft to Saudi Arabia. Such a move, especially following on the heels of the administration's decision, announced March 6, to sell the Saudis air-to-air missiles for the 60 F-15's they have ordered from the United States, would pose a grave threat to Israeli security, the stability of the volatile region, and our own interests in the Middle East.

The fall of the Shah of Iran should have taught us the dangers of overarming nations threatened more by internal discontent than external aggression. For years we supplied advanced weapons to Iran on the theory that the sales would strengthen Iran and thereby stabilize the region. That policy failed because it was not accompanied by adequate and timely recognition of political realities.

Lest we have a similar fate befall Saudi Arabia, careful precautions must be taken. We should not even consider selling more advanced weapons like Sidewinder missiles or the AWACS without first getting Saudi agreement to cooperate in bringing peace to the region. Specifically, the Saudis must terminate all support, financial and political, for the PLO's terrorist activities, and they must withdraw their opposition to the Camp David peace process.

In an editorial published today, the New York Times expresses the view that in return for any weapons sales, the United States should get from the Saudis diplomatic efforts to legitimize Arab negotiations with Israel. As the Times points out, any attempt "to contain Soviet influence in the Middle East" will require cooperation between Israel and Saudi Arabia. The Saudis must make clear their willingness to reach an accommodation with the Israelis if we are to bring stability to the Middle East.

Following is the full text of today's Times editorial. I commend it highly to my colleagues:

[From the New York Times, Apr. 7, 1981]

DRIVE A BARGAIN WITH THE SAUDIS

By persuading President Sadat to let a thousand American troops join a peacekeeping force in the Sinai Peninsula, Secretary of State Haig has assured the survival of the Camp David accords and reaffirmed American sponsorship of the Israeli-Egyptian entente. Thus he reaches Saudi Arabia this morning as a protector of Israel as well as a suitor for oil. It is time to insist that the Saudis end their scornful treatment of Camp David as part of a wider diplomatic bargain that justifies their purchase of ever more sophisticated American weapons.

The Saudis contend that their growing economic and military ties to the United States represent only an anti-Soviet alignment. But in making their air force dependent upon American supplies and training, they are in fact contributing to American influence in the region and thus to the security of Egypt and Israel. The sooner they own up to that reality, and drop even the pretense of a "holy war" against Israel, the smoother will be their American connection. It is hard to believe that the Saudis' diplomatic doubletalk still fools any Palestinians, thus protecting the House of Saud against subversion or revolt. Indeed, if the Saudi monarchy cannot survive open accommodation with Israel, it is hardly a safe depository for all that dangerous hardware.

A few honest words from the Saudis would certainly improve the Reagan Administration's case for the proposed arms sales. Mr. Haig's explanations so far have been extremely vague. His expressed regard for President Carter's "commitments" would be touching if he had not enthusiastically kicked over so many other diplomatic traces.

The fact is that he, too, is eager to give the Saudis almost anything they want—missiles and fuel tanks to extend the reach of the promised F-15 fighters and now the Awacs electronic surveillance aircraft that can spy over the entire region. He wants Congress to approve these sales for the bonds they may create with the Saudi military and for the basing rights that may evolve for American forces.

What Congress should also want in return is a Saudi diplomacy that legitimizes Arab negotiation with Israel. The Saudis should be encouraged to continue to mediate regional disputes, as in their defense of Jordan against Syria last year. They have a role in the effort to restore effective government in Lebanon. And they need to contribute more to international aid programs that help poor nations struggling to pay for oil.

The Israelis resent the buildup of Saudi power, but not because they cannot defend against it. What frightens them most is the Western rush to appease the Saudis' oil wealth. An Israel afraid of diplomatic isolation will not in the end negotiate generously with even the most moderate Arabs. If Mr. Haig aims to contain Soviet influence in the Middle East, he needs allies who will at least speak to each other.●

● Mr. LUKEN. Mr. Speaker, I find the sale of the supplemental equipment for the F-15 plane to the Saudis even more objectionable now than I did when the sale was originally an-

nounced by the previous administration. This action does not promise this country nor the people of the Mideast any hope that we are closer to peace for that troubled region.

My opposition to this action is based on large part on the effects this will have on Israel. We should never forget that to this day, Israel is still the only democracy in that region of the world, even as it experiences another election for the stewardship of that country. Israel is a strategic asset to the United States and through the years has been the only country that has demonstrated steadfast support for our policies in the Mideast and throughout the world. The sale of the supplemental equipment to the Saudis presents Israel with ominous prospects for its security and therefore the security of the U.S. interests in that region as well.

We should never forget that the original sale of the F-15's to Saudi Arabia was agreed to by the Senate only after the previous administration had promised that the supplemental equipment would not be sold. Now we are confronted with this new request. It is inevitable that we must ask ourselves, what are the corresponding actions by the Saudis to further the cause for peace in the Mideast. Have the Saudis agreed to halt support for terrorism, in particular the support for the PLO? Has Saudi Arabia agreed to support the establishment of U.S. military bases in the Persian Gulf area? Finally, have the Saudis given any indication that they are willing to support or explore the paths to peace presented to all in the Camp David accords? In each case, Mr. Speaker, we can only answer no. Regretfully, we are faced with the situation of providing to the Saudi Government additional military equipment, with no promise of actions to be taken by Saudi Arabia to further the cause of peace.

I am, moreover, truly dismayed to learn that the Reagan administration is now favorably considering the sale of the AWACS, the airborne warning and control system airplane. This is a highly sophisticated and guarded part of our military arsenal. Clearly, in the event of armed conflict these AWACS would make it extremely difficult for Israel to prepare or fight without its enemies enjoying a significant tactical advantage. This action poses a new danger for Israel's existence and an unnecessary danger for the security of the United States.

It is the combination, the package, of these two projected actions of the administration, which would, together pose a threat to the security of both Israel and the United States, and would be a grave threat to world peace.

I would also like to include in my remarks a letter sent by the Jewish Community Relations Council of Cincinnati to President Reagan on this subject. I fully agree with the concerns expressed in this very eloquent letter:

JEWISH COMMUNITY RELATIONS
COUNCIL OF CINCINNATI.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On behalf of the Jewish Community Relations Council of Cincinnati, we urge you to recognize the grave consequences of the proposed sale of supplemental equipment to be used by Saudi Arabia on its F-15 warplanes.

American credibility is at the very core of the Middle East peace process. The pledge by the previous Administration to the Senate not to supply offensive equipment for the Saudi F-15s must be upheld, if American commitment is to have any meaning whatsoever.

Moreover, such a sale to the Saudis will in no way diminish the internal security problems of the Saudis, nor will it effectively enable Saudi Arabia to defeat a Soviet threat; will tend to escalate the existing tensions in the Arab-Israeli conflict, adding to a destabilization in the Middle East; will contribute to a runaway arms race in the area; and will tend to alter the regional military balance of power.

We ask that you consider thoroughly the effect of this arms sale upon our only democratic ally in the Middle East, the State of Israel. Not only will this sale produce disastrous economic consequences for Israel but, more importantly, it will jeopardize her already tenuous security. By weakening Israel we only strengthen the Soviet hand.

In closing, we ask that you examine the propriety of providing the aforementioned weaponry to a country who has called for a Holy War against Israel; financially supports international terrorism; and who, to date, has rejected the Camp David peace process. In our eyes, nothing that Saudi Arabia does can in any way be helpful to American security.

Very truly yours,

MALCOLM BERNSTEIN.●

● Mr. WAXMAN. Mr. Speaker, in the next few days, President Reagan will ask Congress to approve the sale of enhanced equipment—fuel tanks and air-to-air missiles—for the 62 F-15's we provided Saudi Arabia in 1978. If approved, this sale would only compound the error we made them to acquiesce in Saudi demands for American military equipment in the absence of any commitment on their part to serve our political, economic, and strategic interests. Once again, we find ourselves held hostage over Arab oil, prevented from exercising our best judgment on an issue of fundamental importance. On this basis alone, the sale should be rejected.

A careful evaluation of every other consideration leads to the same conclusion. In and of themselves, without this new equipment, the F-15's already destined for Saudi Arabia pose a strategic threat to Israel's security. Saudi Arabia has participated in four Arab wars of aggression against Israel's survival. There is no reason to believe the F-15's will not, in the next war, be used against the Israeli Air Force.

In 1978, the Carter administration made explicit and—to this moment—binding assurances to Congress that this very equipment, which increases the lethal capabilities of the F-15's, would not be made available to the Saudis. This pledge was made precisely because such weapons would seriously erode the margin of superiority Israel must have to win the next war.

The violation of this pledge also calls into doubt American credibility and honor. Nowhere in the world are our words and intentions more important. By reversing our position on this key issue, the Reagan administration has compromised the value of our commitments to other nations.

There are other disturbing factors in this proposed arms sale. To further augment Saudi defenses, the administration may provide that country with advanced radar and surveillance equipment, such as AWACS. American pilots have, since the outbreak of the Iran-Iraq war, flown AWACS on behalf of the Saudis to alert them to any threats to their country. Should this equipment be placed in the hands of the Saudis alone, it could easily be used to monitor all of Israel's defense activities. Nothing could be more dangerous.

To compensate for these concerns, the administration intends to sell Israel additional F-15's, and to give Israel some additional capability, as yet undefined, to detect any strategic threat from the Saudi flank posed by the newly equipped F-15's. This is shortsighted and inadequate. It merely escalates the Mideast arms race at a higher balance of terror, increasing the instability in the region. In addition, Israel, which is swamped in debt, and which suffers from triple-digit inflation, hardly needs hundreds of millions of dollars of increased obligations imposed by the United States.

What must be stressed, however, is that this sale should be rejected by Congress not simply because it threatens our strongest ally in the region, or because it violates a pledge by the President of the United States. Congress should veto this sale because it does not serve our national interest.

Our highest priority in the region is to preserve and expand the treaty of peace between Egypt and Israel, and to draw other Arab nations into the peace process. Even though the Saudis are demanding these weapons from the United States as a demonstration of our support and goodwill, we are not receiving anything in return to help us with our political objectives. We have obtained no promise from the Saudis to support Camp David. To the contrary, Saudi Arabia has renewed its call for jihad, or holy war, against Israel. The Saudis have not of-

fered to encourage Palestinian moderation in any respect. Instead, they will continue to finance the PLO, the world's foremost terrorist organization.

It is almost inconceivable that such a transaction would be proposed without receiving political assurances from the Saudis on these key points. But this indeed is the case. In so doing, we have refused to apply what little leverage available to us—repeating the mistake the President made in 1978 to supply these weapons in the first place without a quid pro quo from the Saudis to cooperate with us in waging peace in the Middle East. This fundamental error in judgment will only work to our detriment.

The administration will argue that the Soviet threat to the Persian Gulf, by virtue of its invasion of Afghanistan, and growing instability in the region from the Iranian revolution and the war with Iraq, all underscore the need for us to supply the Saudis with these weapons. Even if these were our sole concerns, it must be asked whether the F-15's will be helpful. Many analysts have concluded that the Saudi armed forces are top-heavy in equipment, and weak in basic defense capabilities. The fuel tanks and missiles will do nothing to strengthen the Saudis' ability to defend the oil fields against invasion, or protect the kingdom's borders. The equipment is offensive, not defensive, in nature and will probably be used first against Israel, not the Soviet Union, and not against other Arab radicals.

Saudi security can best be provided not by a blank check for American weapons, but by an invitation for the United States to share in Saudi Arabia's defense. An American presence in the region would be the strongest deterrent at the least risk to Israel's security.

I had hoped we would have learned from our experience in 1978 not to use our most sophisticated weapons as the sole means of trying to achieve our political objectives—particularly in the Middle East. The Saudis wish to enjoy a special relationship with America. But they want to do it at the expense of our interest in securing peace—an interest which the Saudis should themselves recognize—and at the expense of the security of our ally, Israel. The administration's plans demonstrate that it has not learned these lessons. The Saudis can only come back again in the future, asking for more weapons, and we will be forced to give it to them, for nothing in return. We are allowing ourselves to be a party to our own extortion. Congress should not acquiesce in this arrangement. We have the power to stop it. I urge my colleagues to reject it.●

● Mr. EDGAR. Mr. Speaker, in retrospect, it seems as if all too short a time has passed since we were discussing a plan to sell F-15 fighter planes to Saudi Arabia. Although only 3 years have elapsed since the original proposal, we now discover that, like the economy, a considerable inflation has set in: we are asked now to approve the sale of additional hardware such as FAST packs, advanced air-to-air Sidewinder missiles, possibly AWACS, bomb racks and other support equipment. In 1978 we were persuaded to support the administration's policy by assurances that the F-15's would be used for defense purposes only, as means to repel invaders from Saudi territory. Now, a different administration wants to convince us that despite the dangerous new offensive capabilities involved, we need not be concerned by the Saudis' ability to inflict lethal damage within a 1,000-mile radius. Which countries would bear the brunt of such a new power?

Although the issue of a seriously increased threat to Israeli security is a most important one, one can argue against the proposal on many other grounds. Perhaps foremost among them is the stimulus we would give to an already intense arms race, spurring a further escalation in the current massive arsenals. There surely will be others besides Israel who will feel threatened by the Saudi offensive capability, such as Oman; and so, a new arms spiral would begin. It would be extremely short-sighted of us to ignore the effect such an arms policy has on the economies and societies of these countries. We take a grave risk in so altering the fragile Mideast military balance.

Another reason for concern is the destabilizing effect such arms might have on Saudi Arabia itself, and its conservative society. There appear to be enough parallels between Saudi Arabia and Iran to make a real examination of the detrimental effects very necessary. Can Saudi Arabia realistically absorb such technical, sophisticated equipment and provide the manpower to operate it? What about domestic repercussions and the allocation of resources away from social needs and rising expectations, compounded by strains resulting from quick industrialization and the liberalization of political/social institutions?

Proponents of the sale often mention the need for evenhandedness in our dealing with the various countries of the Middle East. Yet, even as the sale of offensive hardware is presented as a litmus test of our relations with Saudi Arabia, some attention should be given to U.S. needs and a reciprocity on the part of Saudi Arabi in deferring to our national interests also. What about Saudi support for our peace efforts in the Middle East? Saudi influence up to now unfortunately has been used to reduce Arab participation in the peace process, and as a focal point of criticism against Egypt. Yes, Saudi Arabia has kept the oil flowing (a decision guided in part by its own self-interest), but we in turn have sold them over $22 billion worth of military equipment, more than to any other non-NATO country. The Saudis have persisted also in their call for a jihad against Israel, a staunch ally, and such action can hardly be in our best interests.

The United States should not be party to the Mideast arms spiral merely because an ally has demanded it of us. It is one thing to respond to Saudi Arabia's legitimate defense needs, but quite another to provide offensive weapons which only can be used against other allies in that same troubled area.●

● Mr. ARCHER. Mr. Speaker, I wish to add my support today to the eloquent statements of my colleague from New York, JACK KEMP. I have grave concerns over the wisdom of this sale to Saudi Arabia—particularly if the proposed package includes AWACS aircraft. I cannot see how the sale of conformal fuel pods, AIM 9-L missiles, aerial refueling aircraft, and AWACS stabilizes the Saudi Government, or even more importantly, how it bolsters our own strategic interests in this vital region. This sale can only serve to undermine the security of our one steadfast democratic ally in the Middle East—the State of Israel.

Throughout the first few months of the Reagan Presidency, I have been greatly encouraged by the more realistic approach we have been pursuing—not only in confronting our economic problems, but in how we view our role as the leader of the free world. In Latin America we have not hesitated to expose Cuban subversion. We are finally holding the Soviet Union responsible for its support of international terrorism. At the United Nations, we are no longer hesitating to condemn the most outrageous rhetoric of the Third World and the Soviet bloc. Therefore, it simply does not make sense to me, that as we reject a policy of appeasement in the rest of the world, we are still handling our relations with Saudi Arabia as if we are incapable of rejecting any demand they make of us.

Saudi Arabia has been insisting that we sell some of the most sophisticated technology in our arsenal and yet in a number of areas, she has refused to help support our own interests in the region—despite the fact that the Saudi Government recognizes all to well that they cannot survive in a Middle East dominated by the Soviet Union. At the same time that the Saudis demand a stockpile of military equipment and spare parts, they have also opposed the filling of our Strategic Petroleum Reserve. They have opposed our efforts to obtain basing rights in the

Arabian peninsula. They have opposed the Camp David peace process and led the Rejectionist Front's condemnation of our one true friend in the Arab world—Anwar Sadat. Friendship implies a two-way relationship—giving and taking—but the Saudis have thus far seemingly shown that they know only how to take.

We all recognize the importance of maintaining good relations with Saudi Arabia. We all support America's commitment to protect the Saudi Government. The question is, Does this sale actually strengthen that government? I think a careful analysis of the threat to Saudi Arabia leads one to conclude that it does not. AWACS, conformal fuel tanks, and AIM 9-L missiles cannot help them defend their oil fields. In the final analysis, the Saudis cannot defend themselves from any major threats from the Soviets, or even their current friends, the Iraqis, no matter how much equipment we provide them. We should not delude ourselves—only the United States in conjunction with our western allies has the ability and will to counter Soviet or radical Arab military moves on the oil fields. Furthermore, the most ominous threat to the Saudi Government is not from external aggression, but rather from internal subversion. State-of-the-art aircraft technology is not going to stabilize the government or protect it from rioting in the streets.

Some proponents of this sale have argued that we must reward the Saudi royal family for restraining OPEC oil prices. I believe this view represents a serious misreading of Saudi oil policy. Sheikh Yamani himself recently indicated that his country's oil pricing policy is based on a hard-headed assessment of Saudi Arabia's own best economic interests.

I ask unanimous consent to have printed in the CONGRESSIONAL RECORD at the conclusion of my remarks an article by Peter Lubin which recently appeared in the National Review. This article raises a number of important questions regarding the nature of our relationship with Saudi Arabia.

Mr. Speaker, my strongest concerns over the sale stem from the threat it poses to our own security interests. By providing the Saudis with the advanced technology of the AWACS aircraft, we are running too great a risk that the system's secrets will be compromised by defection, accident, diversion of technical manuals, or Soviet intelligence activities. The compromising of F-14 and Phoenix missile technology in Iran provides us with a recent example of the risks we take whenever we provide this type of sensitive technology.

Finally, I am deeply concerned over the implications of this sale for Israel. Saudi forces have been involved in three of the four Arab-Israeli conflicts. In a future war there would be tremendous pressure by the other Arab nations on the Saudis to commit their enhanced F-15's and their AWACS to the battle. The Israeli airforce is certainly capable to meeting a challenge from any single Arab State, but it would be hard pressed in a confrontation with the combined Arab air forces—especially if these Arab forces can take advantage of the force-multiplier effect provided by Saudi AWACS. This sale is not the proper signal to be sending at this time.

I urge President Reagan and his advisers to reexamine and scrutinize the impact of this sale. At a time when the President has embarked on a policy of restoring America's ability to counter the Soviet threat, it is crucial that we do not weaken an ally and risk compromising our most sensitive military technology simply because the Saudis make demands upon us that have little to do with their vital security interests. Thank you, Mr. Speaker.

[From the National Review, Mar. 20, 1981]

TAMING THE SAUDIS

(By Peter Lubin)

When the Carter Administration was finally put out of its misery last November, there was gloom among the Al Saud, the family that owns and rules Saudi Arabia. The Saudis had enjoyed four uninterrupted years of bullying and bamboozling the American government. The lead role (in a star-studded cast) was played by Jimmy Carter, who gushed with gratitude whenever the Saudis, for cold financial reasons, temporarily raised oil production. A supporting role was played by National Security Adviser Brzezinski, who confided to the New York Times last March that we had no reason either to "fear or deplore" an "Islamic renaissance," and who envisioned a natural partnership with Islam to protect the Gulf. (No wonder a journalist in Riyadh described Brzezinski as "a man after Crown Prince Fahd's own heart.") There was Secretary of the Treasury Miller, who winged his way to Saudi Arabia in November 1979 hoping, as he put it, to convince "our friends" in the Gulf that there was no reason to raise prices further after the gigantic boost of the previous June ("It's unrealistic not to expect some upward adjustment in prices," said a chastened Mr. Miller on the plane home). There was Secretary of Energy Duncan, whose Saudi pilgrimage took place in late February 1980, to beg for royal assent to our Strategic Petroleum Reserve (permission denied). And on location in Riyadh there was Ambassador John C. West. Mr. West began his service by obtaining a job for a close friend, Crawford Cook, in the Saudi lobbying machine, and ended his tour with a valedictory that admonished, not the Saudis, but his own government for failing to satisfy every Saudi demand.

All this abasement before the Saudis has taken place in an atmosphere of myth, cliché, and received ideas in which Saudi Arabia is repeatedly described as "moderate," "pro-Western," and "friendly." No evidence is ever adduced for these epithets, but they stick nonetheless. On a recent CBS program on Saudi Arabia, for example, Ambassador West described U.S.-Saudi relations as "good faith, good friendship, and what I call that special relationship." An unsuspecting listener might assume that West had evidence for this. Unfortunately, that listener would be wrong.

The OPEC quasi-cartel operates to mulct the West of tens of billions more each year than would be received were there no limit on, and manipulation of, supply by its members. And the key villain is Saudi Arabia, because that country, not Libya, not Nigeria, not Venezuela, is keeping many millions of barrels off the world market. It is foolish to applaud the Saudis for producing "close to capacity" when they have deliberately and severely restricted that capacity themselves. The Saudis have broken every agreement on oil they have entered into since the Teheran Agreement of 1971. As energy economist Morris Adelman puts it: "There were repeated unilateral revisions, and it [the Teheran Agreement] was finally discarded in September 1973 . . . Sheik Yamani pronounced a classic epitaph: 'We in Saudi Arabia would have liked to honor and abide by the Teheran agreements, but . . .'" Under cover of the "oil embargo" in 1973-74 came the fourfold rise in price. In 1974 the Saudis kept promising to lower prices, and "they repeatedly raised prices. Twice Mr. Kissinger flew into Riyadh and announced that he and his friend the King agreed, prices should be lowered. Each time prices were raised" (Adelman).

In 1974 the United States undertook to guarantee Saudi security, and the Saudis agreed to produce at current capacity, a promise never kept. In late 1978 the Saudis extracted a further American pledge—not to fill the Strategic Petroleum Reserve. In turn the Saudis would keep production up close to 10.5 million barrels a day. So they did—for seven weeks. On January 20, 1979, as Iranian production collapsed, the Saudis slashed their output by a full two million barrels. In the ensuing panic buying and spot-market runup, prices rose more in five weeks than they had in the previous five months. Having accomplished their aim, the Saudis raised production by one million barrels. Again Adelman:

"The net result of Saudi maneuvers, concerted with their neighbors between October 1978 and mid-1980, [was] to increase the price of oil from $12 to $30 [now $32 and up]. At any moment they could have put the price down to any desired level by raising output to capacity, announcing they would maintain that output and even increase it by gradually investing to raise capacity."

The Saudis are the major obstacle to an American presence in the Gulf. They expect us to defend them, but only on their terms, with the means they choose, no matter how difficult or dangerous that makes our task. The Saudis are terrified of any resolute display of American power near them; thus they sponsored a resolution at Islamabad in May condemning the American hostage rescue attempt. By hiring Pakistani mercenaries, by buying German tanks and French planes, they hope to build an armory that will make them independent and able to keep the Americans from establishing a presence nearby. They do not seem nearly as concerned about the Soviet over-flights they permit to Aden and Ethiopia, and they have allowed Soviet-built tanks to be unloaded at Saudi ports for transshipment to Iraq.

While the Saudis have backed Iraq's invasion, though Iraq is linked to the Soviets, the Saudis are not benevolently inclined toward smaller neighbors. Saudi Arabia is

the leading local bully and troublemaker, detested and feared by Oman and the sheikhdoms. The Saudis backed the Marxist-supported Dhofar rebellion. They have pressed territorial claims on both Abu Dhabi and Oman. They have meddled with American arms shipments to North Yemen, which led the Yemenis to look to the Soviet bloc for arms.

SAUDI MODERATION

On Israel the Saudis are as implacable as Syria or Iraq. Twice in recent months they have called for jihad, a word that, despite the attempt of our State Department to give it a soothing gloss, means exactly what it says: warfare by all means, including military force. The flavor of Saudi "moderation" can be gauged from their description of Jerusalem as "purely a genuine Arab and Islamic city. Thus it has been for thousands of years, and thus it should remain forever." Loyalty to a fellow Moslem (who massacred his Christian subjects) has led the Saudis to give refuge to Idi Amin. The Saudis subsidize the most notorious of terrorists; the Arab who recently killed 15 and wounded 85 by bombing a hotel in Kenya escaped, his deed accomplished, to Saudi Arabia.

All this activity, however, is muffled in a vast Saudi disinformation and propaganda effort, aided by Westerners with financial ties to the Saudis. There are two themes. The first is, "we are doing you a favor" by "producing more oil than we [need, want]" so "don't jeopardize this 'special' relationship." Note Yamani's recent interviews: "Don't take the Saudis for granted" (Wall Street Journal); "We're gotten no sign of appreciation for everything we've done" (New York Times): "We are America's number one friend" (Time). By dint of constant repetition, journalists and politicians come to believe this nonsense.

But the evidence shows otherwise. The Saudis are not doing us any favors. Saudi pricing in OPEC, like the pricing of its fellows, is based on their calculation of their "perfect" (optimal monopoly) price. That price will tend to maximize their total revenues over time. Each OPEC member determines its "perfect" price at any moment by taking into account the size of its reserves, its current surplus or deficit, the value of its foreign currency holdings and investments, and the likely production response of its fellows in OPEC. Absent Western pressure, that is all OPEC need worry about. Of particular concern to the Saudis is demand elasticity for oil. As the producer with the largest reserves (whose value they wish to protect), the Saudis must worry about too precipitous a rise in prices, and thus too precipitous a drop in demand. These considerations, not some phony melodrama starring "hawks" and "moderates," are what OPEC price differentials are all about.

Nor are the Saudis "producing more than they need." Detailed studies of Saudi revenues and expenditures show that they always manage not only to squander the surplus funds that may initially be accumulated, but end up needing more. There is every reason to believe that the phenomenal waste, corruption, and extravagance of recent years will continue. Nor have the Saudis ever chosen to lessen current revenues. They may have to, however, when Iran and Iraq resume pre-war production levels. Otherwise, there is a possibility of price-cutting and the destruction of OPEC. The Saudis, having previously threatened to cut as many as seven million barrels a day, will at that point cut a few million at most, and expect to be applauded.

Yamani's claim that by slashing production Saudi Arabia could receive as much current revenue as at a higher level of production is demonstrably false, yet none of the journalists he tells this to has bothered to point it out. Demand elasticity is high, and growing. Professor Robert Pindyck of MIT has noted that every 5 percent rise in oil prices results in a drop in demand of between 1 percent and 1.8 percent. Another way of understanding this is that for every OPEC cut in supply of between 1 percent and 1.8 percent in the total amount of oil available in the non-Communist world's market, OPEC can impose a price rise of 5 percent and still "clear the market" (have demand equal supply) so as to avoid problems of glut and price-cutting.

Suppose the Saudis were to cut production by four million barrels. That represents about 7.5 percent of non-Communist world production (assuming Iran and Iraq are exporting at prewar levels; othewise four million barrels represent about 8 percent). Using the lower figure for demand elasticity would permit the Saudis a price rise on the six million barrels they did produce of about 38 percent. Using the higher figure, the rise is less than 25 percent. In either case, the Saudis stand to lose tens of billions of dollars annually. And the expensive infrastructure for natural gas collection requires a minimum oil production of eight and one-half million barrels. The Saudi subsidy to the PLO, aid to Syria and Jordan, and other pan-Arab aid amounts at most to a few billion. That offers a measure of the financial sacrifice they are willing to make on behalf of fellow Arabs. Why should we believe that the Saudis would suddenly—for "political" reasons—risk the loss of many times that amount?

Such threats tell us a lot about the Saudis. A friend would never say: "Saudi Arabia alone . . . is in a position to inflict very severe damage on the world economy as a whole or a selected group of nations . . . Definitely, I'm not threatening. You threaten when you need to. Among friends, I don't think we are threatening."

Yamani's bluster is as hollow as his bonhomie. For as a number of economists and other commentators have noted, there is no "oil weapon." A study "demystifying" the oil weapon was made by Douglas Feith in Policy Review (Winter 1981). Being fungible oil cannot be selectively denied to one country or group of countries. The only way to "punish" is to cut production massively, and that would harm any producer far more than any potential victim among the importing nations. It might also have unforeseen political consequences. If there are sound economic reasons for raising the price of oil or cutting production, such a price rise, or such a cut, will take place in any case. If such a price rise or production cut is made to "punish" (i.e., employed as a "weapon") then by definition it would go against, rather than promote, the economic interest of the producer instituting it. Otherwise it would have been made for that economic reason. Unlike Khomeini, the Saudis have not shown a taste for self-inflicted wounds.

OUR GOAL: SAUDI COOPERATION

Our policy should be to obtain, not the chimera of Saudi "goodwill," but Saudi cooperation, however unwilling that cooperation will be, on bases, on oil, and on other matters. Policy should be rooted in understanding that: (1) Wahhabi Islam regards the Christian West with hostility, but that need not concern us overmuch; (2) there is no "oil weapon", (3) the Saudis are not "doing us favors", (4) politically, economically, and socially Saudi Arabia remains a primitive tribal kingdom, advanced only in the bankbook sense; (5) the Soviet Union has strengthened its grip on the Saudi perimeter; (6) Saudi Arabia may have to be "saved in spite of itself," and while we understand the Saudis are incapable of protecting themselves, their vulnerability must be brought home to them; (7) the Saudis must be disabused of their inflated notion of their own significance vis-à-vis America and the West; (8) taming the Saudis will demand both intelligence and imagination, but the risks from further appeasement are too great not to make the attempt.

A drastic change in our policy toward Saudi Arabia is essential, beginning with a change in attitude. Diplomatic personnel posted to Riyadh should be chosen so that those with a chronic case of furor arabicus (a peculiar nervous disease first diagnosed by J. B. Kelly in "Arabia, the Gulf, and the West"), are carefully selected out. Cabinet members should no longer rush to Riyadh, seeking the royal indulgence. No more dancing attendance upon Yamani on his various tours. Instead of misplaced gratitude, Washington can by appropriate comments demonstrate a real "appreciation" of all the Saudis have been doing in OPEC.

We should proceed with plans for whatever bases we deem necessary—in the Sinai, in Oman, and elsewhere—explaining to Riyadh that we have no intention of courting disaster simply because the Saudis may be displeased. There is a basic conflict here that cannot be blinked. The Saudis fear such bases nearby because they would have an intimidation value (which, of course, is a further point in their favor).

Washington has been worrying aloud about the stability of Saudi Arabia ever since the collapse of the Shah. The Saudis, in turn, have been quick to react with a propaganda barrage: Saudi Arabia is very different from Iran; the Saudi royal family is revered by all its subjects; its devotion to Islam is profound; and so on. Both American worry over, and Saudi insistence upon, the "stability" of Riyadh are beside the point. Saudi stability is not intrinsically desirable to anyone but the Saudis. Continued rule by the Al Saud, or the continued existence of Saudi Arabia in its present borders, may or may not best serve the interests of the oil-consuming world. If firm Saudi rule promotes Western access to Persian Gulf oil at reasonable prices, then let it be encouraged. But it may be that a severe shock to Saudi complacency, or even a sustained effort to keep the Saudis off balance, would serve Western interests better.

The smug belief of the Saudis that no matter how they behave we will be there to protect them is revealed in a statement Yamani made to an interviewer from Time: "You are not protecting us. When you send your airplanes, you are defending your own interests." The Saudis have not yet understood the significance of General Petrovsky in Ethiopia, Cubans and East Germans in South Yemen, Soviet treaty links and base rights in Syria and Iraq, PLO training in Baku, Tashkent, and Simferopol. It is long past time to heighten their sense of unease. Further, we should make the distinction between protection of oilfields in the physical sense and protection of a regime or a country. Since the Iranians are now in no position to harm the Saudi oilfields, one simple and elegant way to demonstrate our studied insouciance as well as make clear our dis-

pleasure with Saudi behavior would be to recall our Airborne Warning and Control Systems, on the grounds that we need them for our own use (we possess only twenty in all).

As for the Saudi demand for additional equipment for the F-15s that Mr. Carter granted them, that demand should either be rejected out of hand or put under indefinite "review" until such time as Saudi behavior has drastically changed. At the time of the original plane sale, both the Saudis and the Carter Administration offered assurances that the equipment now sought (bomb racks, Sidewinder missiles, fuel tanks) would not even be asked for, much less granted. But the Saudis are convinced that in their case such commitments are meaningless. So great is their contempt for us that they no longer bother to conceal it. Prince Faisal stated on "Meet the Press" that no Iraqi planes are being sheltered in Saudi Arabia; Ambassador Alhegeland recently denied that Soviet-built weapons have been unloaded for Iraq in Saudi ports. Both men knew that Western intelligence sources have confirmed these activities; neither thought it worth his while even to obfuscate.

The equipment demanded cannot be used by the Saudis effectively against the Soviet Union. If used at all, it will be used against its lesser neighbors (Oman, the littoral sheikhdoms), against Israel, or possibly against Western forces should they move decisively into the region. As far as the Israelis go, even if they decide (for reasons of their own) not publicly to oppose the sale, that is no reason for it to go through. Such weaponry makes much likelier a Saudi role in another Arab-Israeli round, and in that case virtually guarantees an Israeli pre-emptive strike. Such a capitulation would dishearten the Omanis, who hate and fear the Saudis and have been ready to serve the West but may now be intimidated by a display of Saudi power.

But the main reason for denying the Saudis the equipment is that they regard the sale as "an important test case in relations between the two countries." Exactly. After two years of uninterrupted and astronomical price hikes, after the resolution condemning our rescue mission, after the efforts to deny us bases, after the open calls for jihad and support for terrorism, after backing the Iraqi invasion of Iran, after meddling with our arms supplies to North Yemen and facilitating Soviet bloc supplies to Iraq, after the attempt to throttle our Strategic Petroleum Reserve, after all this the Saudis want to test whether America will jump once again through the Saudi hoop. If we do so, we will signal that nothing has changed, and that we continue to adhere to the "doctrine of common interest" so lucidly analyzed by J. B. Kelly:

"All that the constant reiteration of the doctrine of common interest achieves is to convince the Middle Eastern oil-producing states that the West needs them as much as (or even more than) they need the West, thereby confirming them in the hauteur and their illusions of power."

Rejecting the Saudi demand would be the first step in forging a coherent strategy for protecting the West's interests. The immediate response will be Saudi bluster and bluff, of the kind Crown Prince Fahd offered in the newspaper Al Hawadith: "We are not compelled to be friends of the Americans. There are many doors wide open to us, be it on the military, technological or economic level . . . . We can easily replace the Americans."

WHO NEEDS THE GULF

But Pakistani mercenaries, German tanks, and Tornado fighters will not really fill the bill. Weapons suppliers are not as easily interchangeable as Fahd pretends to believe. The American equipment already acquired by the Saudis would be greatly diminished in usefulness without easy access to American spare parts, American technical help, American training. And only the United States offers Saudi pilots extensive training on simulators.

Should they proceed, nonetheless, not to yield on policy but attempt to replace us with European arms suppliers, we have the means to obtain European cooperation. In the end the United States could do without oil from the Gulf; Western Europe and Japan cannot. It is to our allies' advantage that the Saudis be brought to heel, even if they choose not to admit it publicly. They may distance themselves from our effort (out of fear) but should not interfere with it. We have a right to ask from those for whom we are protecting the Gulf that they not persist in currying Saudi favor at our expense. The American people may grow weary of safeguarding oil to keep German or French or Japanese industry humming, if those same Germans or French or Japanese make that job more difficult.

The Saudis will also attempt a rhetorical rally of the Third World. But the speciousness of that concept can be exposed. A farmer in Senegal or Brazil has more to gain from our efforts to protect access to, and hold down prices of, Saudi (and OPEC) oil through political pressure even than the Europeans.

The Arab oil states, not least the Saudis, also employ the Arab-Israeli dispute as the perfect diversionary tactic. How dare the West raise the little matter of oil pricing and production (here the face of Faisal or Fahd assumes an aggrieved air, and eyes are raised heavenward) when the "Palestinian problem" has not been solved to Arab satisfaction? But as J. B. Kelly has noted, even if we posit the total disappearance of Israel, our problem with the oil states would be exactly the same.

The past two years have given us a good dose of what the Muslim Middle East, unadorned, is all about. The Saudi regime's legitimacy comes from force and the threat of force. Not surprisingly, it responds only to pressure, not to blandishments.

As long as the Saudis believe that our only reaction to their behavior will be "economic" (i.e., to conserve oil, and to look for non-OPEC sources), they will behave without any constraints. In the long run, a decade or more away, our problem with OPEC may well be solved. In the short run, we must protect the major oilfields and apply pressure to hold down prices and hold up production. That is why any energy policy must include a strategy for taming the Saudis.●

● Mr. GARCIA. Mr. Speaker, with respect to the proposed arms sale to the Saudis, I am deeply concerned that the United States might be buckling under to oil blackmail. Moreover, I am deeply concerned that this move would come at the expense of the security of our long-term friend, the State of Israel, and simultaneously increase the instability of the Middle East.

It seems odd that current American foreign policy has become so—dare I say controlled?—by the threat of an oil embargo.

We are not merely discussing the sale of weapons to the Saudis but, rather, offensive weapons. At a time when the internal stability of Saudi Arabia is much in doubt, should we risk another Iran? I can understand Saudi Arabia wanting to protect itself from its erratic neighbors in Libya and Yemen as well as from the threats from the Soviet Union. But, why must we sell offensive arms to a nation which just a few weeks ago witnessed several of its leaders calling for a holy war against Israel? I submit that we must not.

These highly sophisticated weapons will open all of Israel to Saudi radar. We will, no doubt, eventually have to extend our military sales to Israel to permit it to defend itself at a time when that nation is more in need of economic stability and peace than expansion of its arms purchases.

Will we receive anything from the Saudis in return? It is becoming obvious that they need a market for their oil as much as we need their oil. So let us stop this poker game. Let us get on with promoting peace by encouraging the Saudis to support the Camp David accords, to discontinue their support for terrorist PLO activities, and to guarantee—for the long term—oil sales without the constant threat of an embargo.

I will not support this arms deal. I urge my fellow Members of Congress to carefully consider what this proposal means to the security of Israel, to America's image as a strong world leader if we should give in to another Saudi litmus test, and to the stability of a very vital region.●

● Mr. SANTINI. Mr. Speaker, I rise to express my opposition to the proposed sale of fuel and sensor tactical (FAST) packs and AIM-9L air-to-air missiles for the F-15's purchased by Saudi Arabia.

I oppose this sale for the following reasons:

(a) Saudi Arabia has called for a jihad—holy war—against Israel. The enhancement of the F-15's will give Saudi Arabia the ability to launch an offensive attack against Israel and thus encourage the military aspects of a jihad.

(b) With this new equipment, Saudi Arabia will also be able to monitor all of Israel's military activities, including locating troops, aircraft, tanks, and artillery pieces. Israel's security will undoubtedly be threatened by such a sale.

(c) In 1978, the original sale of the F-15's was justified on the grounds that it was to be for totally defensive purposes. To change direction now and provide Saudi Arabia with offensive weapons is to ignore the will of the Congress. In addition, the commit-

ments and word of the United States are now in question.

(d) Selling weapons to Saudi Arabia in the past has not made the price or supply of oil more secure. In fact, in part due to the position of Saudi Arabia, we have not built up our strategic petroleum reserve, which would be in the best interests of the United States.

(e) Selling these weapons has proved to be a destabilizing influence in the Mideast. Saudi Arabia has given huge sums to Jordan and Syria. Saudi Arabia has also been a leader in the punishment of Egypt for participating in the peace talks. They have not worked for peace in the region.

(f) Saudi Arabia does not need these weapons for its defense. There have been no signs of aggressive intent from South Yemen, Iran, Syria, and Libya.

In conclusion, I see no reason for the Congress to support this sale, which could be of such detriment to one our staunchest allies, Israel.●

● Mr. MATTOX. Mr. Speaker, it defies all logic for us to nourish our ties with democratic Israel, our staunchest ally in the Middle East—and at the same time, sell offensive weapons to Saudi Arabia, whose avowed goal is to wipe Israel off the face of the map.

If we bow to the Saudis' wishes and sell them the fuel tanks and Sidewinder air-to-air missiles for the F-15 jet fighter aircraft they possess, we will only be fueling the instability in the Middle East. We will be doing this in defiance of the intent of Congress when the original sale of F-15's was consummated. Then the strong congressional opposition was overcome only because of assurances given by the administration that the fighter aircraft would not be equipped as a long-range offensive attack plane.

The administration is also reported to have under consideration the sale of AWACS or E-3A airborne command centers to Saudi Arabia. This would be a real quantum leap into destabilization. Because their troop movements would be under constant surveillance, the Israelis would justifiably feel more imperiled, leading to greater and greater defense expenditures.

So far Saudi Arabia has disdained the peace process set in motion by the Camp David accords. Why then are we rewarding them with the weapons that could very well undo that peace process? Mr. Speaker, it is not logical.●

● Mr. BOLAND. Mr. Speaker, anyone interested in the cause of peace in the Middle East must view with concern the Reagan administration's proposed sale of advanced aviation equipment to Saudi Arabia.

As my colleagues know, the administration has indicated a desire to sell the Saudis advanced radar, extra fuel tanks, and AIM 9-L air-to-air missiles for the 62 F-15 fighter aircraft purchased in 1978. This equipment will significantly increase both the range and the firepower of these aircraft. In addition, the administration has proposed that sophisticated airborne early-warning aircraft, the E-3A AWACS, be sold to the Saudis. The AWACS will greatly improve the capability of Saudi Arabia to monitor the movement of Israeli military forces. Taken together, the upgrading of the Saudi F-15's and the acquisition of the AWACS aircraft would represent an enhancement of the military capability of Saudi Arabia that could only be viewed with apprehension by Israel.

Mr. Speaker, no one can argue that the Saudis do not have a legitimate need for military equipment with which to defend their country. It is clearly in the best interests of the United States to encourage peace and stability not only in Saudi Arabia, but in the entire Middle East region. That is why the F-15's were sold in the first place. The additional equipment being sought will not, however, promote stability. It is not primarily defensive in nature. The improved F-15's will impair security in the Middle East by triggering a new arms race, not only in Israel, but in other nations bordering the Persian Gulf. We owe Israel, our oldest and most able ally in the Middle East, something better than arming one of its avowed enemies with sophisticated military equipment that is primarily offensive in nature.

I hope that the administration will reconsider and not submit the proposed sale to Congress for approval. I do not believe that the sale is in the best interests of the United States or of the cause of peace and I urge my colleagues to oppose it.●

● Mr. JAMES K. COYNE. Mr. Speaker, like many of my colleagues here today, I am gravely concerned that the administration's planned sale of conformal fuel tanks and Sidewinder air-to air missiles to Saudi Arabia unduly exacerbates an already tense situation in the Mideast. Before the administration goes ahead with its sale, it ought to carefully consider the ramifications of this move. There is no region in this world more volatile or less stable than the Mideast.

As the events of the last 2 years have starkly demonstrated, the Mideast no longer merely pits Arab against Israeli. Time and again in the recent past, the fighting in the Mideast has pitted Arab against Arab. The new F-15 offensive capability Saudi Arabia stands to acquire will provide one Arab faction with a weapon heretofore unknown among the competing Arab countries. It not only poses a threat to peace and stability vis-a-vis the Israelis, but looms as a distinct threat to the peace and stability of the entire region.

Saudi Arabia has been a long and valued ally of this country, Mr. Speaker, and I do not want the administration to in any way imperil our relationship with the Saudis. At the same time, however, I am concerned that the proposed sale of F-15 offensive weaponry will undermine much of the American-led conciliation and peacemaking in that part of the world.●

● Mr. RINALDO. Mr. Speaker, it is disturbing to note that the administration has announced that it will sell Saudi Arabia extended range conformal fuel tanks and Sidewinder air-to-air missiles for the fleet of 60 F-15 jet fighter aircraft the United States sold to the Saudis in 1978.

Additionally, the administration has indicated that the United States will eventually sell Saudi Arabia aerial refueling tankers as well as surveillance aircraft, possibly including the sophisticated AWACS airborne radar plane.

The fighter plane accessories will greatly enhance the lethality of the F-15's, and will bolster Arab military power in the volatile Middle East, further threatening the security of Israel. It will significantly expand the combat radius, strength, and the ground attack capability of the F-15.

The Saudis have called in the past for a "holy war" to wrest control of Jerusalem from Israel, and by providing them with this added military equipment we are further aggravating tensions between the two nations and making it more possible for Saudi Arabia to launch a devastating attack against Israel.

When Congress debated the wisdom of providing the F-15 to Saudi Arabia 2 years ago, the Pentagon advised us that Saudi Arabia had not requested and that the United States did not intend to sell any other systems or armaments that would increase range or enhance the offensive potential of these aircraft. It was made clear at that time that Saudi Arabia needed the jet fighters to defend itself against attack.

With that understanding in mind, it is clear that the Saudis do not need to enhance the range and firepower of their F-15's and, to, in effect, bring Israel within closer striking distance.

I urge the administration to reconsider its decision to sell this equipment to the Saudis.●

● Mr. EDWARDS of Oklahoma. Mr. Speaker, I am greatly disturbed by the administration's announced intention to sell Saudi Arabia conformal fuel tanks and advanced Sidewinder air-to-air missiles for its F-15 fighters. Such sophisticated equipment will greatly increase the firepower and range of the F-15's. The Saudi request, if granted, could undermine significantly Israel's ability to defend itself.

Mr. Speaker, it is undeniable that the Saudi rulers continue to see Israel

as a principal adversary. As recently as last month, Saudi officials called for a holy war against Israel. Three times in the past 30 years Saudi Armed Forces have been employed against Israel. Saudi Arabia has led the Arab League condemnation of the Camp David accords, has broken diplomatic relations with and withheld economic support to Egypt, and has steadfastly refused American proposals to participate in the peace talks. Moreover, it has increased its financial and diplomatic support for the Palestine Liberation Organization. In short, Saudi Arabia has played anything but a constructive role in the search for a lasting peace in the Middle East.

Ostensibly this sale will contribute to American security interests in the Persian Gulf by providing the Saudi Air Force with greater deterrent capability against a Soviet thrust in the region. But 62 F-15's, sophisticated and formidable as they are, would be incapable of blunting a determined Soviet attack on Saudi oilfields or on the Straits of Hormuz. The more immediate threat to the region stems from Soviet forces in Afghanistan, which pose a direct threat to Pakistan and Iran, not Saudi Arabia.

Given the instability of the region, one cannot discount the possibility that this highly sophisticated U.S. equipment could fall into the wrong hands, thus compromising American military secrets, if the sale goes forward. In particular, the stability of the current Saudi regime is not very reassuring. The takeover of the Grand Mosque in the fall of 1979 is only one indication of the vulnerability of the Saudi ruling family.

The principal advantage Saudi Arabia will gain by the augmentation of its F-15 squadrons is directed against Israel, Mr. Speaker. This is why the proposed sale worries me so greatly and why I believe it is ill advised. Extending the range of the F-15's from 450 miles to 1,000 miles will enable Saudi Arabia to launch attacks from deep within its territory against any target in Israel, with more devastating force than the Saudis now possess. Judging from past behavior, I would not expect the Saudis to act alone, but in concert with other Arab nations in a coordinated attack on a broad front. Quite obviously, precision attacks by heavily armed, long-range Saudi F-15's would severely complicate Israeli defense efforts.

Mr. Speaker, I find it very disturbing that there has been no quid pro quo from Saudi Arabia in response to U.S. willingness to bolster its security. In fact, since the initial sale of F-15's received congressional approval in 1978, Saudi actions have illustrated belligerence. Indeed, oil blackmail has played, and continues to play, a prominent role in Saudi foreign policy. After the 1978 sale, for example, Saudi Arabia put considerable pressure on the United States not to build its strategic oil reserve, and threatened to cut back production if the warning was disregarded. Recent statements by Saudi oil minister Sheik Yamani indicate that Saudi moderation of oil prices is designated to reduce incentives to search for petroleum substitutes, thereby prolonging U.S. dependence on Saudi Arabian oil.

In light of Saudi Arabia's statements and actions, one is entitled to the conclusion that it holds no special regard for the United States. This is not surprising given the differences in history, religion, culture, and political traditions of the two countries. But the United States and Israel do have a special relationship, tied as we are by religious, cultural, and political values and traditions. Let us not forget that Israel is the only pro-Western democratic nation in the Middle East. Its security must be of paramount and overriding importance to U.S. objectives in the region. It is proper to enhance the security of other Middle East countries who are opposed to Soviet expansion, but not to the extent that Israel's security is thereby complicated if compromised. I join my colleagues in opposing this sale.●

● Mr. MOLINARI. Mr. Speaker, I am privileged to have the opportunity today to take part in a special order concerning the sale to Saudi Arabia of sophisticated offensive weaponry for the F-15 fighter planes. When the Carter administration proposed the original F-15 sale in 1978, it convinced a reluctant Congress that the United States would benefit through forthcoming Saudi concessions in areas vital to U.S. security and interest. I am therefore calling on the administration to review their decision to sell air-to-air missiles, extra fuel tanks, and aerial surveillance aircraft to the Saudi Arabian Government, and take into consideration actions toward the United States since the 1978 weapons sale.

True Saudi willingness to cooperate with the United States is most accurately reflected in Saudi oil policy. However, instead of supporting oil price moderation, Saudi Arabia instigated the rapid escalation of OPEC oil prices after the Iranian revolution, and has continued its threats to reduce oil production. The Saudi Arabians also threatened the Carter administration with oil cutbacks if the President complied with the congressional mandate to resume filling the strategic petroleum reserve, a stance of completely unwarranted interference with American policy. While Saudi Arabia moderated its oil prices to a minor degree after the 1978 F-15 sale, international analysts believe it did so more to assert its own independence within OPEC, rather than aid the American oil consumer.

When former President Carter proposed the 1978 arms sale to the Senate, he wrote in a letter that the sale of planes to Saudi Arabia "would cement their ties to the United States and advance the cause of moderation in the area." However, instead of supporting the first peace agreement to be reached between Israel and Egypt, the Saudis opposed the peacemaking efforts of the United States by leading the Arab League in condemning the treaty and organizing an economic and political boycott of Egypt. In May 1979, President Sadat fiercly attacked the Saudi Arabian rulers for their continued efforts to sabotage the peace treaty, charging the Saudi Government with paying several Arab governments to break off diplomatic relations with Egypt.

The Saudi Arabians have redoubled their support of the PLO since the signing of the Camp David agreement. Currently, they provide major financial assistance to the PLO and support its terrorist activities against Israel.

As recently as January 1981, Arabia led the Moslem States at the Islamic Conference at Taif in calling for a jihad or holy war against Israel. At the same conference, Saudi Arabia severely pressured Turkey to sever its relations with Israel. In a revealing moment, Crown Prince Fahad himself participated in an Islamic prayer for the aid of Allah in "cleansing Jerusalem of the Jews."

I believe that today's editorial in the New York Times sums up quite well what we should expect from the Saudis in return for selling more sophisticated weaponry. Today the Times called for the Saudi Arabian Government to drop their pretense of a holy war against Israel. The Times goes on to say:

> It is hard to believe that the Saudi's diplomatic doubletalk still fools any Palestinians, thus protecting the House of Saud against subversion or revolt. Indeed, if the Saudi monarch cannot survive open accommodation with Israel, it is hardly a safe depository for all that dangerous hardware.

Therefore, before future plans are finalized to sell weapons to the Saudis we must in return receive some concessions. These should include upholding the agreements of the 1978 arms deal, dropping their claim of a holy war against Israel, and legitimize Arab negotiations with Israel. Such a posture would increase moderation and stabilization in Middle Eastern affairs, and would serve in the best interests of the United States, Israel, and the pursuit of world peace.●

● Mr. SYNAR. Mr. Speaker, this Nation has no more important ally in the Middle East than the State of Israel. And nowhere in the world does the threat of war pose more danger to the United States and our allies than in the Middle East. Yet this administration proposes to sell our most so-

phisticated air weaponry to the avowed enemies of our Israeli allies.

I do not doubt the necessity of developing better relations with the Arab States of the Middle East. Nor would I oppose providing defensive weaponry to those Arab States as a means of stabilizing cooperative governments. However, I have several questions about the reasoning behind the proposed sale of state-of-the-art offensive weapons to a nation which has openly opposed the Camp David peace initiative.

For example, why is it in the U.S. national interest to equip the Saudis with F-15 fighter-bombers capable of striking targets 1,000 miles away? How is the cause of Middle East peace served by arming the Saudis with "all aspect" Sidewinder missiles? And what does the United States expect to gain from the Saudis in return for our generosity?

Frankly, Mr. Speaker, I can think of no logical answers to these questions. I would hope the current administration is prepared to enlighten the Congress and the American people as to the wisdom of their proposal. If we are to become the arms merchants of the Middle East, let us know precisely what return we can expect on our investment.●

● Mr. ASPIN. Mr. Speaker, in response to renewed Saudi requests, the administration is proposing to sell to Saudi Arabia so-called conformal packs which would lengthen the range and increase the bomb-carrying capability of F-15 fighters sold to Saudi Arabia in 1978. This proposal is contrary to the interests of the United States. It violates the precepts of statesmanship advanced by Secretary Haig during his confirmation hearings before the Senate Foreign Relations Committee just 2 months ago. The proposal answers no security need of Saudi Arabia, and the United States stands to receive no benefit from yielding to Saudi pressure for these arms.

On January 9, 1981, Secretary of State Alexander Haig told the Senate Foreign Relations Committee that consistency, reliability, and balance should characterize American foreign policy. None of these virtues is evident in the proposal to sell Saudi Arabia conformal packs for the F-15: quite the reverse.

It is inconsistent. We have decided to refuse this equipment on at least two previous occasions, when the F-15's were first sold to Saudi Arabia in May 1978 and again in July 1980.

We would be unreliable. Administration spokesman assured the Congress and our Israeli allies that—

The plane requested by Saudi Arabia *will not be equipped* with special features that could give it additional range. (Emphasis added.)

By "balance" Secretary Haig said he meant that decisions should take into account a variety of pressures. This decision responds only to Saudi pressures and not to our interests regarding Israel, other potential allies in the Persian Gulf, Egypt, or the general interest in reduction of arms exports.

How supplying the F-15 with longer range will advance any Saudi security interest is obscure. It is peculiar enough that an aircraft whose most important combat characteristic is all-weather performance should have been supplied to a country whose skies are nearly always clear. The F-15's 450-mile combat radius is adequate to cover virtually any part of Saudi airspace even from central basing in the capital city of Riyadh. If the conformal packs extend the aircraft's radius to 1,000 miles, where do the Saudis mean to fly it?

If in fact the F-15 is intended to be improved in order to upgrade its usefulness for air defense, what do the Saudis mean to protect? One lesson of the Iraq-Iran war is the extraordinary difficulty of severely damaging oil production and transport with air attacks. Both the Iraqis and the Iranians have attacked each other's ports and pipelines by air without doing much damage.

Who is the potential attacker? A cursory glance at the map makes Saudi Arabia look vulnerable to military assault: Long borders without topographical obstacles, a thinly spread population, a central location rimmed by hostile, heavily armed, more populous countries envious of Saudi oil wealth.

But as a British Prime Minister once remarked, cursory glances at the map lead to a great deal of misapprehension. In fact Saudi Arabia is an island in an uncrossable sea of sand. None of its potential enemies can really reach its vitals, and they have proved they cannot. In 1979 the Marxist foothold in South Yemen could scarcely mount an operation 10 kilometers into North Yemen, much less overcome the logistical difficulties of Rub al-Khali, the "Empty Quarter."

As for Iraq, given the glacial pace at which it advanced into Iran against trifling opposition, it would take months to reach anyplace in Saudi Arabia.

Syria tried to cross the border into Jordan in 1970 and received a severe drubbing for its pains. This year Syria restrained itself to posturing on Jordan's border. Its armed forces are in no shape for a campaign across Jordan into Saudi Arabia.

Improving the F-15 serves solely to provide Saudi Arabia's insecure princes with an illusory safety. The danger to the throne stems from home dissatisfaction—the specter of rioters in the streets against whom high-performance jet aircraft will be useless.

Now one might suppose that fulfilling Saudi Arabia's request for the conformal packs would represent a quid pro quo for some Saudi act. The administration has not confided what something we might get for breaching our promises and playing along with the illusions of Saudi princes, but we can imagine that the administration hopes that the Saudis will restrain oil prices or that they will use their influence in the Arab world to advance our causes.

If indeed some such bargain underlies the administration proposal to upgrade the Saudi F-15's, it is a particularly naive and foolish one. The Reagan administration may be the new boys on the block, but they can review the files of their predecessors.

Selling arms to Saudi Arabia is not necessary to make them moderate their oil price rises. I held hearings in the last Congress on what makes OPEC pricing decisions tick. While the executive branch tends to believe that all the Saudis want to do is conserve their oil on the principle that oil in the ground is the best bank account, the record clearly shows otherwise.

Having trained at Harvard Business School, Saudi Arabia's Oil Minister can calculate quite nicely the level of output that maximizes the present value of Saudi oil combined with their portfolio of investments and currency holdings in the West. This calculation shows them that excessive production cuts are contrary to their interest and has made the Saudis repeatedly try to slow the explosion of OPEC prices.

In 1973 or 1974 the Saudis even offered to Secretary Kissinger to hold the line at a price of $7 to the barrel, fearing too rapid a surge in prices. He turned them down.

Despite administration predictions that Saudi Arabia would hold its production to 8.5 million barrels a day or even reduce output when the Iranian revolution cut world supplies in 1979, in fact the Saudis expanded by 1 million barrels per day and peaked at over 10 million barrels per day. This does not sound as though the executive branch's energy experts have a good understanding of Saudi motivations which would allow them to determine that sales of conformal packs for F-15's will help us in the oil game.

There is only one escape from the trap of dependence on Saudi oil. It is not kowtowing to the arms mania of princes. It is cutting our use of oil.

We also ought to know better than to rely on Saudi promises that if we help them they will use their influence with Arab brethren. Saudi Arabia has little enough influence with neighboring Arab countries, whose rulers fear Saudi hegemony. The littoral countries of the Arabian Peninsula look outward on the Persian Gulf and the Red Sea, not inward toward

Riyadh. Mecca is an object of spiritual, not political, reverence.

Whatever influence the Saudis do have in the Moslem countries, we know from bitter experience that they cannot be counted on to use it on our behalf. After the 1979 border skirmish between North and South Yemen, we responded to Saudi request for military aid to North Yemen which they offered to pay for. The aid program we put together lacked sense—we were supplying $40,000 per active soldier of the North Yemeni Army, and $400,000 per literate one—but despite our largesse the Saudis did not keep their end of the bargain. They held up both payments and arms shipments by imposing unacceptable conditions on North Yemen.

It is seldom clear whether this and past Saudi behavior is the result of deviousness or merely of the Saudi royal family's inability to make and hold to policy decisions, which become pawns in the family's internal rivalries for power and influence. But it is clear that the Saudis will not try to advance American objectives in return for our arms. At most they will use their entree into our arsenals as a means of lording it over other Arabs—as they did with North Yemen.

In short, the sale of F-15 conformal packs to Saudi Arabia is not in line with a sound foreign policy, cannot contribute measurably to Saudi security, and offers no benefit that the United States can count on. Appeasing the Saudis' voracious appetite for modern weapons is no policy for a world leader.●

● Mr. EDWARDS of California. Mr. Speaker, I would like to take this opportunity to express my concern over the administration's plan to sell sophisticated arms to Saudi Arabia.

I find the plan to provide conformal fuel tanks and Sidewinder air-to-air missiles for the 60 F-15 jet aircraft which the Saudis have ordered inappropriate. It has become apparent recently that they also intend to provide AWACS equipment in addition to the above-mentioned armaments.

In my mind, the supplying of these arms represents a threat to the security of Israel. Consequently, I am totally opposed to this sale and will gladly support a resolution of disapproval when it is introduced by a member of the Foreign Affairs Committee.●

● Mr. HALL of Ohio. Mr. Speaker, early this year, religious leaders of Saudi Arabia called for a jihad, or holy war, against Israel. In calling for this war, they prayed to God asking for help to "cleanse Jerusalem of the Jews." Two months later, the administration confirmed its intent to sell Saudi Arabia AIM-9L air-to-air missiles and fuel and sensor tactical (FAST) packs for the 62 F-15 jet fighter aircraft the United States had agreed to sell to Saudi Arabia in 1978. I am deeply concerned with the offensive capability the F-15 jets will have with this new equipment. Therefore, I join with my colleagues in opposition to these sales.

In 1978, when Congress approved the original sale of the F-15's to Saudi Arabia, the jets were to be equipped with the AIM-7 Sparrow missile and the AIM-9 Sidewinder missile. Congress received written assurances from the Carter administration that there would be no other sales of "* * * systems or armaments that would increase the range or enhance the ground attack capability of the F-15."

Now, the sale of these extra-large fuel tanks and bomb racks will increase the range and firepower of the jets, bringing great concern to Israel. Saudi Arabia has been one of the greatest opponents of the Camp David accords and this sale could weaken the Arab-Israeli peace process.

The original sale in 1978 was a gesture of friendship on the part of the United States. In response to our good will, the Saudis raised their price of oil from roughly $13 to $32 a barrel. Now what are we to expect from our good will this time?

I doubt this sale will lead to oil price moderation or increased Saudi production. I challenge this dangerous policy of appeasement, even in the face of Saudi threats to cut oil production. An escalated arms race is not a desirable policy for the United States to promote in the Middle East. This sale will only heighten anxiety in an already tense area of the world, intensifying Israeli concern.

It has never been our policy to support regimes which wish to "cleanse Jerusalem of the Jews." Thus, it is most important that all my colleagues stand together in opposition to this sale.●

● Mr. LUNDINE. Mr. Speaker, I rise to join my colleagues today in expressing deep concern over the proposed sale of AIM-9L air-to-air missiles and fuel sensor tactical packs to Saudi Arabia for use on the 60 F-15's sold by the United States in 1978. Proceeding with this proposed sale can only serve to escalate the arms race in the Middle East without contributing to overall progress toward a long-term settlement of the Arab-Israeli dispute.

Sale of this equipment will violate an express commitment made in 1978 by the United States to Israel when the original F-15 sale was made to the Saudis. At that time, the United States indicated that the sale of F-15's was made solely to contribute to the ability of Saudi Arabia to defend itself against external threats from the Soviet Union and South Yemen. Effective defensive capability for the Saudis against these and any other credible potential adversaries remains intact without the sale of this advanced equipment. What this newly proposed sale will do, if permitted to go forward, is to add a destabilizing offensive possibility to the Saudi military capability which will provide a real and perceived threat to the security of Israel. This, in turn, will heighten tensions in the Middle East and leave the Israelis little recourse but to invest in countermilitary measures to check the Saudi escalation.

The long-term interest of the United States and our Western Allies is best served by a situation which provides a military balance between Israel and her adversaries until a framework for peace can be agreed upon and implemented. A major step forward toward peace in the Middle East occurred over the past 4 years with signing of the Camp David Peace Accord by Israel and Egypt. The Saudis, however, have not supported the peace initiative which grew out of the Camp David accords. In fact, they have been outspoken in their opposition to the accord. This raises legitimate questions regarding the advisability of proceeding with a sale which no one can deny places in the Saudi grasp an offensive capability which could result in an escalation, and not a moderation, of tensions in the Middle East. Moreover, the policy course the Reagan administration intends to pursue over the next 4 years in the Middle East is not yet clearly delineated. I would maintain that this sale without the benefit of such a carefully defined policy is ill advised.

The painful course of events in Iran over the past 3 years should further caution us against a policy in the Middle East which has a potential of promoting instability within the region. In Iran, in an effort to provide a buffer to check Soviet advancement in the Middle East, the United States provided a steady stream of advanced military equipment, thereby accelerating technology transfer and industrial moderation. We have already witnessed internal dissension within Saudi Arabia similar to that which eventually led to the downfall of the Shah in Iran. Sales of sophisticated military equipment and technology which further encourage the Saudi ruling family toward a rapid course of modernization and westernization can seriously threaten domestic and regional political and social stability.

No one would deny that fostering friendly relations with Saudi Arabia is very important to the United States, both because of the leadership role the Saudis exercise within OPEC and the importance of political stability in the Middle East. Nonetheless, friendship must be a two-way street, whereby the Saudis must recognize the paramount importance of a stable and secure situation in the Middle East, which includes the well-being of the

state of Israel. This proposed sale, in my opinion, reflects an insensitivity to one part of this equation.

In summary, Mr. Speaker, I would urge a careful reexamination of the proposed sale by this administration. I join efforts of my colleagues here today and in upcoming days to oppose this sale because I am convinced that it is counterproductive to progress toward a lasting peace in the Middle East.●

● Mr. FLORIO. Mr. Speaker, I am pleased that Mr. BLANCHARD and Mr. KEMP have called for this special order, so that we may express our concern about the dangerous implications of the proposed sale of F-15 enhancement equipment to Saudi Arabia. The proposed sale is contrary to both the long and the short term interests of the United States, Saudi Arabia, and Israel.

With this additional offensive equipment, Saudi Arabia will be able to monitor all of Israel's military activities. Israeli air superiority will be severely weakened. Moreover, the F-15 enhancement equipment represents a dangerous threat to the Middle East peace process.

There are additional compelling reasons for us to question the merits of the proposed sale. The sale will not strengthen the security of Saudi Arabia nor will it increase the stability of the entire region. Furthermore, there is no evidence that the sale will lead to oil price moderation or increased Saudi oil production.

The implications of the addition of yet another of the world's most sophisticated military devices to the Saudi arsenal are so dangerous, that I join with my colleagues in urging a halt to the proposed sale.●

● Mr. FROST. Mr. Speaker, I am disappointed with the administration's decision to upgrade Saudi Arabia's F-15 fleet and to sell her the AWAC system.

In one grand sweep, the administration has managed to renege on a promise made to Israel in 1978; it has tilted the balance of power in the Middle East toward Israel's longstanding enemies; and, it has placed the United States in the anomalous position of arming both sides in one of history's most deadly conflicts.

And for what purpose?

We have been led to believe that upgrading the Saudi's F-15's will strengthen her from possible attack by the Soviet Union. By doing so, we are told, the sale will have a stabilizing effect on the Middle East.

This rationale is sadly misguided. Since when does it make sense to deal with instability by raising the stakes in an already volatile situation?

Since when does it make sense to strengthen an Arab nation by enabling it to destroy Israel?

Israel has long been one of our most valuable allies. It is strategically located. Its military force is the strongest in the Middle East. It has an intelligence operation that has on several occasions channelled critical information to the United States and to Arab nations.

Does the administration propose to embark on a policy that rewards our allies by putting weapons into the hands of their adversaries?

And what advantages are to be gained from this sale? The United States has received no guarantees from the Saudis that our generosity will be in the form of military facilities or base rights on Saudi soil. We have no assurances that F-15's will not be targeted against Israel, or that the AWACS will not be used to coordinate an Arab invasion of Israel.

Nor have the Saudis reciproacted by recognizing the right of Israel and her people to live in safety. They have not committed themselves to the Camp David process, or to any effort that promises a meaningful resolution to the Arab-Israeli conflict.

Instead, they have championed the cause of the Palestine Liberation Organization—a body dedicated to the destruction of Israel.

The administration is sadly mistaken if it believes this decision will entice the Saudis away from the PLO. It will have the opposite effect—it will enable them to remain at arms-length from the peace process without fear of reprisal from their good friend the United States.

The United States must not put itself up for sale to the highest bidder. Friendship is a two-way street. The Saudis must understand that there is something to be gained from an alliance with the United States, but that nothing is to be gained that will work to the detriment of Israel.

I urge my colleagues to carefully consider the consequences of this decision. There are far better ways of improving our position in the Middle East. I urge that we instruct the administration to search for other options, instead of taking the easy way out and jeopardizing the State of Israel in the process.●

● Mr. TRAXLER. Mr. Speaker, in 1978 I opposed the sale of F-15 fighter planes to Saudi Arabia. Then I was told that these planes were needed by Saudi Arabia for defensive measures. I was also assured that the United States would not sell the Saudis multiple ejection bomb racks, FAST packs, AIM-9L's, KC-135 tankers or E-2C or E-3A AWACS command/radar planes. I am concerned that now the Reagan administration wants to sell these very same offensive weapons to the Saudis.

The addition of the FAST packs and the AIM-9L's will greatly improve the offensive capability of the Saudi Air Force. The 1978 sale of F-15's to the Saudis did not improve the stability of the region as the supporters of this sale had indicated. Certainly the sale of this sophisticated weaponry will only escalate the Middle East tensions. There is no threat to Saudi Arabia at this time to justify this sale. I urge that the Reagan administration reconsider this possible sale especially in light of its possible impact on Israel and the stability of the entire Middle East region. After the sale of the F-15's in 1978, we saw a rise in the price of oil from $12 to $32 a barrel, Saudi Arabia has continued to be a leading opponent to the Camp David accords and the Saudis have rejected American base arrangements in the Arabian Peninsula. I question whether the sale of these weapons will accomplish its proposed goals of deterring the Soviets in the Middle East or improving the position of the United States there.●

● Mr. WIRTH. Mr. Speaker, I rise to voice my opposition to the proposal to provide Saudi Arabia with additional military equipment for their F-15 aircraft, and the sale of airborne warning and control system (AWACS) E-3A aircraft, which is currently under consideration by the Reagan administration.

I have spoken previously on the floor against the sale of F-15's to Saudi Arabia because I felt that this sale would seriously jeopardize the delicate military balance in the Mideast, and our commitment to the peaceful settlement of the confrontation and hostilities there. The Congress went through a long and intense debate over the decision to sell 60 of our topline fighter/bombers to Saudi Arabia as a part of a package deal of sophisticated armaments to the Mideast. The Congress received assurances from both the Secretary of Defense and the State Department that these aircraft were for defensive purposes only and would not constitute a threat to Israel. Furthermore, we were assured that these planes would not be fitted with the sophisticated add-on equipment which the F-15 is designed to carry. Now the Reagan administration is considering the request by the Government of Saudi Arabia for the same equipment which we were assured would not be provided. In addition, the sale of the AWACS now being considered would give the Saudis the threatening capability to monitor Israeli activity from airspace safely inside Saudi Arabia.

There is only one nation threatened by the supply of armaments to Saudi Arabia—Israel. To supply these additional arms systems would be a direct contravention of the assurances made by the previous administration to the Congress in 1978. While we are working to bring Egypt and Israel closer together for the conclusion of the Camp David peace treaty, it cannot be in our

best interests to escalate the tension of the region by arming Saudi Arabia.

We must act rationally and responsibly, as a nation, if we are to insure that Israel remains a vital, democratic state and that the problems in the Mideast are resolved in an equitable and peaceful manner. I urge my colleagues in the House to join me in expressing to the Reagan administration our opposition to the pursuit of this proposal, which is contrary to American interests in the Mideast.●

● Mr. ERTEL. Mr. Speaker, the Reagan administration is considering the sale of weapons to Saudi Arabia which will substantially increase the pace of the arms race in the Middle East. The weapons currently under consideration include conformal fuel tanks and air-to-air missiles, which would increase the firepower and range of the Saudi's fleet of F-15 missiles, and the AWACS warning system, adding to defensive warning capabilities. I am particularly concerned about the implications of the sale of the F-15 enhancer weapons, significantly adding to the offensive power of the Saudi air force.

First, I contend that Saudi Arabia does not need these enhancer weapons. Saudi Arabia is a small country with weak defense forces, and would be unable to counter a major Soviet attack even with the F-15 enhancer weapons. A buildup of the American presence in the Middle East is probably the best way to ensure against the prospects of a Soviet attack, not the sale of the proposed weapons.

Second, the sale of these weapons certainly will lead to a new round of arms buildup in the Middle East. Conformal fuel tanks would increase the range of Saudi jets to 1,000 miles, placing most of Israel within direct reach of Saudi weapons and forcing Israel to match this new offensive level. Other nations, more radical and not necessarily pro-Saudi, would also be encouraged to increase their weaponry systems to counter the new Saudi offensive threat. In short the new Saudi systems would be used to justify an increase in arms throughout much of the Middle East.

Therefore, I am opposed to the sale of conformal fuel tanks and air-to-air missiles to Saudi Arabia. This sale cannot be expected to increase Saudi security, but it can lead to an unnecessary spiraling of arms buildup and a more devastating potential war in the Middle East.●

● Mr. BIAGGI. Mr. Speaker, I am participating in today's special order to convey my strong opposition and profound concern about this administration's proposal to sell advanced missiles, fuel and sensor packs to Saudi Arabia for use on the 62 F-15 fighter planes that the Saudis are currently purchasing from us.

Our discussions today are among the most important that we have undertaken in the 97th Congress. I will state categorically that whatever short-term benefits we feel we can derive from the Saudis in making this sale, will be completely negated by the harm we will do to our relations with our beloved friend and critically strategic ally Israel.

Let us first examine what is being proposed by the administration. It was 1978 when former President Carter first proposed—and the Senate later approved—the initial sale of advanced F-15 fighters to Saudia Arabia. Much concern was registered at that time relative to the offensive capability of these planes. Now 2 years later—the administration is proposing to greatly enhance offensive potential of the Saudis by equipping these aircraft with sophisticated Sidewinder missiles, extra fuel tanks, and bomb racks. The administration is also proposing to provide the Saudis with the highly technical airborne warning and control system, AWACS E-3A aircraft. In a military sense—AWACS would double the capacity of the F-15's we have already provided.

Let us examine in more detail the relationship between Saudi Arabia and Israel. Only last month, Saudi Arabia lent its support to a statement calling for a holy war against Israel. Saudi Arabia has and continues to refuse to endorse the Camp David peace accord. Finally, and perhaps the most dangerous point to be made is the Saudi's longstanding financial support of the Palestine Liberation Organization—a group whose primary objective is to destroy Israel.

In a more historical setting—Israel in its 33 year history has fought four bitter, bloody wars. Saudi Arabia has participated in three of them. The sale of this sophisticated equipment to the Saudis greatly enhances their ability to wage an individual attack against Israel or adds considerably to a more comprehensive Arab initiative against Israel.

This sale sends the wrong type of American message to the volatile Middle East. It places us in the position of bolstering the arms race in that region, for if we in fact provide these weapons to the Saudis, we will be forced to provide new military aid to Israel. We are unraveling the already precarious balance of power which exists in the Middle East. That balance of power is based on the strength and security of Israel. If we are arming Saudi Arabia—a noted foe of Israel—we are placing Israel at a potential military disadvantage.

It is also important to note that we are getting very little in return for this commitment of arms. There is no reason to feel that this sale will lead the Saudis to endorse the Camp David agreements. On the issue of oil—much ado has been made about the Saudis "moderate" oil pricing policies—and that should be considered as a justification for this sale. Consider this fact: in 1978 the price of a barrel of Saudi oil was $12.70. Today it is $32 or nearly triple the price. Is this something we should reward?

Finally in our discussions today, let us consider the nation we are proposing to sell these arms to—Saudi Arabia. There is reason to be concerned about their internal stability. The attempted seizure of the Grand Mosque in Mecca resulted in security reverberations felt around the world. We have no assurances that all is stable and secure even today in Saudi Arabia. This must be given the most serious consideration.

It is appropriate that we conduct this special order today as Secretary of State Haig visits Saudi Arabia. He just concluded talks in Israel and I am certain he heard first hand of Israel's concern about the sale of arms to Saudi Arabia.

To sell F-15's, improvement equipment, and AWACS systems to Saudi Arabia is not the way to reaffirm our friendship with Israel—it is a regressive step away from the triumphs of the Camp David accord. It is a poor investment of American money. We are getting very little in return as compared to the overall risks. For all these reasons I urge that the Senate vote down this proposal—and this administration shift its Middle East priorities away from a new arms race and back to peace and stability in this region.●

● Mr. AuCOIN. Mr. Speaker, last fall, I joined with other Members of the House in writing to the President to oppose a rumored sale to Saudi Arabia of equipment to enhance the capability of that Kingdom's 60 F-15's. Wisely, the administration at that time chose not to move ahead with the transaction. Little, if anything, has changed over the past 6 months: not conditions in the region, not the buyer, and certainly not the reasons why the sale is not in our best national interests.

Some say the region is unstable and we must shore up the Saudi defense capability. But let there be no doubt. This sale will not make Saudi Arabia more secure from internal or external threats. Nor is there any possibility that enhanced F-15's will enable the Saudi's to defeat a Soviet thrust into the region. In fact, this sale will only increase instability within Saudi Arabia and the Middle East.

Some say the sale will somehow strengthen the Arab-Israeli peace process. But let me remind my colleagues. Saudi Arabia has been and continues to be a leading opponent of the Camp David accords. We were assured in 1978 when the original sale of F-15's was approved that the planes

would promote Saudi moderation and involvement in the peace process. Since then however, Saudi Arabia has continued its support for the terrorist Palestine Liberation Organization, the Kingdom's leaders have called for jihad against Israel and it has condemned the Egypt-Israel peace treaty. To sell Saudi Arabia additional offensive equipment for its F-15's will not encourage moderation and would only reward intransigence.

Some who are legitimately concerned about the flow of oil from Saudi Arabia argue that the sale will assure a continuing supply of crude. But it is clear the sale will not lead to oil price moderation or increased Saudi production. If anything, it will appear to be appeasement in the face of Saudi threats to cut oil production. Because of a current world surplus of oil, Saudi Arabia is reported to be considering production cutbacks to prop up the current price of oil, even though it could assist in rolling back recent OPEC price increases to ease inflationary pressures in the West. No such effort is contemplated or expected.

Moreover, I should point out that after the F-15 sale in 1978, Saudi Arabia threatened to cut back on oil production if the Carter administration continued to build up a strategic petroleum reserve as mandated by the Congress. There can be little doubt that there is little give in the Saudi position on oil supplies.

Mr. Speaker, these are but three of the very sound reasons why this sale is not in our best interests, or those of Saudi Arabia or Israel. Last fall the proposed sale was canceled for these same reasons. Little has changed and I urge my colleagues to again reject this deal.●

● Mr. BOLLING. Mr. Speaker, I wish to go on record as disapproving the sale of any additional equipment to Saudi Arabia for the 60 F-15 jet fighter aircraft the Saudis ordered from the United States in 1978.●

● Mr. LENT. Mr. Speaker, it is with a sense of deep urgency that I join my colleagues in expressing strong opposition to the decision of President Reagan to sell additional F-15 equipment to Saudi Arabia; equipment which would give those highly advanced aircraft a greatly enhanced offensive capability. I congratulate my colleagues, the gentleman from New York (Mr. KEMP), and the gentleman from Michigan (Mr. BLANCHARD), for their efforts in arranging for this special order. I trust that it will serve its purpose in alerting the Reagan administration, and, indeed, the Nation to the seriousness of the problems this unfortunate decision has created.

I might say that I did everything in my power to block the original sale of the F-15's to Saudi Arabia in 1978. I am just as determined to prevent this further enhancement of Saudi Arabia's military capability. Indeed, I have already introduced a resolution, House Concurrent Resolution 90, to block this sale, and I urge my colleagues to support it. I have also written a letter to President Reagan expressing my opposition to the sale in the strongest terms.

Unfortunately, the Reagan administration now appears to be compounding its original error. This past week, we heard reports that the administration has tentatively decided to provide still more arms for the Saudis, in the form of five advanced AWAC surveillance planes.

Mr. Speaker, I regard these proposals as a most dangerous foreign policy mistake on the part of President Reagan and his foreign policy advisers. It disturbs me deeply that they do not seem to recognize the consequences of their action. In fact, the State Department's official justification for providing the Saudis with this added weapons capability is that there is a serious deteroriation in security conditions in the Middle East-Persian Gulf area.

Mr. Speaker, I ask the State Department how creating a greater security imbalance in the area can help prevent deterioration in security conditions? There is no question in my mind that adding to the Saudis weapons capability does create a security imbalance. Already we hear reports that Israel—understandably—is seeking additional F-15's and intelligence equipment from the United States to counter the additional weapons threat from the Saudis. If Saudi Arabia gets this equipment, its F-15's will be able to hit any target in Israel from any base in Saudi Arabia. No wonder Israel feels the need to add to its defenses. Why should not Israel feel threatened?

Nor would Israel be alone. Egypt, Iraq, and Iran also are capable of coming under Saudi Arabian attack with this new equipment. You can be certain they will all be seeking additional arms to meet this new menace.

In selling this military equipment to the Saudis, the United States is stimulating a new arms race in this most volatile part of the world. That certainly contributes to a further deterioration in security.

Mr. Speaker, there are two other important problems involved in this proposed sale. First, there is no doubt in my mind that the world will regard this as another attempt to appease one of the OPEC oil producers. Saudi Arabia, one of the leading oil producers of the world, has recently been threatening to reduce production in order to force oil prices still higher. It is a tragic error to believe that selling arms to the Saudis would appease their appetite for higher oil prices. Three years ago we were assured the sale of the F-15's would persuade the Saudis to moderate their oil price policies. In those 3 years, under Saudi Arabia's leadership, OPEC has more than doubled the price of crude oil, causing untold world financial problems. Such are the rewards of appeasement.

Second, and perhaps even more important, is the fact that if this sale is permitted, it will break a most solemn commitment made by the U.S. Government in 1978 to the U.S. Congress and to Israel. We were assured that if the F-15's were sold to the Saudis, no additional offensive equipment for the planes would be permitted to go to Saudi Arabia. Now, the Reagan administration wants to break this solemn commitment. I find that deplorable, and a foreign policy error of the worst kind.

Mr. Speaker, we are united here on the floor of the House in sending a strong protest to the President. I hope he will reconsider his unfortunate move. But, it appears at this time that it will be necessary for the Congress to take action to prohibit the sale of these additional weapons.

Mr. Speaker, I noted earlier in my remarks that I had introduced a resolution to prevent this sale. In the strongest terms I call upon my colleagues to support his move. We can prevent the Reagan administration from committing a grievous foreign policy error. We must stop the sale of additional arms to Saudi Arabia.●

● Mr. HERTEL. Mr. Speaker, the Middle East has time and again proven itself to be one of the most unstable areas in the world. To combat Soviet adventurism in that area we sold billions of dollars of our finest weaponry to our most stable, stalwart ally. Of course, that was Iran. It is obvious that we have not learned from our past mistakes. In light of the vast purchase of offensive weaponry that Saudi Arabia has made, its population would appear to be incapable of holding forces for the tanks and aircraft it has already obtained. One must question whether the Saudi Government is stockpiling weapons for future transfer to other countries or organizations.

The United States made this error in Iran and we should not repeat this error with the Saudi Government. Certainly there are major differences between the House of Saud and the Shah in terms of governmental administration, yet there are unsettling parallels. There are underlying potentials for inherent instability in this region which date back centuries, which can erupt without warning among ancestral rivals.

I am not convinced the sale of this weaponry adds anything to the defense of Saudi Arabia. Furthermore, anticipating the worst case, should some unexpected political upheaval

topple the present Saudi Government, this stockpile of some of the most advanced American weaponry could fall into the hands of fanatic revolutionaries or neighboring states with affiliations to the Soviet Union.

Alternatively, one can fashion numerous scenarios involving offensive use of these weapons which are not only nonconcurrent but directly opposed to U.S. interests. It is no understatement that Saudi Arabia rejects the Camp David accords and has been given to calls for jihad against Israel and the isolation of Egypt. Sale of these offensive weapons will have a dangerously destabilizing effect on this region. There is no doubt that this sale is an unquestionable threat to the existence of our ally, Israel. In the short term our country may be retrieving petro dollars for weapons, but is it worth precipitating an arms race in the Middle East which could lead to the destruction of our foreign oil supply and our few friends in this region?●

● Mr. BLILEY. Mr. Speaker, it appears that the administration intends to go through with the sale of F-15 fighter aircraft to Saudi Arabia. Many of my distinguished colleagues have raised questions, and expressed doubts, as to whether this is the wise and prudent course of action. Regardless of your views on this question, I urge you to join me in reaffirming our commitment to the continued existence and security of the State of Israel.

Israel is the lynchpin of the Middle East; the only stable democracy on whom the United States can depend. Throughout her history, Israel has remained a staunch and faithful ally of the United States. A strong, stable Israel acting as a bastion against radical and Communist aggression is essential to peace and continued American influence in the area.

Let us make it clear to Israel, her friends, and her adversaries that the United States will not tolerate aggression against Israel.

Let us reaffirm our commitment to never acquiesce in the establishment of a radical Palestinian State in the Middle East for without question it would fall under the control and dominance of the Soviet Union and threaten the very existence of Israel.

Let us never forget Isreal's faithfulness to the United States. We owe her no less.

Mr. Speaker, President Reagan has given America a new beginning both at home and abroad. Let us renew our commitment to the people of Israel as an integral part of that new beginning.●

● Mr. LEBOUTILLIER. Mr. Speaker, the United States has announced its intention to offer to Saudi Arabia a multibillion-dollar arms package to enhance the offensive capability of the 62 F-15 air superiority jet fighters ordered from the Carter administration in 1978.

While the exact details of this sale have yet to be announced, it is already clear the United States is going to considerable lengths to improve Saudi Arabia's offensive capability. To date the following items have been included in the package: First, the free world's most advanced short-range, infrared air-to-air missile, the Sidewinder AIM-9L; second, conformal fuel and equipment pods which will more than double the combat radius of the F-15 and make it possible to strike any target in Israel from any base in Saudi Arabia; and third, five AWACS—airborne warning and control system—enabling Saudi air forces to monitor Israeli defenses in depth and to coordinate any air offensive against Israel.

I have stood in opposition to this sale from the very outset and I now take this occasion to reaffirm my record on the matter.

Generally speaking, if the F-15/AWACS agreement should be approved, the stability of both Isreal and Saudi Arabia would be threatened. Moreover, the Soviet Union would be afforded increased opportunities to penetrate the Middle East and the adjacent land and sea areas. Without question, such developments would endanger vital U.S. interests and cannot be permitted.

To cancel the proposed arms sale—and to forestall these potential developments—I have taken the following actions.

On February 25—10 days before the offer of sale was announced by the administration—I joined a bipartisan group of 19 members of the House Foreign Affairs Committee in writing Secretary of State Alexander Haig, Jr., to express opposition to the possible sale of offensive equipment for the F-15's. In this letter, five principle arguments were set forth. In the first instance, it was pointed out that the proposed sale would go against assurances given Congress in 1978 by Secretary of Defense Harold Brown that offensive equipment would not be transferred to Saudi Arabia. Second, repeated Saudi attacks on President Sadat and the Egypt-Israel peace treaty—in addition to renewed calls for a holy war—jihad—against Israel—undermine America's real and legitimate interests in the Middle East. While Saudi Arabia labels the F-15 sale a test of friendship, such actions call into question the reciprocity of that friendship. Third, potential threats to Saudi Arabian security have actually diminished since 1978—witness the Iraq-Iran war—and today no country would be deterred from attacking Saudi Arabia solely because of this equipment. Fourth, the sale of the F-15's would have an adverse impact upon the security of Israel—America's principle strategic asset in the Middle East. Finally, the security of Saudi Arabia would be threatened in a regional conflict because Israeli security requirements may call for preemptive operations against the F-15's.

In short, the message to Secretary of State Haig was clear: the vital interests of the United States, Israel, and Saudi Arabia may all be adversely affected if this sale is allowed to go forth.

I also cosponsored House Concurrent Resolution 90 on March 24 in an attempt to stop the sale of this additional war material to Saudi Arabia. House Concurrent Resolution 90 states the disapproval of the U.S. House of Representatives of the proposed sale to Saudi Arabia of AIM-9L air-to-air missiles and the FAST auxiliary fuel and equipment pods for the F-15 fighter aircraft ordered by Saudi Arabia.

Most recently, I joined a bipartisan group of 13 Members of Congress on March 26 in signing a letter to President Reagan expressing concern that, by selling these arms to Saudi Arabia, the United States would appear to bow to Saudi demands without regard for its own strategic and economic interests. In this letter, particular emphasis was given to five key areas where Saudi Arabia initiated policies contrary to U.S. security and interests.

First, after the Iranian revolution, Saudi Arabia instigated rapid escalation of OPEC oil prices, has continued threats to reduce oil production, and has threatened reprisals if the President complied with a congressional mandate to resume filling the strategic petroleum reserve.

Second, while President Carter linked this arms sale to the cause of moderation in the Middle East, Saudi Arabia has opposed America's peacemaking efforts, has condemned the Egypt-Israel treaty, has organized an economic and political boycott of Egypt, and has paid several Arab governments to break off diplomatic relations with Egypt.

Third, Saudi Arabia finances the PLO—an international terrorist organization—to the tune of $1 million a day. The PLO is a major source of instability in the region and stands in opposition to the security and interests of not only Israel, but also the United States.

Fourth, in January, 1981, Saudi Arabia led the Moslem states at the Islamic Conference at Taif in calling for a holy war—jihad—against Israel. At the same conference, Saudi Arabia pressured Turkey to reduce its relations with Israel to the level of Second Secretary.

Fifth, after the 1978 arms sale, the White House and Pentagon officials indicated the ultimate objective of the agreement was to secure military bases

in Saudi Arabia. However, in spite of increased U.S. concern over the Soviet role in the Persian Gulf region, the Saudis have consistently and adamantly refused to satisfy this condition.

In short, the F-15/AWAC sale to Saudi Arabia has not led to more friendly relations with that kingdom. Rather, it has been yet another instance where concessions were exacted from the United States without regard to U.S. interests or security. Such actions—not friendly by any measure—only serve to endanger the long-term interests of all parties involved. And it ultimately endangers the pursuit of world peace.

Mr. Speaker, if the Saudis could be relied upon to oppose Soviet aggression in the Middle East, I would welcome any attempt to improve their capability to do so. However, it is my judgment that the history of the past decade must make one hesitant to judge affirmatively in the matter. Until Saudi Arabia drops its threats to reduce oil production, lends support to an Egypt-Israel peace agreement, abandons its hostility toward Egypt, ceases aid to the PLO, curbs its call for a holy war against Israel, and allows U.S. forces access to military bases in Saudi Arabia, arms sales to that country will have no positive benefit to either the security or the interests of the United States. To secure the national interest is, after all, what U.S. foreign policy is all about. To achieve less is either folly or appeasement. In either case, prospects for good are nonexistent.●

● Mr. HOLLENBECK. Mr. Speaker, I rise to join my colleagues in expressing my serious reservations over the proposed sale of conformal fuel tanks and Sidewinder air-to-air missiles to Saudi Arabia for their fleet of American F-15 fighter aircraft. I would also like to express my concern over reports indicating that the administration is currently considering the sale of advanced AWACS aircraft to the Saudis.

I firmly believe that the United States must never take any action which could undermine the security or stability of Israel—our only long-term democratic ally in the Middle East. Because the sale of this sophisticated equipment could potentially endanger both Israel's security and stability, I view this proposal with great alarm. In the hands of Israel's enemies, I know that this equipment would hamper Israeï's ability to counter a military threat.

The sovereignty, security, and integrity of the State of Israel is a moral imperative and serves the strategic interests of the United States. For this reason, I urge the administration to deny the Saudi request for this advanced equipment.●

● Mr. FISH. Mr. Speaker, I join my colleagues today in expressing my reservations over the proposed sale of advanced American weapons systems to Saudi Arabia.

Today, we are facing an escalation in the quantity as well as the quality of the weapons systems which may be offered for sale to Saudi Arabia. Sidewinder AIM-9L missiles and Airborne Warning and Control Systems aircraft are, without doubt, the technolgy of the future. NATO will start to introduce AWACS into its forces only this year. The Sidewinder all-aspect missile is the state-of-the-art in air-to-air weaponry. I fear that the sale of these weapons will result in all the other nations of the region—and not just Israel—seeking comparable weapons from our country, from Europe and from the Soviet Union. Foreign Minister Shamir does not believe it possible to redress the damage to Israel.

The AWACS is such a sophisticated aircraft that I doubt Saudi forces will be able to handle it without American advisers on board. And that leads me to another concern: Americans are flying AWACS right now in the Persian Gulf region, and the planes bear the U.S. Air Force insignia on their wings. Will Americans one day also be flying AWACS bearing the Saudi Royal Air Force insignia?

And what will happen once Americans are phased out of the Saudi training program? What control will we retain over this super-secret, super-sophisticated aircraft? I am worried about the transfer of such technology to a nondemocratic, relatively unstable regime. We learned what could happen to American weaponry already—when the Shah fell and our sophisticated systems in Iran were compromised.

Mr. Speaker, Saudi Arabia is an important oil-producing state. But let us remember that oil and petrodollars do not buy internal stability. And let us remember that in supporting the Saudi Government, we cannot ignore the effect these arms sales could have in destabilizing the whole region—Saudi Arabia included.

Finally, let us never forget the danger to our Nation's own security should these weapons systems ever fall into the wrong hands. For these reasons, I believe we must oppose the sale of the Sidewinder missiles, AWACS, and other sophisticated weapons systems to Saudi Arabia.●

● Mr. GLICKMAN. Mr. Speaker, recent reports indicate that the Reagan administration is considering the sale of advanced E-3A Sentry aircraft to Saudi Arabia. The administration would be making a grave mistake if the sale took place.

The E-3A Sentry airborne warning and control system (AWACS) is one of the world's most sophisticated aircraft. It provides airborne surveillance and communications capabilities through the use of special avionics and a large surveillance radar installed in a modified Boeing 707 airframe. It can remain on station for 6 hours at 1,000 nautical miles from base. The system can detect high-flying objects within a 350-mile radius and low-flying objects within a 250-mile radius. The E-3A is obviously highly technical and could play a strategic role in any Middle East or Persian Gulf conflict.

Maintenance of a strong U.S. presence in the Persian Gulf is an absolute necessity. Without it we could not assure access to petroleum production in that area, nor could we effectively counter the increasingly dangerous threat posed not only by the Soviets, but also by extremist Islamic groups. The administration believes that these strategic interests would be enhanced by the sale of the E-3A's to Saudi Arabia. The case is simply not convincing. Given the high level of technology that the aircraft represents, it is imprudent to transfer that kind of technology to other nations, regardless of their relationship to us. Imagine the scenario had the late Shah—a longtime ally—bought an E-3A which would now be in the hands of the Khomeini regime. A safer approach for the administration to pursue would be to encourage the use of U.S.-owned and operated E-3A's to provide necessary surveillance in the area. Allies—like Saudi Arabia—should feel secure with the information that would be provided. They also should understand our hesitancy about shifting control in these uncertain times.

I can understand the administration's desire to insure a friendly climate for U.S. interests in the Persian Gulf. We stand to benefit if strong ties with those strategic allies are maintained. It would be all-advised, however, for the E-3A to be sold to Saudi Arabia thereby transferring one of our most highly technical defense systems.●

● Mr. LOWERY of California. Mr. Speaker, in 1978, the Carter administration justified the sale of 62 F-15 fighter planes to Saudi Arabia as wholly defensive in nature, and assured the Congress that it would not sell the Saudis any other systems or armaments that would increase the range or enhance the ground attack capability of the F-15. The recent decision to supply Saudi Arabia with AIM-9L air-to-air missiles and conformal fuel tanks converts these F-15's to offensive weapons, hence, contradicting the very purpose for which they were initially being provided.

Unquestionably, a strong Israel is in the best interests of the United States. The proposed sale of add-on equipment to Saudi Arabia must be considered with this primary tenet in mind.

Clearly, the Reagan administration's program to expand military cooperation with Middle East nations is in the

best interests of the United States and Israel. The Soviet invasion of Afghanistan, the turmoil of the Iranian revolution, the Iran-Iraq war, and the Soviet presence in South Yemen and Ethiopia underscore the instability in the region.

In confronting Soviet designs in the Persian Gulf, the administration and the Congress must act decisively and cautiously. Several questions should be addressed before any sale of additional equipment is consummated with Saudi Arabia:

First. Will this sale enhance the security of Saudi Arabia or will it increase instability within the region?

Second. Will the sale lead to oil price moderation or will it appear that the United States is bowing to Saudi threats to cut oil production?

Third. Will the sale strengthen the Arab-Israeli peace process or will it act to further deteriorate relations in the Middle East?

Fourth. Is the best way to confront Soviet adventurism in the gulf through a series of bilaterial arms sales or by establishing a strong U.S. naval presence along with United States military bases in the Arabian peninsula?

My intention is not to offer specific answers, but to raise these issues to illustrate the complexity of the problem at hand. To sell Saudi Arabia additional offensive equipment for its F-15's may be promoting instability in the region rather than bolstering security. In the interests of the United States, Israel, Saudi Arabia and the entire Middle East, I encourage the Reagan administration and my colleagues to reexamine this issue in light of the foregoing questions.●

● Mr. KRAMER. Mr. Speaker, I rise to express my concern, shared by many other Members of this and the other body, about administration plans to sell Saudi Arabia military equipment which will augment that nation's offensive capabilities.

It seems to me that the basic question which needs to be asked in this debate is what purpose is intended to be served by making this highly sophisticated equipment available to Saudi Arabia? What imminent threat is that nation subject to which demands this level of support from the United States? Is it likely that Iran or Iraq will soon launch an assault against Saudi Arabia; if so, is this level of equipment essential to repel such an assault? Are the Soviets now aiming their sights at the Saudi oil fields? If that is indeed the case, then can we assume that the delivery of this equipment will be sufficient to stave off that threat?

If it is in our national interest to prevent Saudi Arabia from falling under Soviet domination—and I believe it is—can we best assure realization of that objective by delivering our highest military technology to the Saudis, when there is substantial question as to whether it can be effectively used by Saudi forces and further question as to whether it might be used in ways not intended by the United States? Or, should we be focusing on other alternatives to meet our primary objective in the area, such as augmenting our own presence to deter further Soviet adventurism?

We must not lose sight of the principal issue in the debate over whether the Saudis have been friends in moderating oil price hikes, or foes of our Mideast peace efforts; whether we should proffer this equipment as an inducement to future Saudi support or withhold it in recognition of Saudi Arabia's past actions which may have been contrary to our policies in the Mideast; whether we should stand up to veiled blackmail threats or take what steps are necessary to preserve our economy from the further shocks of drastically increased oil prices.

The principal issue here is, does Saudi Arabia require this highly sophisticated equipment, which has only been made available to our NATO allies, to meet an imminent threat against its borders? What assurances do we have that the equipment will be used for such defensive purpose only? Given the experience in Iran, how can we be sure that this equipment will not end up in enemy hands—either through diversion or loss? Will those assurances in fact require increased U.S. presence in the area at some point in the future? If, ultimately, we can only guarantee protection of our national security interests through our own presence, what advantage do we gain by making available to a government which many feel is unstable at best, unfriendly at worst, military technology which may further destabilize this critical area; which may constitute a more serious threat to our longtime ally, Israel, than a deterrent to the Soviet Union or other potential attackers; and which may end up in our adversary's hands?

I submit, Mr. Speaker, that the burden of proof rests with the administration to show that this equipment is necessary to meet a very real threat against Saudi Arabia, and that it will tangibly result in meeting our own national security interests in the Middle East.●

● Mr. SOLARZ. Mr. Speaker, like many of my colleagues, I was deeply disturbed by the decision of the Reagan administration to sell Saudi Arabia sophisticated new hardware for its F-15 aircraft. To provide Saudi Arabia with air-to-air missiles and supplemental fuel tanks, as the President has proposed, would jeopardize the air superiority which has been the linchpin of Israeli security. I believe that those of us pledged to preserve the safety and survival of Israel must resist the sale of this new weaponry to Saudi Arabia.

Three years ago, I strongly opposed the Carter administration's efforts to sell the F-15's to Saudi Arabia. I felt then, as I do now, that Saudi possession of these advanced fighter aircraft held potentially ominous consequences for Israel. Although opponents of the sale in the Congress were unable to block the sale of F-15's in 1978, we did succeed in exacting explicit assurances from the highest officials of the executive branch that we would not give the Saudis additional equipment such as the AIM 9-L air-to-air missile or supplemental fuel tanks which would make the aircraft even more dangerous to Israel.

Without these ironclad guarantees from Secretary Brown, Congress would never have approved the initial sale of the F-15's. Yet within weeks of taking office, the Reagan administration has declared itself unbound by these assurances and has been unwilling to respond in any meaningful way to Israel's legitimate concern about providing the Saudis with the deadliest air-to-air missile in the world.

The Reagan administration cites changing circumstances to justify the sale of this new equipment to Saudi Arabia. But the fact of the matter is there is simply no external threat to Saudi security which requires the acquisition of an offsensive capability for the F-15's. Indeed, the Saudi security situation has probably improved since 1978 as a result of the Iran-Iraq war. It is far less likely that either of these two combatants would attack Saudi Arabia while they are at war with each other. Nor is there any other nation in the region which poses a significant threat to Saudi security.

The administration argues that Saudi Arabia's possession of the new equipment will help to counter any future Soviet thrusts in the region. While the possibility of Soviet military moves in the Persian Gulf must be taken seriously, it is simply disingenuous to assert that the Saudis can deter such an attack—with or without new air-to-air missiles and fuel tanks. Clearly, only the United States can thwart a Soviet move on the gulf.

Furthermore, while the United States certainly has an important stake in the stability of Saudi Arabia, we must recognize that the most serious challenge to Saudi rule comes from within the country. Our experience in Iran should have indelibly impressed upon us that arming a nation to the skies with the most advance weapons in our arsenal offers scant protection against dissolution of a government from internal tensions.

Another contention habitually advanced on behalf of arms sales to the Saudis is Saudi Arabia's alleged moderating influence in the Middle East.

This assertion resurfaces with astonishing regularity in each American administration. Yet, as Israeli Foreign Minister Yitzhak Shamir recently noted:

Saudi Arabia has participated in all the wars against Israel. It orchestrated the conference which declared jihad against us. It is the major financier of the PLO's terrorism. It works persistently and aggressively against the peace process. Any additional military equipment given to it will ultimately serve all of the extremist elements in the region that oppose peace and stability.

That is the record President Reagan proposes to reward with new lethal hardware for the F-15's. And, to make matters worse, the administration intends to provide this equipment without any assurances whatsoever from the Saudis that they will support the peace process and refrain from financing the terrorist activities of the PLO.

In military terms, the new missiles and fuel tanks will allow the Saudis to strike at any target in Israel. They will permit the Saudis to keep the F-15 aloft for 3 hours, rather than one half-hour, as is presently the case. They will significantly increase the number of bombs which each plane can drop. And they will give Saudi Arabia a critically important tactical capability: The new missiles can be launched from any direction, thereby making it much easier for Saudi pilots to down Israeli planes.

To make matters even worse, it now appears that the National Security Council has approved and sent to the President's desk a proposal to sell five ultrasophisticated, AWACS electronic surveillance aircraft to Saudi Arabia. The addition of AWACS to the Saudi arsenal will constitute even more of a threat to Israel's security than the fuel tanks or the AIM 9-L missiles. Without leaving Arab territory, these aircraft can monitor Israel's entire airspace, coordinate attacks against Israel by all of the air forces of the eastern front confrontation states—Syria, Jordan, Iraq, and Saudi Arabia—and provide valuable intelligence data on Israeli ground troop positions.

The administration must realize that providing this new equipment to the Saudis seriously compromises the security of our only reliable democratic ally in one of the most volatile regions of the world. How does President Reagan intend to redress the imbalance he is about to create? Remarkably, by announcing he would sell Israel planes it has had a standing offer to buy—at rates it cannot afford.

Israel has purchased 40 F-15's from the United States, and has so far chosen not to exercise an option it had been given by the Carter administration to buy up to 20 more. President Reagan now says Israel can buy 12 F-15's from our country—which it has had the right to do for the last 2 years—and proposes to help Israel finance the purchase of these planes by providing it with a $600 million loan which Israel would be required to repay at market rates of interest. Since Israel could have gotten these planes by borrowing the necessary money on its own, it would have long since done so, if it had been able to afford them. But given the fact that it is already drowning in debt, and simply cannot afford to pay back such large sums at prevailing rates of interest, Israel is unlikely to find President Reagan's suggested compensation of $600 million in nonconcessional credits for 12 more F-15's a viable way to acquire these essential aircraft.

The President's offer, I am afraid, is a political gesture calculated to silence Israel's defenders rather than to shore up Israel's defenses. If the administration is genuinely interested in compensating Israel for the additional security threat created by the sale of offensive equipment to Saudi Arabia, the least it should do is give Israel the funds to buy the 12 additional F-15's on a grant or concessional basis.

In view of the grave consequences that the proposed sale would have for Israel's security, as well as the administration's failure to provide meaningful compensation, I joined a majority of my colleagues in the House Foreign Affairs Committee in sending a strongly worded letter to Secretary of State Haig stating our unequivocal rejection of the plan to provide Saudi Arabia with these weapons. It is our intention to introduce a resolution of disapproval to block the sale immediately after President Reagan formally notifies the Congress that the sale is going forward.

The effort to defeat this sale will be a difficult battle. But it is an effort which we must, in good conscience, undertake and press vigorously. Congress has a responsibility to honor what the President has unfortunately overlooked—our commitment to the security of Israel. We simply cannot let the President's decision go unchallenged.●

● Mr. McGRATH. Mr. Speaker, I join with my colleagues in opposing the proposed sale of enhanced F-15 equipment to Saudi Arabia, and I want to commend my colleagues, the gentleman from New York (Mr. KEMP) and the gentleman from Michigan (Mr. BLANCHARD), for taking this special order to address this critical issue.

On March 10, I joined with Representative NORMAN LENT in sponsoring a resolution to disapprove the proposed sale. Even before the sale of AWACS became part of the sale, I was convinced that the sale would be a serious foreign policy mistake, and I am still hard-pressed to find one single reason to justify it.

As in 1978, when the original sale of F-15's to Saudi Arabia was approved by Congress, the Saudis are calling this latest sale, "an important test case in relations between the two countries." I am still waiting for the first evidence that friendship with Saudi Arabia is not a one-way street.

In a recent article in National Review, Peter Lubin aptly stated:

After two years of uninterrupted and astronomical price hikes, after the resolution condemning our rescue mission, after the efforts to deny us bases, after open calls for jihad and support for terrorism, after backing the Iraqi invasion of Iran, after meddling with our arms supplies to North Yemen and facilitating Soviet bloc supplies to Iraq, after the attempt to throttle our Strategic Petroleum Reserve, after all this, the Saudis want to test whether America will jump once again through the Saudi hoop.

In 1978, the Carter administration stated in writing that it had no intention of supplying Saudi Arabia any systems or armaments which would increase the range or enhance the ground attack capability of the F-15. This proposed sale clearly violates the assurances given Congress less than 3 years ago, and threatens this Nation's credibility. The sale will not enhance the Saudis' self-defense capabilities, because it faces no immediate external threat. It will, however, give the Saudis the capability of striking anywhere in Israel, and given the Saudis' strong opposition to the Camp David accords and militant statements regarding Israel, there is justifiable concern about Israel's future security. The addition of AWACS to the package further adds to the dangers inherent in the proposed sale.

Mr. Speaker, in the past several years, we have seen few evidences of Saudi Arabia's goodwill. It is still clear that Saudi Arabia is bent upon doing what it is in Saudi Arabia's best interest to do. If this sale is approved, what will be the next test of America's friendship?●

● Mr. FORSYTHE. Mr. Speaker, I rise today to add my protest to the proposed sale of offensive weapons to Saudi Arabia.

When the United States originally sold the F-15's to Saudi Arabia in 1978, the executive branch assured the Congress and the Israeli people that additional equipment to enhance the military capability of the F-15's would not be sold to Saudi Arabia. That commitment is now in danger of being violated.

The proposed sale is being explained as a means of countering activities of the Soviet Union in the Middle East and as a means of stabilizing the region. However, the Saudis face no threat of invasion from South Yemen, Libya, Iran, Iraq, or its other neighbors and it is not credible that the Soviets would attack Saudi Arabia from an Afghanistan base. Indeed, if the Soviets were to attack the Saudi oilfields, such an act would be construed as a direct threat to the Western world.

The Saudis would not be able to repel such an attack, even with the additional capability which would be provided by the sale of the AIM-9L air-to-air missiles and the fuel and sensor tactical (FAST) packs. Only the United States could do so. A more constructive means of deterring Soviet aggression in the Middle East and stabilizing the area is to strengthen United States bases and naval operations in the Persian Gulf area.

In addition, the sale of this military hardware seriously threatens the security of Israel. With the AIM-9L's and FAST packs, Saudi Arabia would be capable of hitting Israeli defenses and targets with greater force from more secure bases within Saudi Arabia. And Saudi Arabia does remain a threat to Israel. Saudi leaders continue to voice their opposition to the Israeli state and to call for a holy war against Israel.

The Saudis have said that the AIM-9L's and FAST packs sale is a test of U.S. friendship. I remind the Saudi Government that friendship is a two-way street. On our side, we would like to see Saudi Arabia support the Egypt-Israel peace treaty and halt their attacks on President Sadat.

We cannot allow our foreign policy or the safety of our allies to be held hostage to the demands for tests from other countries. Our credibility is at stake. We have already pledged to Israel that this type of military hardware would not be sold to Saudi Arabia. We cannot retreat from that position.●

● Mr. PORTER. Mr. Speaker, with respect to the prospective addition of fuel tanks and offensive capabilities to Saudi Arabia's F-15 order, let me say this:

We have heard the potential threat to Israel implicit in this sale explained. We have been reminded of the 1978 executive branch promise not to add precisely this equipment to the Saudi contract. And warnings have been voiced that this material may someday end up in the hands of enemies not only of Israel, but perhaps even enemies of the United States. Mindful of these caveats, I would like to add my own concerns.

I am pleased by this administration's efforts to prevent Soviet expansion into the crucial Middle East. And I know that we all share the conviction that nothing would better serve the twin causes of peace and Western security than a firm—if quiet—alinement between the moderate Arab states, the United States, and Egypt and Israel. Conscious of the regional conflicts there, I realize that this alinement will not be achieved easily. I do believe, however, that it is possible. We must then ask ourselves whether or not this sale hastens the coming of that alinement. I think that it does not.

The timing of this offer, coming so soon after Crown Prince Fahd's call for a jihad against Israel gives one pause. Will this sale not be interpreted as an unspoken signal that this Nation will not prod the Saudis toward peace? Will this sale not be interpreted even by some as an endorsement of Saudi negativism? If indeed the Saudi threats are merely rhetorical—as some have told us—we must seriously inquire of ourselves whether we wish to reward even rhetoric which plainly does not serve the cause of peace.

Three years ago, President Carter assured Congress that the F-15 sale would bring the Saudis into the Camp David process. This has not ocurred. In fact, the sale seems to have had no effect save perhaps to retrench Saudi opposition to the Eygptian-Israeli peace.

Mr. Speaker, I do not know whether or not I could support this sale in a climate of greater Saudi cooperation. I know that I cannot in the absence of any indication that Saudi cooperation is in sight.

We have a long-standing and close relationship with the Saudis. We have a vested interest in their stability and sovereignty. Our friends in Arabia should accept the genuineness of this concern and allow the United States to play its ineluctable role of guarantor in good faith. I am mindful of the great Saudi hunger for absolute independent self-defense; however, I recall an equally great American desire for an energy insurance policy called the strategic petroleum reserve, and the Saudi obstruction of its rapid development last year. It is time for both parties to this relationship to acknowledge the very great interdependence between us.

I am not opposed to legitimate Saudi defense growth. I am against increasing both Saudi latitude and capability for offensive potential against a central American ally in the region, in the absence of a firm agreement on peaceful intent.

Should the Saudis receive the F-15 enhancement materials they seek now, then it will become especially important that airborne warning and control system aircraft not be made available to them for purchase as well. Our closest and oldest European allies rely upon enhanced F-15's with AWACS for their tactical air defense and offense. NATO is only this week receiving its first alliance-owned AWACS aircraft.

Providing this powerful system—the marriage of America's best two technological marvels of the air—to the Saudis on a bilateral basis should only be considered in the event of an international emergency of a most dire nature.

Rather, we should continue indefinitely air defense coverage currently afforded the Saudis by American Air Force AWACS now based in Saudi Arabia. In fact, I would welcome a formal American commitment to this "eye in the sky" role as a first step toward effective integrated regional defense. The aircraft themselves, however, as well as final determination of how and against whom the intelligence from them is used, must remain with this Nation while our presence there in this unarmed mode symbolizes our absolute dedication to Saudi protection.

Should the argument be made that a rejection of these sales indicates a lack of U.S. friendship, my colleagues should note that there are over 4,000 Americans already in Saudi Arabia in advisory and technical defense roles, with more soon to follow as the Saudi F-15 wing begins arriving from McDonnell-Douglas with its corps of maintenance people. Our Army Corps of Engineers is also involved in over $10 billion worth of military infrastructure projects in Saudi Arabia, representing the largest American commitment to a foreign power since Vietnam. Our friendship and close relationship to the Saudis is being proved every day.

Mr. Speaker, at this point in time the potential for positive developments in the Middle East is great. As we negotiate the long road ahead we need always keep an eye on the horizon and our ultimate destination of effective and peaceful interdependence between the United States and its Mideast friends. Let us not begin down that path with a step in the wrong direction.●

● Mr. OTTINGER. Mr. Speaker, I rise in strong opposition to the administration's proposal to sell offensive components for 62 F-15's to Saudi Arabia. The implications of this sale for Israel's security and our security are indeed ominous.

The very arguments that were used to justify the original sale of 62 F-15's in 1978 are being used today by President Reagan to justify selling the additional components. These arguments are less valid today than they were 3 years ago.

In 1981, as in 1978, we are told that the Saudi's considered the sale of advanced weaponry as a test of their friendship with the United States. Yet they consistently reject U.S. base arrangements on the Arabian Peninsula, condemn the Egypt-Israel peace treaty, contribute financially, politically, and militarily to the most rejectionist of Arab States. For the Saudis, friendship is not reciprocal.

As to the argument that the sale will encourage the Saudis to moderate their positions on the Arab-Israel conflict, one must note the Saudi regime's call for a jihad, holy war, against Israel only 1 month ago. Indeed, since the original sale of F-15's in 1978,

Saudi intransigence to the Middle East peace process has grown. The same goes for moderating their position on oil pricing and production. Just after the 1978 sale, the Saudis threatened to cut back on oil production if President Carter continued to build up a strategic petroleum reserve as mandated by Congress. It is clear that whatever weapons we sell to Saudi Arabia, they will continue to use their oil weapon against us.

The administration argues that the Saudis must be adequately equipped to resist external threats from the Soviet Union, Iran, or other Arab nations. This might have held some credence in 1978, but today it is simply ludicrous. There is virtually no likelihood of an invasion of Saudi Arabia from other Arab countries. Iran and Iraq are preoccupied with each other, and Iraq and the Saudis have established a rapprochement since 1978. Moreover, the Saudis will not be able to use the F-15's against Soviet targets because they are too far away.

The argument that this sale is wholly defensive in nature is most bothersome to me. The sale of these components will permit Saudi aircraft to operate out of any base in Saudi Arabia against any target in Israel. The enhanced F-15's will severely undermine Israel's air superiority. In another coordinated Arab attack against Israel, our best ally in the Middle East would not only have to resist conventional forces but also deploy aircraft to defend against strikes by the F-15's. This will raise the level of Israel's required military preparedness even further, escalating tensions between Israel and her Arab neighbors.

Mr. Speaker, the United States must not repeat the errors it made in Iran by selling too much advanced weaponry to an unstable client faced with internal discontent rather than external threats. This proposal is ill advised, will not enhance Middle East stability or U.S. interests, and I strongly urge my colleagues to support any resolutions of disapproval with respect to this sale.●

● Mr. HUGHES. Mr. Speaker, I rise today to join my colleagues in expressing deep concern over the recently proposed arms sale to Saudi Arabia which would include airborne warning and control system E-3A aircraft. Until now, only the U.S. Air Force and NATO have been provided with AWACS. Such a sale to Saudi Arabia will mark the first time the system would appear in the arsenal of a Middle East state.

According to a recent press account, U.S. AWACS now on temporary assignment in Saudi Arabia can see any object moving at more than 80 miles an hour within a 250-mile radius. That article, which appeared in the San Francisco Chronicle, went on to say, "if there is a Mercedes moving along the highway, the AWACS can see it."

The plane has look-down radar which can see downward and differentiate moving targets from terrain or background clutter. This radar can detect up to 600 targets and the onboard computers on the planes can define at least 240 in terms of size, altitude, identity, speed, and direction.

According to Department of Defense analysts, the recent sale of AWACS to NATO will have the effect of more than doubling NATO's entire interceptor force. In a major exercise conducted at Nellis Air Force Base in Nevada, two E-3A's were able to coordinate 134 friendly aircraft and stand off 274 enemy planes.

Clearly the sale of these extraordinary planes to Saudi Arabia will threaten the balance of power in the Middle East. Their presence in Saudi Arabia presents the Israelis with a grave and difficult situation since AWACS far surpass any equipment in Israel's air force. AWACS could see all of Israel's airfields, aircraft, and defense systems and could coordinate attacks against Israeli installations by Syria, Jordan, and other Arab states.

The friendship of Israel has always been highly valued by our country. Many of us believe that it is important not only strategically, but also morally, to strongly support the only democracy in the Middle East. Recent tragic experience in selling sophisticated weapons to politically unstable Middle Eastern nations should make us even more careful in determining what weapons we will sell to which nation.

And, indeed, we should be asking ourselves why we are selling these arms to Saudi Arabia, since we are just this year making them available to our NATO allies. Does Saudi Arabia permit the stationing of American troops in the region? Have the Saudis agreed to moderate their oil pricing or supply policies? Have they cooperated in the Camp David accords? Do they refuse financial support to the PLO terrorist activities? The answer to all of these questions is no.

What then is the quid pro quo for this plane sale? In a column by Evans and Novack published in yesterday's Washington Post, it was pointed out that West Germany and other NATO states that have been sold AWACS automatically share with the United States all data picked up by the radar ships. Apparently no such arrangement has yet been negotiated with the Saudi Government.

I oppose the sale of AWACS to the Saudis. It is an improvident decision. Indeed, once again we find ourselves in the position of giving much and getting little, a position this President promised would not occur in his administration. I also oppose the sale because it undermines the State of Israel, a trusted and valued ally, and because I believe it will lead to even greater instability in an already dangerously unstable part of the world.●

● Mr. BEDELL. Mr. Speaker, Secretary of State Alexander Haig stated in his confirmation hearing that there are three essentials to American foreign policy: consistency, reliability, and balance. By selling offensive jet fighter equipment to Saudi Arabia and by proposing to sell them AWAC aircraft, the administration has managed to undermine all three.

Consistency is undermined because the arms sale will weaken the Camp David peace process. The Camp David accords remain as yet the best hope for a comprehensive peace settlement. American interests in the Middle East should only be pursued when in harmony with the accords. Unfortunately, Saudi Arabia continues to lead Arab opposition to Camp David, while punishing President Sadat by withholding economic and diplomatic aid. These arms sales will thwart the Camp David peace process by rewarding Saudi intransigence.

America's reliability will be undermined because the administration is threatening to break solemn promises to both Congress and the Government of Israel. In 1978, when the initial F-15 fighter sale was proposed, President Carter gave explicit assurances that add-on offensive systems would not be included in any future sales. I have already spoken out sharply against the administration's policy reversals in regard to the Law of the Sea negotiations. Regrettably this renunciation of past commitments was not an isolated incident. There is now the real danger that American negotiators will be handicapped by a perceived lack of credibility, particularly when commitments are expected to run from one administration to the next.

Finally, the goal of balancing our Middle East interests will be undermined because these arms sales will fuel that region's arms race at a time of tension and instability. The Iraq-Iran War, for example, continues unabated. Indeed the Saudis are reported to be arming the Iraqis. As a result, Iran may well view Saudi Arabia, armed with offensive F-15 equipment and AWACS, as a strategic threat. Under these conditions, it simply makes no sense to spur a military buildup.

Based on these three fundamental precepts of foreign policy, I urge the administration to honor its commitments and halt its sales of offensive weaponry to Saudi Arabia.●

● Mr. FOWLER. Mr. Speaker, I come before you today to strongly oppose the proposed sale of auxiliary parts for the F-15 fighter-bombers to Saudi Arabia.

The proposal to sell the Saudis extra fuel tanks and missiles, and the possi-

bility of future sales of the airborne warning and control systems (AWACS) E-3-A airborne command centers, raises grave questions.

Fueling another arms race in the Middle East will further strain the economy of the region, will exacerbate tensions, and will place greater emphasis on military solutions to the political problems of the area. None of these will contribute to the stability, prosperity, and cooperation in the Middle East that are the necessary conditions for peace and the achievement of other American objectives in the region.

In 1978, I opposed the sale of 60 F-15 fighter-bombers to Saudi Arabia. At that point, I did not feel that the Saudis had any legitimate self-defense needs for one of the most sophisticated aircraft in the world. Today, I still am not convinced of their need. Be that as it may, at the time of the original sales we were assured that the United States would not support any upgrading of the range or weapons capabilities of the Saudi F-15's that would increase Israel's vulnerability to these aircraft. Now, of course, we are being asked to support precisely such a move.

We must not hastily approve any action that could severely damage the security of Israel, our oldest and most stable ally in the Middle East. We must act in the interests of an overall peace in the Middle East, and we must act in the interests of the United States. In my view, these two are closely related.

I ask you, my colleagues, to please join in the effort to block this proposed sale of arms to Saudi Arabia.●

● Mr. SMITH of New Jersey. Mr. Speaker, the Middle East is, without a doubt, the most explosive part of the world. Here are many nations with a very real sense of their own history who are still struggling with their new independence, who have great grievances—real and imagined—and who, in some instances, are getting very wealthy on the money paid for their oil. These countries are military dictatorships, feudal monarchies, or one party states. There is only one democracy—Israel.

Our State Department has announced its approval of a plan to upgrade the F-15's we have sold Saudi Arabia, equipping them with Sidewinder missiles and refueling capability. Now we are also going to sell the Saudis four AWAC aircraft, very sophisticated equipment that we rather jealously guard.

I know the arguments that Saudi Arabia needs this capability for defensive purposes after the Soviet invasion of Afghanistan and events in Iran. But it seems to me that we are increasing risks and dangers, not lessening them

First, let us take the matter of what these planes are going to be used for. The Saudis say they want them to repel possible aggression against themselves or the states of the Persian Gulf. All well and good. However, we know these planes can be used against Israel. With the refueling capacity they would be given, the Saudi F-15's would reach Israeli airspace.

I know the Saudis deny this will happen. But Israel, I think, has reason to be concerned.

The Saudis have not been a voice for peace and conciliation in the Middle East. Saudi oil money is being used to underwrite Yasir Arafat and the PLO. The Saudis have publicly proclaimed this fact. Some will argue the Saudis are only trying to buy off radical elements. But the Saudi Government is certainly playing with fire in this subsidizing of one of the most radical forces in the Middle East. The Israelis are not going to be reassured by Saudi promises when the murderers of their women and children are being paid by the people we propose to give these weapons and new planes to.

What about the AWAC planes? The radar equipment of these planes can be used to assist the warplanes of other Arab States in raids on targets inside Israel. In announcing the sale of these planes to the Saudi Arabians, the State Department has taken a major step toward escalating tensions in the Middle East. I firmly believe the result of this step will be an increase in Israeli preparedness; in other words, yet more tension in an area where there is already too much tension.

The Israeli Government has already said it opposes the sale of the AWAC planes. The Israelis were willing to accept the missiles and fuel tanks on the F-15's, but they are not willing to put up with the AWAC planes. I am not saying we ought to bend our policy to the desires of Israel—what I am saying is that we should take their fears into account, since they are our allies, and since they may increase their own defense capabilities as a result of this action.

With elections in Israel occurring next month we should use this opportunity to reassure the Israelis about their security. We want to expand the peace process in the area. This is what we are endangering. Whichever party wins the Israeli elections may feel it cannot make the extra moves on the road to peace after the sale of these aircraft, and the decision on enhancing the capabilities of the F-15's.

Second, what have the Saudis given us in return for this aircraft? We have asked the Saudis for access to their bases, so we can develop a regional policy of resistance to Soviet advances. The Saudis have refused. Even at this time they are still refusing. Now the Saudis say they want our aircraft for defense, yet they refuse to cooperate with us in arranging this defense. I would feel a great deal more secure myself if we had some way of keeping our eyes on the sophisticated weaponry we are giving the Saudis. Yet the Saudi Government still refuses us base rights in their country.

The Saudis have also played their own game on the price of oil. While they have sometimes opposed the massive increases other OPEC members have asked for, the Saudis have never been consistent in the matter of oil prices. As often as not they have been strong supporters of price hikes. This, of course, is their right, but it is something we have to think of when we are discussing our ties with Saudi Arabia.

Nor have the Saudis been very helpful in the Middle East peace negotiations. They have not joined the Camp David process—if anything, they have been among its most intransigent opponents. We have said on occasion we were trying to win the Saudis over by giving them these weapons they asked for—at any rate, that was the rationale the Carter administration used when it sold the Saudis the F-15's in the first place. Yet the Saudis have never participated in making peace. They supported the expulsion of Egypt from the Arab League. Last January, just before the inauguration of President Reagan, the Saudi Crown Prince urged a "holy war" to drive the Israelis from Jerusalem.

I hardly think the attitude of the Saudis is such that we should rush to give them weapons, or enhance the weapons they have, when we do not get mutual concessions.

My final point in considering this sale is the matter of the stability of the Saudi monarchy. We have seen what happened in Iran, where we thought the Shah was very strong. Saudi Arabia is a feudal monarchy rapidly being modernized. There are great tensions and stresses in Saudi society. Students who study abroad return discontented. Saudi women are dissatisfied. There are a great number of foreign workers in Saudi Arabia, particularly Palestinians, who are radicalized, and opposed to the Saudi monarchy.

We could find ourselves in a position similar to that we found ourselves in when Vietnam and Iran fell to hostile forces. A large part of our sophisticated equipment fell into the hands of those who are enemies of the United States. I do not want to see this happen again. A radical Arab regime, taking power in Saudi Arabia, could use our weapons against Israel or the states of the Persian Gulf. We would have created our own monster.

When we consider this arms deal we have to take into account the best interest of all the nations concerned—Saudi Arabia, Israel, but most of all ourselves. We have to ask: Is this truly in the national interest?

I believe, very firmly, in having good relations with Saudi Arabia and with the Arab world. However, I do not know if this constant increase in weaponry is what is going to assist us in this job of getting on well with the Arabs.

I know the argument the Saudis can buy from other arms producers if we will not sell to them. But the fact they want our weapons gives us some leverage. If the Saudis want to buy 400 fully armed Mirage fighters from the French, that is their business. However, I think the Saudi Government definitely wants our AWAC planes.

Therefore, Mr. Speaker, I think we should approach this matter with a great deal of caution. I cannot vote to give the Saudis these AWAC planes. I hope a majority in both Houses is opposed to this sale. Unless and until the Saudis show some signs of moderation and of being willing to open their bases to us, I would not support going ahead with the sales of the AWACS. I also feel we should reconsider the matter of arming the F-15's and giving them enhanced fuel capability.

Putting more arms into the troubled Middle East is not a wise thing to do. I would like our State Department to consider all this very carefully. I hope Secretary Haig does not commit us to irrevocable steps while in the Middle East.

There are difficult choices before us. This is one of them. I would like to thank the arrangers of the special order, Congressman BLANCHARD and Congressman KEMP, for giving us the opportunity to express our concern on this vital matter.●

● Mr. BINGHAM. Mr. Speaker, I join with my colleagues in this special order to speak out against the as yet unannounced intention of the Reagan administration to sell conformal fuel tanks, air-to-air missiles, in-flight refueling equipment and tankers, and AWACS surveillance planes to Saudi Arabia. The National Security Council was reported to have recommended such sales to the President last week, and formal notification to the Congress could follow later this month. It is my earnest hope that the President will not approve these sales, and that he will pay close attention to the sentiments expressed in this discussion today. The new administration has made much of the importance it attaches to the U.S. relationship with Israel, which it considers a key ally in an area of the world where tensions constantly run very high. Yet these sales pose a serious, direct threat to the security of this ally, and only the most compelling need for this additional equipment would justify them. It seems to me highly unlikely that such a need can be demonstrated.

The United States has already agreed to sell 62 of our most sophisticated fighter airplanes to Saudi Arabia, but only after assurances were provided to opponents of the sale in the Congress that no additional equipment which would enhance the offensive capability of these airplanes would be sold. Selling such equipment now would rip that pledge to shreds, and despite the fact that the current administration cannot be considered bound to the promises of its predecessor, it does jolt the entire system of congressional review of arms sales. If these sales are sent forward, any future administration pledge in connection with an arms sales will have to be regarded with deep skepticism.

But most importantly, providing this additional equipment for Saudi F-15's clearly would threaten Israel. The fuel tanks alone would increase the flight radius of the airplanes by 79 percent, and the in-flight refueling capability would allow them to fly virtually anywhere in the Middle East. The entire country of Israel would be within reach of the Saudi Air Force, and Israeli strategic planners would have to devote some part of their defensive assets to protect against this new threat. Some Saudi forces or equipment have been used in every Arab war on Israel, and the Saudis recently led the way in a pan-Arab conference which called for beginning a new jihad, or holy war, against this valiant democracy. While the Saudis must know that a direct attack on Israel would surely subject them to devastating counterattack, it seems highly likely that the Saudis would be strongly tempted to make much of their weapons stockpile available to other Arab confrontation states in the event of another war against Israel.

Perhaps the most threatening part of this arms package are the five AWACS surveillance aircraft. These converted 707 jets have the most advanced look-down radar in the world which can track the flight paths and communications of hundreds of airplanes as well as ground forces. These airplanes would be force multipliers, increasing the effectiveness of the F-15's significantly and improving the communications, command and control capabilities of the Saudi Armed Forces tremendously. The Carter administration had made it a policy, and I think it is a good and sensible policy, not to be the first to introduce to a region sophisticated equipment which would create a new or significantly higher combat capability. It would be a great mistake to abandon this principle in this case, especially since the Saudi's need for these planes is highly doubtful and their ability to operate them even more questionable.

Mr. Speaker, about 6 weeks ago I helped to draft and circulate a letter to the Secretary of State cautioning against sales of additional F-15 equipment to Saudi Arabia. Nineteen members of the Foreign Affairs Committee of the House joined in sending that letter, and I am sure if it had been known at that time that the administration was preparing to recommend the sale of AWACS to the Saudis, even more members of the committee would have signed. I would like to include the text of that letter at the conclusion of these remarks.

I urge the Reagan administration to rethink its position on this matter. The equipment the Saudis want is probably beyond their absorptive capacity and surely unnecessary for their real defensive needs. It would upset the strategic balance in the region, guarantee that the Saudis would be drawn into any future conflict in the region, and would touch off a new arms race that Israel does not have the money to win but cannot afford to lose.

HOUSE OF REPRESENTATIVES,
Washington, D.C., Feb. 25, 1981.

Hon. ALEXANDER HAIG, Jr.,
Secretary,
U.S. Department of State,
Washington, D.C.

DEAR MR. SECRETARY: We write to you as Members of the House Foreign Affairs Committee to express our serious concerns about the possible sale to Saudi Arabia of sophisticated offensive equipment for its F-15 jet fighters.

You will recall that, at the time of the original purchase of the planes in 1978, the Congress was given explicit and unequivocal assurances that offensive equipment, including fuel tanks and bomb racks which increase the range and firepower of the aircraft, would not be transferred to Saudi Arabia.

We recognize that the United States has a very real and legitimate interest in the security and stability of Saudi Arabia, and especially in the potential role of the Saudis as a moderating influence on other nations of the region with which our relations are less friendly. The Saudis have called the sale yet another "test" of our friendship for them. Friendship is reciprocal. While they are not reluctant to make demands upon us, the Saudis nonetheless continue to attack President Sadat and the Egypt-Israel peace treaty as well as making repeated calls for a holy war (jihad) against Israel. We should, in this regard, like to know what assurances Saudi Arabia has given the United States of any significant changes in its attitude and position towards Egypt and Israel.

The sale of this equipment would not significantly enhance the security of other nations with which we have close and enduring ties. There simply is no external threat to Saudi security that requires the acquisition of an offensive capability for the F-15s. To the contrary, developments since 1978 have actually diminished any potential threats to Saudi security. Whereas, in 1978, it may have been plausible to argue that Saudi Arabia needed the F-15s to defend itself against a possible Iraqi attack, in the wake of the ongoing Iran-Iraq war and the rapproachment between Saudi Arabia and Iraq, it is less likely that Iraq will be either willing or capable of undertaking such an attack. There is no other country in the region which might be deterred from launching an attack against Saudi Arabia because of this equipment.

The sale of this offensive equipment, despite the absence of a compelling Saudi need for it, will have severe adverse implications for Israel's security. The maintenance of air superiority is essential to the survival of Israel. Today Saudi aircraft largely lack the range and capability to attack Israel and thus would not be a major factor in a war. The potential use of the Saudi F-15s in another Arab-Israeli war will immeasurably complicate Israel's defensive problems. Israel will have to further stretch its already outnumbered air force and divert some of its aircraft from other essential missions in order to defend against the possibility of Saudi air attacks.

It should also be recognized that the provision of the new equipment may very well diminish, rather than enhance, Saudi security. Once the F-15s become an offensive threat against Israel, they could very well become the target of a preemptive attack at the outbreak of any regional hostilities. This will make it more likely that Saudi Arabia will be drawn into any conflict.

In view of the grave reservations expressed above, we urge you to seek the broadest possible consultation with the appropriate committees in both houses of the Congress before a final determination is made about Saudi Arabia's request. With the information we have now, we do not believe that this sale should be allowed.

Sincerely,

BENJAMIN S. ROSENTHAL,

Members of Congress.●

● Mr. VENTO . Mr. Speaker, thus far the administration has been fortunate in its foreign policy decisions. They have taken actions without a thorough review of the full implications and possible negative reactions. However, it is only a matter of time before this habit of shooting from the hip leads us to a foreign policy disaster.

In its decisions on El Salvador, the administration failed to consider the presence of U.S. troops with the OAS peace-keeping force already in the country. In the case of arms for Saudi Arabia, the administration is once again making decisions without properly analyzing the situation.

The Reagan administration decisions to sell advanced equipment for the Saudi Arabian F-15's is an ill-considered policy, which is good neither for the United States, nor for Saudi Arabia, nor for peace in the Middle East.

The 1978 agreement to provide Saudi Arabia with F-15's provided the Saudis with a capability adequate for their own defense needs. Since that time, the United States has deployed two battle groups in the Indian Ocean, thereby increasing our capability to provide additional assistance to the Saudis if needed.

The currently equipped Saudi F-15's are sufficient for the defense of that country. The range of the Saudi F-15 already provides for the interception over the Persian Gulf of any enemy aircraft attempting to attack the cities or oilfields of Saudi Arabia. The addition of the conformal fuel tanks is not justified for defensive needs.

The proposed sale to the Saudis of the improved Sidewinder missiles also goes beyond defensive needs. The Saudi F-15's already have Sidewinder missiles with a pursuit-intercept capability. This capability is adequate for dealing with most aircraft in the area. However, the new Sidewinder would make a big difference in a dog fight with one type of aircraft in the area—the F-15's of the Israeli Air Force.

The impact of these proposed sales on Israel is the central issue. Although the F-15 enhancement of the Saudi airfleet would serve no defensive need for Saudi Arabia, the F-15's with conformal fuel tanks and advanced Sidewinders would be capable of providing air cover for Arab air forces. This is not in accord with the agreement under which the F-15's were originally provided.

The concern for stability of the Middle East is further heightened when one considers the new proposal to provide the Saudi Government with the E-3A AWACS, the early warning aircraft. Currently only we operate this aircraft in the area. The principal functions of our patrols is not only to provide advance warnings for our carriers in the area but also to warn the Saudis of any possible attacks on them. To provide Saudi Arabia with these aircraft will duplicate the American effort and would enhance their F-15's effectiveness in any Arab-Israeli context.

One must question whether in order to maintain stability in the Middle East, our Government will not be forced to provide the Israelis with more and better equipment? Obviously the Israelis believe so. According to the New York Times, Israel has asked the United States for an outright gift of an additional 15 F-15 fighters as well as access to an American spy satellite.

The sale of the advanced equipment to Saudi Arabia will cause us to be whipsawed back and forth between the nations of the Middle East. After the sale to Saudi Arabia, come the demands of Israel, then will come the demands of other nations such as Egypt. The requests for more and better weapons will continue to escalate and will only end in their utilization.

While I do not question the intentions nor integrity of the current Saudi Government with regards to their plans for this advanced equipment, we must look ahead to future potentialities. The Saudi Government is a monarchy based on filial succession. As such, it faces great strains on its stability from the conflict between modernization and tradition. These conflicts and the resultant instability will be heightened during times of succession. The sale to the Saudis of equipment, which is basically offensive in nature, is similar to throwing gasoline on a fire. The Saudis have every right to equipment that provides them with an adequate defensive capability. However, it is apparent that this proposed sale extends beyond defense. In an area as volatile as the Middle East, this sale is unwise. New situations arise and governments and their guarantees change. One need only consider the current value of the guarantees of the Shah of Iran to realize this.

The current equipment of the Saudi F-15's is enough to provide for their defensive needs. Current administration policy gives the ultimate defense of Saudi cities, oilfields, and people through our aircraft carriers in the area. The additional equipment, which we propose to sell to Saudi Arabia will not add to the stability of the Middle East and may well be a destabilizing factor in this area. As such, the sale of this equipment is imprudent and should not occur.●

● Mr. EVANS of Delaware. Mr. Speaker, I join my colleagues in urging the administration to give extremely careful consideration to the critical issues surrounding the decision to provide additional military equipment, particularly that with an offensive capability, to Saudi Arabia.

In 1978, the United States agreed to sell a number of F-15 fighters to Saudi Arabia with explicit understanding that the planes would not be fitted with any other systems or armaments that would increase their range or enhance their ground-attack capabilities. The Carter administration described the sale of the F-15's as a litmus test of our good will and friendship with Saudi Arabia. In return, we hoped Saudi Arabia would adopt a more moderate position toward the peace process in the Middle East and recognize the desirability of maintaining a balanced set of relations with the United States. The Congress was told in 1978 that the Saudis would be more supportive of the peace process, they would soften their strong criticism of President Sadat's courageous initiative, they would reduce their support for the PLO, and they would use their influence within OPEC to stifle the radical call for higher oil prices. The developments in the Middle East in recent years, however, have not led to a more attractive climate for negotia-

tions or any meaningful degree of cooperation on the oil-pricing question.

Several years have passed and I have seen little from the Saudi Government to follow through with the assurances given the Congress. We must ask ourselves about the initiatives and actions of the Saudis since 1978. There has been very little progress toward alleviating the tensions between Israel and her neighbors. The Saudis have enthusiastically condemned the Israel-Egyptian peace treaty. They have broken relations and led the Arab economic boycott against Egypt. Saudi Arabia has refused to join the negotiating framework envisioned in the historic Camp David agreement. They oppose the use of the Suez Canal by Israeli ships and have repeatedly called for a holy war against the sovereign State of Israel.

They continue to finance the PLO and other despicable terrorist organizations. Furthermore, I have serious concerns that such sale of offensive weapons to Saudi Arabia may have a destabilizing effect on Middle East politics rather than the intended impact. I do not believe that this administration wants to be in a position of destabilizing this most troubled part of the world, and strongly feel we must take a long hard look at the long-term results of this action before implementing this decision.

From a diplomatic standpoint, their condemnation of our rescue mission in Iran and the decision to allow Soviet supplies to be shipped through their territory to Iraq are particularly disturbing. At the same time they have granted overflight rights to Soviet planes, the Saudis have rejected American proposals for military bases on the Arabian peninsula. Finally, the Saudis bear a major share of the responsibility for the OPEC pricing policies that are creating devastating economic problems for every oil-consuming nation in the world. In summary, I see very little that the Saudis have done to help the United States over the last several years.

I believe the sale of additional weapons to Saudi Arabia should occur only after careful analysis is given to the possible consequences of such a decision on the United States and our most important strategic ally in the region, Israel. There may in fact be important diplomatic and military interests which will be served by this proposed sale. I, however, will be obliged to oppose this proposal unless the United States receives concrete and binding indications that the Saudis have adopted a more benign and constructive attitude toward U.S. interests in the Middle East. I intend to support Secretary Haig's effort to define a so-called strategic consensus among the friendly nations in the Middle East. I would have greater confidence in Saudi Arabia's role within this consensus if they would formally recognize Israel's legitimate right to exist, participate in the Camp David process, and exercise some additional responsibility in establishing OPEC pricing policies.

Israel's value as a strategic asset and a stable ally to the United States should be absolutely clear to every American, as well as to the leadership in Saudi Arabia. My attitude on this proposal will be dependent to a major degree on the type and firmness of the commitments made by the Saudis to work with the United States and our allies in a constructive and balanced manner. The Reagan administration's strategic approach toward the Middle East will require a commitment to a shared set of goals and policies by countries like Saudi Arabia. Once again, I must state that I have deeply serious reservations regarding the sale of sophisticated arms to Saudi Arabia and hope the Saudis will provide concrete assurances of their willingness to move forward in cooperation with the United States.●

● Mr. OBERSTAR. Mr. Speaker, in 1978 the Carter administration assured Congress that the 62 F-15 fighters to be sold to Saudi Arabia would not at any time be outfitted with offensive capability.

I opposed that sale, but Congress approved it, largely on the strength of those administration assurances. Those promises were an integral part of the process by which the sale was made at all.

Congress probably would not have approved the sale if it had known that 3 years later it would be confronted by a request that the United States sell Saudi Arabia long-range fuel tanks and advanced air-to-air missiles for the F-15's.

These modifications will provide Saudi Arabia with the ability to attack Israel from any airbase within Saudi Arabia—as well as bring Egypt into range.

Mr. Speaker, it is in the interest of the United States to insure the survival and territorial integrity of the Mideast's only democratic and most pro-American Nation—Israel.

Proponents of the sale believe that it will strenghten the pro-Western Saudi royal family and give Saudi Arabia the ability to defend itself against Soviet aggression. I feel there is very good reason to expect that if these modified aircraft are ever used, they will be used against Israelis, not against Soviets or their satellites.

Certainly, we have a great interest in Saudi security, but providing F-15 aircraft with long-range offensive capability does nothing to counter internal instability any more than American technolgy could prevent the downfall of the late Shah of Iran.

Even without this sale, the Saudis will still be receiving more American arms than is good for regional stability, Israel, or world peace.

In 1980 the Saudis purchased about $5 billion in military equipment and construction from the United States. In the last 6 years we have sold more military equipment to the Saudis than to any other non-NATO country.

We do not need to break specific promises made to the American people and to the world in 1978 in order to provide Saudi Arabia with AIM-9L air-to-air missiles and fuel and sensor tactical packs.

I appreciate this opportunity to share with my colleagues some thoughts on arms sales to the Mideast and want to commend our colleagues Mr. BLANCHARD and Mr. KEMP for sponsoring these special orders.●

● Mr. YOUNG of Missouri. Mr. Speaker, plans proposed by the Reagan administration to sell Saudi Arabia offensive equipment to enhance the performance of their F-15 fighter planes are a matter of grave concern that will affect the security of the entire Middle East region.

The administration has said it will sell Sidewinder air-to-air missiles and long-range fuel tanks to the Saudis for use on some 63 F-15's they obtained in 1978.

This plan could lead to increasing the arms race in the Middle East by making it necessary for Israel to strengthen its own defenses. Furthermore, the planned equipment sale is contrary to pledges and assurances made in 1978 when the United States sold the F-15's to the Saudis.

At that time, then-Secretary of Defense Harold Brown sent a letter to the chairman of the Senate Committee on Foreign Relations in which Mr. Brown stated:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground capability of the F-15.
>
> • • • The government of Saudi Arabia has assured us that it has no aggressive intentions against any state, that it will use the F-15 aircraft only in furtherance of its legitimate self-defense, and that it will employ the aircraft offensively.
>
> • • • They have assured us that they intend scrupulously to comply with these prohibitions and restrictions. The record of Saudi Arabia in this respect is excellent. However, should the assurances be violated, the United States can take appropriate action, including suspension of services and of delivery of spare parts and other military equipment. Without such services the usability of the F-15 would degrade rapidly.

That was the essence of Secretary Brown's statement. Looking back at those statements now, I have to think these assurances are mere words and that it is time for the United States to take appropriate action. Rather than selling the Saudis the additional hardware that they are requesting, we should hold them to their own original word and agreement.

I am particularly concerned that the Saudis are calling this sale a test of our friendship for them at the same time they have been making statements calling for a holy war (jihad) against Israel and continually refusing to join in efforts for a long-term Middle East peace.

I am hoping the administration will reconsider this proposed sale in terms of the possible damage this could do to the delicate balance of power in the Middle East. I also would like to see the administration maintain continuity with past U.S. policy to staunchly support Israel's need for fully defensible borders from outside aggression.●

● Mrs. SCHNEIDER. Mr. Speaker, I would like to express my concern with the possible surge in the Middle East arms race that might result from the sale of equipment to increase the offensive capability of F-15 aircraft going to Saudi Arabia.

The proposed sale of equipment would not significantly enhance the security of Saudi Arabia, and is an example of the tendency to remedy urgent policy problems, requiring long-range solutions, with military hardware.

While the administration is justifiably concerned with the possibility of external threats to the Saudis and must be especially sensitive to the potential role of Saudi Arabia as a moderating influence on other nations of the region, I am not convinced that there is any external threat to the security of Saudi Arabia that would require the acquisition of offensive capability for the F-15 at this time.

I oppose this sale in its present terms and urge that additional negotiations and discussion take place before the sale is finalized. A continuing arms spiral will sacrifice short-term security for future economic disaster.●

● Mr. FRANK. Mr. Speaker, opposition to the administration's proposed sale of offensive equipment for the F-15's purchased by Saudi Arabia continues to grow in the House as the details become known to Members.

Yesterday, in a special order called by the gentleman from Michigan (Mr. BLANCHARD) and the gentleman from New York (Mr. KEMP), nearly 80 Members joined in a bipartisan effort to express concern over the implications of the proposed sale.

Recently, the administration announced its plans to add AWACS—airborne warning and command center system—or E-3-A sentry early detection planes to the already announced package. I oppose the selling of any additional equipment to the F-15's, as promised by the former Secretary of Defense, but find it particularly appalling that the administration would propose the transfer of AWACS or E-3-A sentry systems.

Thirty-eight Members on both sides of the aisle have joined me in an effort to bring our concerns to the attention of the President by signing the letter which follows. AWACS and E-3-A sentry systems are the world's most technologically advanced detection equipment. Why is it that the United States should be compelled to sell AWACS or E-3-A sentry aircraft to Saudi Arabia, who has sworn to fight against Israel?

I take this opportunity to reprint the letter to President Reagan outlining the reasons for opposing the sale of advanced warning equipment to Saudi Arabia. The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 6, 1981.

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR PRESIDENT REAGAN: The Administration's plans to allow the sale of Fuel and Sensor Tactical (FAST) packs and AIM-9L air-to-air missiles for the F-15s for Saudi Arabia have caused considerable concern. Reports that several Airborne Warning and Control System (AWACS) or E3A Sentry detection and command aircraft will be added to this sale causes still greater concern.

The implications of the addition of yet another of the world's most sophisticated military devices to Saudi Arabia's arsenal are so dangerous that we feel they require your careful review. As you must be aware, once operational within Saudi airspace, these systems will be able to detect high-flying objects within a 350-mile radius and low-flying objects within a 250-mile radius. These detection systems can differentiate between 600 targets, analyze the data, and relay commands to ground forces or to other aircraft. With this equipment, Saudi Arabia will be able to monitor all of Israel's military movements, including troops, aircraft, tanks, and artillery pieces. Such information in the hands of Israel's enemies would bring an entirely new and insidious dimension to the Arab-Israeli conflict.

Besides the obvious objections to this sale because of its security threat to Israel, there are other compelling reasons to question the wisdom of supplying the Saudi Arabian government with this equipment. Some have questioned whether this equipment is in the best security interests of the United States. Still others have questioned whether arming Saudi Arabia presents some of the same risks to the U.S. as did the arming of the Shah's Iran. Finally, there is the question of the political significance of this sale on future peace negotiations.

The answers to these questions, in addition to the problems of security for Israel lead us to believe that the addition of AWACS of E3A Sentry early detection systems would be a mistake. We ask you to deny the Saudi request.

Sincerely,

Barney Frank, Claude Pepper, Henry A. Waxman, Bill Brodhead, Jim Blanchard, Stanley Lundine, Toby Moffett, Margaret M. Heckler, Frederick Richmond, Tom Lantos, James Oberstar, Richard Ottinger, Stephen J. Solarz, Les AuCoin, Thomas M. Foglietta, Anthony Beilenson, Jerry M. Patterson, Charles E. Schumer, Jim Santini, Bill Ratchford, Edward P. Boland, Norman D'Amours, Dan Glickman, Howard Wolpe, Matthew McHugh, Benjamin Rosenthal, Jim Mattox, James J. Florio, Hamilton Fish, Jr., Les Aspin, Tom Harkin, George C. Wortley, Ted Weiss, Bob Edgar, Dennis E. Eckart, Martin Frost, Silvio O. Conte, Eugene V. Atkinson, Charles F. Dougherty.●

● Mr. GOLDWATER. Mr. Speaker, I wish to join my colleagues in expressing my concern over the proposed arms package for Saudi Arabia.

I believe the proposed sale is neither in the best interest of the Saudis themselves or the long-term prospects for stability and peace in that troubled area.

First, the Saudis have neither the technological capability nor the trained manpower to utilize sophisticated systems such as AWACS. Second, the imminent danger to the Saudi oil fields is within, not without their borders.

It is difficult to contrive a realistic scenario of an invasion for which these advanced arms systems would be a viable repellant. Where would the invasion come from? The Iranians? They are having troubles of their own with the Iraqis and it is highly unlikely that they have the capability of launching an attack on a new front.

Oman presents no threat. It is certain that the Israelis and the Egyptians would not launch an unprovoked attack, and it is hard to envision Syria successfully forging its way across the deserts of Jordan to be the invading army.

That leaves two possible dangers to the oil fields: The Soviet Union and terrorists. In the first instance, the Saudis could never realistically expect to repel such an attack by themselves regardless of the number of sophisticated planes or warning systems in their arsenal. In the second instance, fuel extenders, Sidewinder missiles and AWACS will do nothing to thwart the internal threat of terrorism. That can only be fought with more conventional weapons and the staging ground would be from within the Saudi's borders.

In short, there has got to be a realistic assessment of what the Saudi defense needs are, and concurrent with the assessment, we have got to convince them that they themselves have much to lose if the oil fields are shut down. Certainly the West would be hurt if the oil supply were cut off, but so would the Saudi's, and their best insurance against such a disaster is cooperation in the search for peace and a coordinated deterrent against Soviet aggression and internal terrorism.

Admittedly, we need Saudi oil. But what we and they have apparently failed to admit is that they need us also. They may point to the possibility of the French or Germans filling the gap in terms of arms supply, but then, arms without manpower is neither a deterrent nor a defense.

Reason should tell both the Saudis and the United States that coopera-

tion is to our mutual benefit. Stability and peace is to our mutual benefit. Keeping the oil fields open is to our mutual benefit.

But an escalation of unnecessary types of arms such as those discussed in the proposed sale while ignoring real needs is courting mutual disaster. We cannot let the facts and the realities be obscured by rhetoric.

Recognition of the truth that we both have much to gain and much to lose must be a first step in a new working relationship.●

● Mr. ATKINSON. Mr. Speaker, the Reagan administration is presently weighing the possibility of selling Saudi Arabia equipment that would enhance offensively the F-15 jets that were sold to them by the United States in 1978.

At that time, Mr. Speaker, it was clearly enunciated by the Carter administration in writing to the Congress that offensive capability would not be sold to the Saudi Government because of the strategic imbalance this would create in the Middle East.

Now the Reagan administration proposes to sell fuel and sensor tactical (FAST) packs and AIM-9L air-to-air missiles for these F-15's. This move could prove to be a devastating one to our friends in Israel, who have every reason to fear Saudi Arabian inclinations to use these weapons against our strongest ally in the region.

The Saudi Arabian Government has done nothing to promote peace in the Middle East. On the contrary, since the sale of the F-15's to them in 1978, the Saudis have completely cut off the Egyptians after the Camp David peace accords were signed, opposed the opening of the Suez Canal to all nations, doubled their support of PLO terrorists' activities, and continue to increase the price of oil to the Western democracies. This is hardly the record of a friendly, peace-loving country.

Mr. Speaker, I see no reason for the United States to abandon a proven friend—Israel—to gain a dubious advantage with a government whose attitudes toward peace and progress are questionable, and more often than not openly hostile to the forces of peace.

Appeasement of Saudi demands is an unacceptable policy for this Nation. Arming Saudi Arabia with the sophisticated weapons that have been suggested will only give heart to those nations which oppose a peaceful settlement of Middle East problems.

Evidence continues to mount that the present regime in Saudi Arabia is weak and divided. Do we want to risk a similar situation to that which occurred in Iran when American equipment was overtaken by the successors to the Shah?

Would it not be a better policy for Saudi Arabia to drop its opposition to the State of Israel, join with Egypt in the Camp David peace accords, end support of the PLO, and put its own domestic house in order before it is too late? Peace is always the best policy and the mightiest weapons we can give the Saudi Arabian Government today are our good offices and commitments that could come from a true partnership in peace. Egypt has certainly found that policy to be beneficial and stabilizing. It is time for some sanity in the Mideast arms race. It is time to stop arming our adversaries and near adversaries. Wisdom of the years and good sense should make it clear that furnishing additional offensive equipment to Saudi Arabia will only defeat our real goals of peace, prosperity, freedom and partnership for the nations of the Middle East.

I call upon this Congress and our President to reject the Saudi request for these arms. America is being watched by many nations of the world. If we are to continue the spirit of Camp David we must not encourage arms proliferation in the Middle East. It is a time for leadership. I hope this Congress and our President will hold fast to a positive, long-term peace objective. Denial of the Saudi arms sale would be a constructive first step.●

● Mr. BAILEY of Pennsylvania. Mr. Speaker, it has recently come to our attention that the Reagan administration has confirmed its intention to sell sophisticated military equipment to Saudi Arabia. Among that combat equipment are 60 F-15 jet fighter aircraft. Additionally we have heard reports that advanced Side Winder missiles are included. Perhaps the most significant decision appears to be a desire to sell American AWACS to this Middle Eastern country.

Lest anyone doubt the effectiveness of these weapons when used together, there is probably nothing anywhere in the world, including within the Soviet arsenal, that can match their capability.

I wish, therefore, to inject a note of caution. History has taught us many lessons, with perhaps Iran providing the best analogy for application here. Although the Saudis have in many ways cooperated with us, and although their leadership is facing a certain amount of potential turmoil, at least at home, I sincerely hope we will not forget lessons of the past and the ominous portent for Israeli and Egyptian security and their friendship to us in the future.

Israel is an ally; an ally which is a democracy and whose greatest contribution to the human family is their stand for human rights. President Sadat of Egypt is easily one of the most charismatic and effective leaders of this century.

Combined with the Soviet desire to penetrate and establish their presence in the Middle East, all these variables dictate the necessity for extreme caution. I hope the administration will reconsider this decision with an eye to reaffirming America's vital interest in the Middle East, since it cannot be separated from Israel's and Egypt's concerns. Nor can they be based on a naive interpolation of the political environment faced by all these nations at home.

Our desire to counteract Soviet forces in the area should not be the sole or uninformed basis for making hasty decisions that may eventually result in our own technology being lost to the Soviets or in its being compromised in any form.●

● Mr. PHILLIP BURTON. Mr. Speaker, I rise to denounce the proposed sale of sophisticated weaponry to Saudi Arabia. This dangerous action makes an offensive military power of a nation dedicated to the destruction of the State of Israel.

I am especially disturbed by the inclusion of the highly advanced AWACS aircraft. This system would markedly reduce, if not eliminate, the Israelis' current advantage in the air. It is appalling that the United States would supply such aircraft to a nation whose crown prince has called for a holy war against Israel and which gives aid and comfort to the terrorist PLO. We must realize that Saudi Arabia is dependent on the United States for defense against any major attack—the weaponry we are selling them is not for defense, but instead can only be intended for use against Israel.

I join my colleagues calling on President Reagan to reconsider the decision to sell this deadly equipment to Saudi Arabia.●

● Mr. CONTE. Mr. Speaker, I would like to join my fellow Congressmen in opposing the sale of F-15 enhancement equipment to Saudi Arabia.

I fully understand that the Saudis have been helpful in moderating oil prices against OPEC's desires. I also recognize that the Saudis can buy the necessary equipment elsewhere. However, I remain opposed to this sale because of the threat that it poses to Israel, by severely undermining her air superiority and in enabling Saudi Arabia to hit any Israeli target with greater force from bases located much deeper within Saudi Arabia.

In 1978, the Carter administration approved, and Congress ratified, the sale of the F-15's to Saudi Arabia, with the conditions that certain offensive equipment, which would increase the range and firepower of the aircraft, would not also be sold. The original F-15 sale was made both to reward our friend, Saudi Arabia, and to enhance the security of Saudi Arabia. However, it must be balanced by the maintenance of a U.S. commitment to an important ally—Israel—not to sell the enhancement equipment,

and thereby avoid the possibility of destabilizing the entire region.

I know that this is a difficult issue. But in view of the fact that this equipment poses such a potential threat to Israel, I must oppose this sale, even though I recognize the importance of Saudi Arabia to our national interests.●

Mr. BLANCHARD. Finally, for the record, this important question of the sale of equipment and AWACS to Saudi Arabia, several points should be repeated.

It has been said that the Saudi moderation on oil prices is the reason to give them our most sophisticated equipment. But I think we can make a strong case that the Saudi moderation on oil prices, as even revealed by Sheik Yemani, is due to the fact that they have such a huge reserve of oil that to allow it to be priced much higher would certainly lead to the development of alternate energy sources and, therefore, end the income that that country, that tiny kingdom, family country, would reap from oil.

It has also been said from time to time by defenders of this proposed military transaction that the Israeli Government has no objection, our allies, those brave people of that democracy of Israel, that its leaders have no objection to the sale. I think as a matter of record it should be indicated that they do object, and as indicated most recently by Deputy Defense Minister Zipori when he said that the sale of AWACS to Saudi Arabia would "strip Israel naked to Arab intelligence."

As we have indicated throughout this special order, this issue is, indeed, a bipartisan issue. I know it was very difficult for the gentleman from New York (Mr. KEMP) particularly at this delicate moment when we are all concerned about the President's health, to step forward and express his concern on this sale. I want to say, even though he has had to depart for an important emergency meeting, that I do want to extend my gratitude to Congressman KEMP for his participation and his courage in stepping forward on this important issue.

But, as one from the opposite side of the aisle, I think it needs to be said again on the record that while the President and his new administration has said all sorts of things about their commitment to Israel or their commitment to democracy in the Middle East, or their commitment to a strong policy to bring about peace in the Middle East, now is the time for performance. There is no track record by the President. He has never cast a single vote on the question of a military policy in the Middle East or anywhere else. Only time will tell. We hope for sure that things will work out and that our policies will be intelligent, pro-democracy, and pro-U.S. security in the Middle East. But there is not enough record to go on for us to be celebrating any change in administrations.

I must indicate that for the record because, in all fairness, we were very quick to criticize the previous President on these matters, and the most, the strongest criticism we echoed was relating to the very transaction we rise to oppose today, a transaction supported by the new administration.

Let me mention in summation the enhanced equipment for the F-15's and the AWACS will not guarantee defense for the Saudi Arabians. It will make them a more viable partner in an Arab alliance which could potentially harm Israel. But the nation of Saudi Arabia is not going to have any guarantees of defense by this sophisticated equipment whatsoever.

Second, our security, when we transfer our most sophisticated equipment to another country, especially in a trouble spot of the world, is jeopardized. We have no justification to transfer such sophisticated equipment to a county like Saudi Arabia, especially when we have been willing to loan them the equipment with our technicians to protect them.

Third, the arms escalation. We had better watch out. We had better be careful about the whole notion of being an arms merchant. It may make for good business and profits for many of our companies, but I do not think we serve the cause of peace by selling weapons to one group, and then telling the other we are going to give them more money to buy other weapons. We have to be careful as we review our relationships with our allies and we review our concern about the Soviet Union, that we not go around the world arming everyone in the name of a strong foreign policy.

Another item that has to be reiterated is the fact that this proposed sale places enormous pressure on the only democracy and the only long-lasting ally in the Middle East, Israel. Let us think about how many democracies there really are in the world these days. The truth is very few, very few indeed. It is no way to treat an ally to force them to spend more and more money and develop more and more contingency plans for their own defense because we think this might help us in some unannounced, undefined, unagreed way with a very unstable government. It also represents a complete reversal of the position of the U.S. Government on this equipment that would enhance the striking power and the effectiveness of the F-15's, a reversal of a commitment made by the previous administration, and a reversal of the commitment made by candidate Reagan only a few months ago. No circumstances have changed between September and this date to justify a reversal of that commitment.

Finally, the linkage that is necessary to bring to bear those who may be moderate in the Middle East bring them to bear in enhancing the Camp David accords is missing from this transaction. It is most important to encourage moderate nations in the Middle East to be helpful and supportive in bringing about cooperation and understanding and arrangements for peace in the Middle East, not just because we want oil, but because our foreign policy should always be directed toward promoting peaceful resolution of conflicts.

I sincerely believe that the U.S. role in promoting peace in the Middle East is ill served by this proposed transaction. Therefore, we will serve the Nation and our own Nation of Americans in so doing. So I would respectfully urge the President, the Secretary of State, and the Secretary of Defense, in the name of good government, and democratic and strong and rational and peaceful foreign policy, to reverse their decision to sell this equipment. I know that dozens and dozens of my colleagues, many of whom spoke today, and others who will submit statements for the RECORD agree. We feel they are wrong, and the time to say so is now, before it is too late.

Mr. Speaker, I yield back the balance of my time and thank the Speaker for his patience.

□ 1630

ALCOHOL FUELS TRANSFER ACT OF 1981

The SPEAKER pro tempore (Mr. BLANCHARD). Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, today, I am introducing legislation, the Alcohol Fuels Transfer Act of 1981, to amend the Energy Security Act to grant the Synthetic Fuels Corporation the authority to provide loan guarantees for projects for the production of alcohol fuels and other fuels derived from biomass and municipal wastes.

I strongly support President Reagan's plan to get the Government out of the energy business and eliminate the alcohol fuels and biomass programs in DOE and USDA in order that we reduce Federal spending, particularly for activities which can and should be performed by the private sector. However, I am convinced that in order for the alcohol fuels industry to survive, the loan guarantee portion of our alcohol fuels and biomass programs must be saved.

This is why I propose modifying the authority of the Synthetic Fuels Corporation in order that alcohol fuels and biomass projects—including small projects—be eligible for synfuel loan

guarantees for construction of these production facilities. It is because I believe that these alternative fuels offer the opportunity to increase our domestic energy production in a decentralized and timely manner, thereby allowing areas of our country to become energy self-sufficient, that I am introducing the Alcohol Fuels Transfer Act of 1981.

The legislation I am introducing calls for no new agency or institution. It calls for no new expenditure of Federal funds. It simply consolidates our alternative fuels programs within the budgetary edicts of President Reagan. In fact, during testimony before the Energy and Commerce Committee's Subcommittee on Energy Conservation and Power, on which I serve, Secretary Edwards, in response to questioning, expressed the view that he had no strong opposition to such a transfer of authority. Under this legislation, the goals and objectives of DOE's Office of Alcohol Fuels will be to continue the development of alcohol fuels use by developing new production methods as provided by the President's program for economic recovery.

While the tax credits and excise tax exemption coupled with the decontrol of crude oil prices will, I believe, make gasohol competitive with gasoline at the same pump, investors entering this business may need to secure this kind of financing for a project before being able to take advantage of the various tax incentives. Without a Federal loan guarantee, such financing may only be available to large investors. Alcohol fuels projects rely on proven technology and the economic feasibility can be estimated relatively accurately; however, until more of these plants are on line and members of the investment community can actually, as they have testified, "kick the tires on the thing," there will continue to be an unwillingness in the private sector to make such loans.

I am optimistic about the future of the alcohol fuels industry, and I believe that Reagan administration programs will encourage this infant industry, critical to the Midwestern corn-growing areas and the Nation as a whole. It is, however, the duty of the Congress to insure that an appropriate workable system of energy supplies is available to the American people. We cannot rule out the possibility of further upheavals in the Middle East and the resulting disruption in our oil supplies. In light of the uncertainties surrounding our oil supplies and the time lag which exists for synfuel production, I believe that the continuance of this loan program for the next few years represents a sensible approach.

I ask my colleagues to support such a consolidation of our alternative fuels programs in order that alcohol fuels and biomass technology can increasingly contribute to the energy independence of our country.●

THE GENEVA CONFERENCE ON REFUGEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 10 minutes.

● Mr. CROCKETT. Mr. Speaker, this evening, the U.S. delegation to the United Nations Conference on Assistance to Refugees in Africa will leave for the Conference, to be held in Geneva, Switzerland, April 9 and 10, 1981. This delegation will be headed by Jeane Kirkpatrick, U.S. Ambassador to the United Nations.

Because of my deep concern for this issue, I originally requested from the Speaker that my name be considered as a congressional member of this delegation. However, since it was announced that Ambassador Kirkpatrick would lead the delegation, and since the Congressional Black Caucus has called for her resignation, I believe it would be inappropriate for me to participate in the delegation.

I enclose for the benefit of my colleagues the text of my letter to the Speaker explaining my actions:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 6, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
Washington, D.C.

DEAR MR. SPEAKER: Thank you very much for your kind offer to designate me as a Congressional Member of the United States Delegation to the International Conference on Assistance to Refugees in Africa, Geneva, April 9–10, 1981.

As you know, I am extremely interested in reaching a solution to the problems of African refugees, and have taken part in several Foreign Affairs Committee and Subcommittee on Africa actions in this area. My initial interest in attending this Conference, when the U.S. delegation was to be headed by Vice President Bush, reflects this keen concern.

However, due to the events of the past week, Vice President Bush will no longer head the delegation. Instead, the U.S. Ambassador to the United Nations, Jeane Kirkpatrick, will head the delegation. I cannot in good conscience be a part of such a delegation.

The Congressional Black Caucus has called for the resignation of Ambassador Kirkpatrick, who recently met with a high-ranking member of the South African Security/Intelligence establishment, in violation of U.S. policy in support of the United Nations arms embargo against South Africa. Ambassador Kirkpatrick's meeting offended the nations of Black Africa and Black Americans who are concerned with U.S.-Africa policy, and signals a very negative direction in U.S. relations with Africa.

I believe it would be inappropriate for me to participate as a member of Ambassador Kirkpatrick's delegation under these circumstances, and respectfully request that my name be withdrawn from consideration.

Once again thank you for your consideration.

Sincerely,

GEO. W. CROCKETT, Jr.,
Member of Congress.●

VOTING RIGHTS EXTENSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, today I am introducing legislation that would extend for 10 years the Voting Rights Act of 1965 and amend those absolutely vital provisions that have made this law the most successful civil rights measure ever passed by the Congress.

My proposal has three major provisions:

First, it would continue for 10 years section 5 of the act. This section requires that State and local governments that historically have discriminated against minority voters preclear changes in election procedures with the U.S. Department of Justice or with the U.S. district court in Washington, D.C., to show that the changes will not discriminate.

Second, it would amend section 2 of the act so that plaintiffs in voting rights suits would have to prove that actions by State and local governments had resulted in voting discrimination, regardless of the jurisdictions' intent.

Third, this legislation would continue for 7 years the requirement that voting assistance be provided in languages other than English when there is a substantial number of citizens who could not vote effectively without such help.

As I noted, Mr. Speaker, the Voting Rights Act has been the most successful civil rights legislation we have ever enacted. Under the law, registration and voting by black and Hispanic citizens has risen dramatically. Under this law, the number of minority elected officials has increased substantially. Not to extend the law, the major provisions of which will expire in August of 1982, would risk undermining or undoing these gains that have been so beneficial to minorities and have given so much life and meaning to the principles of equality and fairness that are the very foundation of this Nation.

Now, I know that some persons point to the accomplishments of the act and then question the need for extension. They also say that the preclearance procedure is unfair to one region of the country and they contend the preclearance terms of the law should be applied nationwide.

The Voting Rights Act is national in scope. It bans voting discrimination across the land. It bans literacy tests—East, West, North, South. Section 5

now applies to 24 States or parts of States in all sections of the country.

Much has been made of the fact that the Justice Department objects to only a small fraction of the changes submitted to it for clearance. Over the 15 years of the act, the Department has objected to some 800. This is indeed a small percentage of the total. But each objection represents a protection of minority rights and the avoidance of a lawsuit. The Department's judgments have been sensible and sensitive under both parties, and the clearance procedure has placed no undue burden on the Department or on the entities to which it applies.

To sum up, Mr. Speaker, these extensions are just and necessary.

First, extension of section 5 would continue to require preclearance in those jurisdictions in which discriminatory acts have been proved. There is no necessity for such clearance in other jurisdictions. Without extension, we will regress to where the law was before 1965, sole reliance on law suits, a condition that was unsatisfactory and ineffective and, indeed, gave rise to the Voting Rights Act.

Second, section 2 needs amending to restore the law to where it was before the Supreme Court ruling last year in City of Mobile against Bolden. That decision suggested that specific proof of discriminatory purpose was required for a voting suit to be successful. Legislative history shows that Congress intended that proof could rest on either discriminatory result or purpose. This amendment will restore the original meaning of the law and make section 2 comport with section 5.

Third, the bilingual provisions are to expire in 1985. It is logical to put these provisions on the same timetable as other special sections of the act.

Mr. Speaker, I fully expect that this legislation will receive the same bipartisan support that it has enjoyed since it was given birth in this body by Manny Celler and Bill McCulloch.

To that end, Senator MATHIAS and Senator KENNEDY are introducing similar legislation in the other body today.

This legislation is needed, and it is right.●

INCOME TAX WITHHOLDING FOR AGRICULTURAL EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I am today reintroducing legislation that I first sponsored in the last Congress to require income tax withholding for agricultural employees. I believe this reform would benefit both workers and the Federal Government without causing undue inconvenience to employers.

Under current law, most employees have a proportional amount of their paychecks withheld in order to assist them in prepaying their income taxes. This permits the Government to make use of the taxes they owe, and it enables the individual employee to avoid a large payment to the Internal Revenue Service every April. This method of tax collection has worked efficiently and to the benefit of employees, employers, and Government for several decades.

Agricultural employees were originally exempted from withholding for good reason. The migratory nature of their work, along with the scattered and very low pay they received, made withholding unnecessary and inefficient. It also posed an additional paperwork burden for employers. Thus, it made little sense to go through the process of withholding from individuals who, most likely, would not owe taxes at the end of the year in any event.

Today, however, a number of factors have come together to alter this situation significantly. Primarily, the rapid rate of inflation and increased wages have pushed farm employees into higher tax brackets. They now face the reality of owing the Government a potentially substantial amount that must be paid at one time, by April 15. If they are to avoid this tremendous financial burden, the Federal Government will have to treat them like other workers and have income withheld from their paychecks throughout the year.

Withholding for agricultural employees would provide important benefits for the Nation as well. The more difficult it is for people to pay their taxes, the less likely it is that they will in fact comply with the law. Unfortunately, statistics compiled by the Treasury Department and the General Accounting Office indicate that over one-third of all agricultural workers do not file tax returns at all. Treasury estimates that $1.3 billion of income goes unreported by farm employees.

Given those figures, it is not surprising that the Joint Committee on Taxation estimates that my legislation would increase revenues by over $300 million in the first year of implementation and from $16 to $19 million in succeeding years. Over a 5-year period, this would mean a reduction in Federal budget deficits of $383 million. With our efforts currently concentrated on balancing the budget, we cannot ignore these substantial figures.

There is little doubt that withholding is a very effective method of increasing the legitimate reporting of taxable income. Studies by the Treasury Department have cited withholding as the most important step that can be taken to reduce noncompliance with the income tax. In fact, the General Accounting Office, in a 1975 report entitled "Mandatory Tax Withholding Recommended for Agricultural Employees," urged that Congress, for the sake of both employees and the Federal Government, extend the benefits of withholding to agricultural workers.

My bill is designed to affect only those employees for whom the FICA tax is already withheld. Thus, it would not impose an unreasonable additional paperwork burden on farmers. This is the approach recommended by GAO. The support that has been given to the bill by the United Fresh Fruit & Vegetable Association, as well as the Monterey County, Calif., Farm Bureau in my own area, indicates that farmers recognize the need for withholding for their employees. Certainly, it would be a top priority of mine that the Government avoid creating an excessive paperwork load for employers in the implementation of this legislation.

I believe my bill is a sound, practical approach to this problem, and I would strongly urge my colleagues to join me in supporting this approach. Following is the text of my legislation:

H.R. 3104

A bill to amend the Internal Revenue Code of 1954 to provide that agricultural labor which is subject to FICA tax withholding shall also be subject to withholding for income tax purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of section 3401(a) of the Internal Revenue Code of 1954 (defining wages for purposes of income tax withholding) is amended to read as follows:

"(2)(A) in any medium other than cash for agricultural labor; or

"(B) in cash for agricultural labor unless (i) the cash remuneration paid in the calendar year by the employer to the employee for such labor is $150 or more, or (ii) the employee performs agricultural labor for the employer on 20 days or more during such year for cash remuneration computed on a time basis; or"

(b) Section 3401 of such Code is amended by adding at the end thereof the following new subsection:

"(g) AGRICULTURAL LABOR.—For purposes of subsection (a)(2), the term 'agricultural labor' has the meaning given such term by section 3121(g)."

(c) The amendments made by this Act shall apply to remuneration paid on or after January 1, 1981.●

CONTINUED HELP NEEDED FOR VIETNAM VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, I was astounded recently when I read, in a veterans organization briefing paper which came to my office, that up to one-third of the prison population of the United States is composed of Vietnam-era veterans.

Surely, I thought, this must be a typographical error or an unintended misstatement of fact. I took the trouble to check with the person who wrote the briefing paper. He could not personally confirm the figure, but he directed me to the National Council of Churches' incarcerated veterans program, which operates under Government funding.

No, said the director of the program. At least one-third of the prison population is composed of veterans of all wars. The figure for Vietnam-era veterans is somewhere between 25 and 30 percent, she said.

Then she dropped the other shoe.

Total suicides among Vietnam-era veterans exceed the number of Americans killed in the Vietnam war. That is counting only those who took their lives in the United States, not those who died abroad. Three years ago, the number was 42,000 plus. Since that time it has, by extrapolation, passed the 46,000 battle deaths of the conflict.

One of every four Vietnam combat veterans not incarcerated has at least one arrest on his or her record. Their divorce rate is at least 30 percent higher than that of the population as a whole. Their unemployment rate is astronomically high. Their abuse of alcohol and other drugs, their sense of isolation from the mainstream, their struggles with post-traumatic stress, their experience with agent orange—whether medically documented or not—add up to a generation of American veterans beset with more problems than the survivors of any other war in our history.

I would hasten to say, Mr. Speaker, that my comments are not an indictment of the Vietnam veteran. They are instead an indictment of the insensitivity of our society, and regrettably of its government, which now seems poised to shirk other aspects of our responsibility to these men and women who served their country in a time of need.

Mr. Speaker, let me give you some examples. Under the Reagan plan the incarcerated veterans project is recommended for elimination. The program expends about $100 per veteran reaches, I am told. It costs from $15,000 to $20,000 a year, depending upon the State, to confine a veteran in prison. The return on rehabilitation or prevention, therefore, is $150 to $200 to $1.

The veterans cost of instruction program on college campuses; the targeted technical assistance program; the VA outreach program to deal with post-traumatic stress disorders; the disabled veterans outreach program—all aimed specifically at Vietnam-era and disabled veterans—are recommended by the Reagan administration not for the budget-cutting ax, but for the guillotine.

Mr. Speaker, I do not say that the Congress has abandoned the Vietnam veteran, for I believe we have been sensitive in the past to his or her needs. I do not think, however, that we have been able and willing to recognize that the Vietnam veteran bears a scar never before borne by any American in uniform—defeat at the hands of an enemy, and a lack of appreciation, if not indifference, by the Nation he or she served. Not even the Confederate soldier suffered this humiliation.

There may well be, as some contend, social and other factors that contribute to the prison population factors that I have recited. It may be, and indeed is said, that the Vietnam veteran was drawn from that portion of our society that is most likely to run afoul of the law. It is true, without question, that Vietnam veterans fall in that age grouping which dominates prison population anyway. But it also is without question, in my mind, that neglect has been causative; that neglect continues; and that it will be compounded if these programs are eliminated.

Mr. Speaker, at the present time we depend upon an all-voluntary military service to defend our Nation. If we break faith with those who have served in other times of national crisis, including the Vietnam war, what have we to offer honorably to the prospective recruit of 1981?

And how, Mr. Speaker, if need becomes necessity, could we in good conscience draft another generation into service while we had not yet met our national obligation to those who answered the call to duty in Vietnam?

I do not advocate extravagance in the veterans programs, any more than I would advocate waste in any branch or agency of the Federal Government. But, Mr. Speaker, there sometimes are terrible social consequences from false thrift. We found the financial means to fight the Vietnam war. I believe we must find the means, by cutting the budget elsewhere, to care for those who still suffer from the consequence of service to their country.

Mr. Speaker, they saw their duty clearly, and did it. We cannot, as the body with the clear responsibility of providing for their care, do anything less.●

THE IMPORTANCE OF THE EXPORT-IMPORT BANK

(Mr. VENTO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. VENTO. Mr. Speaker, on March 18, William Faulkner, vice president of the American Hoist & Derrick Co. of St. Paul, Minn., presented a thoughtful statement on behalf of the American League for Exports and Security Assistance before the Subcommittee on International Finance, Trade, Investment and Monetary Policy, of the Committee on Banking, Finance and Urban Affairs on which I am privileged to serve my third term.

The principal points in Mr. Faulkner's statement are:

First. The Export-Import Bank has been an effective and necessary instrument to support American exports and jobs. In 1980, the Bank supported $18.2 billion in U.S. exports which translates into a job impact of 724,000. A State-by-State breakdown of the jobs supported by Eximbank is attached to Mr. Faulkner's statement.

Second. The Bank has been a profitable institution, earning $3 billion in profits and paying $1 billion to the U.S. Treasury.

Third. A unilateral reduction in Eximbank lending authority, as recommended by the administration will, without any restraint on the part of our trading partners, result in lost sales and lost jobs for American workers. This will make the unemployment, inflation, and budgetary problems facing the country worse, not better.

Fourth. Our trading partners are offering their exporters far more liberal credit terms than Eximbank. Typically, the terms are longer and the interest charges lower. The very day Mr. Faulkner testified, the Washington Post reported a major new Japanese campaign to increase exports, including the use of more appealing Export-Import Bank loans and long term low-interest loans.

Mr. Speaker, we all wish to support initiatives to cut the budget and reduce inflation. Mr. Faulkner is no exception. However, he offers some interesting facts and potential consequences about the unilateral reductions proposed in the Eximbank programs. He also offers some very constructive alternatives which I sincerely hope the administration and the Congress will give careful consideration to in this area.

I include Mr. Faulkner's statement and accompanying charts in the RECORD at this point:

STATEMENT OF WILLIAM B. FAULKNER

Mr. Chairman, members of this committee, we are delighted to testify on the Eximbank legislation pending before this Committee. Our organization—the American League for Exports and Security Assistance, Inc.—represents 31 corporations and four unions, all committed to a common goal—increasing exports and jobs created by exports. These corporations employ some 800,000 Americans in all 50 states and the unions have over 4 million dues-paying members.

Mr. Chairman, we recognize the economic situation in this country requires a reduction in huge government deficits. We applaud the President for acting decisively in this area. We are confident the Congress will act responsibly and make cuts where the benefits do not match the costs.

We fully support the burden sharing argument, that all segments of society should share the burden of these budget cuts—business and labor, rich and poor, etc. That argument cannot be successfully challenged. Apparently, it has persuaded many business groups, including the Chamber, the Business Roundtable, and the NAM from speaking against the proposed cuts in Eximbank. We seriously considered adopting that same course. However, upon close examination the issue of Export-Import Bank financing isn't that simple. The issue is whether or not it is in our national economic interest to cut unilaterally one of the few instruments our exporters have which allows them to remain competitive in world markets and thereby to employ millions of American workers who produce for the export market.

We honestly believe a careful analysis of the facts would lead to the conclusion that unilateral reductions in lending authority of the Eximbank would seriously:

Undermine our competitive position;

Cause more unemployment;

Increase inflation;

Worsen our balance of trade position;

Undermine any possibility of reaching an international agreement on export financing terms; and

Have little or no effect on the Federal Budget.

Let us examine these conclusions so as to understand how they were determined.

First, reducing Eximbank lending authority has very little influence on actual government spending.

Exim is in the Federal Budget in an unusual way. Many would argue that Exim should not be in the budget at all. The Bank is audited each year by the GAO in accordance with generally accepted accounting principles. It has been a profitable institution. In 47 years of operation, profits of $3 billion have accrued after paying all of its operating costs, and over $1 billion of these profits have been paid to the U.S. Treasury as dividends. In 47 years the Bank has written off only $8.3 million or 0.02 percent of $34.9 billion of disbursements in its direct loan program. This is a record of success, not failure. Clearly under any normal banking procedures loans are considered assets and the record of this Bank indicates they are indeed repaid with interest.

In any event, the dollar figure in the budget each year on Exim is simply the estimated net cash flow of the Bank for that year; i.e., the difference between the Bank's estimated revenues (repayments and interest on previous loans and receipts of loan commitment fees and insurance premiums) and the Bank's estimated expenses (actual disbursements on loan commitments, guarantees and insurance, interest on borrowings, and administrative expenses). Thus, a cut in Eximbank program authority results in a disproportionately small cut in Federal Budget figures. Each $1 billion reduction in the Bank's lending authority reduces budget figures by only about $100 million in the year when the cut is made.

On the opposite side, the benefit side, however, the Export-Import Bank has made a significant positive contribution to the health of the U.S. economy. Its programs have successfully boosted U.S. exports thereby creating additional jobs and corporate profits, which in turn generate increased Federal, state and local tax revenues. For example—

In fiscal year 1979, the Bank's programs supported $13.6 billion of U.S. export sales. In 1980, the Bank supported exports of $18.2 billion.

These exports generated, maintained or supported 554,000 American jobs in 1979 and 724,000 jobs in 1980 (every billion dollars of exports supports 40,000 U.S. jobs). These workers and their companies, paid billions of dollars in federal, state, and local taxes.

The Bank pays dividends to the U.S. Treasury out of its earnings. In 1979, the Bank paid $35 million in dividends. To conserve funds, Exim for the first time omitted a dividend for 1980 to Treasury even though 1980 operations were profitable ($109.7 million). But cumulative dividends for 1979 and prior years have exceeded $1 billion.

Thus, we believe the calculation is clear. The benefits of cutting Export-Import Bank financing are mainly psychological—taking something away from business, from the rich, to balance cuts in programs which help the poor.

But the costs fall directly on the American working man—who loses his job because his company can no longer compete in the international marketplace, and upon the U.S. budget—because this worker no longer pays taxes, but instead draws unemployment compensation.

We have examined the Export-Import Bank's direct effect — state-by-state — through the life of the Bank on exports and the direct job relationship to those exports. Table 1 gives a state-by-state breakdown of the results. For the job impact we used the Labor Department estimated ratio of 40,000 jobs created for every $1 billion in exports. Admittedly, this is an estimate. Other estimates by Treasury and others suggest the job-export relationship is closer to 60,000 jobs per $1 billion in U.S. exports. In my own company—American Hoist and Derrick—I can say that between 35 and 40 percent of the work force at AmHoist depend for their jobs on our exports. Our exports in turn, depend heavily on support from the Bank. I can cite some personal experiences in which our company has lost sales because of non-competitive export financing.

The United States faces fierce competition from European and Japanese producers in almost every sector, including high technology sectors. Their products are fine quality. On large ticket items—cranes, derricks, aircraft, heavy machinery, the credit terms are often the determining factor in who makes the sale. As indicated in the GAO report, foreign credit institutions are generally far more generous than the Eximbank. At the end of 1979, the latest full year in which data are available, Japanese MITI had export supporting policies outstanding of $460 billion; Hermes of Germany $42 billion and the U.S. Export-Import Bank, $10 billion. This explains in large part why the Japanese had a trade surplus in manufactured goods of $72 billion in 1979, Germany $59.2 billion, while the U.S. had a deficit of $2.1 billion. These data and the comparative export business financed by various export credit institutions are shown in Table 2 of the appendix.

There has been much publicity that the Bank is "owned" so to speak by a few major export oriented companies in the aerospace industry. This is misleading. It is misleading in that, over the history of the Bank, commitments have been made to over 9,000 suppliers in all 50 states. A review of these commitments suggest that small and large export oriented companies in all 50 states have received vital export financing from the Bank. Also, as representatives from the aerospace industry have pointed out, an airplane such as a Boeing 747 or a Lockheed 1011 is not made exclusively in Seattle or Burbank. There are thousands of suppliers and subcontractors spread across the land for each of these aircraft. Thus, if we lose an aircraft sale because of noncompetitive or inadequate export financing it means lost jobs all over America, not just in Seattle or Burbank.

Another assumption we seriously question is that if Eximbank direct loans are cut, the private banking institutions would pick up the slack and (a) the sale would be made anyway; and (b) we would benefit our budget. Increasingly, the availability of favorable financing has become a key element in making an export sale of major capital equipment. Under today's high interest rates in the private sector, concessionary financing is more vital than ever. Many of our international trading competitors, notably the French, Germans, British, and Japanese are aggressively providing concessionary financing assistance to their exporters despite the intention of reducing and eliminating such subsidies which formed the basis for the Tokyo Round GATT negotiations and the OECD export credit Arrangement. In 1980 official government support was behind 39 percent of Japanese exports, 35 percent of British, 34 percent of French, while only 18 percent of U.S. exports received official support. These negotiations failed mainly because we had no real weapons to negotiate with and the foreign nations were not about to give up their advantage on financing terms which could cost them sales and jobs.[1] Today, in the direct loan program the Bank is only mildly competitive with its world counterparts which almost universally provide 85 percent loan cover after a 15 percent cash payment and at interest rates of 7.75 percent for developing countries, 8.5 percent for intermediate, and 8.75 percent for developed countries. Eximbank interest rates have been generally 8.75 percent for non-aircraft and 9.25 percent for aircraft, with cover averaging only about 65 percent and 47 percent respectively. The GAO study discusses in detail the constraints which prevent the Eximbank from consistently offering competitive financing for U.S. exports.

"Additionality" of U.S. Exim programs, especially direct lending, is very high; e.g., sales which would have gone to foreign suppliers if Eximbank had not provided financing assistance. This was confirmed by a January, 1980 Treasury Department study, which concluded that, in fiscal year 1978, Exim's "additionality" on lending programs was over 70 percent. In these cases, financing was the major determinant of the sale.

If the ultimate aim of the Administration's proposal is, as it appears to be, to phase out the government's role in export financing, it should be aware that the result (which all the market economics or competitive theories in the world will not prevent) will inevitably be the loss of billions of dollars of U.S. export sales as well as the loss of thousands of American jobs.

Unless these jobs can be quickly absorbed in other sectors of the economy, the government will have less revenue, greater expenditures for unemployment compensation and higher budget deficits, the very opposite of the intended goal.

Thus, we really believe the Administration is unintentionally hurting its own cause by

[1] Comptroller General, Report to the Congress on "Financial and Other Constraints Prevent Eximbank from Consistently Offering Competitive Financing for U.S. Exports". April 30, 1980.

sharp unilateral cuts in Export-Import Bank lending authority.

We suggest that this Committee carefully review the economic ramifications of the Administration's proposals before rushing to judgement on the issue.

We, like you, are caught in an apparent dilemma on this issue. On the one hand, we fervently believe that a fully competitive Eximbank is vital to our national economic interests. On the other hand, we recognize the President's concern for preserving intact his initiative to cut the budget.

We have a few suggestions which we believe may help resolve the dilemma. One suggestion is to encourage the Bank to issue directly long term tax exempt securities to raise its capital, just as the World Bank does to raise capital. We believe that funds from the major export corporations, insurance and banking institutions would be attracted to such securities; this would be prudent for the investor, beneficial to the corporations while providing the Bank with sufficient long-term financing to compete with Hermes in Germany, COFACE in France, MITI in Japan and ECGD in the U.K. It would not involve any budgetary cost to the U.S. Treasury. The World Bank has been raising its capital this way since its inception.

Second, to qualify for the tax deferral benefits of the Domestic International Sales Corporation (DISC) provisions of the IRS Code, at least 95 per cent of the corporation's assets must be export-related. If Congress mandated that a portion of the deferred DISC income must be invested in Eximbank securities, it would be consistent with the DISC legislation while providing a renewable source of private funding from the very people who benefit most from the Bank and from DISC. We suggest the Committee may wish to ask the Treasury (and Ways and Means Committee) to study how DISC deferred assets could be channeled into our Export-Import Bank.

We also suggest that the Bank be permitted to follow normal accounting procedures of a normal banking institution. Currently Eximbank is charged with an expense when it makes a commitment to loan funds, without having disbursed a penny. There is no offsetting receivable to offset this "expense", even though the Bank has an excellent record of repayment. The only offset to current expenses is repayment of previous loan agreements. Thus, in any period when the Bank is expanding its loan commitments, it will appear, from its current accounting practices, to be losing billions of dollars when in fact it is earning money and paying dividends to the Treasury. This is nonsensical. If any other banking institution followed these accounting rules, it would cause a run on its bank. Furthermore, under these accounting rules, if the Bank shut down for two years, it would still show a budgetary loss of $2½-$3½ billion. That can't be what the Administration wants. If the Bank were able to follow normal acceptable accounting standards we doubt whether there would be any issue over the Bank's effect on the budget. We suggest that the Committee ask the Accounting Standards Principles Board and/or the GAO to compare Eximbank accounting practices with those of the World Bank and commercial banking accounting procedures.

Mr. Chairman, this concludes my statement. We have tried to be responsible and constructive in our remarks. We understand the Administration's theory, but we honestly believe that the unilateral reductions in Eximbank lending authority are based on faulty assumptions and will, if enacted or carried out by the Administration, be harmful to our international competitive position and to our domestic economy. We thank you for your patience and will be happy to answer any questions you may have.

TABLE 1.—U.S. EXPORTS FINANCED BY EXPORT-IMPORT BANK BY STATE AND ESTIMATED JOBS DIRECTLY CREATED THEREBY AS OF JANUARY 31, 1981

[Dollars in millions]

State	Number of Eximbank commitments	Amount of Eximbank commitments [1]	U.S. export value	Estimate U.S. jobs [2]
Alabama	72	$47.9	$61.4	2,456
Arkansas	26	203.2	205.1	8,204
Arizona	50	99.3	116.3	4,652
California	442	6,604.8	11,078.5	443,140

THREAT TO THE LIBRARIES OF THE COUNTRY

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PERKINS. Mr. Speaker, this week is National Library Week, designated by Congress to focus attention upon the importance of libraries in the lives of American citizens. I am proud that Congress has been of significant assistance to the libraries in our schools, in our communities, and in our institutions of higher learning. As we look at the Federal role in the past we see programs that have been successful and dollars well spent. But now it seems the administration would like us to cut back in our aid to libraries by reducing appropriations for the Library Services and Construction Act, the title IV-B of the Elementary and Secondary Education Act, and title II of the Higher Education Act.

Besides the more ominous overtones of the cuts (that is the lessening of citizen access to information, essential in a democratic society), the practical effects of these cuts would be so devastating to libraries that the savings would hardly be worth it. According to a survey conducted by the American Library Association, a 25-percent cut in funds for ESEA title IV-B would have a major impact on every school district in the country. Only 6 out of 74 respondents to the survey said their State or locality could fill the gap left by a cut in Federal funds. Teaching would suffer if materials are not kept up to date, in a decent library to back up the curriculum. Small schools would really be hard hit and private school participation would definitely drop. All this damage to a program that has time after time received overwhelmingly popular support in the Congress. By a great majority, the respondents were also opposed to the inclusion of this program in the State education bloc grant program that the administration has proposed for fiscal year 1982. Among the many valid reasons for not including this program in such a package were:

When funds for equipment have to compete with funds for salaries, salaries will always win;

Specific State mandates such as special education will be funded first, making it difficult for libraries to compete;

Libraries would not be able to plan long range;

In a bloc grant situation, the funding tends to be highly political with the program with the best public relations receiving the most funds.

And many more. In the long run, this might be one of the most expensive budget cuts Congress could enact.

A 25-percent cut to the Library Services and Construction Act programs could be equally damaging. A just completed evaluation of LSCA title I for the Department of Education concluded that the program has made significant contributions and continues to be needed. If cut, the impact would be immediate, since LSCA is not advance funded. Since fiscal year 1981 funding is available only through June 5, the Department has prorated allocations to the States and will provide only 72 percent of the funds until Congress makes a further decision on the fiscal year 1981 funding. Many State libraries have already been affected, especially those which provide essential public services in sparsely

populated areas. Oregon, for instance, has eliminated its $80,000 book budget and imposed a hiring freeze to cope with the shortfall. My own State of Kentucky would lose $245,879. Let me remind you that these are dollars to provide library services to disadvantaged persons in both urban and rural areas, to the institutionalized, to the handicapped, to persons of limited English-speaking ability, and to the aging.

I am also opposed to the proposed rescission of funds for title IIA of the Higher Education Act, which provides grants to academic libraries for the acquisition of books, periodicals, and other library materials and for establishing networks. In 1979, the average cost of an economics or sociology book was $43.57, a 47-percent increase over the year before. Inflation has ravaged library budgets and the Federal dollars are a real help to our academic institutions. I just do not think the administration has made a good enough case for wiping out these programs that the American people really need and want. On the contrary, the administration talks of the great need for an excellent national defense and yet recent reports on the All-Volunteer Army indicate that almost 4 percent of the enlistees read at below the fifth-grade level and more than 25 percent of new enlistees have difficulty reading their training manuals.

The administration speaks to the need for a productive work force, yet in a Wall Street Journal article on January 22 it was stated that—

> The lack of literate workers is creating problems for a variety of industries . . . poorly educated workers are contributing to the U.S.'s productivity difficulties.

I could continue, for the importance of the survival of this Nation's libraries cannot be overstated. But I conclude in asking you to listen to the librarians and concerned individuals when they come to your offices this Library Legislation Day, for their concern is in the national interest.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. MITCHELL of New York (at the request of Mr. MICHEL), for today and tomorrow, on account of illness in the family.

Mr. DERRICK (at the request of Mr. WRIGHT), for today, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HARTNETT) to revise and extend their remarks and include extraneous matter:)

Mr. COLLINS of Texas, for 45 minutes, on April 8.

Mr. CORCORAN, for 5 minutes, today.

Mr. ASHBROOK, for 10 minutes, today.

(The following Members (at the request of Mr. BLANCHARD) to revise and extend their remarks and include extraneous matter:)

Mr. OTTINGER, for 5 minutes, today.

Mr. CROCKETT, for 10 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. WILLIAM J. COYNE, for 15 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

(The following Member (at the request of Mr. ANDERSON) to revise and extend his remarks and include extraneous matter:)

Mr. NEAL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BROOMFIELD, and to revise and extend his remarks during the special order by Mr. KEMP today.

Mr. VENTO, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,320.

(The following Members (at the request of Mr. HARTNETT) and to include extraneous matter:)

Mr. KEMP.
Mr. ROUSSELOT.
Mr. CARMAN.
Mr. PHILIP M. CRANE.
Mr. SMITH of New Jersey.
Mr. MICHEL in two instances.
Mr. TAUKE.
Mr. CONABLE in two instances.
Mr. WHITEHURST.
Mr. ROTH.
Mr. GILMAN in three instances.
Mr. LOTT.
Mr. GOODLING in two instances.
Mr. EVANS of Iowa.
Mr. BADHAM.
Mr. LAGOMARSINO in two instances.
Mr. COLLINS of Texas in three instances.
Mr. BLILEY.
Mr. CHAPPIE.
Mr. DANNEMEYER in four instances.
Mr. MCDADE.
Mr. FINDLEY.
Mr. ASHBROOK in three instances.
Mr. MARRIOTT.
Mr. STANTON of Ohio.
Mr. DERWINSKI.
Mr. ROBERTS of South Dakota.

(The following Members (at the request of Mr. BLANCHARD) and to revise and extend their remarks:)

Mrs. SCHROEDER in five instances.
Mr. BEILENSON.
Mr. GRAY.
Mr. ROEMER in 10 instances.
Mr. KASTENMEIER.
Mr. VENTO.
Mr. STOKES.
Mr. FORD of Michigan in three instances.
Mr. HAMILTON.
Mr. MAZZOLI.
Mr. WEAVER.
Mr. YATRON.
Mr. BOLLING.
Mr. SANTINI.
Mr. GUARINI in four instances.
Mr. OTTINGER in three instances.
Mr. FOWLER.
Mr. BAILEY of Pennsylvania.
Mr. KOGOVSEK.
Mr. IRELAND.
Mr. WEISS in five instances.
Mr. BONER of Tennessee.
Mr. SKELTON.
Mr. HUBBARD.
Mr. GEPHARDT in two instances.
Mr. DORGAN of North Dakota.
Mr. JENKINS.
Mr. LEHMAN.
Mr. HAWKINS in 10 instances.
Mr. YOUNG of Missouri.
Mr. SIMON.
Mr. EVANS of Indiana in two instances.
Mr. MCDONALD in five instances.
Ms. OAKAR in two instances.
Mr. JONES of North Carolina.
Mr. RAHALL.
Mr. SHELBY.
Ms. FERRARO.
Mr. REUSS.
Mr. NEAL
Mr. EDWARDS of California.
Mr. CONYERS.
Mr. GAYDOS.

ADJOURNMENT

Mr. ANDERSON. Mr. Speaker, I move that the house do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 32 minutes p.m.), the House adjourned until tomorrow, Wednesday, April 8, 1981, at 3 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1032. Communication from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1981 and amended appropriation language for fiscal year 1982 (H. Doc. No. 97-43); to the Committee on Appropriations and ordered to be printed.

1033. A letter from the Executive Associate Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation to the Department of Justice for "Salaries and expenses, U.S. Attorneys and Marshals," for fiscal year 1981, has been reapportioned on a basis that indicates the ne-

cessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1034. A letter from the Secretary of Defense, transmitting eight reports of violations of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1035. A letter from the Deputy Secretary of Defense, transmitting nine reports of violations of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1036. A letter from the Acting General Counsel, U.S. General Accounting Office, transmitting a report on the status of budget authority that was proposed for rescission, but for which Congress failed to pass a rescission bill; to the Committee on Appropriations.

1037. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to improve the effectiveness and reduce the cost of programs under the National School Lunch Act and the Child Nutrition Act of 1966; to the Committee on Education and Labor.

1038. A letter from the Acting Director of ACTION, transmitting a draft of proposed legislation to authorize appropriations for programs under the Domestic Volunteer Service Act of 1973, and for other purposes; to the Committee on Education and Labor.

1039. A letter from the Chairman, National Council on the Handicapped, transmitting the annual report of the National Council on the Handicapped, pursuant to section 401(6) of the Rehabilitation Act of 1973 as amended; to the Committee on Education and Labor.

1040. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to consolidate Federal assistance to States for health promotion and disease prevention, to provide greater flexibility to States in administering health promotion and disease prevention programs, and for other purposes; to the Committee on Energy and Commerce.

1041. A letter from the Secretary of Transportation, transmitting a report on the study of the cost-benefit analysis of increased natural gas pipeline safety regulation, pursuant to section 110 of Public Law 96-129; to the Committee on Energy and Commerce.

1042. A letter from the Acting President, Overseas Private Investment Corporation, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Affairs.

1043. A letter from the Secretary of Labor, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1044. A letter from the Acting Administrator, United States Environmental Protection Agency, transmitting the Agency's annual 5-year plan for research, development, and demonstration, pursuant to section 5 of Public Law 94-475, together with the comments of the Science Advisory Board, pursuant to section 8(c) of Public Law 95-155; to the Committee on Science and Technology.

1045. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to consolidate Federal assistance to States for health services, to provide greater flexibility to States in administering health services programs, and for other purposes; jointly to the Committees on Energy and Commerce, Education and Labor, and Ways and Means.

1046. A letter from the Acting Comptroller General of the United States, transmitting a report on efforts to measure the undocumented alien population (GGD-81-56, April 6, 1981); jointly, to the Committees on Government Operations and the Judiciary.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON (for himself, Mr. LUNGREN, Mr. MATSUI, and Mr. ROUSSELOT):

H.R. 3044. A bill to clarify the intent of Congress with respect to the exemption of the economic interests of State and local governments from the crude oil windfall profit tax; to the Committee on Ways and Means.

By Mr. ANDREWS:

H.R. 3045. A bill to amend the Economic Opportunity Act of 1964 to extend the authorizations of appropriations contained in such act, and for other purposes; to the Committee on Education and Labor.

H.R. 3046. A bill to amend the Older Americans Act of 1965 to extend the authorizations of appropriations contained in such act, and for other purposes; to the Committee on Education and Labor.

By Mr. BAFALIS:

H.R. 3047. A bill to amend section 1951 of the United States Code, and for other purposes; to the Committee on the Judiciary.

By Mr. BEILENSON (for himself, Mr. JONES of North Carolina, Mr. BEDELL, Mr. BINGHAM, Mr. BONIOR of Michigan, Mr. BONKER, Mr. BRODHEAD, Mr. BROWN of California, Mr. BURGENER, Mr. CLINGER, Mr. DELLUMS, Mr. DERWINSKI, Mr. DORGAN of North Dakota, Mr. DORNAN of California, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. EMERY, Mr. FAZIO, Mr. FORSYTHE, Mr. FRANK, Mr. GREGG, Mr. GUYER, Mrs. HOLT, Mr. HUGHES, Mr. HYDE, Mr. JACOBS, Mr. JEFFORDS, Mr. KILDEE, Mr. LAGOMARSINO, Mr. LEHMAN, Mr. LONG of Maryland, Mr. LOWERY of California, Mr. MCCLOSKEY, Mr. MCKINNEY, Ms. MIKULSKI, Mr. MINETA, Mr. MOAKLEY, Mr. NEAL, Mr. OTTINGER, Mr. PANETTA, Mr. PATTERSON, Mr. RICHMOND, Mr. ROE, Mr. ROUSSELOT, Mr. SCHEUER, Mr. SEIBERLING, Mr. SIMON, Mr. STARK, Mr. STOKES, Mr. THOMAS, Mr. VENTO, Mr. WAXMAN, Mr. WEISS, Mr. WHITEHURST, Mr. WILSON, and Mr. YATES):

H.R. 3048. A bill to provide for the control of the importing into, and the exporting from, the United States of elephants and elephant products; to the Committee on Merchant Marine and Fisheries.

By Mr. BIAGGI:

H.R. 3049. A bill to increase the interest exemption to $1,000 in the case of taxpayers who are not elderly, to exclude from gross income all interest in the case of taxpayers who are elderly, to make permanent the exemption of certain interest income from tax, and for other purposes; to the Committee on Ways and Means.

By Mr. EDWARDS of California (for himself, Mr. COELHO, Mr. DANIELSON, Mr. FRANK, Mr. GARCIA, Mr. KOGOVSEK, Mr. MINETA, Mr. MITCHELL of Maryland, Mr. MURPHY, Mr. PEPPER, Mr. RICHMOND, and Mr. STUDDS):

H.R. 3050. A bill to amend the Internal Revenue Code of 1954 to provide tax reform and tax incentives for individuals and businesses; to the Committee on Ways and Means.

By Mr. BLANCHARD:

H.R. 3051. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide mandatory social security coverage for all Members of Congress and other employees in the legislative branch, and for all new employees of the United States (and its instrumentalities) outside of the legislative branch; to the Committee on Ways and Means.

H.R. 3052. A bill to amend title XVI of the Social Security Act to provide for a more complete exchange of information between the Secretary of Health and Human Services and the Immigration and Naturalization Service with respect to all aliens who are applicants for or recipients of supplemental security income benefits, and to amend section 212 of the Immigration and Nationality Act to provide for the exclusion from the United States of aliens who are determined by the Attorney General to be likely to receive such benefits within 6 months of their entry; jointly, to the Committees on the Judiciary and Ways and Means.

By Mr. CHAPPIE:

H.R. 3053. A bill to require that certain lands in the Shasta National Forest be managed for uses other than wilderness; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. COLEMAN:

H.R. 3054. A bill to amend title 11 of the United States Code to require that bankruptcy courts grant relief from stays of acts against agricultural commodities held as property of estates in bankruptcy; to the Committee on the Judiciary.

By Mr. CONABLE:

H.R. 3055. A bill to amend the Internal Revenue Code of 1954 to provide that meals furnished by employers to employees which are excluded from income shall not be subject to employment taxes; to the Committee on Ways and Means.

By Mr. CONABLE (for himself and Mr. JENKINS):

H.R. 3056. A bill to amend the Internal Revenue Code to permit foreign pension plans to invest in the United States on a nontaxable basis; to the Committee on Ways and Means.

By Mr. CORCORAN:

H.R. 3057. A bill to amend the Energy Security Act to authorize the Synthetic Fuels Corporation to provide loan guarantees for projects for production of alcohol and other fuels from biomass and municipal wastes, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Agriculture, and Energy and Commerce.

By Mr. JAMES K. COYNE (by request):

H.R. 3058. A bill to amend the Federal Reserve Act to authorize the Board of Governors of the Federal Reserve System to impose reserve requirements on money market mutual funds; jointly, to the Com-

mittees on Banking, Finance and Urban Affairs and Energy and Commerce.

By Mr. DANIEL B. CRANE:

H.R. 3059. A bill to repeal section 1725 of title 18, United States Code, which prohibits mailable matter on which no postage has been paid from being deposited into letter boxes; jointly, to the Committees on Post Office and Civil Service and the Judiciary.

By Mr. DANIELSON:

H.R. 3060. A bill to amend section 3006A of title 18 of the United States Code to provide protection against personal liability to the officers and employees of certain defender organizations providing representation under the Criminal Justice Act; to the Committee on the Judiciary.

By Mr. DORNAN of California:

H.R. 3061. A bill to amend the Internal Revenue Code of 1954 to provide tax-saving incentives for savings accounts established for the purpose of purchasing a home, and for other purposes; to the Committee on Ways and Means.

By Mr. DUNCAN:

H.R. 3062. A bill to amend the Internal Revenue Code of 1954 to reduce the maximum individual income rate to 50 per centum; to the Committee on Ways and Means.

By Mr. EDWARDS of Alabama:

H.R. 3063. A bill to amend the Clean Air Act to require certain areas to be designated as class III for purposes of the provisions of that act relating to nondegradation of air quality, and for other purposes; to the Committee on Energy and Commerce.

By Mr. EVANS of Georgia:

H.R. 3064. A bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice; to the Committee on Ways and Means.

H.R. 3065. A bill to protect taxpayers' privacy regarding third-party recordkeepers summoned to produce records of taxpayers and at the same time to insure effective, efficient enforcement of Internal Revenue Service third-party summons; to the Committee on Ways and Means.

H.R. 3066. A bill to simplify trade procedures regarding sales of U.S. products abroad, and for other purposes; jointly to the Committees on Foreign Affairs and the Judiciary.

By Mr. EVANS of Georgia (for himself and Mr. ARCHER):

H.R. 3067. A bill to amend title 18 of the United States Code to provide a mandatory death penalty for the killing or attempted killing of the President if a firearm is used in the offense, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Iowa:

H.R. 3068. A bill to amend the Soil Conservation and Domestic Allotment Act to provide the additional financial assistance to producers who remove cropland from production in order to install conservation measures; to the Committee on Agriculture.

H.R. 3069. A bill to provide that under any set-aside or diversion program for agricultural commodities, lands set-aside or diverted must be selected, in part, on the basis of the contribution such set-aside or diversion will make to soil conservation; to the Committee on Agriculture.

By Mr. FINDLEY (for himself, Mr. WINN, Mr. HORTON, Mr. MURPHY, Mr. STOKES, Mr. PEPPER, Mr. FRANK, Mr. KILDEE, and Mr. VENTO):

H.R. 3070. A bill to amend the Internal Revenue Code of 1954 to allow a credit for amounts paid by deaf or speech-impaired individuals for use of toll telephone service by means of teletypewriters, and to allow such individuals a deduction for the purchase and installation of such teletypewriters; to the Committee on Ways and Means.

By Mr. FLORIO (for himself, Mr. LENT, Ms. MIKULSKI, Mr. MADIGAN, Mr. SCHEUER, and Mr. MOFFETT):

H.R. 3071. A bill to amend the Noise Control Act of 1972, and for other purposes; to the Committee on Energy and Commerce.

By Mr. FORD of Tennessee (for himself, Mr. BEARD, and Mr. JONES of Tennessee):

H.R. 3072. A bill to designate the control tower at Memphis International Airport the Omlie Tower; to the Committee on Public Works and Transportation.

By Mr. GEPHARDT:

H.R. 3073. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit for contributions to certain investment accounts, to exempt the earnings on such accounts from tax, and to exempt from tax certain distributions from such accounts; to the Committee on Ways and Means.

By Mr. GEPHARDT (for himself and Mr. DUNCAN):

H.R. 3074. A bill to amend section 103(b)(6) of the Internal Revenue Code of 1954 to increase the exemption from the industrial development bond provisions for certain small issues; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 3075. A bill relating to the tariff treatment of tuna packed in airtight containers; to the Committee on Ways and Means.

By Mr. GOODLING:

H.R. 3076. A bill to consolidate educational assistance programs for refugees; to the Committee on Education and Labor.

By Mr. GOODLING (for himself and Mr. FORD of Michigan):

H.R. 3077. A bill to amend the National School Lunch Act and the Child Nutrition Act of 1966 to provide for the issuance of commodity allowances by the U.S. Department of Agriculture for the purchase of domestic agricultural commodities by schools to carry out school feeding programs in lieu of the purchase and distribution of commodities to the States by the U.S. Department of Agriculture, and for other purposes; jointly, to the Committees on Education and Labor and Agriculture.

By Mr. GONZALEZ (for himself and Mr. SCHUMER):

H.R. 3078. A bill to provide supplemental authority to the Secretary of Housing and Urban Development for the purpose of providing annual contributions for the operation of low-income housing projects; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GREEN (for himself, Mrs. CHISHOLM, Mr. WINN, Mr. JOHN L. BURTON, Mr. LAFALCE, Mr. ADDABBO, Mr. FLORIO, Mr. ZEFERETTI, Mr. GARCIA, Mr. MITCHELL of Maryland, Mr. CLAY, Mr. STOKES, Mr. DORNAN of California, Mr. PEPPER, Mr. FAZIO, Mr. PATTERSON, Mr. ROE, and Mr. RINALDO):

H.R. 3079. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for real estate taxes imposed on tenants; to the Committee on Ways and Means.

By Mr. GUARINI:

H.R. 3080. A bill to amend title II of the Social Security Act to provide that wife's or mother's insurance benefits may be paid to an individual, on the basis of having a nondisabled child in care, until such child finishes high school (or attains age 19 while still in school) instead of only until such child attains age 18 as is provided in existing law; to the Committee on Ways and Means.

H.R. 3081. A bill to amend title II of the Social Security Act to eliminate the offset against social security benefits which is presently imposed in the case of spouses and surviving spouses receiving certain Government pensions; to the Committee on Ways and Means.

H.R. 3082. A bill to amend the Internal Revenue Code of 1954 to increase to $7,500 the maximum deduction for contributions to retirement savings; to the Committee on Ways and Means.

By Mr. SAM B. HALL, JR.:

H.R. 3083. A bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. JENKINS:

H.R. 3084. A bill to amend title II of the Social Security Act to permit a State to modify its coverage agreement so as to exclude services performed in any year by an election official or election worker if the remuneration paid for such services is less than $300 (instead of only if such remuneration is less than $100 as at present); to the Committee on Ways and Means.

H.R. 3085. A bill to amend the Internal Revenue Code of 1954 to provide for employee stock ownership plans, and for other purposes; to the Committee on Ways and Means.

H.R. 3086. A bill to amend the Internal Revenue Code to change certain accounting rules related to inventory, and for other purposes; to the Committee on Ways and Means.

By Mr. KOGOVSEK:

H.R. 3087. A bill to amend section 502 of the Federal Mine Safety and Health Act of 1977 to require the Secretary of Labor to conduct a compliance assistance visit at any coal or other mine within 15 days after receiving a request for such visit from the operator of the mine; to the Committee on Education and Labor.

By Mr. LANTOS:

H.R. 3088. A bill to amend title 18 of the United States Code to prohibit the importation of parts of certain firearms and for other purposes; to the Committee on the Judiciary.

By Mr. LENT:

H.R. 3089. A bill to amend the Public Safety Officers' Benefits Act of 1976 to eliminate the requirement that parents of deceased public safety officers be financially dependent on such officers in order to qualify for death benefits; to the Committee on the Judiciary.

H.R. 3090. A bill to amend title 5 of the United States Code to change the date of the legal public holiday of Memorial Day from the last Monday in May to May 30; to the Committee on Post Office and Civil Service.

By Mr. LEWIS (for himself, Mr. MCDADE, Mr. CONTE, Mr. DAUB, Mr. DREIER, Mr. MARRIOTT, Mrs. SNOWE, Mr. STANTON of Ohio, Mr. WILLIAMS of Ohio, Mr. WEBER of Ohio, Mr. IRELAND, and Mr. NOWAK):

H.R. 3091. A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy; to the Committee on Small Business.

By Mr. MARRIOTT:

H.R. 3092. A bill to facilitate and encourage the production of oil from tar sand and other hydrocarbon deposits; to the Committee on Interior and Insular Affairs.

By Mr. MARTIN of North Carolina (for himself and Mr. HOLLAND):

H.R. 3093. A bill to amend the Internal Revenue Code of 1954 to provide for increased savings and investment by individuals through a tax-deferred rollover account; to the Committee on Ways and Means.

By Mr. MAVROULES:

H.R. 3094. A bill to modify the navigation project for Lynn Harbor, Mass.; to the Committee on Public Works and Transportation.

By Mr. MICA:

H.R. 3095. A bill to provide for the establishment of a national cemetery in the Withlacoochee State Forest in Sumter County, Fla.; to the Committee on Veterans' Affairs.

By Mr. MICHEL:

H.R. 3096. A bill to increase the penalties and eliminate parole for those offenses in which a firearm is used and violence or the threat of imminent violence was involved, and for other purposes; to the Committee on the Judiciary.

By Mr. MINISH:

H.R. 3097. A bill to give the Federal Reserve Board authority to impose reserves on money market mutual funds; jointly, to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

By Mr. MITCHELL of Maryland:

H.R. 3098. A bill to provide for the establishment of the Federal Protective Service for the protection of property under the jurisdiction of the General Services Administration, to provide for the pay and training of the members of such service, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. MITCHELL of Maryland (for himself, Mr. CLAY, Mrs. COLLINS of Illinois, Mrs. CHISHOLM, Mr. DYMALLY, Mr. GUARINI, Mr. STOKES, Mr. WEISS, Mr. CONYERS, Mr. DIXON, Mr. PATTERSON, and Mr. BONIOR of Michigan):

H.R. 3099. A bill to establish Federal policies designed to minimize the involuntary displacement of individuals from housing and to provide additional assistance for those who have been so displaced; jointly, to the Committees on Banking, Finance and Urban Affairs and Public Works and Transportation.

By Mr. MOTTL:

H.R. 3100. A bill to amend the Internal Revenue Code of 1954 to encourage greater individual savings; to the Committee on Ways and Means.

H.R. 3101. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the exclusion from gross income of dividends received by individuals; to the Committee on Ways and Means.

H.R. 3102. A bill to amend the Social Security Act to provide for a national catastrophic health insurance program, to amend the Internal Revenue Code of 1954 to provide for a tax on removal of natural resources from Federal lands to pay for such program, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

H.R. 3103. A bill to improve part B of the medicare program with respect to the hearing requirement applicable to a carrier, the determination of reasonable charge, and the amount of payment made under such part; jointly, to the Committees on Ways and Means and Energy and Commerce.

Mr. PANETTA:

H.R. 3104. A bill to amend the Internal Revenue Code of 1954 to provide that agricultural labor which is subject to FICA tax withholding shall also be subject to withholding for income tax purposes; to the Committee on Ways and Means.

Mr. PORTER:

H.R. 3105. A bill to amend section 1751 of title 18, United States Code, to provide the death penalty for killing a Federal officer or employee in the commission of a Presidential assassination, kidnaping, or assault, and for other purposes; to the Committee on the Judiciary.

H.R. 3106. A bill to amend title 18, United States Code, to prohibit licensed importers, licensed manufacturers, and licensed dealers from selling or otherwise transferring ownership of handguns to any persons or entities who are not licensed importers, licensed manufacturers, licensed dealers, or governments; to the Committee on the Judiciary.

H.R. 3107. A bill to amend chapter 44 of title 18 of the United States Code to extend and strengthen the mandatory penalty feature of the prohibition against the use of deadly or dangerous weapons in Federal felonies, and for other purposes; to the Committee on the Judiciary.

By Mr. RAILSBACK:

H.R. 3108. A bill to amend title 18, United States Code, to regulate polygraph and other detection of deception examinations and prohibit certain practices with respect thereto for the purpose of protecting the privacy rights of employees and individuals seeking employment with employers engaged in any business or activity in or affecting interstate commerce while permitting such employers to use such examinations to protect their businesses and control property losses attributable to employee theft and other acts of misconduct; to the Committee on the Judiciary.

By Mr. RICHMOND:

H.R. 3109. A bill to amend and extend the Food Stamp Act of 1977, as amended; to amend and extend the commodity distribution provisions of the Agriculture and Consumer Protection Act of 1973, and for other purposes; to the Committee on Agriculture.

By Mr. HANSEN of Idaho:

H.R. 3129. A bill for the relief of Alick A. de Montmorency; to the Committee on the Judiciary.

By Mr. LONG of Maryland:

H.R. 3130. A bill for the relief of Antonino H. Calon, M.D.; Celia P. Calon, M.D.; and Maritoni Calon; to the Committee on the Judiciary.

By Mr. SCHUMER:

H.R. 3131. A bill for the relief of Pepi Traub; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 52: Mr. EVANS of Indiana and Mr. PICKLE.

H.R. 157: Mr. SIMON, Mr. GRAMM, Mr. LAGOMARSINO, Mrs. HOLT, Mr. PARRIS, Mr. EVANS of Georgia, Mr. WALKER, Mr. BAILEY of Missouri, Mr. BUTLER, Mr. BADHAM, Mr. BARNARD, Mr. GUYER, MR. ROBERT W. DANIEL, JR., Mr. HYDE, Mr. GINGRICH, Mr. SOLOMON, Mr. LOTT, Mr. LUNGREN, Mr. RUDD, Mr. WHITTAKER, Mr. WINN, Mr. LEBOUTILLIER, Mr. NICHOLS, Mr. FINDLEY, Mr. HUCKABY, Mr. CHAPPELL, Mr. HARTNETT, Mr. LIVINGSTON, Mr. REGULA, Mr. JOHNSTON, Mr. PORTER, and Mr. FRENZEL.

H.R. 158: Mr. DERWINSKI, Mr. FORSYTHE, Mr. EVANS of Georgia, Mr. COLLINS of Texas, Mr. BADHAM, Mr. STRATTON, Mr. JOHNSTON, Mr. WINN, Mr. WILSON, and Mr. JAMES K. COYNE.

H.R. 214: Mr. HOWARD.

H.R. 215: Mr. STANGELAND, Mr. ROE, and Mr. SYNAR.

H.R. 248: Mr. ADDABBO, Mr. BARNES, Mrs. BOUQUARD, Mr. FRENZEL, Mr. PRITCHARD, Mr. ROUSSELOT, Mr. WHITEHURST, Mr. WINN, Mr. VENTO, Mr. SAWYER, and Mrs. FENWICK.

H.R. 269: Mr. SAWYER and Mr. STUMP.

H.R. 280: Mr. SMITH of Alabama.

H.R. 284: Mr. SMITH of Alabama.

H.R. 450: Mr. DANIEL B. CRANE, Mr. WINN, Mr. LOTT, Mr. MCDONALD, Mr. BADHAM, Mr. CHAPPELL, Mr. BUTLER, and Mr. BAFALIS.

H.R. 465: Mr. BAILEY of Pennsylvania.

H.R. 476: Mr. ERTEL.

H.R. 484: Mr. LAFALCE.

H.R. 556: Mr. GEPHARDT, Mr. MINETA, Mr. BRODHEAD, Mr. DONNELLY, Mr. HEFTEL, and Mr. ZABLOCKI.

H.R. 565: Mr. STARK.

H.R. 567: Mr. GINGRICH.

H.R. 637: Mr. DERWINSKI, Mr. SOLOMON, and Mr. GINGRICH.

H.R. 645: Mr. CAMPBELL, and Mr. JAMES K. COYNE.

H.R. 646: Mr. JAMES K. COYNE.

H.R. 654: Mr. MOORE, Mr. SKEEN, Mr. HOPKINS, Mrs. BYRON, and Mr. RUDD.

H.R. 886: Mr. LONG of Maryland.

H.R. 911: Mr. GOODLING, Mr. SPENCE, and Mr. BAILEY of Pennsylvania.

H.R. 1006: Mr. FORD of Tennessee.

H.R. 1266: Ms. OAKAR.

H.R. 1290: Mrs. SCHNEIDER, Mr. PASHAYAN, Mr. GINGRICH, Mrs. BOUQUARD, and Mrs. BOGGS.

H.R. 1294: Mr. FOUNTAIN.

H.R. 1297: Mr. KAZEN.

H.R. 1298: Mr. KAZEN.

H.R. 1458: Mr. JAMES K. COYNE.

H.R. 1541: Mr. PATTERSON.

H.R. 1596: Mr. MATSUI.

H.R. 1646: Mr. BAILEY of Pennsylvania, Mr. BEILENSON, Mr. GRAY, Mr. SIMON, Mr. STOKES, and Mr. SUNIA.

H.R. 1663: Mrs. SCHNEIDER, Mr. BAILEY of Pennsylvania, Mr. DOWNEY, Mr. PATTERSON, Mr. ROSENTHAL, Mr. MCHUGH, Mr. PANETTA, Mr. MINETA, Mr. MILLER of California, Mr. MATSUI, Mr. COELHO, Mr. DYMALLY, Mr. DANIELSON, Mr. ROYBAL, Mr. EDWARDS of California, Mr. BEILENSON, Mr. OTTINGER, and Mr. SMITH of New Jersey.

H.R. 1686: Mr. OTTINGER, Mr. BEDELL, Mr. BONIOR of Michigan, Mr. BROWN of California, Mr. JAMES K. COYNE, Mr. ECKART, Mr. EDGAR, Mr. FAZIO, Mr. FORSYTHE, Mr. GUYER, Mr. HOWARD, Mr. IRELAND, Mr. MAVROULES, Mr. MCKINNEY, Mr. MURPHY, Mr. SIMON, Mr. STOKES, Mr. VENTO, Mr. WEAVER, Mr. WHITEHURST, Mr. WOLPE, AND Mr. WYDEN.

H.R. 1703: Mr. PHILIP M. CRANE AND Mr. STUMP.

H.R. 1723: Mr. BONER of Tennessee.

H.R. 1769: Mr. SEIBERLING.

H.R. 1778: Mr. MCKINNEY.

H.R. 1779: Mr. MCKINNEY.

H.R. 1819: Mr. BONKER, Mr. HUBBARD, Mr. LEWIS, Mr. MINETA, Mr. NEAL, Mr. SEIBERLING, and Mr. WILLIAMS of Montana.

H.R. 1911: Mr. GRAMM, Mr. BLILEY, and Mr. HENDON.

H.R. 1914: Mr. GINGRICH, Mr. MOTTL, Mr. SIMON, and Mr. SOLOMON.

H.R. 1935: Mr. CONYERS.

H.R. 1951: Mr. ROSENTHAL.

H.R. 1956: Mr. HANSEN of Utah.

H.R. 2024: Mr. RAHALL.

H.R. 2031: Mr. SPENCE and Mr. WILLIAMS of Montana.

H.R. 2036: Mr. HILER, Mr. GUYER, Mr. SIMON, Mr. NEAL, Mr. PATTERSON, Mr. BARNES, Mr. PRITCHARD, Mr. FRANK, Mr. LAFALCE, Mr. DAUB, Mr. MILLER of California, Mr. AKAKA, and Mr. CHAPPELL.

H.R. 2037: Mr. EDWARDS of Oklahoma.

H.R. 2262: Mr. COELHO.

H.R. 2319: Mr. SMITH of Iowa, Mr. SAVAGE, Mr. WON PAT, Mr. STANGELAND, Mr. BEVILL, Mrs. BOUQUARD, Mr. BEDELL, Mr. FORSYTHE, Mr. NEAL, Mr. FARY, Mr. ADDABBO, Mr. JOHNSTON, Mr. RICHMOND, Mr. D'AMOURS, Mr. LOWERY of California, Mr. KOGOVSEK, Mr. IRELAND, Mr. FISH, Mr. WHITEHURST, Mr. EVANS of Georgia, Mr. SANTINI, and Mr. MARRIOTT.

H.R. 2327: Mr. DAUB.

H.R. 2334: Mr. WEISS, Mr. CONYERS, Ms. FERRARO, and Mr. SWIFT.

H.R. 2352: Mr. FISH, Mr. PORTER, Mr. BONKER, Mr. GUYER, and Mr. WALGREN.

H.R. 2388: Mr. FIELDS.

H.R. 2421: Mr. GRAMM.

H.R. 2422: Mr. GRAMM and Mr. WHITEHURST.

H.R. 2423: Mr. GRAMM, Mr. WHITEHURST, and Mr. WILSON.

H.R. 2424: Mr. GRAMM and Mr. WHITEHURST.

H.R. 2425: Mr. GRAMM and Mr. WHITEHURST.

H.R. 2428: Mr. LEE.

H.R. 2451: Mr. JAMES K. COYNE and Mr. BAFALIS.

H.R. 2509: Mr. ARCHER, Mr. AUCOIN, Mr. BARNARD, Mr. BLILEY, Mrs. BOGGS, Mr. CAMPBELL, Mr. CHAPPELL, Mr. COLLINS of Texas, Mr. CORCORAN, Mr. DOUGHERTY, Mr. ENGLISH, Mr. EVANS of Georgia, Mr. FAZIO, Mr. FOUNTAIN, Mr. GINN, Mr. GRADISON, Mr. GRAY, Mr. SAM B. HALL, Mr. HEFNER, Mr. HOLLAND, Mr. HUCKABY, Mr. HUTTO, Mr.

JOHNSTON, Mr. LEHMAN, Mr. LIVINGSTON, Mr. MADIGAN, Mr. MONTGOMERY, Mr. PASHAYAN, Mr. RINALDO, Mr. ROEMER, Mr. RUDD, Mr. SENSENBRENNER, Mr. SHELBY, Mrs. SMITH of Nebraska, Mr. STENHOLM, Mr. TAUZIN, Mr. WEBER of Minnesota, Mr. WHITEHURST, Mr. WHITLEY, and Mr. YOUNG of Alaska.

H.R. 2512: Mr. BAILEY of Pennsylvania.

H.R. 2522: Mr. EVANS of Georgia.

H.R. 2523: Mr. MURPHY, Mr. WILLIAMS of Montana, and Mr. CORRADA.

H.R. 2556: Mr. WINN, Mr. LAGOMARSINO, Mr. HANSEN of Idaho, and Mr. DANIEL B. CRANE.

H.R. 2618: Mr. GRAMM, Mr. HUBBARD, Mr. BEVILL, and Mr. STUMP.

H. Con. Res. 96: Mr. DORNAN of California, Mrs. FENWICK, Mr. MARKEY, Mr. AUCOIN, Mr. WHITEHURST, Mr. HARKIN, Mr. WEISS, Mrs. HOLT, Mr. BEILENSON, Mr. EDGAR, Mr. MOLINARI, Mr. FORSYTHE, Mrs. SCHROEDER, Mr. ERDAHL, Mr. JEFFORDS, Mr. RICHMOND, Mr. EDWARDS of California, Mr. LOWRY of Washington, Mr. JACOBS, Mr. ROE, Mr. HYDE, Mr. COLLINS of Texas, Mr. MCCLOSKEY, Mr. DENARDIS, Mr. VENTO, Mr. TRAXLER, Mr. PEPPER, Mr. HERTEL, Mr. ECKART, Mr. GREGG, and Mr. LEHMAN.

H. Res. 55: Ms. FERRARO.

H. Res. 79: Mr. PEPPER, Mr. GUYER, Mr. HYDE, Mr. STARK, Mr. LANTOS, Mr. CORRADA, Mr. MURPHY, Mr. WON PAT, Mr. HUGHES, Mr. OTTINGER, and Mr. DORNAN of California.

H. Res. 112: Mr. LELAND, Mr. FAUNTROY, Mr. EDWARDS of California, Mr. WOLPE, Mr. FORD of Michigan, Mr. DOWNEY, Mr. RANGEL, Mr. OTTINGER, Mr. RICHMOND, Mr. WEISS, Mr. MILLER of California, Mr. MITCHELL of Maryland, Mr. DORGAN of North Dakota, Mrs. SCHROEDER, Mr. BEILENSON, Mrs. CHISHOLM, Mr. ROSENTHAL, Mr. VENTO, Mr. OBERSTAR, and Mr. ST GERMAIN.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

52. By the SPEAKER: Petition of the Governing Board, Inter-Tribal Council of Michigan, Inc., Sault Ste. Marie, relative to the Community Services Administration; to the Committee on Education and Labor.

53. Also, petition of the Board of County Commissioners, St. Louis County, Minn., relative to El Salvador; to the Committee on Foreign Affairs.

SENATE—*Tuesday, April 7, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Almighty God, as human government is ordained by Thee to be Thy minister for good, grant that the Senate this day shall be guided by the wisdom of Thy word.

Thou hast said:

When the righteous are in authority, the people rejoice; but when the wicked rule the people groan.—Proverbs 29: 2 (R.S.V.).

Give Thy servants the desire and determination to legislate righteously.

Thou hast said:

A righteous man knows the rights of the poor; a wicked man does not understand such knowledge.—Proverbs 29: 7 (R.S.V.).

May the business done in this place conform to Thy justice and equity.

Our Father in heaven, we thank You for the good news from the hospital, and we commend to Thee the President and Mr. Brady and the others and their families.

Let Thy wisdom and love pervade this place and Thy law infuse our hearts and minds for Thy glory and in Thy name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. I thank the Chair.

Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a request from the distinguished Senator from Kansas for a period of time. If there is no problem from the standpoint of the minority leader, I will yield now out of my time or I can reserve it and yield it after the minority leader's remarks.

If I may, Mr. President, while I still have the floor, I yield now 3 minutes to the distinguished Senator from Kansas.

The PRESIDENT pro tempore. The Senator from Kansas is recognized.

DESIGNATING APRIL 9, 1981, AS "AFRICAN REFUGEE RELIEF DAY"

Mrs. KASSEBAUM. Mr. President, I send a joint resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. RUDMAN). The clerk will state the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 61) to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object, I have cleared this resolution with Mr. BIDEN, the ranking member on the Judiciary Committee, and there is no objection from this side.

There being no objection, the Senate proceeded to consider the joint resolution, and without objection, the joint resolution will be considered to have been read the second time at length.

Mrs. KASSEBAUM. Mr. President, in Geneva this week U.N. Ambassador Kirkpatrick will represent the American people at a conference sponsored by the United Nations and the Organization of African Unity on measures to increase the assistance given to African refugees.

No one who has seen the condition of the African refugees, mostly women and children, can be unconcerned about their plight.

Refugees in Africa pose a particularly difficult challenge to the international community, as many of the host nations are themselves quite poor and suffer from food shortages.

An inadequate transportation network creates difficulties in delivering food from the outside to the refugees in time, and massive starvation has been avoided only through the extraordinary efforts and competence of the private voluntary organizations through which relief has been channeled.

The origins of the African refugee crisis are varied, as are the solutions. The challenge before the international community is to provide for the basic human needs of the refugees while engaging in efforts to bring about the long-term political solutions that will enable the refugees to return home.

With the independence of Zimbabwe, for example, refugees from the surrounding countries were able to return to their homes and begin to reconstruct their lives in peace.

Congressmen JULIAN DIXON and JACK KEMP were joined by 141 other Members of the House of Representatives in introducing a resolution asking the President to designate April 9, the opening day of the conference, as "African Refugee Relief Day" and asking Americans to increase their voluntary contributions to the private voluntary organizations through whom much of the relief efforts have been channeled.

My office has worked closely with the House sponsors, and I am pleased today to introduce an identical resolution in the Senate. This resolution is an important symbol to the world of American interest in African refugees.

It is also a symbol of our appreciation of the dedicated and self-sacrificing efforts of the employees of the voluntary organizations. These men and women undertake, for only modest salaries, to work under the most difficult and unpleasant conditions in remote parts of Africa to provide for the needs of their fellow man.

In some parts of the continent, the hardships are aggravated by a breakdown of law and order so that considerable personal bravery is required by these men and women.

I urge all my colleagues to support this resolution which I offer on behalf of myself and Senators THURMOND, KENNEDY, MATHIAS, TSONGAS, DODD, EXON, PERCY, HAYAKAWA, LEVIN, GLENN, and CRANSTON.

Mr. President, I have sent the resolution to the desk and have asked for its immediate consideration. My request has been cleared on both sides of the aisle and with the joint leadership of the Judiciary Committee.

(By request of Mrs. KASSEBAUM, the following statement was ordered to be printed in the RECORD:)

AFRICAN REFUGEE CONFERENCE

● Mr. KENNEDY. Mr. President, I am pleased to join in cosponsoring this resolution designating April 9 as "African Refugee Relief Day," to mark the opening of the International Conference for Assistance to Refugees in Africa.

The conference is being held under the auspices of the United Nations High Commissioner for Refugees to focus worldwide attention on the estimated 3 to 5 million refugees spread across 25 nations in Africa. Half of the world's refugees are in Africa, yet their plight is least understood by the international community.

The goal of the conference, to be held at the United Nations in Geneva, is to gain the support of the international community in providing basic humani-

tarian assistance to African refugees as well as to increase international awareness of their plight. This resolution is offered in support of these goals.

Mr. President, as former chairman of the Subcommittee on Refugees and of the full Judiciary Committee, I can say the United States has had a proud record in responding to the needs of refugees around the world. When refugee emergencies have arisen, we have responded. When humanitarian assistance has been required, we have offered a helping hand. And when resettlement opportunities have been called for, we have opened our doors.

This resolution recognizes this humanitarian tradition. It affirms our concern for the millions for homeless people in Africa, and the special and urgent needs they have today.

As ranking minority member of the Judiciary Subcommittee on Immigration and Refugee Policy, I am pleased that the chairman, my distinguished colleague from Wyoming (Mr. SIMPSON), is dispatching a member of the subcommittee staff to monitor the African Refugee Conference in Geneva next week and to report to the subcommittee on its work. I commend the administration for its efforts to respond favorably and generously to the UNHCR's call for assistance. And I pledge my continued support for all of these efforts in the Senate.

Mr. President, I ask that excerpts from the UNHCR report on the African Refugee Conference be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

REFUGEES IN AFRICA: A COUNTRY-BY-COUNTRY SURVEY

INTRODUCTION

In 1970, the number of refugees in Africa was estimated at three-quarters of a million; by 1980 it was estimated at 5 million and it is still growing.

One in every two refugees in the world is from Africa; that is, of the 10 million refugees around the world, half are in Africa. The total number of African refugees now exceeds the population of many African countries.

The largest refugee problem on the continent is in the Horn of Africa. In Somalia, the refugee population has now exceeded the one million mark. In Djibouti, 12% of the population are refugees. Elsewhere on the continent, the civil war in Chad caused hundreds of thousands of women and children to flee into Cameroon, Nigeria and Sudan.

The categories of assistance normally accorded to refugees by the United Nations are as follows:

Emergency assistance (for new refugees). This includes short-term, rapidly implemented measures of immediate relief including provision of basic necessities such as food, shelter, clothing and blankets, household utensils and equipment and basic health care.

Intermediate assistance. This includes interim relief measures aimed at consolidating the infrastructure and laying the foundation for long-term solutions.

Long-term solutions. These consist of activities leading initially to the economic self-sufficiency of the group concerned and ultimately to voluntary repatriation or to the social, economic and administrative integration of the refugees into their area of residence.

The magnitude of the refugee problem in Africa has made it necessary for the United Nations to convene an International Conference on Assistance to Refugees in Africa, to be held on 9–10 April 1981 in Geneva.

One of the major objectives of the Conference is to obtain additional resources to enable African countries to meet the already burdensome responsibility of hosting several million refugees. The Conference will also attempt to focus the attention of the international community on the plight of African refugees.

ALGERIA, MOROCCO AND TUNISIA

UNHCR works in these countries for European refugees in need of constant assistance, since most of them are aged and many are physically and socially handicapped; for refugees from Latin America who require assistance towards local settlement; and for African refugees, mostly students, who are provided with educational assistance or temporary allowances pending their placement in educational institutions or in employment. These three categories number some 3,000 individuals and the Office spent some US $150,000 in these countries in 1980. UNHCR also reviewed in 1980 the situation of refugees from Western Sahara in Algeria who will be assisted under the General Programmes in 1981.

ANGOLA

There are at present about 73,000 refugees in Angola, of whom 18,000 are Zairians, 50,000 are Namibians and 5,000 are South Africans.

In addition to its assistance to these groups, UNHCR was also responsible for measures facilitating the return and rehabilitation of some 100,000 (50,000 in 1979 and 50,000 in 1980) Angolans who returned from Zaire. It is anticipated that this movement will be followed by that of many more Angolans still living in Zaire. Plans are under discussion for the construction of a transit centre near Luanda which might receive up to 1,500 returnees from Zaire or elsewhere.

Although the majority of Zairean refugees in Angola have returned to their homeland following the decree of June 1978, some 18,000 have chosen to stay behind and UNHCR is cooperating closely with the government in measures for their permanent settlement.

The needs of Namibian refugees, arriving in increasing numbers in Angola, have been a source of constant concern to UNHCR. Efforts have been directed towards meeting the immediate needs of these refugees while seeking also to provide them with the means, albeit limited, of attaining greater self-sufficiency. Despite the best efforts of UNHCR and other agencies, the situation of these refugees remains critical.

UNHCR spent some US $4.8 million in Angola in 1980.

BOTSWANA

The year marked a major change in the refugee situation in Botswana. The number of refugees in the country had increased steadily throughout 1979, due to new arrivals from Zimbabwe, whose nationals accounted for as many as 96% of the 23,000 refugees at the end of the year. But with the Lancaster House Agreement, which brought the civil war in Southern Rhodesia to an end, the flow was dramatically reversed. UNHCR supervised the repatriation from Botswana of 18,200 Zimbabweans in early 1980. Some 1,700 Zimbabwean refugees had already repatriated by their own means. The Government of Botswana now uses the facilities created for Zimbabweans at the Dukwe settlement for rural and urban refugees in Botswana for whom no other durable solution had been found. Agricultural activity continues, while other refugees received training in skills such as carpentry and tailoring.

The emphasis on educational assistance to Southern African refugee students has remained a priority in Botswana. The Education Resource Centre now situated at Dukwe continues to offer remedial programmes and correspondence courses to refugees. Classes also began early in 1980 at two secondary schools constructed with financial assistance from UNHCR.

The refugee population in Botswana now stands at some 3,400 persons.

The total UNHCR allocations for refugees in Botswana amounted to US $3.27 million in 1980.

BURUNDI

The number of refugees in Burundi, most of whom are of Rwandese origin, is estimated at some 234,590. A large proportion of these refugees live in urban areas and most of them are jobless. UNHCR has focused its efforts on improving their lot through the establishment of small family businesses or through apprenticeships. Local settlement assistance has also included appropriations to cover costs incurred in transferring refugees in the capital, Bujumbura, to rural settlements, wherever this solution was feasible. UNHCR also provides assistance for refugee schools.

At the request of the Government of Burundi, UNHCR plans to contribute to the cost of building a hospital in the province of Ruigi where the presence of a large number of Rwandese refugees has placed a considerable strain on local medical and other services.

UNHCR spent some US $400,000 in Burundi in 1980.

CAMEROON

(United Republic of)

Following events in Chad, tens of thousands of Chadian refugees crossed the Chari River and entered the northern province of Cameroon. They concentrated in and around the town of Kousseri, increasing the population (formerly 10,000) more than eleven-fold. The new influx of refugees drove UNHCR's initial budgetary estimates for 1980 up from US $0.5 million to US $8.8 million.

The number of refugees is now estimated by the Government at 266,000.

CENTRAL AFRICAN REPUBLIC

The total number of refugees in the Central African Republic is estimated at 7,000.

With the arrival in spring 1979 of 1,000 refugees from Chad, UNHCR obligated US $83,000 from the Emergency Fund in response to the Government's appeal for assistance in meeting the needs for this group. In mid-1980, a UNHCR mission visited the Central African Republic to review the situation, in view of the continued arrival of refugees from Chad.

Following this mission another US $300,000 has been drawn from the Emergency Fund to face the first needs of the 6,000 newly arrived refugees from Chad.

DJIBOUTI

The continued movement of refugees into Djibouti during 1980 drove the total number of refugees there to over 42,000.

Refugees now constitute a sizeable percentage (about 12%) of Djibouti's total population.

Many of the refugees are of rural background, but their settlement in agriculture is largely impracticable due to the harsh climatic conditions, which have been further aggravated by persistent drought in this area of Africa.

Many Ethiopian refugees of urban background continue to live in precarious conditions in the capital city. Those enjoying refugee status number over 4,100, but many thousands more are living unidentified

among the local population. Their presence weighs heavily upon the economy of the country, particularly in view of the low living standards and high unemployment rate (as high as 50%). Intensified efforts have, therefore, been made by UNHCR to promote counselling services. Many of these refugees are students for whom the only solution lies in placement in schools or colleges in other countries. Meanwhile, plans are under way for a transit centre designed to house refugees and improve their chances of resettlement through some vocational training.

UNHCR's total budget for Djibouti in 1980 was around US $4.87 million.

EGYPT

The estimated number of refugees of concern to UNHCR in Egypt remained unchanged at some 5,000. Of the 1,200 that receive regular monthly assistance, 400 are destitute and aged refugees of European origin; the remainder are African, mostly from Ethiopia. For the resident European caseload, assistance measures have been directed towards the local integration of refugees through job placement, the establishment or consolidation of small businesses, provision of shelter, medical care and counselling services. Financial assistance in the form of annuities has been provided for aged and destitute cases. The vast majority of African cases receive educational assistance including vocational/technical training, and this has remained a major priority. The resettlement abroad or refugees residing in Egypt, including the younger stateless cases of European origin, continues to prove difficult, but a number of African refugees who have completed their education are being successfully resettled and efforts are being made to find employment in the area for others.

UNHCR spent US $1.3 million in Egypt in 1980, the bulk on education.

ETHIOPIA

In 1980 it was reported that several thousand Ethiopians who sought refuge in neighbouring countries as a result of internal unrest and natural disasters were returning to their country of origin.

Towards the end of the year UNHCR provided funds for an initial assistance project to benefiit some 10,000 returnees. The project, valued at some US $1.3 million, covers the construction of reception centres and provision of immediate relief to the returnees, together with distribution of self-sufficiency packages to facilitate the rehabilitation of the returning population.

It is expected that greater numbers of Ethiopian refugees will be repatriated in the near future.

GABON

The number of refugees in Gabon is estimated at some 30,000. With the change of regime in Equatorial Guinea, spontaneous repatriation of Guineans was carried out under UNHCR auspices. UNHCR also continued to provide limited assistance of various kinds, mainly for educational purposes.

UNHCR's revised allocations for 1980 amounted to US $240,000.

GHANA

In Ghana, where refugees, originating mostly from southern Africa, number some 200, emphasis has been placed on educational assistance. Scholarships at primary and lower secondary level are being provided, and assistance to individual refugees, many of whom are without employment, is continuing. In view of the severely limited labour market, assistance needs are increasing, though efforts are being made towards attaining durable solutions in place of immediate aid, notably through the promotion of counselling.

UNHCR spent nearly US $200,000 in Ghana in 1980.

KENYA

At the beginning of 1980, there were some 5,800 refguees in Kenya of whom 3,500 were Ugandans. The remainder consisted of Ethiopians and Rwandese and smaller groups of various origins. During the first four months of 1980, the most significant change in the refugee population was the repatriation of about 2,000 Ugandans to their country and an influx of a small group of Ethiopian and Rwandese refugees into Kenya. As in previous years, assistance was provided towards the local integration of individual refugees, for educational and vocational training, for counselling services and supplementary assistance was provided for destitute refugees. The refugee population in Kenya now stands at some 3,500 persons.

UNHCR spent over US $2 million in Kenya on these activities and on the voluntary repatriation programme.

LESOTHO

The total number of refugees in Lesotho is estimated by the Government of Lesotho at 10,000. As a result of the continuing process relating to the determination of refugee status some 2,000 of these had been formally granted asylum. In 1980, as in previous years, UNHCR assistance has been extended also to persons awaiting the official determination of their refugee status by the Government. UNHCR continues to focus on providing additional educational facilities at the secondary and technical levels to enhance employment prospects for refugees, and also to encourage the authorities to continue their liberal admission policy towards Southern African refugee students.

The UNHCR allocations for refugees in Lesotho amounted to US $589,600 in 1980.

MOZAMBIQUE

The dramatic developments in Zimbabwe brought major changes to the refugee situation in Mozambique. Following the Lancaster House Agreement in December 1979, the repatriation of Zimbabweans was begun under UNHCR auspices. During the first phase of the repatriation, aimed at the return of refugees prior to the general election at the end of February 1980, some 11,000 Zimbabweans in Mozambique were repatriated with UNHCR assistance. Another 15,000 went home when the organized repatriation programme resumed after the elections in April 1980. In addition, large numbers of Zimbabweans in Mozambique have returned to their country on their own.

UNHCR's allocations for Mozambique, including for the repatriation programme, amounted to US $11.7 million in 1980.

Since the departure of the Zimbabwean refugees there are no UNHCR-sponsored organized refugee settlements in Mozambique and emphasis is now being placed on assistance to individual refugees coming mainly from South Africa.

The refugee population in Mozambique now stands at some 100 persons.

NIGERIA

According to the Government there are at present some 110,000 refugees in Nigeria, of whom some 104,920 Chadian refugees would require UNHCR-co-ordinated assistance. Other UNHCR activities in Nigeria include the provision of scholarships for refugee students from Southern Africa and legal and counselling services. Nigeria also became UNHCR's largest African donor, in 1980, with a contribution of nearly US $1 million towards the Office's programme in Zimbabwe.

RWANDA

The refugee population in Rwanda is estimated at some 10,150 mainly from Burundi and Uganda. UNHCR's activities in this country include the provision of emergency relief to new refugees and educational assistance, at lower secondary, higher secondary, technical and university levels. UNHCR's 1980 budget in Rwanda amounted to some US $300,000.

SENEGAL

The number of refugees, of various origins, residing in Senegal was estimated at the beginning of 1980 at 5,000 UNHCR contributed to the implementation of a fishery project which helped achieve self-sufficiency for a group of refugees. The Office's total expenditures in 1980 were about US $820,000.

SOMALIA

"The biggest refugee problem in the world" is how the High Commissioner described, the crisis in Somalia where, according to the government, continuing influxes have brought about 1.3 million refugees to 30 camps and 7 transit centres in 4 regions of the country.

In 1978 the High Commissioner launched an appeal for funds on behalf of refugees in the Horn of Africa. Several hundred thousand refugees in Somalia benefited from nearly US $11 million raised in the course of 1978 and 1979. At the same time technical assistance was ensured from a number of governmental and non-governmental agencies, which today provides some 250 experts in various fields.

The current UNHCR programme of US $41.8 million for 1981 was planned for an estimated camp population of 900,000 persons. However, the continued and massive influx has necessitated an upward revision of assistance requirements.

The $400,000 newly arrived refugees will require some US $8,270,000 for immediate nonfood assistance, over and above the amounts already set aside. The food deficit for 1981 is estimated at some 163,915 million tons. There will also be need for further supplementary food for vulnerable groups and extension of educational and vocational facilities in the camps.

Provision of an adequate supply of potable water is a major concern of the assistance programme. The polluted river water is a threat to the health situation of the refugee population. At present, short-term water supply is being provided to the camps through the co-operation of a number of voluntary agencies. The situation, however, remains unsatisfactory. A UNHCR/UNICEF project for a long-term supply of safe water will continue in 1981 and will be completed in 1982.

Progressive orientation of the UNHCR programme towards self-reliance is a major objective. An amount of US $4.15 million has been earmarked in 1981 to develop agricultural projects, animal husbandry and other self-help schemes.

SUDAN

Sudan continues to host the second largest refugee population in Africa. The Government estimates that there are 490,000 refugees in the country. The strain on the resources of the country, due to the presence of such large numbers of refugees, was further aggravated by the concentration of a significant portion of them in the urban centres, such as Khartoum, Gedaref, Kassala and Port Sudan.

Faced with the risk of being forced to divert funds and attention from pressing development tasks, the Sudanese Government decided to relocate unemployed refugees to organized semi-urban or rural settlements where opportunities would be created for the refugees to achieve self-sufficiency. In order to cope with its enormous task, the government declared 1980 as the "Year of the Refugee in the Sudan", and launched a world-wide campaign culminating in an International Conference on Refugees, in Khartoum in June 1980. The objectives of

this campaign were to settle all refugees in organized settlements, to solve the problems of urban refugees, to tackle the problems of dependent groups such as orphans, widows, the aged and the handicapped, and to harmonize refugee settlements with those of the local people by integrating them into overall plans for regional development.

UNHCR's assistance programme in the Sudan has concentrated on supporting the establishment of these organized settlements. These would essentially be of three types: rural settlements based primarily on individual farming; rural settlements based primarily on wage employment in several of the large irrigation projects in the eastern provinces; and semi-urban settlements. In all cases, UNHCR's assistance comprises provision of housing, communal facilities such as dispensaries, schools and water supply, the transportation of refugees to the new sites, agricultural inputs, and meeting the running costs for an initial period. Food is being provided by WFP for a period of about two to three years.

To cope with the needs of urban refugees, UNHCR helped run the Refugee Counseling Service, which assists urban refugees to overcome their immediate problems and arranges educational and vocational training for them.

UNHCR's 1980 budget in the Sudan was over US $11 million.

SWAZILAND

The influx of refugees into Swaziland from South Africa continues unabated. UNHCR continues to promote self-sufficiency through local integration measures, which should eventually settle almost 5,000 refugees from South Africa at the Ndzevane Rural Settlement in south-eastern Swaziland, on land being provided by the Government. Efforts to provide educational assistance to refugee students continue. Refugees without specific skills are being assisted through the provision of vocational and technical training and the further expansion of these facilities is planned for during 1981.

The total UNHCR allocation for refugees in Swaziland amounted to US $1,141,600 in 1980.

The estimated refugee population is some 10,000 of whom 5,047 persons are registered.

TANZANIA

(United Republic of)

There are at present some 140,000 refugees in Tanzania consisting of some 130,000 from Burundi and other groups of various origins including Zaireans, Malawians and South Africans.

UNHCR activities in Tanzania focus on assistance to organized rural settlements, particularly those for refugees from Burundi at Ulyankulu and Mishamo. Since the population of Ulyankulu had grown to a level beyond the economic capacity of the settlement, some 23,000 refugees had been transferred to a new settlement at Mishamo and Ulyankulu was re-organized to provide for more effective use of the existing facilities and a better distribution of the most fertile agricultural plots. Following the re-organization of the settlement, the remaining refugees in Ulyankulu have achieved a level of self-sufficiency comparable to the local population and the settlement was handed over to the government on 28 June 1980.

In the meantime, the population of Mishamo by the end of March 1980 rose to about 28,000. The settlement made good progress during the year, with the refugees themselves working actively in clearing, tilling and planting the land, and in constructing their own houses and communal facilities.

In addition to programmes for refugees in rural settlements, assistance towards the local integration of individual refugees in the form of supplementary aid, educational assistance, counselling programmes and for the promotion of resettlement and voluntary repatriation, was provided to various refugees, including southern African refugee students.

Towards the end of the year, the Tanzanian Government announced its decision to grant citizenship to some 35,000 refugees, mainly of Rwandese origin. This major development—the first occasion in Africa when such a large number of persons in exile have so dramatically ceased to be refugees was welcomed by the High Commissioner, whose representatives were present at the naturalization ceremonies.

UNHCR's total allocations for Tanzania in 1980 amounted to US $6.5 million.

UGANDA

The refugee population in Uganda is estimated at about 112,400 comprising 78,000 Rwandese, 34,000 Zairean and smaller groups of various origins. Prior to the events of 1979, most of the refugees, whether integrated in urban areas or living in eight organized rural settlements, were virtually self-sufficient. However, the disruption caused by the events of 1979 affected both groups of refugees, many of whom were displaced. In addition, an estimated number of 265,000 Ugandans were displaced within the country.

As a result, the assistance programme for refugees has focused on providing for the repair and reconstruction of established refugee settlements. In addition, assistance in the form of supplementary aid, counselling services, education and local integration measures for individual urban refugees has had to be substantially increased.

UNHCR spent nearly US $2 million in Uganda in 1980. In addition, some US $6.5 million were received in response of the High Commissioner's appeal, launched in July 1979 to provide assistance to displaced Ugandans, returnees and refugees. This special programme, which continued during 1980, will shortly be phased out.

ZAIRE

The total number of refugees in Zaire is estimated at some 400,000. Angolan refugees, the largest refugee group, numbered some 215,000; there are also over 100,000 Ugandan refugees. Other groups include 11,000 Burundi, 22,000 Rwandese and 1,800 Zambians. UNHCR's efforts have focused largely on promoting their local integration and self-sufficiency, particularly through rural settlements. Measures to improve agricultural production, water supply and health care were taken. However, efforts for the Ugandan refugees took the form of relief aid, pending more durable solutions for their plight.

During most of 1980, UNHCR continued to pursue the rehabilitation programme for Zairean repatriates who had returned to their homes following the proclamation of an Amnesty Law in June 1978. Assistance included the distribution of food, seeds, agricultural tools, blankets, kitchen utensils and a major medical programme.

UNHCR's expenditures in Zaire in 1980 were of the order of US $7.5 million.

ZAMBIA

There are at present some 33,500 refugees in Zambia consisting of some 18,000 Angolans, 5,000 Zaireans and other smaller groups of refugees like Namibians and South Africans.

UNHCR is presently assisting the development of a large refugee settlement in Meheba for some 9,000 Angolans, 600 Zaireans and 150 Namibian refugees. The settlement will be handed over to the Government at the end of 1981. UNHCR has a large education assistance programme for refugees in Zambia and is in the process of consolidating and improving the counseling services in the country in order to make them more responsive to the refugees' individual needs. More emphasis is also being placed on assisting refugees to find employment opportunities as well as to create self-help projects for individuals or small groups.

UNHCR's total allocations for Zambia in 1980 amounted to US $6.94 million.

ZIMBABWE

Following the agreement signed in December 1979 at the end of the Lancaster House Conference in London, UNHCR was requested by the Government of the United Kingdom to undertake the over-all co-ordination of the international effort to assist in the repatriation of Zimbabwean refugees.

In the first phase of the repatriation, aimed at the return of refugees prior to the elections at the end of February 1980, over 33,000 refugees were repatriated under UNHCR auspices: some 18,200 from Botswana, 11,000 from Mozambique and over 4,000 from Zambia. Additional numbers of refugees returned to their country on their own. A network of transit centers was established with UNHCR's financial support to provide temporary accommodation and assistance to returnees. The repatriation resumed after the independence of Zimbabwe and by the middle of October 1980 a total of 69,000 persons had been repatriated with UNHCR's help. Repatriation is now terminated except for a number of individual Zimbabweans in various countries who, for reasons such as studies, wish to stay abroad longer.

Events in Zimbabwe over the past years had serious effects on the rural areas of the country where the majority of the population lives. Health clinics and schools were seriously damaged, agricultural land ruined, livestock numbers sharply reduced, animal disease became widespread and crop production was severely disrupted by two seasons of drought. In addition to the returning refugees, nearly a million people are estimated to have been displaced internally during the war.

After an interagency mission to Zimbabwe in April 1980 the High Commissioner issued an appeal to the international community for a US $110 million assistance programme over a period of 12 months. In addition, food needs were estimated at 113,000 metric tons. The programme, co-ordinated by UNHCR, includes transporting returning refugees and displaced persons to their homes, and assisting them to repair, reconstruct, and re-equip them; agricultural assistance in the form of seeds, tools and fertilizers; and a comprehensive training programme for farmers. Help will also be provided to restore damaged water supply systems and repair rural roads and bridges. The programme further includes the repair and restoration of community facilities, notably rural health clinics and primary schools, the provision of necessary equipment and supplies and the training of staff. Specialized facilities will be established for the handicapped, orphans and the aged.●

Mr. LEVIN. Mr. President, I am happy today to join Senator KASSEBAUM and the other Senators sponsoring the resolution asking President Reagan to designate April 9 as "African Refugee Relief Day."

The problem of hunger in Africa is growing. People of Africa are suffering the ravages of continuing wars and damaging weather, leaving 27 African countries confronted by desperate people seeking shelter and food.

Our great Nation owes its support to the African people in the face of this suffering.

This resolution expressed the support of the Senate in two ways: It encourages

those convening in Geneva under the auspices of Organization for African Unity and the United Nations High Commissioner for Refugees on April 9 and 10 to develop a much needed plan of action to cope with the immense refugee crisis in Africa. It also encourages American citizens to make a real contribution by foregoing a meal and contributing the cost of the meal to African refugee relief with the cost of the meal.

Senator KASSEBAUM's resolution is a reflection of what has made this country great. We are a nation that cares about people.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the joint resolution be held at the desk for the remainder of the day for any further cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 61) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The Senate joint resolution, together with its preamble, reads as follows:

S.J. RES. 61

Whereas there are more than four million refugees on the continent of Africa, and more than half of the world's refugees are African;

Whereas these refugees, who are primarily women and children, have typically crossed hundreds of miles to escape the ravages of armed conflict, drought, and political unrest;

Whereas world attention has focused on the plight of the more than one million refugees in Somalia who have fled the war in Ogaden, are suffering greatly from disease and malnutrition, and are being housed in overcrowded camps in which more than 90 per centum of the refugees are women and children;

Whereas approximately twenty-seven African countries are confronted with refugee problems, and generally lack sufficient resources to provide these victims with necessary sustenance; and

Whereas the Organization for African Unity and the United Nations High Commissioner for Refugees will convene an international conference in Geneva on April 9 and 10, 1981, to develop a plan of action to respond to this grave crises: Now, therefore, be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day" and calling upon the people of the United States to observe such day by (1) increasing their awareness of the plight of African refugees; and (2) foregoing one meal and using the funds that otherwise would have been spent on such meal to make contributions to recognized private voluntary agencies providing care and relief for such refugees.

Mrs. KASSEBAUM. I thank the Chair.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a request to yield time to the distinguished Senator from New Hampshire, the distinguished Senator from Minnesota, and the distinguished Senator from Washington, and rather than impose further on the minority leader's time I wish to make this statement.

ORDER FOR A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of the recognition of the minority leader under the standing order the Senate have a period for the transaction of routine morning business for a period not to exceed 30 minutes in length in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I yield to the minority leader my time remaining under the standing order.

RECOGNITION OF THE MINORITY LEADER

Mr. ROBERT C. BYRD. Mr. President, how much time do I have?

The PRESIDING OFFICER. Thirteen minutes and 40 seconds

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

AFGHANISTAN: STALEMATE AND BRUTALITY

Mr. ROBERT C. BYRD. Mr. President, the Soviet Union is perpetuating a brutal military and political stalemate in Afghanistan. The Soviets hope the world will come to accept their illegal occupation of another sovereign nation and go on to other matters. But they have failed to broaden the political base of their proxy regime led by Babrak Karmal. They have failed to build an effective Afghan military force responsive to their dictates. They are totally unable to legitimize their presence.

Yet, they have so far succeeded in their primary goal: To remain there. Soviet tyranny is perpetuating itself indefinitely. Soviet brutality is widening its reach day by day. Determined to tough it out, they want the normalization of their destruction of the sovereignty of Afghanistan.

Despite the continuation of active armed resistance, the Soviet military presence guarantees their control of the key population centers, the communication network and major roads.

Despite a variety of diplomatic initiatives by many nations over the last year, the Soviets remain unresponsive. This is so even though they have suffered significant damage to their international image. It is so even though they continue to bear a significant economic penalty imposed by the U.S. grain embargo.

Soviet intransigence on the Afghanistan question was reiterated by Soviet President Brezhnev before the 26th Soviet Party Congress in Moscow in March of this year. It was reinforced by his negative response to an innovative proposal recently made by French President Giscard d'Estaing. It was repeated subsequently in a bellicose statement by "Soviet leading circles" in Tass which charged that American actions are now making an Afghan political settlement more difficult.

The continued Soviet occupation of Afghanistan, and the daily commission of acts of brutality toward the Afghan people, is an international scandal. It must remain on the top of the international agenda until a political solution acceptable to the Afghan people is achieved. This solution must satisfy two basic standards: The removal of Soviet troops and self-determination for the Afghan people. Any proposal, any mechanism, any process which accomplishes these goals should be vigorously supported by the United States. Any conclusion which perpetuates Soviet control of Afghanistan must be rejected.

MILITARY SITUATION

The Soviet occupation is now in its 16th month. There was a brief period last June when the Soviet announced the withdrawal of 5,000 troops, when it seemed that an end to the occupation was possible. But these hopes were quickly dashed. The announcement turned out to be a propaganda offensive aimed at softening any anti-Soviet consensus among the allied summit conference in Venice. Shortly afterward, it became clear that the troops which were withdrawn were those not considered useful in the Afghan environment. These included antinuclear and antiair forces. They were replaced by considerably more useful forces. In fact, the initial Soviet force included a substantial number of reservists, and they have been replaced by seasoned regular soldiers. They continue to maintain a force of over 85,000 troops in Afghanistan, with some 30,000 more just over the Soviet border.

Soviet forces have consistently upgraded their organization and equipment to deal with the stubborn Afghan resistance. Their increased involvement was necessary because they have made little progress in molding the Afghan Army into an effective instrument. Defections and rebellions have reduced it to perhaps 25,000, a third of its size prior to the invasion. The Soviets have had to take all antitank and antiaircraft weapons, as well as dynamite, away from the Afghan Army because the ordnance was being diverted to the freedom fighters.

Since the Soviets cannot rely on the Afghan Army, they are trying to control the countryside themselves. This has required the introduction of a sizable helicopter gunship force—240 at last count—and the utilization of coordinated helicopter-tank operations. There is also evidence of Soviet use of incapacitating and lethal chemical agents.

The initial Soviet intention seems to have been to secure the key population centers and lines of communication while building the Afghan Army into a force capable of controlling the rural areas. Instead, it appears that the Soviets effectively control no more than 25 percent of the nation. All Soviet convoys travel as military operations with air cover and special communications. Soviet forces have had to continually engage in sweep and destroy operations in virtually every province in the country.

Soviet troops have reportedly retaliated brutally against villages suspected of harboring Afghan armed resistance. As the inability of Soviet troops to search out and destroy the resistance becomes obvious, reports are growing of indiscriminate massacres of innocent villagers by Soviet troops, as well as looting, rape, and black market operations.

In several major provincial capitals, the Afghan resistance operates freely, particularly in the central area of the cities.

The strength of the resistance is not easily measured. Some analysts feel the stalemate will favor the Soviets over time. They see the situation facing the freedom fighters becoming more desperate due to shortages of weapons, ammunition, and particularly food. They anticipate a collapse of the movement as the outward flow of refugees and constant Soviet operations take their toll. These observers say the next few months will be critical. Other analysts argue that with an assured supply of weapons, the guerrillas can hold out indefinitely. They think the resistance is becoming better organized.

Despite these uncertainties, the resistance has engaged virtually the whole Afghan population. The people show no promise of ever accepting Soviet rule. There remains a large reserve of manpower and the generally spontaneous, uncoordinated and countrywide nature of the resistance is its great strength.

Thus, it is probable that the military stalemate will not end without a major infusion of additional Soviet troops. The Soviets cannot deliver a knockout punch because of the nature of the terrain and the lack of a central command for the resistance.

POLITICAL SITUATION

The most glaring aspect of Soviet failure in Afghanistan is the inability to create an Afghan Government with any popular support. The regime installed by the Soviets, with Babrak Karmal at its head, is a powerless facade. Soviet advisers operate at all levels of government. No decision is reached without Soviet approval. Karmal has been unable to put together a nationwide united front to provide legitimacy and a political base. He has been unable even to reconcile the warring factions of the Afghan Communist party. The split between the two dominant factions of this party has continued to rage. There have been credible reports of three major coup attempts, the most recent last October, by elements of the Khalqi faction against the Karmal-led Parcham faction. Karmal's base of support has been shrinking rather than growing.

The clear evidence of this failure is the swelling tide of refugees flowing into Iran and Pakistan. There are now over 1.6 million refugees in camps in Pakistan. This means that more than 10 percent of the Afghan population has voted with its feet. And the flow is accelerating. A new monthly record was set in January 1981 when 143,000 Afghans fled their country. The February exodus continued at a high rate of about 120,000.

Additional proof of this failure are the draconian means being used to bolster the size of the Afghan Army. House to house impressment gangs have been reported taking boys as young as 14 in Kabul. Soviet military offensives reportedly return from the countryside, their only visible achievement the capture of new recruits for the army. Last September, a new draft law extended the term of service for soldiers and police already serving—a move which generated more restlessness in the ranks. The French press reported in January that Afghanistan military conscripts, whose terms have been extended, have threatened to revolt and join the rebels en masse.

To try to offset the diminishing size of the army, the regime has attempted to develop local militia units called "Defense of the Revolution Battalions." Even with offers of high pay to youngsters to join these units, they are critically undermanned.

There are some indications the Soviets may replace Karmal with someone more able to produce a viable government and unified party. Evidence of this was contained in an unusual article in the January 1981 issue of an official Soviet journal. The article warned of impending "catastrophe" if the Karmal government did not modify its harsh attempts to transform Afghan society. It said the regime must enlist the active support of the various tribal and religious groups, particularly the nomads, which constitute a large portion of the population. The journal warned the regime not to engage in indiscriminate operations against these groups, which it said were a vital and cohesive core of the nation's social fabric.

This analysis, along with Soviet unwillingness to commit the substantial additional troops necessary to wipe out all resistance, indicates the Soviets intend to keep trying political techniques to consolidate their rule. This would include patching up the warring factions of the Communist party, perhaps with a new leader drawn from the dominant Kalqui group. It would include the long-term rebuilding of the army, the administration and the popularity of the government.

There are, nevertheless, continuing reports of a long-haul Soviet strategy to "Sovietize" some of Afghanistan's major institutions. Moscow is working hard to reform the Afghan educational and legal systems along the lines of the Soviet model. This includes retraining of elementary school teachers in a new Soviet-developed curriculum. Relatively large numbers of Afghan students have been enrolled in Soviet higher educational institutions over the last year. An agreement reached last August, for instance, called for the enrollment of 1,500 students in such institutions over the next few months. The brightest students are not permitted to accept scholarships to Western universities, but are reportedly forced to go to the Soviet Union instead. Other reports repeat this theme for legal institutions. It is said that the entire Afghan legal system, which was Western oriented, has been revamped. All appeal courts have been abolished. Judges are being appointed for their political views, not legal training. In February, Kabul radio said two large delegations of attorneys and judges traveled to the Soviet Union to deepen their knowledge of Soviet legal techniques.

The Sovietization of Afghanistan continues in the economic sphere. Economic ties between the two countries have been strengthened in trade, aid, and project development. The Soviet Union is now supplying 80 percent of Afghanistan's foreign aid. In 1980, Soviet-Afghanistan trade amounted to some $670 million. In 1981, the total is expected to more than double to around $2 billion. The Soviets are building permanent facilities to service their troops in Afghanistan, and are busy creating better transportation access from the Soviet Union. They have built three bridges across a strategic river and are planning a railroad as well.

COST OF THE SOVIET ADVENTURE

The most serious damage resulting from the Soviet adventure in Afghanistan has been to their international image. If the world community permits the issue to be forgotten, the other economic and human costs seem affordable. Although the outlays of their defense operation are hard to measure, no more than 1 percent of the annual defense budget is reportedly involved. The estimated extent of their losses, dead and wounded, varies from 5,000 to 10,000 troops. And from what we know of the Soviet system, there is a complete lack of public pressure from any part of society to pull out their troops. This leaves only international economic and political pressure to force a change in the situation. The chief economic pain has resulted from the U.S. grain embargo. For this reason, as I have stated many times, the embargo must not be lifted. Indeed, we should consider expanding it where alternative sources of supply are not readily available to the Soviets. We have also tightened controls on the export of advanced technology and we have curtailed Soviet fishing rights and commercial airline service. A measure of economic pain must eliminate any Soviet illusion that the passage of time will normalize their occupation of Afghanistan. Aggression cannot be regarded as normal.

There are, Mr. President, many countries which agree with us that the invasion and occupation of Afghanistan must remain at the top of the international agenda. There are many countries which agree with us that the Soviets must continue to bear an economic burden for their continuing violation of Afgan sovereignty.

All major international bodies have condemned the Soviet action and called for Soviet troop removal. In the United Nations, resolutions along these lines passed overwhelmingly in January 1980, by a vote of 104 to 18, and in November 1980 by a vote of 111 to 22. Afghanistan will be on the U.N.'s agenda at its next session this fall.

The Islamic Conference of Foreign Ministers condemned the occupation in January and again in May 1980. The conference has expelled the Karmal regime. The same decision was reached by the Foreign Ministers of the European Common Market, the Association of Southeast Asian Nations, and the Inter-

parliamentary Union. The countries of Southwest Asia and the Middle East, including Saudi Arabia, Egypt, Pakistan, Iran, and the Persian Gulf States, have been particularly strong in the condemnation of the Soviet invasion.

Recently, there have been other promising diplomatic moves geared toward initiating a political settlement of the Soviet occupation. On February 11, U.N. Secretary General Kurt Waldheim appointed a special representative to attempt to get negotiations started. Also in February, the 95-nation Non-Alined Foreign Ministers Conference met in New Delhi and called for a political settlement of the Afghanistan crisis on the basis of, first, the withdrawal of foreign troops and, second, respect for the independence, sovereignty, and nonalined status of Afghanistan.

And perhaps the most interesting proposal was made by French President Giscard d'Estaing. He has called for an international conference on Afghanistan. The French idea is a simple one: Convene a conference in which the United States, Soviet Union, Egypt, Pakistan, China, and Iran all pledge not to intervene in Afghanistan's internal affairs. The Soviets, having been thus assured that external interference in Afghanistan's affairs was prohibited, would pull out and go home.

What has been the Soviet response to all these initiatives? They have rejected any serious peace process. The Soviet position has been to attempt to legitimize the status of their puppet government in Afghanistan by attempting to achieve bilateral negotiations between it and Pakistan and Iran. The ostensible reason for these negotiations is to discuss the alleged interference in Afghan affairs by outside nations, the key pretext for the Soviet occupation. Its real purpose is simply to give international currency to the Karmal government.

The Soviet line was clearly explained by Soviet President Brezhnev in his speech to the 26th Communist Party Congress. He explicitly rejected any discussion of the situation in Afghanistan as an internal matter. He was ready to negotiate an accord with the West to demilitarize the Persian Gulf region. While his idea of an accord would remove any effective Western military presence, he would exempt the Soviet presence in Afghanistan from the conference table. He said, and I quote:

> Concerning our proposals on the Persian Gulf, sometimes it is said that they cannot be separated from the question of the presence of a Soviet military contingent in Afghanistan. What can be said about this? . . . We do not object to the questions connected with Afghanistan being discussed in conjunction with the questions of security in the Persian Gulf. Naturally here only the international aspects of the Afghan problem can be discussed, not internal Afghan affairs.

On February 17, the French received the Soviet response by letter. Although the French have not yet made the text public, President d'Estaing said on February 10 that although it did not constitute a formal rejection, it reaffirmed the traditional Soviet position. To clarify matters, Karmal gave a press conference in Moscow on February 22—he killed the French proposal with kindness: Essentially, he said, the French President means well but Afghanistan's internal situation is simply not an international matter. Specifically, he rejected "any international coloring to the nonexistent Afghan problem."

Mr. President, on March 19, Tass, the official Soviet press agency, attacked President Reagan's support for the Afghan resistance. The statement blamed the United States for actions which "complicate still more the situation in Southwest Asia." It said these so-called actions would "lead to new difficulties on the road to political settlement in connection with Afghanistan."

And that is Soviet policy today. It is the perpetuation of aggression and brutality. The Soviets seem to act as if there are only two other, unsatisfactory, options available to them. First, they might try to pacify the countryside, eliminate the resistance, and compel the people to accept their rule. This would require perhaps a doubling of their current force, upward of 200,000 troops. The second possibility, Soviet troop withdrawal, would be instant suicide for the present Karmal regime. Prior to any withdrawal, the Soviets want to build the military and political structures which would constitute a survivable regime responsive to their direction. But they have not made any progress in creating these structures. And so they remain, maintaining a modicum of countrywide presence, strategic control of the cities and infrastructure. They will wait the world out, hoping we will acquiesce over time. But there is a third possibility—Soviet acceptance of a peace process which will result in an Afghan political conclusion.

U.S. POLICY

There must be a political solution in Afghanistan. The United States should continue to call the world's attention to Soviet aggression there. We should continue to support the diplomatic efforts of the French, the Islamic nations, the U.N. and any other legitimate group. These initiatives should be directed at ending the occupation and achieving true self-determination for the Afghans.

We should support any effort which holds the promise of bringing these results, and we should keep the economic pressure on and consider upping the ante. We should continue to provide adequate assistance through the U.N. to ease refugee pressures on Pakistan, and do whatever is necessary to assist the Pakistanis in their active role among the Islamic nations and in the U.N. Finally, we should avoid giving the Soviets any reason for justifying their presence. It does not appear that the demise of the resistance is at hand. Virtually the whole Afghan population rejects the Soviet presence, rejects its puppet regime, rejects its attempts to rebuild the army along Soviet lines. U.S. provision of military aid to the resistance would be of minimal effect and would allow the Soviets to broadcast U.S. interference. They would be quick to legitimize their presence as a counterweight to this external interference.

Further, provision of U.S. military aid would frame the situation into a United States-Soviet superpower confrontation. Many other nations are involved. The damage to Soviet prestige in the Islamic world, for instance, is not the result of U.S. policy or action. It is a natural reaction to Soviet invasion and continued violation of a nonalined nation's sovereignty. Those nations do not want to be pushed into taking sides in a superpower conflict.

Let us not help the Soviets out of their dilemma. Let us keep making their present policy painful for them. Let us encourage a political solution which returns Afghan sovereignty back to Afghanistan; which permits the reinstatement of a truly independent and nonalined nation state; which ends Soviet tyranny in South Asia; and which, ultimately, would allow United States-Soviet relations to go forward in a more constructive fashion.

SENATOR ROBERT C. BYRD'S APPEARANCE ON "FACE THE NATION"

Mr. ROBERT C. BYRD. Mr. President, I appeared on "Face the Nation" on the CBS Television Network last Sunday. I ask unanimous consent that the transcript of that program—in which George Herman of CBS News was the moderator, and John Mashek, of U.S. News & World Report, and Phil Jones of CBS News constituted the panel—be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

FACE THE NATION

(Sunday, April 5, 1981, CBS Television Network, 11:30 a.m.–12 Noon, e.s.t. and the CBS Radio Network, 12:30 p.m.–1 p.m., e.s.t.)

GUEST. Senator ROBERT C. BYRD (D., W. Va.), Senate Minority Leader.

CORRESPONDENTS. George Herman, CBS News, Moderator; John Mashek, U.S. News & World Report, Phil Jones, CBS News.

PRODUCER. Joan Barone.

ASSOCIATE PRODUCER. Jim McGlinchy.

ORIGINATION: WASHINGTON, D.C.

Mr. HERMAN. Senator Byrd, you have watched the country facing one emergency in the past week, the attempted assassination try at President Reagan. Now we may be facing another kind of emergency, foreign emergency in Poland. Do the week's events give you confidence that we'll be able to handle this overseas emergency in good style?

Senator BYRD. Yes, I'd have to answer in the affirmative. I've had some problems with respect, for example, to the visits by Mr. Haig and Mr. Weinberger out of the country at this particular critical moment, especially in view of the fact that the Administration itself has raised the level of concern and has spoken quite often about the, quote, grave consequences, close quote, of an invasion, and we have heard from many sources that an invasion may be imminent. And for these two top persons, and especially the Secretary of State—and I don't know who made the decisions—for these two to leave at this particular time when the President is convalescing, I think it certainly leaves the perception that we may not be quite so concerned as we have indicated, and that we're going about business as usual in the same old way.

It seems to me that this may be the wrong perception, but other than that, I should think that the way the Administration handled the crisis surrounding the President's assassination was about as good as could be done. I would have no—I could not fault the Administration in any way. I think it gave the appearance that it was in control. I think the Vice President acted as a mature, poised individual, and the President came through as his friendly self. I think he acted with courage and it, I think, gave a very good impression of the Government's handling of that situation and that crisis.

ANNOUNCER. From CBS News Washington, a spontaneous and unrehearsed news interview on Face the Nation, with Senate Minority Leader Robert Byrd, Democrat of West Virginia. Senator Byrd will be questioned by CBS News Congressional Correspondent Phil Jones, by John Mashek, a Correspondent for U.S. News and World Report, and by the Moderator, CBS News Correspondent George Herman.

Face the Nation is produced by CBS News, which is solely responsible for the selection of today's guest and panel.

Our previously announced guests, Representative James R. Jones, Democrat of Oklahoma, Chairman of the House Budget Committee, and Edwin Meese III, Counsellor to the President, will appear at later dates.

Mr. HERMAN. Senator Byrd, in your first answer you said that the departure of Secretaries Weinberger and Haig overseas leaves the perception that we may not be as concerned as we have indicated about the events in Poland. Do you think that this is something which could lead, as Senator Percy said last week, to misperceptions on the part of the Soviet Union, dangerous misconceptions?

Senator BYRD. I don't—there's no way to know, but I just think that the overall perception with friend and foe alike is that we're not as organized, we're not as sure of what we should be doing at a time like this—we have spoken about the grave consequences of an invasion by the Soviets into Poland, and yet at a time when that invasion may be imminent, these two top department heads go about business as usual. I just feel that the trips could have been delayed. I think the countries in the Middle East would have understood, especially with respect to Mr. Haig, and that the President, who is convalescing at the moment, would have been better served if he had had these two men, who represent the top team, here all the time during these critical moments.

I hope that there will be no invasion, but I think the perception might very well be that we're really not as concerned as we say, that we talk one way and act another, and that we're going about as usual when we should be demonstrating our concern by keeping the team here and being prepared with those top men here to aid and advise and counsel the President in the event that that invasion should occur.

Mr. MASHEK. Well, Senator, you questioned Secretary Haig's appointment in the first place, then you voted against his confirmation in the Senate. He's been embroiled in controversies since the Administration took over. Do you think that his effectiveness has been irrevocably impaired?

Senator BYRD. I don't think his effectiveness has been irrevocably impaired. I think it has been impaired, but I think that lost ground can be regained, but I think it's going to require a looking forward, rather than looking backward. I think that the Secretary of State is going to have to concentrate on his role, his responsibilities of being the topmost formulator of foreign policy, and I think that personal interests are going to have to be subjugated on the part of everybody who is involved here—and in the national interest. The national interest is not served if personal interests interfere.

I believe that there have been too many voices speaking for the Administration in the area of foreign policy, and during the campaign we heard a good bit of criticism of the Carter Administration, and some of it quite rightly, to the effect that there were voices in the White House, there were voices in the State Department, and nobody spoke with a single voice.

Mr. Haig himself indicated that what we needed in our foreign policy was continuity, balance and consistency, and we haven't seen that consistency and we need to see it, and I think that our friends, our foes, the American people alike would be better served if we were to show that consistency, if the President were to be the foremost spokesman, if Mr. Haig were to be the foremost formulator of foreign policy, and if some of the other voices lowered themselves.

Mr. JONES. Senator, going back to whether or not Secretaries Haig and Weinberger should be out of the country at this particular time, you have access to intelligence reports of this country—as one of the Senate leaders, you are supposedly kept informed—do you think the situation is so serious that these two men should be here in Washington today?

Senator BYRD. We have been given every reason to believe that an invasion may be imminent. We've seen the Soviets moving into their airports in Poland. We've seen them in the war games. We've seen the war exercises extended. There is every indication that they may be getting themselves into place to conduct an invasion, and with all of these signals, with all of the statements on the part of the Administration concerning the, quote, grave consequences, close quote, that would result from an invasion, it seems to me that in these hours when invasion was, early on, at least—last Friday, perhaps—expected to take place, that the President should have his top team here.

Mr. MASHEK. Well, in the event there is an invasion, or if there is just creeping occupation, which could happen, Senator, what really are the viable options left open to the United States?

Senator BYRD. I suppose we don't have too many; certainly from the military standpoint, I don't think of any, and I think the Administration has ruled out any military options. The options seem to present themselves in the diplomatic channels and in the economic area.

Mr. HERMAN. Let me ask you, acting for the moment as a sort of an Administration spokesman, this crisis that you're so worried about has been threatening us now for a month—threatening Poland, I should say, but by implication threatening the whole free world. Surely the contingency plans are all worked out; they've foreseen most of the possible emergencies; why does it need continuing presence of the two Secretaries after this long period of planning?

Senator BYRD. Well, we've seen the evolution, as you say, occurring over a period of some time, but we've seen a buildup; we've seen an intensification, and——

Mr. HERMAN. But we've feared the invasion for a month now.

Senator BYRD. And if the invasion would produce such grave consequences, as we're told it would, then it seems to me that the President's top team should be here at a time when he is convalescing. Now, perhaps they can return quite quickly, but it seems to me that the perceptions that this kind of activity leaves with our friends, and with foe alike, is that what does the United States mean by all this? They talk of grave consequences, they talk of their concern, and now they're off to business as usual on trips that could be delayed, and I just think that the perceptions are not good.

Mr. JONES. But then how do you respond to Secretary Weinberger, who says that he's going to be right there close to many of the defense people for our NATO allies, and that that's reassuring in itself? He doesn't have to send cables off and make phone calls; he can talk to them face-to-face.

Senator BYRD. I think still the perceptions are there, and especially with respect to the Secretary of State, in view of the fact that military options have apparently been ruled out, and quite properly so, I would say.

Mr. JONES. So then your criticism is really more with the Secretary of State for his trip?

Senator BYRD. Not of him personally. I don't know who made the——

Mr. JONES. Of the trip, his trip?

Senator BYRD. I don't know who made the decision that they go.

Mr. JONES. But that's where you're aiming your criticism, at that trip of the Secretary of State?

Senator BYRD. I think it was bad judgment to make that decision that those two men go at this time.

Mr. HERMAN. Well, since we're laying so much emphasis, not so much on actual planning as on perception, what do you think the perception of our European allies is? What is your own perception of the performance of Secretary Haig during the crisis last week?

Senator BYRD. Well, perhaps not an A plus performance, but on the other hand, there are those who feel that he was at his post of duty. He misunderstood the Constitutional requirements concerning succession, but I know that he called me in my office and gave me a briefing on how the President was coming along, and so I think he fulfilled certain responsibilities well. How he may have appeared before the cameras might not have left the best impression, but still it's not fatal to his role as Secretary of State, and I think that we ought to look ahead. After all, his first responsibility is to help in the formulation of foreign policy, and perhaps he can do that, and he can perhaps do it——

Mr. HERMAN. Is he a good Secretary of State?

Senator BYRD (continuing). Perhaps do it well. He has a lot of experience. He is admired and respected by our European allies, and he has some considerable talents that he can bring to bear, and I would just hope that he would bring them to bear, concentrate on the job, and that the rest of us then would try to assist him in that regard, because if he succeeds, then our country succeeds.

Mr. JONES. You indicated at the time of his confirmation vote that—I think to use your words, that Mr. Haig lacks fundamental understanding of and sensitivity towards the balance of powers between Congress and the Executive Branch of Government. Have you changed your assessment any from that comment?

Senator BYRD. No, I have not, but that's beside the point now. He has been confirmed. I didn't attempt to influence any other Senators on how they voted on the confirmation. I simply made up my own judgment. I don't believe that the confirmation process is a pro forma one. I think we have a very serious responsibility as Senators to develop those confirmations through hearings and make judgment, because, after all, we are the elected representatives of the people, and that's the only place that the people have a voice in connection with nominations and appointments.

And so that is behind us. I think, as I said then, that our foreign policy has to be bipartisan. I intend for it to be bipartisan as far as I'm concerned. I will encourage that, and I wished, and still wish, the Secretary of State well, because he has been confirmed, he has a job to do, and that's behind us. Now I think that we have got to work together to formulate a bipartisan foreign pol-

icy and to implement it—implement the kind of policy that will best serve the nation.

Mr. MASHEK. Well, Senator, in dealing with the Soviets, should we continue the ban on the export of grain sales, or perhaps our relationship with the Soviet Union ought to be looked at in a whole new attitude. What's your feeling about that?

Senator BYRD. I think we should continue the grain embargo. It is hurting the Soviets. Mr. Brezhnev himself has spoken about the failures of the agricultural economy. The Soviets have drawn down their grain reserves. They've drawn down their foreign currency reserves. They're hurting. And if it's hurting, I think we ought to keep on hurting them. After all, the invasion of Afghanistan has not been lifted, and the sales of grain that would otherwise have gone to the Soviets have not been lost. They've gone to other countries, Mexico, Japan, Taiwan, the People's Republic of China, and so on. And so I think that not only should we maintain that embargo, but I think that we should continue to keep the screws tight, because the Soviets respond only to power, and I think that we ought to continue to look across the board, and if the invasion of Poland occurs, I think it will require an even greater assessment.

Mr. JONES. On that very subject, should we sell arms to China if the Soviets invade Poland, as some Administration officials are now talking about?

Senator BYRD. I think it's something that we ought to consider, but I think that we ought to do what's in the best interest of the United States in the short run and in the long run. If two weeks ago, if a month ago, if six weeks ago it would have been in the best interests of the United States to provide arms to China, that's perhaps what we ought to do, but I don't think that ours ought to be a policy of simple reaction here; well, if the Soviets go into Poland, we will sell arms to China. What does that have to do with the invasion of Poland?

I think we best be very careful that we don't leave the impression with the People's Republic of China that we're simply out to use the Chinese.

Mr. JONES. Would such a sale do that?

Senator BYRD. Well, it could leave that impression. Perhaps it's in the best interests of the United States. I have said early on that we perhaps ought to consider some military sales of conventional weapons to the Chinese, but I said this a long time ago. I don't think that we should implement this policy now, suddenly, just on the basis of an invasion of Poland. If it's in the best interest of the United States that we do it entirely aside from that, then we ought to proceed with it. I think we have to be careful that the Chinese don't get the impression that they're just being used.

I think that up to now they have felt that we have mutual interests and that we should have mutual concerns regarding the Soviet Union and its intentions, its expansionist policies; but we don't want them to get the idea that we're going to use them as a so-called China card.

Mr. JONES. Well, just let me clean this up and then we can move on. You think at this point, then, that we should do what, maybe look into the possibility but not move forward now?

Senator BYRD. I wouldn't rule out a continued assessment of such a policy. This would constitute a major policy determination on the part of the Administration, and, as such, I think it ought to be developed through consultations with the Congress, because the Congress certainly should have a large voice in the implementation of that policy if it were to be decided upon.

Mr. MASHEK. Senator, I'd like to turn to a subject that's of paramount interest to the people in your state. Given the grave economic conditions in the country today, how long can we really endure a coal strike?

Senator BYRD. We can't really endure it very long. It will impact upon the economy of the state and of the nation. I would hope that the leaders on both sides would get together as soon as possible again and renew their negotiations. Coal has a very important contribution to make to the national economy and to the national energy picture.

Mr. MASHEK. And if they don't get together, when should the Administration then move in with Taft-Hartley?

Senator BYRD. Well, I hope they get together.

Mr. HERMAN. Do you think it is the intention of the Bituminous Coal Operators' Association to use this deadlock to break the industry-wide bargaining and start going in coal mine by coal mine trying to break the solid front?

Senator BYRD. I don't think so. I don't see any indications of that.

Mr. HERMAN. Why do we have the strike when everybody is suffering? I mean, who is going to gain from it, or was it poor negotiations, or what's the problem?

Senator BYRD. Why do we have a strike?

Mr. HERMAN. Yes.

Senator BYRD. The miners voted against the contract.

Mr. HERMAN. Well, I understand, but——

Senator BYRD. That's the simple answer. As to what their motivations were, as to their reasons, I'm not privy to that.

Mr. HERMAN. You did not have any role? You were not consulted, despite your interest in——

Senator BYRD. I've had no role, I have no role, and I should have no role. I have no business getting into those things.

Mr. MASHEK. Senator, the Administration's relatively easy victory in the Senate last week on the budget has led many people to believe that the Democratic Minority is in disarray and that they're, very frankly, just about ready to rubber-stamp the President's program. What's your reaction to that?

Senator BYRD. I can understand that perception as one looks down from the galleries.

Mr. JONES. How about looking at the votes?

Senator BYRD. But the Minority was not in disarray. The Minority held strategy caucuses. It decided what amendments should be offered, how much the amounts would be in each amendment, the order of offering the amendments, who would offer the amendment, and it held together very well.

Mr. MASHEK. But, Senator, the final——

Senator BYRD. Out of 47 votes, we were able to deliver 44 on the Veterans' Health Service Amendment, 44 on the second Veterans' Health Service Amendment, and right on down. We decided to endorse about 10 or 12 amendments. There were about 28 amendments offered by Democrats. Obviously, any Senator has the right to offer any amendment he wishes, but on those amendments that we endorsed, we had good support.

Mr. HERMAN. But wasn't that a fall-back position? Wasn't your original intention to form a unified counter budget that all the Democrats could support as a package?

Senator BYRD. No. No, that was never our intention. We intended to——

Mr. HERMAN. Should it have been?

Senator BYRD. No. We intended from the start to support the overall spending levels that the President recommended—the dimensions and scope of the budget cuts—but within those dimensions, we determined that there were selective areas involving people who would otherwise fall through the President's safety net, and we attempted through our amendments to save them from falling through—the veterans, children with respect to school lunches, the old folks with respect to the minimum social security payment, the middle income people with respect to their children who need to go to college and who won't be able to get loans, and those were the groups that were defeated. The arithmetic was there. The Republicans have 53 Senators. If they can hold them all, as they were able to do, then the arithmetic counts.

Mr. HERMAN. Well, you couldn't even hold the Democrats when there was a Republican Minority.

Senator BYRD. But it wasn't the Democrats who were defeated. It was the old folks, it was the veterans, it was the school children, it was the college kids, and it was the nation, because there is no energy program, other than the program of price, that the Administration has enunciated.

Mr. HERMAN. But, Senator, when Republican Senator Chafee proposed an amendment to restore some of the cuts, not even the Democrats could be united behind him to support him, starting with a Republican amendment.

Senator BYRD. Some of those items that were in his amendment had been endorsed by the Democrats, that's true, but it was the mix of items in his amendment, I think, that kept us from getting more Democrats on that particular amendment.

Mr. JONES. Senator, earlier in this broadcast, when asked about the week's events and the assassination attempt, you said that the President had, quote, acted in his friendly self. I'd like to have your assessment of, from a political point of view, how this is all going to impact on the President's ability to get his economic package through Congress?

Senator BYRD. The President is a very likeable, personable man. He communicates well. He has a personality that is magnetic. We are all sympathetic with respect to what has happened. But with respect to the programs, they're entirely aside from our sympathies toward the individual himself.

Mr. JONES. So it's not going to help him?

Senator BYRD. I don't think that this sympathy will translate into votes. We must be objective when it comes to determining the issues.

Mr. HERMAN. On the other hand, do you agree with Senator Laxalt, who said the President's absence from the scene must be short because we need his supersalesmanship to put the program across?

Senator BYRD. I don't think that what has happened will translate into votes. Our responsibility, when it comes to voting on the issues, is to weigh the issue and determine what is good, what is bad for the country, and in doing that, we will act absolutely independently of our high regard, our respect and our sympathies for the President of the United States.

Mr. HERMAN. Thank you very much, Senator Byrd, for being our guest today on Face the Nation.

ANNOUNCER. Today on Face the Nation, the Senate Minority Leader, Robert Byrd, Democrat of West Virginia, was interviewed by CBS News Congressional Correspondent Phil Jones, by John Mashek, a Correspondent for U.S. News and World Report, and by the Moderator, CBS News Correspondent George Herman.

Face the Nation has been sponsored by I.B.M.

Next week, another prominent figure in the news will Face the Nation.

This broadcast was produced by CBS News.

Face the Nation originated from Washington, D.C.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Three minutes and forty-six seconds.

Mr. ROBERT C. BYRD. Mr. President, I yield 1 minute back to the distinguished majority leader and I will yield the remainder of my time to Mr. PRYOR.

Mr. BAKER. Mr. President, I thank the

Senator. I thank him for honoring my request to recover a minute, which I now yield to the Senator from Minnesota.

EL SALVADOR

Mr. DURENBERGER. Mr. President, recently we observed the first anniversary of the martyrdom of Archbishop Romero of El Salvador, who was murdered while saying mass at a hospital chapel in the capital city of San Salvador. Even those who had become numbed by the regularity with which Salvadorans suffer from torture, murder, and other violence were horrified by the particular brutality of so outrageous an act. Archbishop Romero was widely known for his courageous work among the poor and his concern for the future of his country. Like Thomas Becket many centuries earlier, he was cut down with an almost gratuitous contempt for decency while in the conduct of his holy office solely because his convictions and his character were found meddlesome by a few men.

It was thus not surprising that the anniversary of his death should occasion, as it did, an outpouring of concern by many Americans over our policy in El Salvador. In death as in life, the Archbishop was a focal point for those who feel deeply about the need for reform in El Salvador and elsewhere.

All of us in this Chamber and elsewhere in the Government are aware of how vitally most Americans are concerned about events in El Salvador. We are in the midst of a major national debate touching upon many questions, ranging from the proper role of the United States in world affairs to the prospects for peace in El Salvador. The demonstrations last week are one aspect of this debate, as are the numerous letters which we receive daily from our constituents.

I am deeply concerned, however, that far too much of the current debate is characterized on each side by incomplete information, selective attention to detail, and outright misrepresentation. Too often in our discussions of foreign policy, we fall into the trap of scoring debating points rather than seeking a consensus based upon a full and mature understanding of the issues. This tendency is compounded when we deal with areas of the world, such as Central America, with which far too many of us are sadly unfamiliar.

Given the events of the past two decades, it is no longer a civics-book platitude that the American public determine our foreign policy. It is the public, and not we in government, who ultimately set the pace and direction of our foreign policy, and it is therefore imperative that all of us, in government and out, be as fully informed as possible. When national debates over crucial policy questions are based on information which is as accurate and complete as possible, our policy and our people both benefit. When such debates are couched in polarized views of incomplete information, however, or fed by the opportunistic escalation of opinion into rhetoric, our policy suffers. Indeed, much of the erraticism in the conduct of our foreign policy for which we have justly been criticized can be ascribed to our tendency to seek black-and-white analyses of highly complex issues.

There are many grounds for debate over our current policy in El Salvador Mr. President. There are seldom any clear choices in foreign policy, and the consequences of error are always significant. Therefore, people are always rightly concerned about the particular choices which we make in situations which appear ambigous.

Informed, well-motivated and reasonable people can question, and are now questioning, such things as the wisdom of additional military assistance to the Government in El Salvador. Many people are legitimately concerned about some of the rhetoric with which we have announced and promoted our latest policy initiatives. Many persons can recognize the inherent dilemma posed by dealing with any government in a country as deeply troubled as El Salvador. These are valid questions, Mr. President, and opinions can reasonably be expected to differ on such complex issues. Fortunately, such questions have set the tenor for much of the debate thus far.

But these questions and these concerns are a far cry from some of the statements being made by so-called experts on El Salvador who are more interested in fostering hysteria and abrogating any U.S. foreign policy role than in addressing significant and valid questions. I am particularly disturbed by the systematic mythmaking which passes for analysis and which often leads to a wanton disregard for the truth. I am distressed that many of those who accuse the United States of seeking overly simplistic policies are themselves prone to fall back on equally simplistic assumptions, to offer equally simplistic solutions, and to paint with their brush all those who would offer a more judicious and informed critique of the situation.

If we as a nation are going to debate this issue, I believe that we should address our attention to the issues which bear upon the reality of the situation, rather than falling back on myths which are not accepted even by the most telling critics of our policy. In other words, let us confine the debate to sensible issues, rather than seeking to escalate the debate into polarized views which have no purpose other than to attract an audience.

I wish, therefore, Mr. President, to address several of the myths which are now current among some of the critics of U.S. policy. If we can dismiss these myths once and for all, it should be possible to proceed with legitimate and productive discussion. Let me take these myths one by one.

THE MYTH OF PRESIDENT DUARTE AS A DICTATOR

It is commonly claimed by many critics that President Jose Napoleon Duarte is at best a stooge fronting for extremists, and at worst a brutal man who does not merit our support. Not long ago, for instance, the St. Paul Pioneer Press quoted a member of the Committee for Solidarity, a Minnesota group which protests current U.S. policy, as follows:

> The talk of Cuban and Soviet support (for rebels) is a smokescreen intended to obscure the real situation. That situation is accurately described as a popular struggle for liberation by the El Salvadoran people against a most brutal military dictatorship.

Mr. President, I am frankly astounded that this myth enjoys any currency, for even the most prominent critics of our policy in El Salvador have attested to President Duarte's character. It is widely known that President Duarte was himself arrested and tortured by the security forces of El Salvador in 1972, following his successful campaign for the presidency in an open election. If any person has reason to detest right-wing repression in El Salvador, it is Jose Napoleon Duarte. As Senator EAGLETON noted on the floor of the Senate on March 17, 1981, Senor Duarte is one of the few leaders in El Salvador with a legitimate claim to broad support among the people.

Many of those who have known President Duarte, or lived under his regime, are quick to praise the man even if they do not agree with U.S. policies. For instance, former agrarian leader Leonel Gomez, who is currently hiding in exile in the United States in fear of rightist terror, states in the Boston Globe that President Duarte is honest and seeks the best for his country. Equally, former Ambassador Robert White, whose abrupt dismissal by the Reagan administration I criticized, has repeatedly stated that President Duarte is engaged in struggling with the extreme right as well as the extreme left.

Perhaps the best indications of President Duarte's efforts to bring reform and peace to his country are to be found in his own words and deeds. He has undertaken the most impressive land reform in recent history; he has instituted banking reforms in order to lend substance to his land reforms; he has seen to the appointment of an election board; and he has repeatedly condemned the terror and violence practiced by rightist elements in Salvadoran society.

In a December 1980 interview with the German magazine Der Speigel, which was excerpted in the Washington Star on March 8, 1981, President Duarte explicitly accused the oligarchy and the security forces of practicing terror for 50 years of Salvadoran history, and he made clear that he does not intend to become a willing partner to any U.S. military actions, no matter how farfetched such actions might be. Perhaps the most explicit statement of President Duarte's views can be found in the Los Angeles Times of December 14, 1980. I would like to quote President Duarte at length:

> No one can ignore the fact that the situation the country finds itself in today is the product of 50 years of injustice . . . these people of privilege are the ones responsible for generating the structure of violence in this country . . . they have perpetrated fraud after fraud in all elections, thus frustrating and radicalizing the people of El Salvador . . . and when the people have no hope,

they seize upon violence as the only way of confronting violence. This is the legacy that these men of the extreme right have left the people of El Salvador.

Mr. President, I find it fantastic that anyone could believe or argue that a man such as President Duarte is a rightist dictator or that he will countenance the very repression and economic injustices that he both recognizes and condemns. To those who hold that President Duarte is well-intentioned but ultimately too weak to hold the center against extremists from the right and left, let me note that his government has successfully withstood months of terror, three strikes, several coup attempts, and a failed offensive by leftist guerrillas. In short, Mr. President, the Duarte government is clearly both reformist and viable, and it merits our support. Debate within this country is more properly focused on the kinds of support which we should lend the Duarte government than on specious claims of the repressive character of those now in power. Let me therefore turn to another myth.

THE MYTH OF POPULAR SUPPORT FOR BENIGN LEFT

This myth, of course, often follows from the first. It is frequently held that the leftist forces in El Salvador are simple freedom fighters and agrarian reformers who enjoy wide support among an allegedly repressed population. Once again, the facts—including those offered by many critics of both the United States and President Duarte—indicate otherwise.

Let us first set the nature of the leftist opposition in context. As President Duarte makes clear, El Salvador has suffered from 50 years of rightist repression, and people have therefore been against the Government. It is equally true that a substantial portion, if not the majority, of the vicious terrorism plaguing El Salvador comes from right-wing death squads and their paid thugs who in many cases have infiltrated the security forces. I am not disputing that rightist terror is a major problem in El Salvador, perhaps in the long run the major problem facing the country.

What I do dispute, however, is that notion that the people of El Salvador have joined with the left to overthrow the Duarte government in a popular liberation movement. To the contrary, a population which has suffered so much that it has little left to lose actually sat out the so-called final offensive which was thrown by the left in January of this year. In the words of Ambassador White, "the left gave a war and nobody came." Surely, if there were widespread support for the guerrillas the population would at least have participated in the general strike which was demanded. Instead, the entire offensive was a failure from beginning to end because the leftists did not garner the support of the people.

Archbishop Romero's successor, Bishop Arturo Rivera y Damas, the Apostolic Administrator of El Salvador, has addressed the same point. Shortly after the failure of the final offensive, he was quoted as follows in the St. Paul Pioneer Press:

> We cannot affirm that the civilian population is with the government, but it is a fact that it is more accepting of it, at least as the lesser evil. It is evident that a majority of the population does not support solutions based on violence . . . I am not in favor of repression, but I think people want tranquility, in order to work.

This statement, of course, does not indemnify or support the Duarte government. Such reticence is perhaps understandable from a man who has seen 1 archbishop, 11 priests, many hundreds of lay workers, and 4 missionaries murdered by elements of the extreme right. But the statement is all the more powerful therefore in its recognition that the Salvadoran people do not support the left. The point is clear: The people of El Salvador want peace, not violence. They want work, not war. They want food, not guns. And they feel that their best chances lie with the Government and not with the left. This is not the stuff of a "popular liberation movement."

Just as important, Mr. President, is the nature of the leftist opposition itself. It is one thing to note that it enjoys little support. It is another to assume that it is a benign group of humanitarians bent on domestic reform, even if its merits are not widely recognized by the Salvadoran population. Yet many Americans assume that the leftist opposition can be so characterized.

Once again, the history of leftist opposition has to be put into context. As Bishop Rivera y Damas himself noted, many of those who have joined the guerrillas are genuinely well motivated and seek the best for the country as they see it. Given the history of El Salvador through the regime of General Romero, this is understandable. Equally, many Americans note that Guillermo Ungo, President Duarte's running mate in the 1972 elections and later a member of the first junta which overthrew the military regime in October 1979, has joined with other mainstream Social Democrats in forming the Democratic Revolutionary Front, which is allied with other leftist opposition groups. From this fact it is often assumed—falsely—that the character of the leftist opposition is in fact reformist rather than militant and radical.

Again, those most familiar with situation, including many Salvadoran activists, disagree with such an assessment. Leonel Gomez, the agrarian leader who fled El Salvador in fear of assassination by the right, refers in the Boston Globe to Guillermo Ungo and the other socialists who resigned from the first junta as "naive political animals," who do not recognize the nature of the leftist opposition. In his words:

> If the left takes over, I doubt they will give power to these civilians who now speak for them. There is a small, very aggressive radical sector in the guerrilla left that I think may take over. That is my main fear.

Similarly, Bishop Rivera y Damas is quoted in the New Republic, a magazine not noted for its conservative bias, as saying that the left has "never been clear and specific with the people."

Indeed, the editorial staff of the New Republic has specifically concluded that the armed population in El Salvador is controlled by Leninists who are using terror to establish a radical, anti-Western Communist regime. To those who feel that the Social Democrats in the FDR may serve to moderate the radicals, the New Republic responds as follows:

> The flaw in this approach is that Ungo leads only a small splinter in the opposition coalition, is excluded from the central military directorate that controls it, and is allied with at least three well-armed guerrilla factions who believe strongly in the relation between power and guns. Ungo has no guns, only friends. If Ungo's side wins, it is doubtful that even Willy Brandt will be able to save him from his friends. That leaves Duarte.

Moreover, Ambassador White, in a recent debate with Jeanne Kirkpatrick, the new Ambassador to the United Nations, was equally explicit in his condemnation of the leftist opposition in El Salvador. He feels that—

> The ultimate enemy of Western civilization and of the U.S. in El Salvador is a Marxist-Leninist group which is dedicated to the overthrow of the Duarte government by force.

Indeed, Ambassador White, who is perhaps the most prominent critic of President Reagan's policies in El Salvador, draws a telling contrast between the leftist opposition and the Duarte government. Let me quote him at length:

> No leader of the leftist forces, no representative of the left—whether it be Ungo or Mallorgo or Oquelli or whoever—has ever stated, and I have asked that they do so publicly, has ever criticized, has ever made any effort to stop the leftist forces from murdering, from kidnapping, from assassinating. The left takes bus drivers out of their vehicles and guns them down in front of people.
>
> The day that Dr. Ungo condemns that, he starts to gain some moral authority in my eyes. The government of Napoleon Duarte, on the other hand, and many of the moderate military officers, have explicitly condemned the excesses of the security forces.

Even Archbishop Romero, whose name is often used by those who wish to condemn both the Duarte government and the policies of the United States, had no illusions about the nature of the armed leftist opposition in El Salvador. As Georgie Anne Geyer notes in a recent editorial in the Washington Star, the Archbishop was bitterly critical of the Marxists during an August 1979 interview. In a particularly insightful and much-overlooked statement, the Archbishop said:

> When I returned home in April, I found their bombs in the cathedral. Our popular groups had been taken over by the far left. They want the church to support everything, not only justice but all their strategies.

Finally, Mr. President, while it is difficult to apportion with any precision the shares of blame for all the violence which has made El Salvador so miserable, it is clear that the left does bear considerable responsibility. The Baltimore Sun recently noted that rather than the 6,000 fatalities cited by President Reagan as arising from leftist terror and violence,

State Department critics believe that the true figure—as boastfully claimed by the left itself—is "only" 4,017.

Admittedly, this represents only one-third of the total fatalities in the past 18 months. But it is clear that the left considers and has long employed terrorism as its most effective weapon. Moreover, this is not a recent development, as I can testify from my own experience. In January 1976, while I was visiting San Salvador, Roberto Poma, the president of the Salvadoran Tourism Institution, was kidnapped and subsequently murdered. I walked through the blood and broken glass which littered the quiet residential street of San Salvador on which he was ambushed, kidnapped, and his bodyguards killed. Significantly, the left immediately took credit for this crime, hoping thereby to terrorize the Salvadoran middle class.

In other words, it makes no sense to overlook the reality of leftist terror when discussing El Salvador. I agree that terrorism from the right is a major problem in El Salvador. But more importantly, I hold that terrorism in general is a crime against all Salvadorans, whether it originates from the right or from the left. Too often, the victims of terror are the farmers, merchants, and peasants who want nothing more than to be left alone.

In short, Mr. President, the pattern in El Salvador is strikingly familiar to those who remember earlier Communist revolutions, whether in Russia or Vietnam or Afghanistan. What began as a reform and opposition movement created by years of brutality and repression has been taken over from within by an equally brutal and repressive group who are waiting to take command of the country. Just as the populist Kerensky regime was displaced and eventually liquidated by a Bolshevik minority in the Russian revolution, there is a grave risk that Guillermo Ungo and his colleagues in the relatively moderate Democratic Revolutionary Front will be displaced and liquidated by a Leninist minority which has assumed control of the DRU and the FMLN. Given this, and given the manifest lack of popular support for the leftist opposition, it is evident that those who hold that the Duarte government is confronted by a popular liberation movement have succeeded in creating still another myth. Let me turn to a third.

THE MYTH OF SOVIET AND CUBAN NEUTRALITY

Ever since the publication of the State Department white paper on February 23, 1981, many people have either refused to believe or downplayed the significance of the overwhelming evidence that Cuban, Nicaraguan, Russian, and Vietnamese authorities have conspired to ship massive quantities of arms to the Salvadoran left. As one would expect, the white paper was greeted with pious denials by the Soviets and others, including the FMLN.

I am disturbed that many Americans are apparently convinced that their own Government can never tell the truth while the Soviet Government can never tell a lie. It is as though the white paper was a predictable product of a Reagan administration which has been presumed since the election to side with the right and use "traditional" right-wing condemnation of Soviet influence as a tool. The reality is far different, however, not the least because the evidence of Soviet interference is clear and overwhelming.

Once again, Mr. President, let us put the significance of these arms shipments in proper context. Few Americans are going to claim that the arms shipments precipitated the violence in El Salvador, or that Cuban and other foreign meddling is the primary cause of a long-standing pattern of violence. The basic causes of the conflict in El Salvador are indigenous to El Salvador. They date back more than 50 years and they are rooted in the pattern of structural violence which Jose Napoleon Duarte and the other reformists are committed to eliminate. Our own Government has acknowledged as much on several occasions.

For instance, Under Secretary of State Walter Stoessel recently testified before the Senate Appropriations Committee that:

> While the guerrillas in El Salvador are externally supported, they also feed on domestic ills. These include years of repressive and unresponsive governments and inequitable distribution of resources and life opportunities. For this reason, the major emphasis of our assistance program for El Salvador is economic rather than military.

Equally, Ambassador Kirkpatrick agrees that:

> El Salvador is a country with profoundly inequitable distribution of wealth and status, a largely illiterate population, miserable poverty, and a negative political tradition.

In other words, the Cuban arms and Cuban paramilitary intervention did not cause the conflict to break out in the first place. But such activities did occur, and they did add fuel to the fire. The influx of arms gave the armed leftist opposition the means by which to carry out the January offensive, and it substantially threatened the stability of the only decent government El Salvador has had in many years.

While one can argue about the proper U.S. response to this intrusion by outside Communist states, one cannot and should not deny that it has occurred or that it merits some serious thought. One again, support for this comes from some surprising sources.

The New Republic editorial staff has concluded that:

> The left's arms do indeed come from the Soviet bloc and its leaders do indeed meet in Havana. But that is not sufficient reason for opposing them. The reason to oppose them is because of what they intend to do—which is to turn El Salvador into another Cuba.

Once again, Mr. President, let me stress that this assessment comes not from the Government, nor from the Reagan administration, but rather from a magazine which has been known for years for its liberal rather than its conservative point of view.

Equally, former Ambassador White, who has publicly stated his belief that our current policy in El Salvador is both disproportionate and counter-productive, fully accepts the necessity to counter outside interference. In his debate with Jeanne Kirkpatrick, White stated:

> We have seen over the last few days or weeks a great emphasis on the enemy without. I applaud this Administration for emphasizing that danger and for sealing off El Salvador from this influx of arms from communist and communist-related countries. . . . However, that traffic has been if not entirely stopped, ninety-nine percent stopped. Now is not the time to emphasize military assistance.

Finally, in testimony before the House Appropriations Committee on February 25, 1981, the Rev. J. Bryan Hehir, who represented the U.S. Catholic Conference, both recognized and condemned Soviet and Cuban interference in El Salvador. This statment, of course, came from an organization which has been deeply disturbed about some of our recent policies in El Salvador. Once again, however, concern and disagreement did not lead to abandoning the truth. Reverend Hehir, like Ambassador White and others, recognizes what the real issues are and resists the temptation to press his viewpoints through the vehicle of mythology. Let me now turn to a fourth, and final, example of the myths which warp our debate of U.S. policy.

THE MYTH OF A U.S. QUEST FOR SIMPLISTIC SOLUTIONS

The final myth in some ways follows from the first three. It is widely claimed by many critics that the U.S. Government does not recognize the complexity of the situation in El Salvador, and that it seeks merely to prop up a regime, no matter how unpopular, which will be friendly to U.S. interests. Indeed, the more radical persons who hold to this view believe that we would favor, whether implicitly or explicitly, a rightist coup in El Salvador. Once again, massive evidence simply does not bear out this myth.

In many respects, the decisions of the Reagan administration represent marginal changes in the policy first set out by Jimmy Carter. As noted earlier, Under Secretary Stoessel has stressed that the great bulk of our aid is economic in nature, and it is designed to address the pressing problems of Salvadoran poverty, both directly and indirectly by sustaining the land and banking reforms of the Duarte government.

This bears repetition, for it is most singular that an avowedly conservative administration is actively supporting a program of reform in El Salvador that many American conservatives would doubtless find shocking.

Just as important, spokesmen for the Government have repeatedly made clear that we support democratic change, human rights, reforms, and whatever electoral solution the Salvadorans themselves choose to adopt. William Dyess, principal spokesman for the State Department, made this clear on February 18 of this year. Five days later, the white paper explicitly noted the long history of rightist repression in El Salvador and clearly stated that the U.S. Government supports measures directed against the

Salvadoran right as well as the left. On March 4, Secretary Haig, responding to the underground news conference of rightist terrorist Maj. Roberto D'Aubuisson, stated that we will not support a rightist government installed by the coup d'etat promoted by D'Aubuisson. In short, Mr. President, our Government has made as clear as possible its support for reform, for elections, and for whatever peaceful solution the Salvadorans themselves adopt.

Perhaps the most comprehensive statement of our position occurred on March 3, 1981, when Gen. Vernon Walters, acting as special envoy to Latin American countries, met at length with President Carlos Andres Perez of Venezuela and the Dominican political leader Jose Francisco Pena Gomez. General Walters assured these regional leaders that our Government desires a negotiated rather than a military solution to the violence in El Salvador; that we look forward to elections; that we will actively support a pluralistic society and government which represent all sectors of the Salvadoran polity; and that our concern which prompted the white paper and the overseas tours of various envoys was with Cuban and Soviet meddling.

In short, Mr. President, it is simply not true that we wish to promote any particular electoral outcome in El Salvador or that we are ignorant of the highly complex nature of this tragic situation.

THE REAL ISSUES IN THE DEBATE

Mr. President, I have spent considerable time atempting to dispel a number of myths which warp the current debate over U.S. policy in El Salvador and throughout Central America in general. Admittedly, this has been more in the nature of brush-clearing than of proposing solutions. I would like therefore briefly to outline what I believe to be the real essence of the debate and my own views on the matter.

First, as former Ambassador White, Representative CLARENCE LONG, and Archbishop James Hickey have all noted, the principal issue which separates all those concerned about El Salvador is the question of military versus economic assistance. It is simply specious to claim that the United States should wash its hands of the entire matter and cut off all aid. To do so is simply to promote more starvation rather than less, to foster misery rather than peace. El Salvador faces grievous problems of unemployment, capital flight, net disinvestment, and poverty. An elimination of all assistance, both economic and military, as proposed by a few people, is shortsighted and even inhuman.

There is, however, considerable concern over whether further military assistance will not prove counter-productive. It might lead, according to this vein of thought, to a decreased emphasis on the process of economic reform and recovery. It might also promote more rather than less violence. It might encourage the rightists, or those who favor a simply military solution, to force President Duarte out of power. Less dramatically, it might shift the balance of power within the ruling coalition more in favor of Colonel Gutteriez and his supporters rather than President Duarte and his allies.

These are all legitimate questions. While I do not currently share all the fears of those who propose a complete cessation of military aid, I recognize and understand such concerns. Indeed, I have written to Secretary Haig myself, seeking assurances that we will not lose sight of the ultimately political and economic nature of the problems in El Salvador. I look forward to a debate on this subject, for it addresses perhaps the core issue, it will prove informative, and it will result in a more comprehensive understanding of a highly complex and highly important matter.

Second, there is the issue of Cuban, Nicaraguan, Soviet, and other interference, and how best to handle such involvement. Once again, informed and concerned people have addressed the key points in this issue. Many persons believe, for instance, that the steps taken by President Carter on January 17, 1981, to restore nonlethal military assistance and to provide as well $5 million worth of lethal military equipment were sufficient. Such persons hold that these arms were all that was needed to replenish what was used to counter the January offensive, and that once the balance was restored we could look forward to further progressive work by the Duarte government. While I believe myself that somewhat more was needed, the point raised by these persons is worthy of debate.

A second school of thought holds that President Carter's decisions required the supplemental step, taken by President Reagan, of publishing a detailed accounting of outside interference. In other words, these people believe that it was necessary both to restore the military balance between the government and the armed opposition, and to demonstrate to the world our awareness of outside interference, coupled with our condemnation of such acts. There is considerable merit to this point of view.

Finally, of course, there are those who hold that both of the preceding steps were necessary, but that they needed as well to be bolstered by a substantial increase in our own military support. This, of course, has proved the most contentious point in this issue.

Third, there is the issue of U.S. military advisers. Opinion is divided along clear lines here, with one side fearful that an attack on our advisers will impel us to begin an incremental process of inevitably greater involvement. The other side, of course, believes that our advisers are necessary both to provide the technical training necessary to operate and maintain helicopters and other complex equipment and to provide some rudimentary education in the rules of engagement, fire discipline, and so forth. The latter training, it is felt, will eventually result in far fewer casualties caused by excessive force. While it will not end the fighting, it may result in fewer fatalities among those unfortunate enough to be caught in the crossfire.

Again, this issue is clearly debatable. My communication with Secretary Haig specifically addressed this point, for many of my constituents are deeply disturbed over the presence of advisers in El Salvador, and I can understand this concern. Vietnam is an example of gradual involvement which grows out of hand, and it is an example few of us will ever forget. While I do not believe that there is anything mechanistically inevitable about the decisions taken by our Government, and while I believe that the experience of Vietnam is the greatest deterrent against a repetition of such a catastrophe, I once again feel that this is an issue which deserves debate.

Finally, of course, there is the issue of contingency planning. Many people wish that we could more clearly state what responses we will make to any number of possible events, such as an attack on the U.S. presence, a new offensive, a growth of rightist influence, and so forth. Again, this is a point which bears debate, keeping in mind that we cannot overspecify the future and that we should not list every conceivable response which we might take to every conceivable contingency. To do so is to play into the hands of those who wish us ill.

Ultimately, Mr. President, the question of U.S. policy in El Salvador has few black and white answers. Like any matter of foreign policy, it represents a series of hard decisions taken in ambiguous circumstances for purposes that are often unclear until events have more fully developed. The role of a national debate is therefore to provide guidance, to set limits, and to raise questions. This is a crucial element of foreign policy, and one which we ignore at our peril. In other words, I encourage debate, for it is in debate, both here in Congress and throughout America, that we will find our strength and set our policy.

I do not encourage, however, rhetoric for the sake of rhetoric, or myth for the sake of rabble rousing. I am struck by the fact that much of what has passed for debate has in fact been the indiscriminate and repetitious resort to demagoguery and myth making. I am also struck by the fact that much of this myth making seeks to draw for support upon persons, such as Ambassador White or Leonel Gomez or Archbishop Romero, whose views have little if anything in common with those of the chief myth makers. Indeed, there is considerable consensus between critics and supporters of this Government's policies.

It is agreed that President Duarte represents the best chance for El Salvador to come to peace with itself. The debate separating critics and supporters of President Reagan's policy is over the kind and amount of support which we should provide to President Duarte, and not whether such support is merited at all.

It is agreed that the armed leftist opposition in El Salvador represents neither the wishes nor the best interests of the Salvadoran people themselves. Instead, it is agreed that the core of the leftist opposition is to be found in a cabal of Leninists, relying upon terror and violence, who seek to emulate Cuba and other Communist nations. The real debate separating critics and supporters of President Reagan's policies is over how best to isolate and deal with these

terrorists, through military assistance or through reforms that eliminate the grievances upon which they depend for sustenance.

In other words, there is both consensus and disconsensus. There is, in short, the basis for a productive debate, one which might result in the alteration of our foreign policy just as readily as it might result in its continuation. Mr. President, let us get on with this debate, but let us insure that it is in fact a debate rather than the blind resort to slogans that are suited only to bumper stickers.

To conclude, Mr. President, I would like to cite my own beliefs insofar as I can outline them. Senators will remember that I testified before the Foreign Relations Committee and later worked very hard in this Chamber in order to secure passage of the supplemental funding for Nicaragua. I stated at the time that many of us might have preferred to see another government than the Sandinistas assume power after Anastasio Somoza was overthrown by a populace that detested him. However, the reality was that we had to deal with the Sandinistas and not with some preferred alternative. To my mind, what was important then, and is important now, is to recognize that we in this country have for far too long simply overlooked what happens in Latin America. We have pursued a foreign policy based in equal parts on panic and neglect, ignoring reality and confusing the support of fragile governments with the friendship of populations. Thus, I urged the passage of funding for Nicaragua in hopes that it would provide the seed money for needed reforms, that it would preserve a centrist element within a country that was increasingly radical, and that it would maintain some measure of American influence in a country that desperately needed help from all available sources.

Since the passage of that bill, Nicaragua has not behaved in a way that would endear it to most Americans, of whatever political conviction. It has attempted to foster armed insurrection beyond its own borders. It has abused the civil and human rights of many of its own citizens, including Jose Esteban Gonzalez, the noted human rights critic who suffered so badly under Somoza. It has periodically shut down and harrassed the staff of La Prensa, the one newspaper preserving a modicum of independence from the Sandinista party line. It has increasingly made clear its Marxist convictions.

But I do not regret my role in securing assistance for Nicaragua. The decision to provide this funding was a straight gamble, and it was taken long after our neglect had precluded any other options. As such, it was worth it simply on those terms alone. But just as important, while Nicaragua is not as democratic and pro-American as we might wish, it certainly is not as communistic and anti-American as it could be. It is not another Cuba. As I often explain, on a scale of 1 to 5, with one and five representing the extremes and three as the preferred outcome, Nicaragua can be viewed as a four. This is unfortunate, but clearly not so unfortunate as if it were a five. And the proper U.S. policy in the rest of Central America could result in a three.

By the same token, El Salvador can currently be envisioned as a two. All Americans who care for basic human rights and who hope for peace and prosperity in Central America are rightly disturbed over the continued terror in El Salvador. The reforms of the Duarte government need further implementation, and the abuses of the security forces must be brought under control and ended altogether.

However, the country has clearly changed, and changed for the better, since the days of the oligarchy when 2 percent of the population controlled 70 or more percent of the land. While much remain to be done, we should not under-rate what has been done or express despair that unrealistic expectations have not yet been met. In this regard, I was struck by an article in last Sunday's Washington Post, noting that many critics are upset that only 283 of 315 farms have thus far been taken over by the government in phase I of the land reform program. Mr. President, I contend that it would be very difficult for any country, much less one only now emerging from years of oligarchic control, to accomplish an 87 percent completion rate of so ambitious a program in so short a time. Rather than noting that the glass is half empty, let us be pleased that it is half full, particularly since the Romero and preceding governments would have broken the glass altogether.

In other words, let us give credit to the Duarte government for moving El Salvador so far along the road to reform. And I mean this literally, for it is the lack of consumer credit that is now most hampering further implementation of the land reform program. Changes of such magnitude as President Duarte is trying to accomplish require two things above all: time and material resources. We have it in our power to give him a substantial measure of each. It requires that we be realistic about the situation, that we not demand more than can be accomplished by any government, and that we can provide further economic assistance.

Let us be clear about this, Mr. President. We have the opportunity to deal with a situation in El Salvador that is very different from that which we faced last year in Nicaragua. In Nicaragua, it was too late to encourage reform by the time we noted the existence of problems, and we were therefore left with only short-term and last-minute gambles in hopes of preserving a democratic option. In El Salvador, a wise foreign policy can act before the fact and encourage precisely what those of us who sympathize with changes most want: meaningful reforms, greater economic welfare, political liberty, independence from any outside influence, and peace.

Ever since the Puebla Conference of Latin American Bishops in 1979, the Roman Catholic Church, which is enormously influential in Latin America, has recognized that there must be, in the words of the conferees, an "option for the poor." The church has faced up to its responsibilities in a region of the world where far too many people suffer needlessly from economic injustice, political persecution, and feudal terror.

Pope John Paul II, speaking in Brazil in 1979, was more explicit about this point. As he reminded us then:

> Anyone who reflects on the reality of Latin America, as it presents itself at this moment, is led to agree that the realization of justice on this continent faces a clear dilemma: either it will come through profound and courageous reforms, according to principles that express the supremacy of the dignity of man, or it will come—but without lasting result and without the forces of violence.

Mr. President, there is clear need for "profound and courageous reforms" throughout much of Latin America, and in El Salvador specifically. President Duarte has recognized this need and has acted upon it with dignity and with courage. It may be too late; the forces of violence may yet run their course, without lasting result and without benefit. The stream of casualty figures from El Salvador makes this a clear possibility.

But let us not abandon this challenge before we know the outcome; let us not consign future generations of Central Americans to an endless cycle of repression from the right and terror from the left; let us work together, here in this country and with appropriate figures in Latin America, profoundly and courageously, to bring about reforms. Above all, therefore, let us debate our course and then set out upon that course. Let us not waste our time and the lives of Salvadorans with endless sloganeering. The issue is far too important for us to be diverted by those who wish to promote their own narrow aims through catering to mythology.

Mr. President, I ask unanimous consent to have printed in the RECORD a recent article in the New Republic, the editorial by Georgie Anne Geyer in the Washington Star, and my letter to Secretary of State Haig.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON GOVERNMENTAL AFFAIRS,
Washington, D.C., March 6, 1981.

Hon. ALEXANDER HAIG,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: Having closely followed events throughout Central America for the past few years, I am greatly encouraged that we have recognized the crucial importance of this region. As President Reagan pointed out in his speech to the nation on October 19, 1980, no area of the world should have a higher priority than the place where we live, the Western Hemisphere. For too long, we pursued a policy of apathy and neglect, prompting many Central American and Caribbean countries to turn elsewhere for guidance and assistance. Consequently, I am most pleased to see us resume the initiative in our relations with these countries.

I am particularly gratified by our recognition that stopping Cuban and Soviet penetration is not enough. Many Central American governments are caught in a race between revolution and reform. As you and the President have made clear, it is imperative that we work to provide the economic and political support necessary to solve the pressing problems in this region.

As the recent State Department white paper makes clear, this is particularly true in El Salvador. The need for the reforms introduced by the Duarte government is mani-

fest, and it is not surprising that such reforms are opposed by the extreme left as well as the extreme right. Significant reform reduces the attractiveness of the radical option, and it represents a blow to the aspirations of Cuban and other adventurers. Therefore, reform must continue. It is the best means of fighting radicalism. That significant progress has been made in this regard was strongly indicated by the failure of the January offensive. Few Salvadorans were willing to join the rebels.

But more must be done if the American public as well as the citizens of El Salvador are to understand the issue and support the efforts of the Duarte government. A government that faces the doubts of its citizens is crippled. Likewise, a foreign policy that is not supported by a wide spectrum of opinion is hampered. I am concerned that the sudden rush to El Salvador of U.S. journalists inexperienced in Central American affairs can cause such constraints to develop.

In short, Mr. Secretary, your policy is in trouble unless there is clear evidence that rightist as well as leftist terror is being dealt with.

I support our policy in El Salvador. I believe that President Reagan has recognized and acted upon a major challenge to hemispheric security. I support his call for increased economic assistance to the government of El Salvador. I am pleased that he has publicized the information about Cuban, Vietnamese, and Soviet subversion, dramatically illustrating that an unstable situation has been worsened by our adversaries.

It is imperative that additional steps be taken soon. Specifically, I would ask that you convey to the Duarte government the urgency of demonstrating full cooperation in the investigation of the murders of Maura Clarke, Jean Donovan, Ita Ford, and Dorothy Kazel. You already know how important this would be to many in this country. I would also ask that you and other spokesmen for the government continually emphasize to all Americans that our support for the government of El Salvador means that we are fully committed to the process of reform rather than the attitudes expressed by Major D'Aubisson and others. I thought Frederick Chapin did it well on March 5.

And finally it would be reassuring to many to know that the decision to send United States military personnel carries with it a commitment not to panic, not to overreact, not to alter the policy course of ensuring a moderate, representative, and stable government in the event of an attack on this U.S. presence.

The recent election demonstrated clearly that we have a rare opportunity to restore this country's strength and return a measure of assertiveness, control, and reliability to our foreign policy. It would be an immeasurable tragedy if this opportunity were lost because the American public became polarized over the issue of El Salvador. Continued reassurance that we do not intend to convert the situation in El Salvador into a military operation—whether through American arms or American troops—can go a long way toward preserving the current consensus, particularly if such reassurance is coupled with tangible evidence of progress by the Duarte government.

Very truly yours,

DAVE DURENBERGER,
U.S. Senate.

AMERICAN CATHOLICS ARE BEING USED ON EL SALVADOR

(By George Anne Geyer)

Salvadoran Archbishop Arturo Rivera y Damas, whose own reformist credentials are impeccable, said last week: "The left has lost support because the people saw they were more interested in obtaining power than in fulfilling . . . hope for the people."

The president of the temporary government, Napoleon Duarte, is the most prominent and respected Catholic in the country and founder of the Christian Democrat Party. He is fighting to hold things together until elections in 1982.

Figures just out on the first year of his government's massive reform show not only that it is working but that production has even remained stable in this turbulent year.

And yet—and yet—this last week has seen demonstrations throughout the United States unprecedented since the Vietnam War. They were waged largely by Roman Catholics, and they were all against Rivera, Duarte and the land reforms.

Perhaps most ironically, they were mourning the first anniversary of the assassination of Archbishop Oscar Romero, who was murdered in his chapel, probably by the far right. They were doing this in his name.

But how many of the mourners and the manipulative activists actually knew Romero, a man I revered, or know the endless, dangerous and unique complexities of Salvadoran politics and society?

FAR LEFT TAKES OVER

When I interviewed Romero in August 1979, for instance, he was bitterly critical of the Marxists. "When I returned from Rome in April, I found their bombs in the cathedral," he said. "Our popular groups had been taken over by the far left. They want the church to support everything, not only justice but all their strategies."

He was equally critical of—and determined to make a change in—the "theology of liberation," which reached its quintessence in El-Salvador and which, in effect, makes Christianity and Marxism almost interchangeable.

"If 'liberation' is only temporal, that is not complete," the archbishop commented. "I've always said that such a 'liberation' is not Christian. It must be total—social, yes, but eternal and transcendent."

It is true that Romero hated the far right, which is as much the author of the bloody carnage in El Salvador as the left. Only a month before his death, he wrote a now famous letter to the American bishops begging them to fight against American military aid to the right. But what people are not remembering is that he was a balanced man of the humane center and was against both extremes.

His relationship with the American church is one reason for the little less than extraordinary reaction by American Catholics last week. The terrible murders of the four American Catholic women in El Salvador, probably also by the right, is another. As one church leader described the effect of the murders here, "The death of the four became the symbol of thousands and thousands of dead there that you never heard about."

At the same time, El Salvador is the first test of "reverse missions," the church's policy, developed during the last five to six years, of feeding back to home countries information about the peoples and countries where it has missions.

CONTROL THE MILITARY

Now, there is no question that the savage military in Salvador has to be changed or destroyed—that there must be elections, that this slaughter of the innocents must end. But is the activist Catholic position a wise one? The answer to that may lie in these questions:

Why are virtually none of the activist American Catholics supporting the archbishop there? President Duarte? The Christian Democrats? By ignoring and disparaging the Catholic leadership in El Salvador, are the Americans really supporting what the people there want?

Why are the Catholic missionaries and other American church leaders not supporting land reform? Why indeed do many of them belong to the American protest group, the Committee in Solidarity With the People of El Salvador, that has as its No. 1 priority the dismantling of the land reform? Could it not be that the church people are accepting the word and position of the far left, which wants to destroy all other organizations so that it can preside?

MARXIST CLERGY

Are they willing to recognize the fact, as the Vatican certainly has, that there are many clergy there, in particular many European Jesuits, who frankly describe themselves as "Christian-Marxists" of various incarnations? Do they, in effect, know what confused messages they are responding so tumultuously to?

Many Catholic activists say they want political participation for the people of El Salvador as well as economic participation, yet they are less than entirely moral when they refuse to take the hard responsibility for the structure of that participation. Many of them, to put it bluntly, are being used.

[From the New Republic, Mar. 21, 1981]

SALVAGING EL SALVADOR

The first thing that needs to be said about El Salvador is that it is not Vietnam. It needs to be said because from the op-ed pages to Capitol Hill the specter of Vietnam hovers over the El Salvador debate. El Salvador is not the first "new Vietnam" sighting. Since the fall of Saigon in 1974 there have been many. Angola, Ethiopia, and Afghanistan were thought destined to be Soviet Vietnams. Cambodia was to turn into Vietnam's Vietnam. And now there is El Salvador.

In fact, there has been only one Vietnam, and El Salvador is different in three crucial respects. First, instead of a succession of swaggering tin-horn generals, we're backing a civilian Christian Democratic president, José Napoleon Duarte, who won the presidency nine years ago in the only fair election El Salvador has had in 50 years. (He subsequently was denied the office, tortured, and exiled by the military.) Second, instead of a popular enemy living in jungles and villages where "the people are like water and the army is like fish," the Salvadoran guerrillas last year called three general strikes which all failed. And this year, to quote former US ambassador to El Salvador Robert White, they gave a war and no one came. Third, instead of half a million US conscripts, we're sending 54 non-combatant advisers, volunteers from a volunteer army. Importing the memory of Vietnam into El Salvador is an exercise in emotion, not analysis.

The second thing that needs to be said is that El Salvador is not Poland. Ronald Steel put that proposition in these pages last week: "The question raised in El Salvador today is, in essence, not very different than that raised in Poland. Can a relatively weak country within the sphere of influence of a great power be allowed to go through its own social revolution?" The assumption here is that sincerity requires a single attitude toward all social revolutions. It is a false assumption. Sincerity—and wisdom—require that revolutions, like all political events, be judged according to the value of their means and ends. The Polish labor revolution is a non-violent movement seeking to create (again) socialism with a human face. In El Salvador, the armed opposition has shown little evidence of a human face. It is controlled by Leninists (Marxists is a term more aptly applied to bookish types) using terror to establish a radical, anti-Western communist regime. We have no moral qualms about supporting Poland's revolutionaries and opposing El Salvador's.

The Reagan administration has based US opposition to the guerrillas on the grounds that they are merely surrogates for the Soviet Union and Cuba. The State Deparment's European blitz to peddle copies of its "Com-

munist Interference in El Salvador" has been justly ridiculed as a replay of a discredited Vietnam argument and as an exercise in hypocrisy, given American willingness to intervene on the other side. The left's arms do indeed come from the Soviet bloc and its leaders do indeed meet in Havana. But that is not sufficient motive for opposing them. The reason to oppose them is because of what they intend to do—which is to turn El Salvador into another Cuba. That is not in the interest of the United States. If we believe anything about democracy and pluralism, we must believe it is not in the interest of El Salvador. And given the miserable failure of the left to gain support for its strikes and its "final offensive," there is good evidence that the Salvadoran people don't believe it is in their interest either.

The real dilemma for Americans in El Salvador lies in facing the fact that the right is just as brutal and hostile to democratic values and human rights as the left. Our values, and our interests, demand support for the center. The problem is that the civil war has bisected the political spectrum and the line runs right through the center.

When Duarte won the presidency in 1972 his vice presidential running mate was a Social Democrat, Guillermo Ungo. Ungo joined the civilian-military junta that overthrew the right-wing dictatorship in October 1979. He subsequently quit and joined the guerrillas. He has been instrumental in getting support for the left from European Social Democrats and from Mexico. They see the tide of revolution in Central America as irresistible. Their strategy is to acquiesce to the inevitable and try to strengthen the moderating forces in the leftist coalition to keep the post-revolutionary government from becoming too radical. The flaw in this approach is that Ungo leads only a small splinter in the opposition coalition, is excluded from the central military directorate that controls it, and is allied with at least three well-armed guerrilla factions who believe strongly in the relation between power and guns. Ungo has no guns, only friends. If Ungo's side wins, it is doubtful that even Willy Brandt will be able to save him from his friends.

That leaves Duarte. Since the 1979 coup, American policy under Carter and Reagan has been to support the civilian-military junta as the best hope for the center. Operating under conditions of virtual civil war, it has achieved genuine change. Before the land reform about half of all agricultural land was owned by a tiny oligarchy. With two decrees in 1980 the government transferred more than half of that property to peasant cooperatives and individual sharecropper families. (Compare this achievement to the fact that in Chile all the land reform under presidents Frei and Allende redistributed approximately the same percentage of the land.) More than half the peasantry is newly enfranchised. And the junta has backed up land reform by nationalizing the banks and extending credit to the new owner-farmers.

The problem with Duarte is that he does not have full control over the forces nominally under command. El Salvador has a system of semi-autonomous militias. The national guard, the treasury and customs police, and the national police all have decentralized commands and often act on behalf of powerful local landlords. The State Department estimates that about 20 percent of the regular security forces are sympathetic to the extreme right. There is no evidence that Duarte is. His problem is weakness vis-a-vis his allies. The only solution is to strengthen him. And the way to do it is with aid.

The economic aid that the administration is sending is desperately needed, especially in the face of leftist attempts to destroy the harvest and rightist attempts to disrupt the newly formed cooperatives. In any case, any society undergoing such extensive land reform can expect declines in production (although surprisingly these have been mild thus far) as old agricultural patterns change and as some economies of scale are lost.

Military assistance is more problematic. The principal purpose is to counter the hundreds of tons of equipment that the left has recently received, to replenish the stores spent by the junta in stopping the January offensive, and to ensure that the left does not achieve a military victory. It is true that some arms may fall into the wrong hands and strengthen the extreme right. But it is also true that the US, by making it clear to the army that it can only acquire what it needs through Duarte, strengthens his hand vis-a-vis his military. As a civilian and Christian Democrat with few personal allegiances in the armed forces, Duarte needs this lever to extend some control over the military and to marshal support for his reform program.

The modest aid proposed by the administration seems reasonable. But it must be accompanied by clearly spelled out conditions. First, continuation of the land reform program, in particular speeding up the tedious task of assigning and distributing titles for the land already transferred. (According to the AFL–CIO, Duarte is proceeding in good faith to acomplish this task.) Second, early elections and an attempt to wean some of the left-of-center democratic elements into a centrist coalition. Third, as much pressure as Duarte and the regular military can exert to restrain the right-wing death squads. Fourth, and most important, a clear understanding by the military that a coup means they are on their own and no longer will receive American support.

Our quarrel with the current Reagan policy is not with its actions but with its talk, which makes that last condition—that we will not tolerate to declare that preventing a leftish victory in El Salvador is a test case of born-again American will and prestige. The current situation in El Salvador is too fluid, the actors too unpredictable for us now to make a solemn commitment to prevent a leftist victory. Our policy must be to do whatever we can to build and reunite the center. But it is possible that the center will collapse, leaving only a choice between the extreme right and the extreme left. As Duarte himself said this week, that would result in an inevitable leftist victory, unless the United States sent in ground troops in support of the right. In that case, the US would find itself in a land war not merely against a small guerrilla army, but against an aroused population. Now that would be another Vietnam. It would tear this country apart again and undo a decade of psychological rebuilding of our unity and national purpose. It would likely prove to be military, and certainly moral, disaster. If the center collapses we might have to withdraw our aid and hope that the Mexicans and Social Democrats have some luck in moderating the victorious left into something closer to a Nicaragua than a Cuba. The point is that we must retain the option of changing our policy down the road, if necessary, not only to avoid disaster, but to give us today some leverage with any rightists contemplating a coup.

Drawing lines in the sand is a high-stakes move meant for Soviet consumption. The balance of forces in El Salvador is too precarious for our policy there to be distorted by such gestures. El Salvador is very small and very complex. Any US policy there must be grounded in Salvadorean realities. We have little chance of succeeding in El Salvador if we try to shape its future with our eyes fixed on Moscow, on Warsaw, or on Vietnam.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. The Senator's time has expired. However, under the previous order, we are now entering a period for routine morning business, and the Senator from Arkansas is recognized.

NATIONAL VOLUNTEER WEEK

Mr. DURENBERGER. Mr. President, volunteers are part of a tradition older than our Nation. In fact, one of the qualities of our citizens that has set the United States apart from other societies has been the willingness of individuals to contribute their time, their talents, and their resources to help others. No other country can match ours for the involvement of private citizens in delivering services and playing a role in public policy.

April 26–May 2 has been proclaimed "National Volunteer Week." As a lifelong advocate of voluntarism—and, as a lifelong volunteer—I want to urge my colleagues to join me in this national celebration of the many contributions volunteers make every day.

The tradition of contributing time and talent has been especially strong in my State of Minnesota. One out of every two Minnesotans is involved in a voluntary activity. The dollar worth of these volunteers is hard to calculate. It is not unusual, for example, for a Meals-on-Wheels volunteer in Minnesota to drive 300 miles a month delivering meals. Services like that would be impossible without volunteers. Our society would certainly be much poorer were it not for the generosity of millions of volunteers.

Those contributions that so many in our country have come to rely on, though, are being threatened. Inflation, cuts in Government spending, and changing demographics are making it more and more difficult for voluntary organizations to meet their present goals. At the same time, those same factors are making it more imperative that voluntary groups not only achieve their current goals, but expand their services.

Voluntary groups provide a unique service delivery alternative to Government. They are more sensitive to individual and local needs and they are far more cost-efficient than Government. Many studies have demonstrated that a $1 contribution to a voluntary action organization provides the equivalent of $3 or $4 in services to people.

The redirection of the national Government that we are now undertaking depends, in large measure, on a parallel effort to encourage greater voluntary action. Voluntary groups will not and should not replace the national Government; they can and should, however, become an alternative to Government-provided services.

The National Government must encourage the continued development of voluntarism and volunteerism through the measures that I and many others have urged. Among other things, we must change the Tax Code to encourage more charitable contributions and to recognize

the true value of a volunteer's time and noncash contributions.

Just as Government is being called on to change, so too must the voluntary organizations themselves. They must encourage consumer choice in the selection of services, then respond to those decisions. They must challenge their volunteers to meet the changing needs of people. More than anything, they must be willing to experiment with diverse services and delivery systems.

In summary, we need a national dialog on the voluntary sector, its relationship with Government and the for-profit sector and its future. I cannot think of a better way to celebrate the myriad contributions of volunteers than to begin the dialog that will assure an even stronger and more productive future for our country's volunteer organizations.

Mr. DURENBERGER. Mr. President, I thank the majority and minority leaders.

Mr. ROBERT C. BYRD. Mr. President, I yield to Mr. PRYOR.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, I thank the minority leader for yielding to me.

Mr. President, how much time do I have?

The PRESIDING OFFICER. Two minutes and 25 seconds.

CONTROLS OVER DOD'S MANAGEMENT SUPPORT SERVICE CONTRACTS NEED STRENGTHENING

Mr. PRYOR. Mr. President, I am pleased to present to the Senate today a report prepared by the General Accounting Office at my request which examined the Department of Defense use of consulting and related services.

Mr. President, it is my opinion that this report indicates that in the Department of Defense the methods used to award these consulting contracts are sloppy, shabby, and, in many cases, incestuous. The Department of Defense will spend in excess of $70 billion for contracts, or over 60 percent of total Federal procurement dollars this year. These figures illustrate the importance and necessity of thorough consideration of how and why these dollars are being spent.

The General Accounting Office reviewed 256 contracts, all selected at random, for management support services valued at about $175 million. They found that despite continuing attention being focused on the use of consulting and related types of services that "serious and pervasive" problems continue. In fact, GAO found that contractors were not only playing a significant role in determining defense contracting needs—a function I assumed would be performed by Department personnel—but were also performing defense management functions. This and other findings made by the GAO raise serious questions in my mind as to whether the Department of Defense is properly utilizing its contractor work force and also, whether such use is in the best interests of our Nation. But most critically, who is actually setting defense policy for our country?

Among the concerns and issues raised by the GAO in this report are:

The impact of extensive contractor use on DOD—GAO found that reliance of DOD on contractor support has a snowballing effect. As contractors acquire knowledge of DOD's operations, they literally become assured of subsequent, continuous sole source contracts. The result is that contractors are exercising substantial influence over the scope and direction of work performed. In fact, several contract arrangements reviewed by GAO appear to have preempted DOD's prerogative in directing national defense and in management and direction of the armed services.

Illustrative of this result was the sole source award of a contract for the Office of Secretary of Defense to review Army support unit requirements for the first 30 days of a NATO war. Reliance on contractors for critical defense requirements raises serious questions about the role of contractors in vital defense activities.

The second area of the GAO study was the impact of unsolicited proposals. Approximately 40 percent of the contracts reviewed were unsolicited. While the fact that a contract award was based on an unsolicited proposal does not make the award improper, the fact that so many contracts were the result of unsolicited proposals raises questions whether they are being used to: First, subvert the competitive process; second, encourage work that may not be important relative to DOD's mission needs and priorities; third, abrogate DOD's responsibility over the scope and direction of work related to defense management; or, fourth, are not truly unique or innovative. These questions are especially disturbing in the light of the fact that DOD contract awards resulting from unsolicited proposals are over twice the proportion found in civilian agencies in the earlier GAO report.

Another area that GAO looked into, Mr. President, was the revolving door problem. The involvement of former DOD military and civilian employees in contracts with DOD is extensive—51 percent of the contracts reviewed involved former employees in capacities of top management and technical levels. This aspect of the GAO review raises a number of questions: First, are former top level DOD officials improperly using their influence in securing contracts with DOD for their own benefit as opposed to the Government's benefit? Second, is DOD adequately planning and training personnel to insure their capability to perform essential work? and third, how objective is the work of former employees in areas where they were formerly involved while at DOD?

The other serious impact shown by the study, Mr. President, was the continuous nature of many contracts. Almost 57 percent of the contracts reviewed were renewed repeatedly. One contract, again, no competition, awarded sole source by the Air Force, has been repeatedly renewed for the last 28 years and to date no study has been performed on the related costs involved in contracting out the work versus performing the contract work in-house. Where the work is of a recurring nature the absence of cost comparisons and competition illustrates the poor management that presently results in the waste of millions of dollars every year.

As to the questionable need or value of services contracted for—of the 256 contracts reviewed, GAO considered 44 to be of questionable value in terms of DOD's priorities and mission. Illustrative is a contract awarded sole-source by the Office of the Secretary of Defense for "studies of nonpecuniary factors in the Federal approach to pay comparability and the feasibility of monetizing these nonpecuniary factors for consideration in the pay comparability process."

When a DOD official was asked by GAO staff if this was an impossible task he replied, "That's what makes it interesting." He went on to state that the intent of the study was to obtain support to "derail" proposed legislation on pay comparability. In my opinion it is well outside DOD mission and responsibility to spend its appropriated funds for such a purpose.

The excessive use of sole-source awards—sole-source awards were found to be the rule rather than the exception; 82 percent of the contracts reviewed were awarded sole-source without any competition. The primary factors cited by the GAO for this situation were—continuous contractual relationships, large number of unsolicited proposals, and the involvement of former employees in contract performance.

The fact that 82 percent of the contract awards were sole-source is a sad commentary on DOD's commitment for cost minimization. I consider it a disservice to all taxpayers. Competition has been shown to save an average of 20 percent of a contract's cost, and the 20 percent at DOD represents a substantial amount of taxpayer money.

In sum, Mr. President, the GAO report describes a very disturbing situation at the Department of Defense. I am pleased that the distinguished chairman of the Senate Subcommittee on Civil Service, Post Office, and General Services, Mr. STEVENS and the distinguished chairwoman of the House Subcommittee on Human Resources, Congresswoman GERALDINE FERRARO of New York have set a hearing on this report on April 29.

Mr. President, I ask unanimous consent that the summary from the GAO report be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY

The Department of Defense (DOD) spent about $2.6 billion in fiscal year 1979 on all types of contract management support services. These services range from relatively simple studies to aid in management decisions to contracts involving com-

plex engineering support services for major weapon systems.

Proper use of these services can be a normal, legitimate, and economical way for DOD to satisfy its mission requirements. GAO reviewed 256 contracts for management support services valued at about $175.4 million. These contracts were randomly selected, and GAO believes its findings are representative of the total universe of management support contracts.

In spite of the continuing attention being focused on the use of contract consultants, serious and pervasive problems continue to exist, and will continue until DOD takes the initiative to address them. Contractors are playing a significant role in identifying needs and thus, in effect, are articulating and performing defense management functions. The result is that DOD is weakening its ability to perform in-house work essential to fulfillment of its defense mission. Much of the work is currently being performed by former DOD employees.

This increasing reliance on contractors has raised the following additional issues:

Extensive contract awards resulting from unsolicited proposals. (102 contracts reviewed valued at $25 million. See p. 11.)

Significant involvement of former DOD officials and employees in contracts. (131 contracts reviewed valued at approximately $52.6 million. See p. 13.)

Continuous renewal of contracts. (146 contracts reviewed valued at $149.2 million. See p. 16.)

Instances of questionable need for and use made of the contract services. (44 contracts reviewed valued at approximately $6.8 million. See p. 19.)

Overuse of sole-source awards. (211 contracts reviewed valued at approximately $156.7 million. See p. 21.)

Extensive contract modification. (176 contracts reviewed with modifications valued at approximately $73.8 million. (See p. 29.)

Previously, the focus of attention has been on problems with consulting services as defined by the Office of Management and Budget (OMB). GAO found the above problems in all types of management support services reviewed; therefore, GAO believes that the management controls outlined in OMB Circular A–120 should be applied to professional and management support services and special studies and analyses. Also, there is a need to provide visibility over these services in the budgetary displays.

An assessment of DOD's capability to perform all essential management functions in-house under existing personnel ceiling constraints is needed to achieve effective actions for the problems brought out in this report. GAO is currently reviewing the issue of personnel ceilings Government-wide and will provide further insight on this issue at a later time.

RECOMMENDATIONS

GAO has issued over 30 reports during the past 20 years identifying deficiencies related to the use of consulting services. One of the major issues identified was the failure to obtain adequate competition in awarding procurement contracts for these services. Additionally, the Congress has repeatedly voiced concern over the lack of competition in awarding these contracts. Normally, GAO is opposed to legislative remedies for problems that should be resolved administratively. However, GAO believes this problem is serious enough in DOD to warrant legislative action.

Accordingly, GAO recommends the Congress, as an interim measure, consider legislation which would minimize the funding of sole-source contracts for management support services and the funding of such contracts resulting from unsolicited proposals. One way to accomplish this might be to establish quotas for a period of 2 to 4 years. For example, the Congress might provide that not more than 50 percent of the total dollars spent by an agency for management support service contracts may be used to fund sole-source contracts. This figure could be adjusted in future years until a more acceptable balance is achieved.

The Director of OMB should:

Extend the management controls outlined in OMB Circular A–120 to other categories of management support services.

Assure that agencies identify all requested funds to be used for management support services and provide this information to the Congress. Such identification would provide the basis for the Congress to review agencies' use of such services as well as provide a base from which to control funds available for such services. GAO believes that OMB could satisfy this recommendation by extending the requirements of OMB Bulletin No. 80–13 for the types of management support services identified in this report.

The Secretary of Defense should take the following actions:

Required DOD activities to establish an independent review board to assure the highest level review of proposed contract awards and modifications over $100,000 for management support services. This independent assessment is particularly critical for those contracts to be performed by former DOD employees.

Identify functions being performed by contractors which are governmental in nature, and determine personnel needs and develop ways to meet those needs.

Identify management support services which are not governmental in nature and which are required on a continuing basis. For each service, an assessment should be made of current in-house capability, the possibility of acquiring such capability, and the relative costs involved in performing the work in-house versus contractor support.

AGENCY COMMENTS

Although this report was furnished to DOD for comment, it did not provide written comments before the issuance of this report. GAO received DOD's oral comments, but was told that DOD was amending its response and the oral comments could not be relied on.

OMB agreed in comments provided to GAO that the report makes a strong case for more stringent controls to eliminate weaknesses in and curtail abuses of DOD's procurement of management support services. However, OMB does not totally agree with GAO's recommendations. OMB believes that legislation is not necessary to solve the problems with contracting for management support services. It is currently considering issuing an OMB bulletin and a revision to an existing circular which it believes will correct the problems illustrated in this report.

GAO believes OMB's planned actions, if carried out, are commendable, but several of its suggested actions will not result in meaningful improvements in contracting for management support services.

OMB intends to eliminate the majority of improper sole-source awards by removing the incentives to use unsolicited proposals for management support service contracts. In GAO's opinion, this proposed action will result in fewer unsolicited proposals but will not have a major impact on the number of sole-source awards. GAO continues to believe legislation is necessary to correct this longstanding problem.

OMB does not believe that a specific entry (budget line item) for consulting services within the object classification schedules for each agency account in the budget is necessary, appropriate, or practicable. GAO's recommendation for budgetary identification does not require a specific entry for management support services.

GAO's report clearly demonstrates that the problems identified are not restricted to consulting service contracts alone but instead, are prevalent throughout the entire universe of management support service contracts. With the implementation of OMB Bulletin No. 80–13, budgetary identification of consulting services is already required. GAO believes that OMB could satisfy this recommendation by extending the existing requirement to include the types of management support services identified in this report and providing the information to the Congress.

Finally, OMB believes that review and approval of management support service contracts by a level above the sponsoring activity will provide sufficient control. GAO continues to believe that review and approval by an independent board is a more desirable approach. Such a board or boards would have no direct benefit from the outcome of their decision and would bring management support services under a proper degree of independent and objective scrutiny.

Mr. PRYOR. Mr. President, the magnitude of procurement spending entered into by the Federal Government requires that oversight be aggressive. Further, it requires detailed examination and thorough consideration in the budgetary and appropriations process. To address these needs I have introduced S. 719, the Consultant Reform and Disclosure Act of 1981. In this effort I must pay tribute to those of my colleagues who have joined me in this call to action by cosponsoring this legislation. At this point, my cosponsors include Senators PROXMIRE, DECONCINI, WILLIAMS, BAUCUS, SIMPSON, BURDICK, EAGLETON, RIEGLE, LEVIN, PERCY, SASSER, COCHRAN, BUMPERS, MOYNIHAN, HEFLIN, and METZENBAUM.

Very simply stated, this legislation would address the areas of abuse and waste within the procurement process by a sunshine/disclosure approach.

I hope others of my colleagues will join as cosponsors of this bill and at this time I ask unanimous consent that a summary of S. 719 be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

CONSULTANT REFORM AND DISCLOSURE ACT OF 1981

MAJOR PROVISIONS

Clarifies the authority of agencies to appoint experts and consultants pursuant to title 5, section 3109 U.S.C. Requires that OPM assume a more active oversight and reporting role in relation to the use of appointments by agencies.

Defines consulting services, management and professional services, and special studies and analyses as the universe to which most provisions apply.

Requires the publication of all consulting services, management and professional service, and special study and analysis contracts in excess of $10,000 in the Commerce Business Daily prior to award. Also requires notification and justification of all subsequent modifications which increase the contract value by $25,000 to be sent to the respective Inspector General or comparable official.

Requires basic attribution information to be included in reports prepared pursuant to a consulting service, management and pro-

fessional service, or special study contract and in agency-prepared reports which include substantial portions of such contractor-prepared reports.

Requires the evaluation of consulting, management and professional service, and special study and analysis contracts which exceed a value of $50,000. Special attention is focused on performance according to the terms of the contract and deviations from cost and time as specified in the original contract.

Organizational conflict of interest determinations are required which are to be applied on a test basis—for three years—at the Departments of Energy and Transportation, and the Environmental Protection Agency. Actual conflicts and appearances of conflict are addressed in regard to consulting, management and professional service, and special study and analysis contracts only. Where an adverse determination is made the contractor will have an appeal procedure.

Line item identification in the budget submitted by the President to Congress is required for consulting service, management and professional service, and special study and analysis procurement requests. Agencies will also be required to explain these requests in the budget justification process.

The Federal Procurement Data System is codified.

Agency contract listings for all contracts entered into within the preceding 12 months, and contracts which are active, are required to be maintained and be made available to the public for inspection. Such listing will be updated quarterly.

Written justifications for consulting service, management and professional service, and special study and analysis contracts are required to be maintained by the agencies and are to be made available to the public.

All contracts, unless classified for national security purposes, are to be considered public documents and thus available for inspection by the public unless disclosure is prohibited by law.

ORDER TO PROCEED IMMEDIATELY TO CONSIDERATION OF BUDGET WAIVER RESOLUTION

Mr. BAKER. Mr. President, I announced earlier that, at the appropriate time following the disposition of the period for the transaction of routine morning business, it was my intention to proceed to consideration of Calendar Order No. 44, a bill to authorize the supplemental appropriation for 1981 for procurement of military equipment.

Mr. President, in a moment, I shall propound a unanimous-consent request in respect of the supplemental, which has been cleared on both sides. In preparation for that, I ask unanimous consent that the Senate proceed immediately to the consideration of Calendar Order No. 46, the budget waiver, to accompany that measure.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, there is no objection on the side to proceeding immediately to consideration of the budget waiver.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESSIONAL BUDGET ACT WAIVER

The Senate proceeded to consider the resolution (S. Res. 105) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 694, which was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 694, a bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes.

Such a waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 694, as reported by the Committee on Armed Services.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR CONSIDERATION OF S. 694 AND FOR TIME LIMITATION AGREEMENT THEREON

Mr. ROBERT C. BYRD. Mr. President, in response to an earlier statement, I say to the distinguished majority leader, there is no objection to securing the consent of the Senate at this time to proceed to the consideration of the supplemental appropriations bill for fiscal year 1981 if he wishes to propose the request now.

Mr. BAKER. I thank the distinguished minority leader.

Mr. President, in view of that statement by the distinguished minority leader, I ask unanimous consent that, after the closing of the routine morning business, the Senate turn immediately to the consideration of Calendar Order No. 44 and that there be a time limitation as follows of consideration of that measure: Four hours on the bill, equally divided between the Senator from Texas (Mr. TOWER) and the Senator from Mississippi (Mr. STENNIS); that there be a time limitation of 2 hours to be equally divided on an amendment to be offered by the Senator from Arkansas (Mr. BUMPERS) dealing with the proposed deauthorization of the battleship *New Jersey;* that there be a time limitation of 1 hour to be equally divided on amendments in the first degree, 30 minutes to be equally divided on amendments in the second degree, 20 minutes to be equally divided on all motions, appeals, or points of order if the same are submitted; and that the agreement be in the usual form.

Mr. ROBERT C. BYRD. Mr. President, I am sure the distinguished majority leader meant to say all debatable motions.

Mr. BAKER. Mr. President, I thank the distinguished minority leader. All debatable motions.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the distinguished minority leader and I thank the Senator from Washington for forbearing his statement so I could make the request of the Senate today.

(Mr. GORTON assumed the chair.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEPARTMENT OF DEFENSE SUPPLEMENTAL APPROPRIATIONS AUTHORIZATION ACT, 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of Calendar Order No. 44, which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Armed Services with an amendment, as follows, to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Department of Defense Supplemental Authorization Act, 1981".

TITLE I—PROCUREMENT OF AUTHORIZATION AND APPROPRIATIONS

AUTHORIZATION OF APPROPRIATIONS

SEC. 101. (a) In addition to the funds authorized to be appropriated under title I of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, as authorized by law, in amounts as follows:

AIRCRAFT

For aircraft: for the Army, $128,000,000; for the Navy and Marine Corps, $47,600,000; for the Air Force, $716,625,000.

MISSILES

For missiles: for the Army, $27,000,000; for the Air Force, $228,269,000; for the Marine Corps, $10,700,000.

NAVAL VESSELS

For naval vessels; for the Navy $172,100,000.

TRACKED COMBAT VEHICLES

For tracked combat vehicles: for the Army, $796,000,000; for the Marine Corps, $11,300,000.

(b) Of the total amount authorized to be appropriated in subsection (a) for the XM–1 Main Battle Tank, the sum of $336,700,000 may not be obligated or expended unless and until the Secretary of Defense certifies in writing to the Committees on Armed Serv-

ices of the Senate and the House of Representatives that (1) the durability performance results of the RAM-D testing program for such tank do not present an unacceptable level of risk in terms of satisfying the Army's operational mission requirements, and (2) such results support the procurement of such tanks in a number greater than the 360 for which funds were appropriated before the date of the enactment of this Act.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. In addition to the funds authorized to be appropriated under title II of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces for research, development, test, and evaluation, as authorized by law, in amounts as follows:

For the Army, $79,500,000; for the Navy (including the Marine Corps), $139,900,000; for the Air Force, $339,200,000; for the Defense Agencies, $41,000,000.

TITLE III—ACTIVE FORCES

INCREASE IN AUTHORIZATION OF END STRENGTHS

SEC. 301. Section 301 of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1082), is amended to increase the active duty personnel end strengths of the Navy, Marine Corps, and Air Force by striking out "537,456", "188,100", and "564,500" and inserting in lieu thereof "540,456", "190,600", and "569,000", respectively.

TITLE IV—RESERVE FORCES

INCREASE IN AUTHORIZATION OF AVERAGE STRENGTHS

SEC. 401. Section 401(b) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1084), is amended to increase the number of Reserve component members authorized to serve on full-time active duty with the Marine Corps Reserve for the purpose of organizing, administering, recruiting, instructing, or training by striking out "67" and inserting in place thereof "133".

TITLE V—CIVILIAN PERSONNEL

INCREASE IN AUTHORIZATION OF END STRENGTH

SEC. 501. Section 501(a) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1085), is amended by striking out "986,000" and inserting in place thereof "1,010,600".

TITLE VI—MILITARY TRAINING STUDENT LOADS

INCREASE IN AUTHORIZATION FOR AIR NATIONAL GUARD OF THE UNITED STATES

SEC. 601. Section 601(a)(9) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1087), is amended by striking out "1,930" and inserting in lieu thereof "2,509".

TITLE VII—MILITARY CONSTRUCTION

ARMY

SEC. 701. (a) In addition to the amounts authorized for acquisition and construction by title I of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), the following amount is authorized for the location specified:

UNITED STATES ARMY, EUROPE

Various Locations, $1,800,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $1,800,000.

NAVY

SEC. 702. (a) In addition to the amounts authorized for acquisition and construction by title II of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1752), the following amount is authorized for the location specified:

UNITED STATES MARINE CORPS

Marine Corps Air Station, El Toro, California, $2,000,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $2,000,000.

AIR FORCE

SEC. 703. (a) In addition to the amounts authorized for acquisition and construction by title III of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1756), the following amounts are authorized for the locations specified:

AIR TRAINING COMMAND

Laughlin Air Force Base, Texas, $4,700,000.

STRATEGIC AIR COMMAND

K. I. Sawyer Air Force Base, Michigan, $540,000.

SPECIAL PROJECT

Various Locations, Special Project, $50,000,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $55,240,000.

DEFENSE AGENCIES

SEC. 704. (a) In addition to the amount specified for minor construction projects by section 403 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1761), the Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $900,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purposes of subsection (a) the sum of $900,000.

MILITARY FAMILY HOUSING

SEC. 705. Section 510(a) of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1767), is amended—

(1) by striking out "$276,100,000" in clause (1) and inserting in lieu thereof "$260,078,000"; and

(2) by striikng out "$1,880,760,000" in clause (2) and inserting in lieu thereof "$1,896,782,000".

AIR NATIONAL GUARD OF THE UNITED STATES

SEC. 706. In addition to the amount specified in section 701(3)(A) of the Military Construction Authorization Act, 1981 (Public Law 96-418 Stat. 1774), the Secretary of Defense may establish or develop facilities for the Air National Guard of the United States in an amount not to exceed $6,500,000.

LIMITATIONS APPLICABLE TO USE OF FUNDS

SEC. 707. (a) Authorizations contained in this title shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), in the same manner as if such authorizations had been included in that Act.

(b) For the purposes of the limitations set forth in section 603 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1768), the amounts authorized to be appropriated for titles I through V of that Act shall be deemed to be increased, respectively, by the amount authorized to be appropriated by section 601 through 605.

MODIFICATION OF PRIOR YEAR AUTHORIZATION FOR FAMILY HOUSING UNITS AT TINKER AIR FORCE BASE

SEC. 708. (a) Section 501(c) of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 940), is amended by striking out "three hundred thirty-two units" in the item relating to Tinker Air Force Base and inserting in lieu thereof "two hundred units".

(b) The authorization for construction of, or acquisition of sole interest in, family housing units at Tinker Air Force Base, Oklahoma, contained in section 501 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 940), as amended by subsection (a), is hereby modified to authorize construction of such family housing units on base at Tinker Air Force Base.

TITLE VIII—MISCELLANEOUS PROVISIONS

AMENDMENTS RELATING TO CONTINUOUS SUBMARINE DUTY INCENTIVE PAY

SEC. 801. (a) Section 301c of title 37, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out "(1)" after "(a)";

(B) by striking out "subsection (b)" in the first sentence and inserting in lieu thereof "subsection (c)";

(C) by striking out paragraph (2) and inserting in lieu thereof the following:

"(b)(1) Subject to regulations prescribed by the President, a member who is entitled to basic pay is also entitled to continuous submarine duty incentive pay under this subsection instead of submarine duty incentive pay authorized under subsection (a) of this section if such member holds or is in training leading to a submarine duty designator, remains in the submarine service on a career basis, and meets the requirements of paragraph (2) of this subsection."; and

(D) by redesignating paragraphs (3), (4), and (5) as paragraphs (2), (3), and (4), respectively;

(2) in subsection (b), as designated by clause (1)(C)—

(A) by striking out "subsection (b)" in the third sentence of paragraph (3), as redesignated by clause (1)(D), and inserting in lieu thereof "subsection (c)";

(B) by inserting after "title" each time it appears in paragraphs (2) and (3), as redesignated by clause (1)(D), "less, in the case of an officer, periods as an enlisted member prior to initial appointment as an officer"; and

(C) by inserting after the first comma in paragraph (4)(A)(i), as redesignated by clause (1)(D), "while serving as an operator or crew member of an operational submersible, including undersea exploration and research vehicles,";

(3) by redesignating subsections (b), (c), (d), and (e) as subsections (c), (d), (e), and (f), respectively;

(4) by striking out "subsection (b)" in subsection (e), as redesignated by clause (3), and inserting in lieu thereof "subsection (c)"; and

(5) by striking out "subsection (a)" in subsection (f)(1), as redesignated by clause (3), and inserting in lieu thereof "subsection (b)".

(b) The amendments made by this section shall take effect as of January 1, 1981.

(c) Persons who become eligible for continuous submarine duty incentive pay for any period during the fiscal year ending September 30, 1981, by virtue of the amendments made by this section shall be paid exclusively from funds heretofore appropriated for such fiscal year for the payment of pay and allowances of members of the Navy (Department of the Navy Account: Military Personnel, Navy Appropriation Symbol No. 1711453).

ACCRUED LEAVE

SEC. 802. Section 10 of the Military Pay and Allowances Benefits Act of 1980 (Public Law 96-579; 94 Stat. 3359) is amended—

(1) by inserting "(a)" after "SEC. 10. "; and

(2) by adding at the end thereof the following new subsection:

"(b) The amendment made by subsection (a) shall be effective in the case of any member of the Armed Forces assigned to a deployable ship, mobile unit, or other duty designated for the purpose of section 701(f) of title 10, United States Code, after September 30, 1979.".

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I suggest

the absence of a quorum and I ask unanimous consent that the time consumed be equally charged against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

Mr. TOWER. Mr. President, November 4 marked the end to nearly a decade of neglect and indifference about the military capability of the United States vis-a-vis that of the Soviet Union. In the late 1960's and early 1970's, funds which normally would have been used to modernize our Armed Forces were diverted instead to support our activities in the Vietnam war. In the mid and late 1970's, many defense programs lost out to competing demands to fund the ever-increasing number of social programs.

Nonetheless, the Soviet Union, in the last 10 years, has undertaken a massive military buildup to modernize nearly every segment of its strategic and conventional arsenal. This, coupled with the Soviet invasion of Afghanistan, confirmed the worst fears of the American people about the genuine motivations of the Soviet Union. It raised doubts in the minds of most Americans about the sincerity of the Soviet Union's expressed desire to achieve détente with the United States, and it caused many Americans to question the adequacy of our defense spending.

Mr. President, on November 4, we received the answer of the American people loudly and clearly. They are deeply concerned and disturbed about the ability of our Armed Forces to respond effectively to situations which affect our national security interests. They are concerned about whether the United States is still perceived around the world to be the preeminent military power which they know must be the case if the United States is to negotiate with its potential adversaries from a position of strength. They are concerned that, as a result of the neglect and indifference on defense matters which characterized the last decade, the United States may now be viewed incorrectly around the world as a nation which has neither the resolve nor the ability to respond to events which challenge its national interests.

Mr. President, the American people recognize and we in the Senate should recognize that in order to preserve peace and check the expansionist activities of the Soviet Union and her surrogates around the world, the United States must have, and—equally important—must be perceived to have the national will and the military ability to respond quickly and decisively to events which threaten our national security interests and those of our allies.

I reject the notion that we need to prove our military might and national resolve on a battlefield with the blood of our young men. To the contrary, the billions of dollars which we allocate to national defense are designed to avert war by assuring our potential adversaries that a military confrontation with the United States is, for them, a losing proposition.

The primary mission of our Armed Forces is to preserve peace and avoid the needless sacrifice of American lives. It is only when we have failed in this effort that our Armed Forces are called upon to fulfill their secondary mission which is to restore peace. It is only because we value life so much that we are willing to spend billions of dollars on defense to deter those who would otherwise challenge us in a conflict which would inevitably result in the loss of many lives on both sides.

The American people are not naive. They observe in their own daily experience—whether in business dealings or otherwise—that the results of any serious negotiations more often than not favor those who negotiate from a position of strength rather than one of weakness. It is, therefore, not perplexing at all to the vast majority of American people that to deal effectively with the Soviet Union, the United States must not only have but also be perceived to have the military and economic might, coupled with the national resolve, to face up to the Soviet Union eyeball to eyeball.

It is our military and economic strength and our willingness to use it, if necessary, which the Soviet Union understands and which is our best insurance policy for peace. The American people have not forgotten the more notable case studies of Hungary, Czechoslovakia, and more recently Afghanistan, which serve to remind us of the unsavory consequences which befall those who deal with the Soviet Union from a position of weakness.

Mr. President, I share the concern of the American people about the present quality and quantity of our military personnel and the equipment which they must use—particularly in light of the accelerated production schedules and impressive technological advances which the Soviets have made in their military hardware. The United States must always be prepared to meet the enemy on its own terms if ever the situation requires.

To satisfy this requirement after nearly a decade of neglect, the United States will have to resolve in the near term some very serious manpower, readiness, and weapons modernization deficiencies which currently plague our Armed Forces. No matter how much money we spend, it will be years before we have in place the ships, submarines, strategic and tactical aircraft, missile systems, tanks, and numerous other weapons systems which are required to modernize our Military Forces properly. It currently takes—

Approximately 8 years to construct a nuclear carrier;

Approximately 6 years to construct a cruiser;

Approximately 7 years to construct a Trident submarine;

At least 7 to 9 years to develop a new generation of strategic bombers; and

At least 7 more years before we have a modernized strategic missile system.

One can see, therefore, that we cannot afford to delay any longer our efforts to get these weapons systems in place as quickly as possible while simultaneously addressing our serious manpower and readiness problems. The American people have indicated their support for these initiatives not unmindful of the significant expenditures which will have to be made. It is now time to get on with the serious task at hand.

Mr. President, the Reagan administration has indicated to the Soviet Union that the United States will no longer react passively and sheepishly to world events which affect directly or indirectly the interests of the United States or those of its allies. The Reagan administration supports the notion that peace through strength should be our national objective.

Consistent with this objective, President Reagan has requested that we add $3.04 billion to that already authorized and appropriated in fiscal year 1981 to provide funding for some of the more urgently needed manpower, readiness, and weapons modernization initiatives which were seriously underfunded under the Carter administration's fiscal year 1981 request.

The Committee on Armed Services is well aware of the fact that simply throwing money at the Department of Defense will not, in and of itself, result in a significantly improved fighting force. The committee is also aware that, even though the American people have indicated their willingness to pay the price required to have a strong military capability, they will require that their scarce dollars are invested in a way that will insure the greatest return.

This is why the committee has taken great pains to recommend funding for only those programs for which the administration has provided a clear and convincing justification. The committee has found that most of the administration's requests were sufficiently justified to overcome the traditional reluctance of the committee to support supplemental authorizations.

For a variety of reasons, however, the committee found several of the administration's funding requests to lack sufficient justification and recommends that the Senate—

Disapprove $146 million requested for the reactivation of the aircraft carrier *Oriskany;*

Deny $96 million which represents the administration's proposal to procure seven additional F–18 aircraft above the currently funded 53 aircraft;

Approve $15.2 million of the $21.8 million DOD request to provide full long-lead funding to support construction of an LSD–41 in fiscal year 1982; and

Provide that $336.7 million of the total fiscal year 1981 supplemental request for procurement of additional XM–1 main battle tanks may not be expended unless and until the Secretary of Defense certifies in writing to the Committee on Armed Services that he is satisfied with the results of the proposed durability testing to be conducted by the Department of the Army.

The administration requested supplemental funding in the total amount of $3.04 billion. If the Senate approves the committee's recommendations which are reflected in the Department of Defense fiscal year 1981 supplemental authorization bill before the Senate, the administration's request will be reduced from $3.04 billion to $2.8 billion—a reduction of $238 million.

Mr. President, this is the first significant legislative initiative by this new administration designed to improve the quality of our fighting forces. I strongly urge my colleagues to give this terribly important matter their unequivocal support.

Mr. President, at this time I would like to express my thanks to the Senator whom I expect to be recognized immediately following, Senator STENNIS, for many years the distinguished chairman of the Committee on Armed Services, who has been enormously cooperative in expediting the consideration and reporting out of the committee of this bill. He has demonstrated his usual statesmanship on defense matters, and I would like to thank him for his wonderful cooperation.

Mr. STENNIS. Mr. President, I yield myself such time as I may use which, I assure the Senate, that I will not speak at length.

I certainly appreciate the very generous remarks of the Senator from Texas (Mr. TOWER) with reference to our relationship and our continued working together on these matters, and I join with him in the sponsoring of the items of the bill.

Mr. President, as he explained, they supplement and bring forward and hasten the day of consummation of these programs that will end the current fiscal year program or end that program now, the fiscal 1981 program.

There are additional sums for various reasons, as he described. They include some items, a few items, that were not a continuation of active programs, programs that are already in being, that will be developed later. I know of one item, the battleship, which will be stricken, as I understand, which will be called up, so I will be heard from on that.

I am supporting the bills as it is drawn now, Mr. President. I think these funds are necessary, and I subscribe to including the battleship item that I have mentioned.

I subscribe to what the Senator says about the inability to solve these problems in connection with our military preparedness merely by throwing money out, throwing money to the Pentagon, which is the way he expressed it. But we also have funds from time to time that do not go directly to the Pentagon. Money is not the primary problem. The people of America have been willing to spend the necessary money.

Frankly, I said years before, each time when the bill came up, that the weak part of the program was the personnel, and that is still true. I do not say that trying to blame anyone, but it is a matter that is hard to get in its proper perspective, hard to prove adequately, hard to get over to the membership of the body and the American people the need, I think, of a certain source of manpower, quality power. But those things will continue to be worked on. I think our present President, Mr. Reagan, will give it more attention when there is a chance.

I trust that sometime soon there will be the emergence of an additional source of manpower that will insure more of the quality line, particularly for our valued Army.

So I will be here during the entire discussion of this bill, Mr. President, which is my intention as well as other members of the committee, of course. I will at that time feel free to make any remarks that I may desire.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. Mr. President, this time will be charged to Senator TOWER.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I would like to speak briefly in support of the fiscal year 1981 DOD supplemental bill as reported by the Senate Armed Services Committee.

This bill is a very important piece of legislation, and its passage will mark the beginning of that restoration of the margin of safety articulated by President Reagan as the foundation for his new defense programs.

As every Member has heard so often, our defenses indeed are running down, down especially in comparison with the increasing trend of Soviet defense expenditures.

The Soviet Union has continued for 15 years, consecutive years, on a massive military buildup, and that buildup is beginning to have a very noticeable adverse effect on the overall military balance.

Also third country capabilities have sprung up throughout the world. This poses a new challenge to our defense equation. For example, Libya now possesses sophisticated military forces. Conceivably they could be used against the United States or allied interests in some part of the world.

It is indisputable that our defense posture is less secure than it was 3 years ago. 5 years ago. 10 years ago.

We, as a nation, simply must respond, and respond now or the military balance will shift even further against us.

It is up to Congress at this very moment to get the President's new program moving by approving first this bill and, subsequently, its companion appropriation bill.

I shall not take the time of the Senate to summarize the items in the bill. That is done most adequately in the committee report. Instead I shall address those parts of the bill which fall within the jurisdiction of the Subcommittee on Strategic and Theater Nuclear Forces of which I am the chairman.

The only additions above the amended request were $8.3 million in R.D.T. & E., and $18.9 million in procurement for programs which are classified within the Department of the Air Force. I assure my colleagues that while I cannot disclose the factual basis and justification for these programs they were considered very carefully by the Committee on Armed Services.

Last year, during the consideration of the original fiscal year 1981 request, the committee expressed interest in protecting the option to have an early preprototype demonstration of the Army's LoADS ballistic missile defense systems. The Reagan administration request, therefore, for $36.1 million for R.D.T. & E. in the ballistic missile defense systems technology line was for exactly that purpose, and I commend the administration for stepping forward on this issue. The LoADS program is the most near-term of the Army high technology BMD, that is ballistic missile defense, programs.

The supplemental request also adds $67.6 million for the ground-launched cruise missile program. As you will recall, this program is vital to redressing the long-range theater nuclear force balance in Europe, and the NATO modernization program which provides for the deployment of the GLCM and the Pershing II missile. The deployment of these weapons systems in the future is a symbol of alliance unity.

Much of the funding requested in the supplemental is to cover cost growths related to technical problems in the cruise missile launcher as well as software problems, as well as the procurement of additional equipment for meeting training requirements. This funding is necessary to insure that there is no slip in the IOC in Europe, somewhere in the area of 1983 as agreed upon in the historic December 1979 NATO agreement.

I would also note that the supplemental requests $55.5 million to purchase used commercial Boeing 707 aircraft as part of the program to provide six airborne range instrumentation aircraft and one airborne launch control center aircraft along with reengining kits for existing C–135 aircraft. The procurement of these aircraft with many flying hours left on their airframes and the procurement of engines which will be set back to zero hours is a good example of ways in which defense requirements can be met at reduced cost. The committee will continue this process of investigating the purchase of used aircraft with long airframe life left and also leasing options to reduce costs associated with the purchase of new aircraft.

The supplemental also requests $20 million for research related to EMP hardening of B–52 aircraft. In fact, this step was recommended by our committee last year. These funds will permit electromagnetic pulse and associated nuclear effects tests on the B–52's which will carry our air-launched cruise missile force. Hopefully, an extensive modification program will not be necessary, but we will not know until these tests are completed. We must conduct these tests.

In summary, there are no major new strategic initiatives in the fiscal year 1981 supplemental request, but there are important funding requirements which must be met to keep important programs going at the proper pace.

Mr. President, as I conclude this statement I would like to observe comments that have come from senior members of

the Department of Defense with respect to shipbuilding of naval vessels in yards other than those located in the Continental United States of America. The statements while indefinite in context, nevertheless indicate that there may well be some thinking within the Department that foreign shipyards could be employed to build U.S. warships.

Mr. President, I have seen this issue raised many times. I am unalterably opposed to any American warship being built in a foreign shipyard, and I forewarn my colleagues that that matter will be so objectionable to me and a number of my colleagues that I state here and now that I would likely mount a filibuster on the floor of this historic Chamber to prevent any such action.

I think the Department of Defense has a responsibility to help restore America's industrial base—and that includes our shipbuilding capacity, particularly that for naval warships.

In closing, Mr. President, I would like to commend the chairman of the Senate Committee on Armed Services and the ranking member for the innovation of a new subcommittee system designed along the lines of roles and missions. We are now well along in the hearings in preparation for the 1982 bill, and it is my observation that this new committee structure is working not only as intended by its chairman but in a most efficient manner, and one which addresses with, I think, greater scrutiny each and every element of the defense program.

Returning to the supplemental before us today, I assure my colleagues that it has received careful scrutiny of the committee and the membership individually as well as the Senate, and I, therefore, urge adoption of this legislation.

Mr. THURMOND. Mr. President, I rise in support of the pending bill, S. 694, the fiscal year 1981 defense procurement authorization supplemental bill. This bill includes urgently required Defense Department needs that have been recommended by President Reagan. I applaud the action of our chairman of the Senate Armed Services Committee, Senator TOWER, for his expeditious handling of this highly important bill.

In my view it is critical that the United States move quickly to strengthen its defense forces. With the Soviets threatening to invade Poland, we need to let the world know that we will not shrink from our role as leader of the free world. We must act from a position of strength or we will find ourselves unable to act at all.

This bill sends the Nation and the rest of the world a message. It is a message of commitment—commitment to the defense of free people. We are going to improve our defense forces to guarantee that we are second to none. No one must doubt our resolve.

This supplemental represents one of the first initiatives of the Reagan administration to begin rebuilding our national defense structure. Defense Secretary Caspar Weinberger testified before our committee on this legislation to the effect that these proposals would accelerate and enhance steps to strengthen our Military Establishment.

AIRCRAFT AND VEHICLES

Mr. President, the major procurement items in this legislation include $892 million for aircraft procurement and $807 million for tracked combat vehicle procurement.

The bulk of the aircraft procurement account is for spares to support planes already in the inventory. Another major item in this account is $55.5 million to procure used Boeing 707 aircraft in lieu of purchasing new planes for military missions and to provide low cost modification kits for existing C–135 aircraft.

In the combat tracked vehicle account, the funds will be used to procure M–60A3 tanks, M–1 tanks and the infantry fighting vehicle.

RESEARCH PROGRAMS

The committee has also approved and recommended to the full Senate $599 million for research, development, and testing projects. These programs are essential if our Nation is to continue its technology growth.

MILITARY CONSTRUCTION

Mr. President, I might mention briefly the matter of military construction, since as chairman of the Military Construction Subcommittee I have a special responsibility in that area. S. 774, which Senator HART and I introduced by request, was the Department's request for supplemental military construction authority and has been incorporated into the committee's action on S. 694. The Department requested $83 million in new construction authority for badly needed construction projects. We are recommending that $66 million in new authority be granted and that the fiscal year 1981 Military Construction Authorization Act be amended to accommodate the $17 million difference. Details are in the committee's report and I would be happy to respond to questions if there are any.

Mr. President, it is a real pleasure for me, as a Member of the majority party in the Senate, to support this bill. Chairman TOWER and the splendid staff that he has assembled on the Armed Services Committee have handled this bill swiftly and professionally.

● Mr. EAST. Mr. President, the funds which we are considering today are those intended for the security and defense of our country. There purpose is therefore intimately related to one of the fundamental purposes of our Government, to "provide for the common defense."

The need for additional defense expenditures should be obvious. For the last decade the Soviet Union has increased its defense efforts at a rate of 3 percent or more per year, while our efforts in the same area have declined by a total of 11 percent in the same period. By 1979 the U.S.S.R. was spending 50 percent more on defense than the United States.

The 1980's began, Mr. President, with the United States facing strategic inferiority to the Soviet Union. At the same time the military, political, economic, and diplomatic challenges to our country are greater than at any time since the end of World War II. Valuable allies in Iran and Nicaragua are gone, and their countries are in the hands of hostile forces.

We have rejected the bonds of friendship and alliance with the Republic of China on Taiwan, but we have not yet developed similar ties with Communist China, and it remains debatable that we can or should do so. Our dependence on foreign oil and other strategic minerals and materials is of vital importance to our viability as a nation, as a world power, and as a society.

The Soviet Union, on the other hand, shows every sign of expansion and dynamism as a world power, while we are in retreat and withdrawal. While the Soviets have serious internal political and economic problems, they also continue to threaten other states. In Afghanistan the Soviet Army continues to occupy the territory and suppresses the freedom of this nation, and they remain less than 300 miles from the Persian Gulf. The Soviets are also engaging at this very moment in the most threatening maneuvers and political actions and statements thus far observed in regard to Poland and the nascent labor movement in that country. The Soviet support for terrorism and guerrilla warfare all over the world is becoming well known after too many years of being ignored.

Mr. President, I believe that it is absolutely necessary to support the supplemental defense budget for our national defense, not only because of the need for the particular programs it involves, but also because of the signal our acceptance of it will send to the Soviet Union, that we as a nation are resolved to meet aggression and tyranny with the forceful response that they deserve.●

UP AMENDMENT NO. 55

(Purpose: To eliminate entitlement to continuing submarine duty incentive pay in certain cases not intended to be included in the committee amendment)

Mr. TOWER. Mr. President, I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. GOLDWATER). The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an unprinted amendment numbered 55.

Mr. TOWER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 9, insert "and" after the semicolon.

On page 12, strike out lines 10 through 14.

On page 12, line 15, strike out "(C)" and insert in lieu thereof "(B)".

Mr. TOWER. Mr. President, this amendment deletes a sentence from the bill which would have a spending impact clearly not intended by the Committee on Armed Services. The deleted sentence implies an amendment which the committee did not approve, but which the committee may consider at a later date. Its removal is without prejudice. It would have assisted submariners with prior enlisted time and is not directly related to the technical amendments in the bill.

I have discussed this matter with Sen-

ator STENNIS. It is simply a technical amendment. It reflects the intent of the committee. It is my understanding that Senator STENNIS is prepared to accept the amendment.

Mr. STENNIS. Mr. President, that is correct. This is a technical amendment to which we join in asking approval.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time.

Mr. STENNIS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas (Mr. TOWER).

The amendment (UP No. 55) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STENNIS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TOWER. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time consumed be charged to both sides on the bill.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield to the Senator from Nebraska such time as he may use.

Mr. EXON. Mr. President, I thank my friend from Mississippi.

Mr. President, I proposed an amendment to the current bill during markup by the Manpower and Personnel Subcommittee. The purpose of my amendment was to provide a significant pay increase effective July 1, 1981, for senior enlisted personnel and to make other changes which will directly enhance retention. Last week the Department of Defense formally proposed a 5.3-percent, across-the-board military pay raise for July 1. By across the board it is meant that the base pay and the basic allowance for quarters and the basic allowance for subsistence for each individual rank would be raised by 5.3 percent.

Under the administration's proposal, a new recruit would receive a basic pay increase of $26.57 per month; a master sergeant or senior chief petty officer would receive a $74.90 increase in basic pay per month; and a colonel would receive a $169.08 increase in basic pay per month. In my view, this proposal does not meet the needs outlined by the Department of Defense.

In its letter of March 31, 1981, forwarding the proposed 5.3-percent pay increase, the General Counsel of the Department of Defense says:

> It is estimated that enactment of this proposal would allow the armed forces to retain about 15,000 more careerists by the end of fiscal year 1982, thereby reducing the demand for accessions. Alternatively, it would allow the armed forces to be more selective in the reenlistment process, thereby further improving the quality of their non-commissioned officer corps. With the American youth population declining each year, the importance of retention of experienced personnel in the armed forces cannot be overemphasized.

Mr. President, the Department of Defense seems to be saying that increasing the monthly pay of a master sergeant by $74.90 and increasing the pay of a colonel by $169.08 will both contribute to improved retention of noncommissioned officers. I find that logic very hard to follow. It makes no sense to me to increase the pay of privates and generals at this time when everyone will receive some form of cost-of-living increase in October of this year.

The Manpower and Personnel Subcommittee has held hearings on military compensation matters during this congressional session and the last. It has received consistent testimony on the need to increase pay for senior enlisted personnel. For example, Maj. Gen. William Usher, Director of Personnel Plans for the Air Force, testified:

> There is legitimate cause for concern over the inadequate pay differentials for members who are expected to assume greater rank and responsibilities without commensurate economic rewards. However, I think it would be a grave mistake to try to reduce pay compression by depressing pay raises for first-term enlisted members, as some have proposed. . . . We can hardly expect to attract and retain quality people unless we can demonstrate our intent to provide them a standard of living comparable to that enjoyed by their civilian counterparts. Therefore, I firmly believe that resolution of the pay compression problem must be accomplished through a separate pay raise additive to the annual comparability increase.

Mr. President, I do not necessarily agree with General Usher's comments that pay raises targeted to specific problems by rank or skill cannot be dealt with by reallocating the annual October 1 pay raise toward those problem areas. I do agree that if a pay raise is to become effective in July of 1981, it must be enacted soon. I do agree that such a special pay raise should be directed toward problems in the current pay structure. And I am concerned about further delays in achieving this goal.

One of the main problems facing military personnel managers is the need to increase the senior experience level of the enlisted ranks; that is, those personnel with over 10 years of service. First-term retention rates are relatively high, but it is among second- and third-term personnel where increased retention is critically needed to increase the numbers of senior noncommissioned officers. The Navy's ability to man the growing number of new ships now entering the fleet, as well as to expand its size in the future, will depend on its ability to retain more people with over 10 years experience and to bring back into the Navy petty officers with previous experience. I believe that when considering a mid-year pay raise of this sort the Congress should target these increases to the areas of greatest need. Most people seem to agree in principle that this concept is correct and now is the time to do something about the problem. The NCO's are the backbone and muscle of today's Armed Forces and they also have suffered the most from pay policies during the last few years.

The frontloading of first-term pay over the past several years has resulted in pay compression in the enlisted ranks. The ratio of a senior sergeant's pay to a recruit's pay has declined by 50 percent since 1964. So, if someone decides to stay in the military service as a senior noncommissioned officer, he must do so without the substantial increases in pay that once were provided. At the same time, he must assume a more demanding leadership role, especially in light of the quality problems in the junior enlisted ranks. So, we are asking these dedicated and talented people to assume additional responsibilities without significant increases in pay and without the significant privileges that used to be associated with the NCO ranks. The Defense Department continues to say that they recognize this pay compression problem. Yet they never propose a solution to it and action is long overdue. Last year, Congress gave the Secretary of Defense authority to reallocate up to 25 percent of last year's 11.7-percent pay raise; however, not one dime was reallocated. Congress expected the Secretary of Defense to identify the specific pay problems, but he did not. Now, with a new administration, testimony indicates that this reallocation authority will never be used. If the problems with the structure of military pay are to be solved, it will have to be the Congress which provides the solutions.

My amendment proposed a July 1, 1981, pay raise that would be limited to senior enlisted personnel:

Sergeant's (pay grade E–5) will receive 5.3 percent;

Staff sergeants and sergeants first class (pay grades E–6 and E–7) will receive 6.3 percent;

Master sergeants and sergeants major (pay grades E–8 and E–9) will receive 7.3 percent.

My amendment also included two other smaller pay adjustments. Much military flying duty, particularly helicopter flying in the Army, is assigned to warrant officers. Yet, warrant officers who are pilots are not entitled to the same flight pay as are commissioned officers. This results in an inequity, where a helicopter flight commander who is a warrant officer receives less flight pay than an officer who is not in command of a flight. My amendment would provide the same aviation career incentive pay for commissioned officers and warrant officers.

Second, last year Congress passed legislation designed to improve the management of and increase experience levels in the officer corps. Part of that legislation authorized the Secretaries of the Military Departments to continue captains and Navy lieutenants in technical fields on active duty until 20 years of service. However, under the current pay tables such an officer would receive no increase in pay based on his length of service in the military after he had com-

pleted 14 years of service. My amendment would continue to provide longevity pay increases for such personnel through 20 years of service.

The pay raises in my amendment apply only to military personnel and the amendment does not include other increases in pay for junior enlisted personnel or officers. Mr. President, at this time when we are considering a midyear pay raise, I do not feel it necessary to include junior enlisted people in pay grades E–1 through E–4. Currently there are enlistment bonuses available to cover critical skills where shortages exist. The same is true for officers. In fact, the Defense Department has not yet begun to pay the aviation continuation bonus for pilots because of disagreements within the Pentagon—even though Congress granted the authority for its payments last year. However, I am not precluding other subsequent actions to increase pay in skill areas where there are shortages or even across the board.

My amendment would cost about $150 million in fiscal year 1981 and about $500 million in fiscal year 1982. In contrast, the Department of Defense proposal would cost about $400 million in 1981 and $1.9 billion in 1982—that is, the administration's proposal would cost over three times as much but would give a lower pay raise to senior NCO's. If the Congress decides that further increases are warranted, there are funds earmarked in the fiscal year 1982 budget for subsequent increases in pay. However, if we cannot implement the policy of targeting military pay raises to achieve the best result at this time—a midyear pay raise—it will be very difficult to ever accomplish this goal.

Mr. President. I have received assurances from the Senator from Iowa (Mr. JEPSEN), the chairman of the Manpower and Personnel Subcommittee, that the subcommittee will give speedy consideration to my proposal. Knowing his interest and dedication to military personnel matters, I believe we will be able to join together in this proposal in the end.

I would hope that the distinguished chairman of the Armed Services Committee would add his assurance that the committee will consider my proposal, as I know he shares my general concern in this area.

Mr. President, because of these assurances, I will not offer my amendment at this time, but will continue to work toward the goals I have outlined here on the floor and in the committee. I am confident that we will be able to bring my proposal back to the Senate in the near future, and I hope and expect at that time, we will bring the committee's endorsement of such a proposal, or something quite near to it, in the future.

Mr. TOWER. Mr. President, I yield myself 2 minutes.

Let me say that I thank the Senator from Nebraska for his presentation and bringing this matter to the attention of the Senate. As he well knows, his proposal has considerable merit and reflects a lot of the thinking that is currently going on in the Armed Services Committee.

In general, the approach is probably a viable alternative to the DOD's across-the-board formula and is supported by many members of the committee.

The Senator from Nebraska has my assurance that the committee will focus in on this problem and his suggestion will be very carefully considered along with other suggestions along the same line.

Mr. EXON. Mr. President, I thank the chairman of our Armed Services Committee. As he knows, this is a critical area. I am sure that the Armed Services Committee will be focusing in on this.

I very much appreciate the comments of the distinguished chairman.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be equally charged.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 56

(Purpose: To delete funding for the MX missile system)

Mr. PRESSLER. Mr. President, I send an amendment to the desk for the purpose of laying it down, and then ask that when we resume——

Mr. TOWER. Mr. President, if the Senator will permit, what we would like to do is permit the Senator from South Dakota to lay his amendment down and make it the pending business when we reconvene.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes an unprinted amendment numbered 56.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 6, line 5 delete "$339,200,000" and insert "$334,200,000" in lieu thereof; and delete "$41,000,000" and insert "$39,000,000" in lieu thereof.

Mr. BAKER. Mr. President, I understand now that the Pressler amendment is the pending business.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I believe it would best serve the purposes of the Senate, in view of certain meetings which are about to occur, if we were now to recess the Senate for a brief time.

Before I make a unanimous-consent request, may I remind Senators that the National Geographic is scheduled to take the annual picture of the Senate, which is authorized by a resolution of the Senate, at 2 o'clock sharp. I urge all Members to be present and in their seats well in advance of that time. Wives of Members are invited to be present and sit in the gallery at a place to be designated for them.

RECESS UNTIL 1:45 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate stand in recess until 1:45 p.m. today.

There being no objection, the Senate, at 12:35 p.m., recessed until 1:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HUMPHREY).

ORDER OF PROCEDURE

Mr. TOWER. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time consumed not be charged to either side in the debate on the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I take this opportunity to remind Senators that the picture of the Senate, authorized by a resolution adopted by this body, will occur at 2 o'clock. I hope all Members will make preparations to be in their seats promptly at 2.

Mr. President, I ask unanimous consent that the time consumed from the reconvening of the Senate at 1:45 until the completion of the picture taking not be charged against the limitation previously imposed against the pending measure.

The PRESIDING OFFICER (Mr. SCHMITT). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I announce to my colleagues that I am advised that the National Geographic photographers will take a series of eight photographs. They will begin at 2 o'clock or as close to that as possible.

I understand that the wives of some Members have been attending a luncheon, in honor of Mrs. Reagan, in the Russell Building. I am sure all my colleagues will understand and agree that if we run a few minutes past 2 o'clock awaiting the attendance of wives and husbands, that will not be a mark of disrespect to our friends at the National Geographic but, rather, great concern for our future welfare. [Laughter.]

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask

unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BAKER. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order. Senators will take their seats and cease conversation.

The majority leader is recognized.

NOTICE OF BRIEFING ON WEDNESDAY ON THE SPACE SHUTTLE

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, while I instruct the Sergeant at Arms to inquire of the attendance of all Senators and Senators' wives who may wish to be in this photograph, I have an anouncement I would like to make on behalf of the distinguished Senator from Ohio (Mr. GLENN).

Senator GLENN wishes to say that there will be a briefing on the Space Shuttle by representatives from NASA on Wednesday, tomorrow, at 10 a.m. in room 412 of the Russell Building and at 2 p.m. in room 2228 of the Dirksen Building. Senator GLENN, I believe, indicates that not only will Members be welcome at those briefings, but so will their staffs.

Mr. President, I yield to the Senator from Ohio.

Mr. GLENN. Mr. President, if the Senator would yield momentarily. I have had a number of requests, and I know Senator SCHMITT has had a number of requests, so we jointly worked together on this and set up a briefing tomorrow at the 10 a.m. and 2 p.m times. As far as we are concerned, everybody is welcome—family, friends, staff, whoever may wish to attend. They will have models, a little movie of what is going to transpire on the flight, and some of the things that are planned on later shuttle flights. I think it should prove very interesting for everyone.

Mr. SCHMITT. Mr. President, will the majority leader yield to me?

Mr. BAKER. Mr. President, I am happy to yield to the distinguished Senator from New Mexico.

Mr. SCHMITT. Mr. President, anyone who needs information on scheduling, give the Commerce Committee staff a call. But, basically, there will be a DOD airplane leaving around Thursday noon, and a NASA airplane leaving very early Friday morning, very early in the a.m. There will be briefings associated with both of those flights in flight.

Mr. BAKER. Mr. President, I thank both of our distinguished astronauts, the distinguished Senator from Ohio (Mr. GLENN) and the distinguished Senator from New Mexico. I cannot help but point out that, as a class, astronauts are the most overrepresented group in society in the United States.

Mr. President, if I might have a report from the Sergeant at Arms.

Mr. President, I am advised that we are not quite ready and, for the moment, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BAKER. Mr. President, could we have order?

The VICE PRESIDENT. The Senate will be in order. Senators will take their seats.

PHOTOGRAPH OF THE SENATE

Mr. BAKER. Mr. President, I wish to announce to all Members that if they take their seats we are prepared, I believe, to go forward with the pictures. There will be a series of eight photographs. On previous occasions, we have experimented variously at the request of my friend, the present minority leader, on whether we face the camera or face forward. As far as I can tell, it has not made any difference either way. So, Mr. President, I leave that to the discretion of Members, but the cameras are in this corner. As I say, there will be eight exposures. So I will take my seat now and at the conclusion of the eight exposures we will resume.

(At this point, photographs of the Senate were taken.)

(Mr. DENTON assumed the chair.)

DEPARTMENT OF DEFENSE SUPPLEMENTAL APPROPRIATION AUTHORIZATION ACT, 1981

The Senate resumed consideration of S. 694.

The PRESIDING OFFICER. The Senate will be in order.

The Chair recognizes the Senator from Texas.

Mr. TOWER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The amendment offered by the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

Mr. TOWER. Let me ask the Senator from South Dakota if he wishes to discuss his amendment.

Mr. PRESSLER. I am asking for the yeas and nays, but I will discuss it if the Senator wishes. I wish to seek the yeas and nays. I might also say——

Mr. TOWER. Mr. President, I withdraw what I just suggested.

Mr. PRESSLER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PRESSLER. Mr. President, I rise to offer an amendment to this fiscal year 1981 supplemental authorization for the Department of Defense with some reluctance.

I have long supported strengthening of U.S. national security and, indeed, I am one of the strongest proponents of a better defense. In fact, I have a 100-percent record in national defense matters from groups that rate Senators and Congressmen on national defense. This is the case for my years in the House and in the Senate, according to those groups that rate Members of Congress in terms of their votes for a strong national defense and who believe in the threat the Soviets pose against our country.

However, I am a great skeptic of the MX program. We have had several years of debate about the MX. We do not know where it will be located. In fact, we are building a system that we do not know where or how it will be deployed. I cannot find out, as a U.S. Senator, where the MX will be built. First, we were told that it would be built on a railroad bed underground. Next, we were told that the MX would not be built underground on tracks but, rather, the MX would be put on hard-surface roads above ground.

Also there is a plan for the deployment of the MX by sea, a plan that has much merit. Most recently we were told that there is a blue ribbon committee in the Pentagon studying how to deploy the MX missile. Almost monthly I hear a different report as to where the MX might be located or how it will be developed.

Mr. President, the defense budget is enormous, and in most areas it is necessary. It is beyond the comprehension of many people to fathom the size of a budget projected to exceed $200 billion within a short time. Thus we must be careful in analyzing the Defense Department budget, just as we are with all budgets of all agencies and programs. Perhaps we need to be more careful with defense spending in order to avoid the feeling some might have that money is being squandered in the name of a strong defense.

Coming from South Dakota, I remember well the ABM system which was declared obsolete on the day it was operational, and that troubled me a great deal, since that system was built in our sister State of North Dakota. I fear the MX, too, may well be obsolete by the time it is built.

In any event, Mr. President, I am offering this amendment to reduce the fiscal year 1981 defense supplemental by a mere $7 million. Some say this is not the proper vehicle to pursue these concerns. Some say that deletion of funds for the MX should occur on a later bill. But I feel very strongly that if the Senate were to go forward with this $7 million reduction for the MX in this particular supplemental, it would be a clear signal to the Pentagon that many people are concerned about the validity of the MX, first of all, and second of all that we would like to know where it is going to be located before moving ahead with more expenditures.

The $7 million is the total of the amount which the committee report indicates will be provided as supplemental money for the MX missile research, development, test, and evaluation program. It does not seem right that on top of the

$1.5 billion already available that we should now be asked to add the $7 million more. Surely the $1.5 billion program can be managed within the existing authorization for the rest of this fiscal year.

Let me say a few words about alternatives. If we are to build several thousand miles of hard-surface roads for the MX, why do we not locate those roads in a place where we can have some civilian use for them? If 9,000 miles of railroad are to be built for this system, could not such track be built for hauling grain, or for transcontinental carriers? Our railroads are much in need of rehabilitation. Could we not camouflage missile cars and move them around on the same tracks?

The current plan we are told may involve building several thousand miles—up to 9,000 miles of hard-surface roads. Our interstate highway program is becoming obsolete. Could we not plan to put this military system to civilian uses? Does the Pentagon and its blue ribbon committee deciding where to locate the MX include persons who have a concern for our national transportation system and the application of some military systems to civilian use?

If we are going to spend this kind of money, literally tens of billions of dollars, it seems to me we should be considering civilian applications in the area of transportation.

Civilian transportation of agricultural products, other products, as well as people should be feasible on the roads or railroads used to occasionally shuttle the MX missile around.

Mr. STENNIS. May we have quiet? This is a matter of vast consequence, as I understand, and I am sure the membership will be interested in it.

The PRESIDING OFFICER. The Senator's point is well taken.

Mr. PRESSLER. I thank my colleague from Mississippi.

Mr. President, it has also been proposed that the areas currently serving the Nation with Minuteman missile complexes might be appropriate locations for the MX deployment, or at least deployment of some part of the system. Let me say that I am not committed to that. I have asked the Pentagon what their plans are for the Minuteman missile sites in western South Dakota. I am a great supporter of the strategic value of Ellsworth Air Force Base in my State. But my State has not spoken in terms of its willingness to take the MX if that is an option. I have not suggested that. What I am suggesting is that before we continue spending supplemental funds on this MX program we find out where we are going to deploy it. Indeed, I am told that if it is going to be deployed at sea, that certain plans will have to be significantly changed. Another portion of the system might even be deployed on wide-bodied cargo planes, I am told.

Mr. President, in those States in the Southwest where it has been indicated the MX would be located, there has been much opposition, even though that part of the country is very much attuned to most military proposals. They do not know now where the Pentagon proposes to locate the MX.

This is a program which is now estimated to cost over $53 billion and according to some estimates could exceed $100 million. That is a lot of money in terms of our budget and taxpayers' dollars. Therefore, we should be sure that we wring every possible benefit from this huge expenditure if it is going to be made.

Mr. President, I think this amendment could send a clear signal to the Pentagon and the White House that the Senate wants some answers before the MX program goes forward.

Is this system going to be obsolete by the time it is built? There are some who argue it is already obsolete. The American people have a right to know what is being done with so much of their money.

With that, Mr. President, I conclude my opening statement on this amendment to eliminate the requested $7 million supplemental for the current fiscal year for the MX. If the amendment is accepted, it will be telling the American people that we are being extremely careful with their tax dollars and we will not spend those dollars until we are convinced they are being wisely spent.

Also, Mr. President, I have had some discussions concerning my own State of South Dakota. I have not endorsed the MX overall program, I must say very frankly. I have not said that we want the MX in South Dakota. But I understand that some of the western sites are being considered. If they are, I would like to be told with more clarity.

So all of these things bring me to the conclusion that we should delete this supplemental funding for the MX in this particular bill.

Mr. President, that concludes my statement.

Mr. TOWER. Mr. President, I yield myself such time in opposition to the amendment as I may require.

Mr. President, the Senator from South Dakota has mentioned a number of potential basing modes that have already been rejected as being totally impractical. I do not know why he is concerned about those. I would suggest he ask his staff to look into these various methods he has discussed here because most have already been rejected and will not even be considered.

I would like to ask the Senator from South Dakota if he believes that the Commission should make a decision absent the kind of information we seek with this authorization.

Mr. PRESSLER. I must say how high a regard I have for my friend from Texas in the area of his military expertise as chairman of the Armed Services Commitee. Also, I would like to say I prefer to see the recommendation of the Commission before we are asked to spend still more money for this missile system. We are being told "Give us the money to go forward."

Mr. TOWER. How can they make a rational decision if we do not provide the funds for them to make important studies?

Mr. PRESSLER. May I finish my answer? We are being asked to continue to appropriate money to build the MX missile without being told where it will be located, how deployed, whether on surface roads, missile silos, or at sea. We have not been told what State it will be in. I think it is unfair to the taxpayers to be spending this kind of money without some answers to those questions. I see no reason why we cannot have the answers today. I have been trying to get the answers for several months. I have been writing letters and making calls. I have been given the runaround as a U.S. Senator. I want some answers to those questions.

Mr. TOWER. I might say that if the Senator is thinking about sending a message to the DOD, he is behind time. The Armed Services Committee has already done that. In fact, we authorized a basing mode. The new administration wanted to review that decision and they are currently in the process of doing so. Although Congress has directed an MPS basing mode there is disagreement between and among various people on the deployment mode. There is virtually no disagreement on the need for the missile. What the Senator from South Dakota proposes to do is to arrest the modernization of our entire intercontinental ballistic missile force just at a time when we are losing essential equivalence in strategic capability with the Soviet Union. He wants us to delay still further, which would increase the vulnerability the United States will face through the decade of the eighties. To adopt this amendment will be irresponsible in the extreme on the part of the United States Senate.

Mr. GOLDWATER. Will the Senator yield for a question?

Mr. TOWER. I yield.

Mr. GOLDWATER. What is the amount of money the Senator is mentioning in his amendment? Is it $7 million?

Mr. PRESSLER. It is $7 million.

Mr. GOLDWATER. What, precisely, would that $7 million do in the program? Mind you, I think we have made a mistake all along in using the term MX because MX is merely a follow-on inside for the Minuteman missile. The basing mode is something we have to discuss separately. I have to agree with my chairman. Although I am not in complete agreement with the basing mode, I am in complete agreement with the need for the new missile. I am afraid that taking that much money out of it at this time would work a hardship. Am I correct?

Mr. TOWER. The Senator from Arizona is absolutely correct. I might note that what the Senator proposes to do in his amendment is to deny information on blast and radiation effects that are important to all U.S. nuclear missiles, including Tridents, ALCM, GLCM, Pershing II, Minuteman, and Titan, as well as the MX. So with a pretty broad brush in the process of sending what he thinks might be a message to DOD, he is sending a message to the Soviet Union that we are not serious about maintaining an adequate stratgeic capability in this country to deter them from a first strike.

Mr. GOLDWATER. Will the Senator yield for a question?

Mr. TOWER. I yield.

Mr. GOLDWATER. I remember when he first came here that the Senator from Utah was trying to stress the need for a modernized Minuteman missile. Many of us went along with him, but we have yet to do anything about it. We still have the same old Minuteman sitting in the holes out in the West that we put there so long ago. In my humble opinion, and, as I say, I am not sold on this basing mode, we have to have a new intercontinental missile. I think eliminating $7 million is going to slow down the beginning of the manufacture of these new missiles. If you are talking of $30, $40, or $50 billion, you might be getting at the basing mode.

I cannot support the amendment. I feel too strongly that we have to have these new missiles. We will decide where they go.

Mr. WARNER. Will the Senator yield?

Mr. TOWER. I yield such time as the Senator from Virginia may desire.

Mr. WARNER. Mr. President, this is a matter that falls within the jurisdiction of my subcommittee. I have taken a very close look at it. I would like to express to my distinguished colleague, the Senator from South Dakota, that there is a proper time and a proper procedure by which this Chamber will someday address itself to the pros and cons of the MX system. I urge my colleagues, however, to oppose this amendment because this amendment not only is not the right way to do it but it will subtract vital information from the ultimate debate on the system.

I can be more specific.

The Senator from South Dakota wishes to strike $7 million and there are two components to the $7 million. First, there is the $5 million which represents research and development funds for the Air Force to keep a program funded which is going on right at this minute, and that program is for the specific purpose of determining how well a missile can be hidden. In other words, the $5 million is to provide data of the kind which the blue ribbon committee will require when it reconvenes next week.

I am certain that the distinguished Senator does not wish to deny information, either to this committee or to the U.S. Senate, when that information will be integral to any decisionmaking on the MX system. The $5 million applies to various basing modes and will help tell us how successful the United States, under all of these modes, can conceal the missile.

Then, as the distinguished chairman mentioned, $2 million will be for a study of the thermal and blast effects upon the missile itself. That is totally apart from any basing consideration. It goes to the missile, which I think almost everyone in this Chamber will agree is necessary for the United States to bring into production, depending upon the basing mode of that missile.

By supporting this amendment, the Senator will deny the Defense Nuclear Agency the moneys needed to provide a test program for the study of thermal and blast effects not only on the MX missile but, as the distinguished chairman said, on a series of missiles utilized by the United States in our deterrence defense system.

I fervently urge the distinguished Senator from South Dakota to reconsider pressing this amendment at this time.

Mr. PRESSLER. Will my colleague yield?

Mr. WARNER. Yes.

Mr. PRESSLER. Let me say what a great regard I have for my colleague from Virginia. I have enjoyed working with him on the arms control issue, since I am the chairman of the Arms Control Subcommittee and he heads an important Armed Services subcommittee which touches this area. But let me ask him, is it not possible for the Defense Department to move forward on the strength of the $1.5 billion appropriation that they already have for the MX? Surely, $7 million will not halt this work. Would it not be good to send a clear signal?

Mr. President, I ask unanimous consent to have printed in the RECORD an article dated March 1, 1981, concerning remarks of the President with regard to the MX, from the Washington Post.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

Q. A number of leaders from western states, including some of your strong supporters, oppose the MX fixed-rail siting because it's going to use up so much range land. How do you feel about that?

A. I have to tell you that, while I can't claim that I've had enough input to make a final decision on anything, I'm not enamored of that fixed-rail system. I believe the missile is necessary. I don't believe in the basing method that has been suggested so far.

Q. Because of the land use?

A. It's not only that. It's so elaborate, so costly, and I'm not sure that it is necessary or would be effective. It's again an indication of this whole effort, such as in the SALT talks, to have verifiability so you create a great, elaborate costly system in which you can hide the missile except that the enemy has to know that the missile is there. And it doesn't make much sense to me.

Q. Does that mean that the sea-based option is under active consideration?

A. Oh, I think there are any number of them, ranging all the way from silos such as we presently have. Silo, sea-based, they're all being looked at.

Q. So the siting question. You've been committed to the missile, but the siting of it is still a wide-open question as far as you're concerned?

A. Yes.

Mr. PRESSLER. I say to the Senator that we are so far down the road in building this missile that it seems very strange to me that we cannot get some answers, that we do not know where we are going to put this costly thing, which may cost over $100 billion. We are building this weapon, and we do not know what we are going to do with it.

I wish to reiterate that, in regard to South Dakota, I do not advocate bringing the MX missile to our State. More work is needed to determine the feasibility of building an MX system with civilian applications, such as roads or railroads to shuttle the mobile missile as well as civilian traffic. Perhaps we would participate if we could hear and see these studies. That is a decision the people of South Dakota would have to make and for which they need more information.

Mr. WARNER. I reply to my distinguished colleague by saying that President Reagan was entitled to the opportunity to review not only this program but also all the defense programs to determine whether or not, in fact, they did work toward his goal of restoring the margin of safety in our overall defense system.

We cannot expect him to be in office a mere 90 or 120 days and make all these decisions carefully within that brief period of time, particularly with a new Secretary of Defense and a new deputy secretary for purposes of research and development; and we have not even had a hearing on him as yet.

This team, which is working informally, is attempting, as rapidly as it can, to gather a data base for a decision by the Defense Secretary as well as the President. These two small sums are an integral part of the factfinding process so that they can develop a record to take to Congress, as well as the Nation, to substantiate whatever decision they may come up with with respect to the basing mode.

Again, I call my distinguished colleague's attention to the $2 million. Is it his intention to press for the deletion of that sum?

Mr. PRESSLER. Yes, that is my intention. It is part of my amendment.

It seems to me that we are talking about a relatively small amount. I am sure that the Department of Defense, with an existing $1.5 billion appropriation for this program, in this time of budget austerity, could do without that $2 million. In any event, the total of $7 million would send a signal. I know of no other way to do it as a Senator. I have tried to get a briefing. I have tried to talk to people. I am told, "We don't know." Even the President of the United States does not know how to deploy this.

Mr. TOWER. We are already sending a signal. We have asked for a report. The Secretary of Defense has appointed the Townes committee to study and review the whole matter of the basing mode.

The signal that the Senator from South Dakota is going to send is one to the Soviet Union of a lack of determination on our part to maintain an adequate strategic capability.

I yield to the Senator from Utah such time as he may require.

Mr. GARN. I thank the Senator from Texas.

Mr. President, I oppose this amendment.

The Senator from Arizona mentioned that when I first came to this body and was a member of the Armed Services Committee, the very first concern I had was for the growing strategic imbalance. At that time, as a freshman Senator, I tried to accelerate the development of the MX missile, on the basis that the basing mode could be argued about and disputed, but that no one should dispute the need that we should proceed with the development and procurement of the missile while the basing mode debate was going on.

At the same time, I stopped for a year

and a half an intent by the Carter administration to stop the production line of Minuteman III and to disperse that team. Unfortunately, I could not keep it going longer.

I felt strongly that President Ford made a serious mistake in 1976 by not making a decision to go ahead with the building of the missile. He deferred that until after the 1976 election. In addition, he deferred the decision on the B–1 until after the 1976 election.

Unfortunately, he lost the election. I am sure that if he had been elected, he would have proceeded with both, but he did not.

Then we had Jimmy Carter dilly-dally for 3 years before making a decision on even building a missile, let alone the basing mode, and he canceled the B–1. So he effectively cut off one leg of the triad by leaving us with an aging B–52, and then he opened this window of vulnerability to an even longer period of time, while the Soviet Union has SS–17's and SS–19's, with 4.6-ton warheads, and 10.5-ton warheads on the SS–18.

Also, I am more directly involved than any other Senator in this body because a major portion of this system is proposed to be deployed in my State, and I do not want it in my State. I wish it were not necessary to have an MX, and I do not want the socioeconomic or environmental problems that will occur from building the biggest manmade public works project in the history of the world.

I went through it during an entire campaign last year, with my opponent saying he would lay his body before the MX and stop it and Senator GARN would not.

Well, that is true. I do not want it there, and I wish it would go away. I wish we did not have to have it. But it is irresponsible to continue to delay year after year after year.

During my entire 6-year term, we have delayed, the window of vulnerability has become wider, the Soviets have become stronger, and we have become weaker.

It is not a matter of $7 million, I say to my distinguished colleague from South Dakota. It is a matter of sending signals that, once again, we are trying to delay it.

I cannot emphasize enough that nobody is more involved than I am and wish it would go away, but I cannot play politics with the national defense. We need the MX missile, and as rapidly as we can get it. I wish there were some alternatives to putting it in my State of Utah.

Most of the seabased options are not viable. The SOM system is the most Rube Goldberg, stupid concoction that scientists ever thought up. It is a concept.

It does not have any research and development to speak of, no accurate cost data. It probably would take longer than the MX to deploy.

I cannot emphasize strongly enough that while we continue to make a decision and give the Reagan administration time to review the various alternatives as to how we should base it, there should not be 1 day of delay in continuing the development of the missile itself while we debate the basing mode.

I say to my distinguished colleague from South Dakota, as one who has lived with the MX, literally, about 20 hours a day for the last 3 years, with a massive amount of data in my office, on microfilm and everything else, that if he would like a briefing I would be glad to talk to him. There is something about the MX every day. There is a headline or an editorial in our papers. I have never had a request to talk about the MX. So I make that offer to my colleagues. We can talk for days about the MX.

I will make the point once more, and then I will conclude:

Let us not delay the development of the MX missile. This country is in danger, and we will have a decision on the basing mode by June.

Even though I do not want it in my State—I would love to give it to JOHN TOWER, in Texas, or someplace else—the national security has to come first, over State interests. If we are not able to find a suitable alternative or to modify this system, I am going to be willing to take it, whether I want it or not, because we cannot let the Soviets continue to build that strategic gap. I have six children, and I would like to have that threat removed.

Mr. TOWER. Mr. President, I thank the distinguished Senator from Utah for his very statesmanlike approach on this issue. It is typical of him and his zeal to defend the United States against external adversaries.

It is my intention to move to table this amendment once all the time has expired or has been yielded back.

Mr. President, I yield to the distinguished Senator from Mississippi such time as he requires.

Mr. STENNIS. I thank the Senator.

Mr. President, I commend the Senator from South Dakota for his interest and concern in this matter. He is well within his rights and his responsibility in submitting this amendment or any other amendment.

The matter of the MX has been before the Senate for 3 or 4 years, and the membership has been given assurances before that we are going to make progress, and so forth, and the matter comes back without much advancement in position.

I believe it is well that someone not on the committee bring attention through an amendment. However, in deference to the Senator, I believe this is a matter that should proceed, after years of our committee having gone into the most extensive kind of hearings and thorough consideration and weighing the matter, as has the Pentagon, in the great concern that is brought about by the need and by the problem of the basing mode.

Mr. President, it is a fact that this money relates to preliminary research and development with respect to the hiding, the concealment, of our missiles. After they are located at a certain spot $2 million of the $7 million goes to some experimental work with reference to concussion blasts and nuclear radiation.

Unfortunately, we have been delayed all this time on the basing mode, the location, as referred to by the Senator from Utah. Other matters are still pending, and we are waiting for a decision. I believe it is due January 15, according to the latest testimony. For all this time, excellent work has been going forward on the missile itself. There has been no undue delay. To suspend it awaiting a basing mode decision would be grave error. It would be lost time which could not be recaptured; and in that way, it would be a great mistake.

I believe that our committee has fully covered the facts of the situation and the need, and the committee has a correct position.

Mr. PRESSLER. I thank my colleague from Mississippi. I see him frequently on Wednesday mornings at the prayer breakfast, and I see him on many other occasions, and he is one of the most distinguished Members of this body.

Also, I have extremely high regard for the views of the Senator from Utah.

Nevertheless, Mr. President, I conclude by saying that I feel that by cutting this $7 million for the MX, we will be sending a signal to the Pentagon. We will not be stopping the program, because there is $1.5 billion in the budget.

Also, I should clarify my position with regard to South Dakota. I do not necessarily want the MX in South Dakota. Overall, I believe that our people would rather not have them. But if they are to build roads or railroads, this is something very much needed in my State and of course the United States as a whole. I hope we can find a civilian use for some of these great expenditures we are making.

I believe it is very strange for our country to be in the process of building something which is so expensive and we have no idea how we are going to deploy it. The President of the United States said on March 29 that we do not know where it is going to be deployed.

Mr. President, I have asked the distinguished Senator from Texas if we might have a 10-minute quorum call before the start of this vote, and with that in mind, I suggest the absence of a quorum, to be charged to my time.

Mr. TOWER. Mr. President, I yield back the remainder of my time, and I suggest the absence of a quorum, on the time of the Senator from South Dakota, after which time it is my intention to move to table the amendment offered by the Senator from South Dakota.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

Mr. TOWER. Mr. President, I move to lay on the table the amendment proposed by the Senator from South Dakota (Mr. PRESSLER).

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas to lay on the table

the amendment of the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Delaware (Mr. ROTH) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

The PRESIDING OFFICER. Are there other Senators in the Chamber desiring to vote?

The result was announced—yeas 79, nays 15, as follows:

[Rollcall Vote No. 78 Leg.]

YEAS—79

Abdnor	Ford	McClure
Andrews	Garn	Melcher
Armstrong	Glenn	Mitchell
Baucus	Goldwater	Moynihan
Bentsen	Gorton	Murkowski
Boren	Grassley	Nickles
Bradley	Hart	Nunn
Bumpers	Hatch	Packwood
Burdick	Hawkins	Percy
Byrd, Harry F., Jr.	Hayakawa	Pryor
Byrd, Robert C.	Heflin	Quayle
Cannon	Heinz	Randolph
Chafee	Helms	Rudman
Chiles	Hollings	Sarbanes
Cochran	Huddleston	Sasser
Cohen	Humphrey	Schmitt
Cranston	Inouye	Simpson
D'Amato	Jackson	Specter
Danforth	Jepsen	Stafford
DeConcini	Johnston	Stennis
Denton	Kasten	Stevens
Dixon	Laxalt	Symms
Dole	Leahy	Thurmond
Domenici	Levin	Tower
East	Long	Wallop
Exon	Lugar	Warner
	Mattingly	

NAYS—15

Baker	Kassebaum	Pressler
Boschwitz	Kennedy	Proxmire
Dodd	Matsunaga	Riegle
Eagleton	Metzenbaum	Tsongas
Hatfield	Pell	Weicker

NOT VOTING—6

Biden	Mathias	Williams
Durenberger	Roth	Zorinsky

So Mr. TOWER's motion to lay on the table Mr. PRESSLER's amendment was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. TOWER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

Mr. BAKER. Mr. President, the requests I am about to make have been cleared, I believe, on the minority side.

I observe that the minority leader is on the floor.

On Thursday, the Senate had final consideration and passage of Senate Concurrent Resolution 9. I ask unanimous consent now, Mr. President, that the Secretary of the Senate be authorized to make the following modifications to Senate Concurrent Resolution 9 to make the resolution mathematically consistent and to conform with the actions taken by the Senate.

Mr. ROBERT C. BYRD. Mr. President, may the clerk state the modifications?

The PRESIDING OFFICER. The modifications will be stated.

The legislative clerk read as follows:

On page 2, line 17, strike "$52,144,000,000" and insert in lieu thereof, "$52,825,000,000."

On page 2, line 19, strike "$59,023,000,000" and insert in lieu thereof, "$59,228,000,000."

On page 12, line 10, strike "$3,462,000,000" and insert in lieu thereof, "$3,243,000,000."

On page 12, line 11, strike "$3,400,000,000" and insert in lieu thereof, "$3,200,000,000."

On page 12, line 12, strike "$4,210,000,000" and insert in lieu thereof, "$4,011,000,000."

On page 12, line 13, strike "$4,161,000,000" and insert in lieu thereof, "$3,961,000,000."

On page 15, line 17, strike "$150,000,000" and insert in lieu thereof, "$1,050,000,000."

On page 15, line 18, strike "$101,000,000" and insert in lieu thereof, "$301,000,000."

On page 15, line 19, strike "$196,000,000" and insert in lieu thereof, "$600,000,000."

On page 15, line 19, strike "$167,000,000" and insert in lieu thereof, "$367,000,000."

On page 20, line 20, strike "$710,000,000" and insert in lieu thereof, "$195,000,000."

On page 20, line 22, strike "$7,861,000,000" and insert in lieu thereof, "$8,383,000,000."

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, the request has been cleared on the minority side. We have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the minority leader.

Mr. President, I have two more requests and I believe these have been cleared as well. I submit them for the consideration of the distinguished minority leader.

I ask unanimous consent, Mr. President, that the Secretary of the Senate be authorized to make other technical and clerical changes to Senate Concurrent Resolution 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that Senate Concurrent Resolution 9, as modified, be printed in today's RECORD in full.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 9), as modified, reads as follows:

Resolved by the Senate (the House of Representatives concurring), That H. Con. Res. 448, Ninety-sixth Congress, second session, adopted November 20, 1980, shall be revised pursuant to sections 304 and 301 of the Congressional Budget Act of 1974, by adding at the end thereof new sections 9, 10, and 11, as follows:

"RECONCILIATION

"SEC. 9. (a) Congress hereby determines and declares that it is necessary to make changes in enacted laws in order to reduce budget authority by $14,667,000,000, and outlays by $2,353,000,000, in fiscal year 1981; to reduce budget authority by $52,825,000,000, and outlays by $36,945,000,000, in fiscal year 1982; and to reduce budget authority by $59,228,000,000, and outlays by $47,694,000,000, in fiscal year 1983.

"(b) The Committees on Appropriations of the House and Senate shall report not later than June 5, 1981, legislation to reduce previously enacted appropriations by $13,300,000,000 in budget authority and $1,500,000,000 in outlays for fiscal year 1981; by $3,200,000,000 in outlays for fiscal year 1982; and $1,800,000,000 in outlays for fiscal year 1983.

"(c) Not later than May 31, 1981, the committees named in subsections (c)(1) through (c)(29) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. Those recommendations shall be sufficient to accomplish the reductions required by subsections (c)(1) through (c)(29) of this section. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

"SENATE COMMITTEES

"(1)(A) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1981; to reduce budget authority by $474,000,000 and outlays by $928,000,000 in fiscal year 1982; and to reduce budget authority by $659,000,000 and outlays by $618,000,000 in fiscal year 1983; and

"(B) the Senate Committee on Agriculture, Nutrition, and Forestry shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,243,000,000 in budget authority and $3,200,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,961,000,000 in outlays for fiscal year 1983.

"(2) The Senate Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

"(3) The Senate Committee on Banking, Housing, and Urban Affairs shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $6,146,000,000 in budget authority and $133,000,000 in outlays for fiscal year 1981; $15,460,000,000 in budget authority and $958,000,000 in outlays for fiscal year 1982; and $18,412,000,000 in budget authority and $2,274,000,000 in outlays for fiscal year 1983.

"(4)(A) The Senate Committee on Commerce, Science, and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $150,000,000 and outlays by $150,000,000 in fiscal year 1982 and to reduce budget authority by $300,000,000 and outlays by $300,000,000 in fiscal year 1983; and

"(B) The Senate Committee on Commerce, Science, and Transportation shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as

follows: $1,558,000,000 in budget authority and $884,000,000 in outlays for fiscal year 1982 and $1,598,000,000 in budget authority and $1,328,000,000 in outlays ffor fiscal year 1983.

"(5) The Senate Committee on Energy and Natural Resources shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,071,000,000 in budget authority and $106,000,000 in outlays for fiscal year 1981; $3,714,000,000 in budget authority and $3,404,000,000 in outlays for fiscal year 1982; and $3,660,000,000 in budget authority and $3,628,000,000 in outlays for fiscal year 1983.

"(6)(A) The Senate Committee on Environment and Public Works shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

"(B) the Senate Committee on Environment and Public Works shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $4,935,000,000 in budget authority and $793,000,000 in outlays for fiscal year 1982; and $3,035,000,000 in budget authority and $1,872,000,000 in outlays for fiscal year 1983.

"(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $295,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $9,354,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $10,870,000,000 in fiscal year 1983; and

"(B) the Senate Committee on Finance shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $96,000,000 in budget authority and $112,000,000 in outlays for fiscal year 1982 and $114,000,000 in budget authority and $132,000,000 in outlays for fiscal year 1983.

"(8) The Senate Committee on Foreign Relations shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,050,000,000 in budget authority and $301,000,000 in outlays for fiscal year 1982 and $600,000,000 in budget authority and $367,000,000 in outlays for fiscal year 1983.

"(9)(A) the Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

"(B) the Senate Committee on Governmental Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,776,000,000 in budget authority and $4,690,000,000 in outlays for fiscal year 1982 and $6,360,000,000 in budget authority and $6,388,000,000 in outlays for fiscal year 1983.

"(10) The Senate Committee on the Judiciary shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

"(11)(A) the Senate Committee on Labor and Human Resources shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlays by $49,000,000 in fiscal year 1981; to reduce budget authority by $658,000,000 and outlays by $622,000,000 in fiscal year 1982; and to reduce budget authority by $1,601,000,000 and outlays by $1,495,000,000 in fiscal year 1983; and

"(B) the Senate Committee on Labor and Human Resources shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,388,000,000 in budget authority and $414,000,000 in outlays for fiscal year 1981; $10,303,000,000 in budget authority and $7,928,000,000 in outlays for fiscal year 1982; and $12,363,000,000 in budget authority and $10,913,000,000 in outlays for fiscal year 1983.

"(12) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $390,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget authority and $541,000,000 in outlays for fiscal year 1983.

"(13)(A) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

"(B) The Senate Committee on Veterans' Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000 in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

"HOUSE COMMITTEES

"(14)(A) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $163,000,000 in fiscal year 1981; to reduce budget authority by $232,000,000 and outlays by $693,000,000 in fiscal year 1982; and to reduce budget authority by $400,000,000 and outlays by $362,000,000 in fiscal year 1983; and

"(B) the House Committee on Agriculture shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $645,000,000 in budget authority and $3,000,000 in outlays for fiscal year 1981; $3,243,000,000 in budget authority and $3,200,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,961,000,000 in outlays for fiscal year 1983.

"(15) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $966,000,000 and outlays by $966,000,000 in fiscal year 1982; and to reduce budget authority by $899,000,000 and outlays by $899,000,000 in fiscal year 1983.

"(16) The House Committee on Banking, Finance and Urban Affairs shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $7,146,000,000 in budget authority and $143,000,000 in outlays for fiscal year 1981; $14,139,000,000 in budget authority and $808,000,000 in outlays for fiscal year 1982; and $16,534,000,000 in budget authority and $1,669,000,000 in outlays for fiscal year 1983.

"(17) The House Committee on the District of Columbia shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $39,000,000 in budget authority and $40,000,000 in outlays for fiscal year 1982 and $56,000,000 in budget authority and $64,000,000 in outlays for fiscal year 1983.

"(18)(A) The House Committee on Education and Labor shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $808,000,000 and outlays by $725,000,000 in fiscal year 1982 and to reduce budget authority by $1,681,000,000; and outlays by $1,532,000,000 in fiscal year 1983; and

"(B) the House Committee on Education and Labor shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,282,000,000 in budget authority and $372,000,000 in outlays for fiscal year 1981; $8,578,000,000 in budget authority and $6,733,000,000 in outlays for fiscal year 1982; and $10,035,000,000 in budget authority and $8,968,000,000 in outlays for fiscal year 1983.

"(19)(A) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $176,000,000 and outlays by $110,000,000 in fiscal year 1981; to reduce budget authority by $695,000,000 and outlays by $1,011,000,000 in fiscal year 1982; and to reduce budget authority by $903,000,000 and outlays by $1,537,000,000 in fiscal year 1983; and

"(B) the House Committee on Energy and Commerce shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $764,000,000 in budget authority and $19,000,000 in outlays for fiscal

year 1981; $4,885,000,000 in budget authority and $4,088,000,000 in outlays for fiscal year 1982; and $5,251,000,000 in budget authority and $4,846,000,000 in outlays for fiscal year 1983.

"(20) The House Committee on Foreign Affairs shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $1,050,000,000 in budget authority and $301,000,000 in outlays for fiscal year 1982 and $600,000,000 in budget authority and $367,000,000 in outlays for fiscal year 1983.

"(21) The House Committee on Interior and Insular Affairs shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $331,000,000 in budget authority and $84,000,000 in outlays for fiscal year 1981; $815,000,000 in budget authority and $369,000,000 in outlays for fiscal year 1982; and $796,000,000 in budget authority and $564,000,000 in outlays for fiscal year 1983.

"(22) The House Committee on the Judiciary shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $116,000,000 in budget authority and $13,000,000 in outlays for fiscal year 1982 and $133,000,000 in budget authority and $81,000,000 in outlays for fiscal year 1983.

"(23)(A) The House Committee on Merchant Marine and Fisheries shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $39,000,000 and outlays by $39,000,000 in fiscal year 1981; to reduce budget authority by $242,000,000 and outlays by $242,000,000 in fiscal year 1982; and to reduce budget authority by $479,000,000 and outlays by $479,000,000 in fiscal year 1983; and

"(B) the House Committee on Merchant Marine and Fisheries shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $147,000,000 in budget authority and $15,000,000 in outlays for fiscal year 1982 and $60,000,000 in budget authority and $32,000,000 in outlays for fiscal year 1983.

"(24)(A) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce outlays by $513,000,000 in fiscal year 1982 and to reduce outlays by $414,000,000 in fiscal year 1983; and

"(B) the House Committee on Post Office and Civil Service shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $4,737,000,000 in budget authority and $4,650,000,000 in outlays for fiscal year 1982 and $6,304,000,000 in budget authority and $6,324,000,000 in outlays for fiscal year 1983.

"(25)(A) The House Committee on Public Works and Transportation shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce outlays by $185,000,000 in fiscal year 1982 and to reduce outlays by $900,000,000 in fiscal year 1983; and

"(B) the House Committee on Public Works and Transportation shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,350,000,000 in budget authority and $68,000,000 in outlays for fiscal year 1981; $6,446,000,000 in budget authority and $1,033,000,000 in outlays for fiscal year 1982; and $5,122,000,000 in budget authority and $2,697,000,000 in outlays for fiscal year 1983.

"(26) The House Committee on Science and Technology shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $82,000,000 in budget authority and $35,000,000 in outlays for fiscal year 1981; $78,000,000 in budget authority and $39,000,000 in outlays for fiscal year 1982; and $90,000,000 in budget authority and $59,000,000 in outlays for fiscal year 1983.

"(27) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $97,000,000 in budget authority and $67,000,000 in outlays for fiscal year 1981; $526,000,000 in budget authority and $394,000,000 in outlays for fiscal year 1982; and $564,000,000 in budget authority and $541,000,000 in outlays for fiscal year 1983.

"(28)(A) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $14,000,000 and outlays by $14,000,000 in fiscal year 1981; to reduce budget authority by $32,000,000 and outlays by $32,000,000 in fiscal year 1982; and to reduce budget authority by $28,000,000 and outlays by $28,000,000 in fiscal year 1983; and

"(B) the House Committee on Veterans' Affairs shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $414,000,000 in budget authority and $375,000,000 in outlays for fiscal year 1982 and $397,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1983.

"(29)(A) the House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93–344, sufficient to reduce budget authority by $36,000,000 and outlays by $195,000,000 in fiscal year 1981; to reduce budget authority by $3,659,000,000 and outlays by $8,383,000,000 in fiscal year 1982; and to reduce budget authority by $3,591,000,000 and outlays by $9,373,000,000 in fiscal year 1983; and

"(B) the House Committee on Ways and Means shall also report changes in laws within the jurisdiction of that committee sufficient to reduce appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $978,000,000 in budget authority and $994,000,000 in outlays for fiscal year 1982 and $1,294,000,000 in budget authority and $1,312,000,000 in outlays for fiscal year 1983.

"SEC. 10. The enactment of savings required by this resolution is critical to the health of the economy of the Nation; and

"Expeditious action on legislation pursuant to these instructions is critical to achieving the savings required by this resolution; and

"The Senate is committed to completing action on the savings legislation required by this resolution at the earliest possible time; and

"It is the sense of the Senate that Senate committees instructed in section 9(c)(1) through (c)(13) of this resolution should begin deliberations on the legislation those committees are required to report under this resolution as soon as the resolution is agreed to in the Senate; and

"It is the further sense of the Senate that Senate committees should report the legislation required by section 9(c) of this resolution as agreed to in the Senate, except to the extent that the amounts referred to may be modified in conference with the House of Representatives, by May 31, 1981.

"SEC. 11. The Senate Committee on Governmental Affairs should report changes in laws within the jurisdiction of that committee which would reduce the costs to the Government which result from waste, fraud, and abuse. Savings in appropriations and expenditures from trust funds from such statutory changes are estimated to be $700,000,000 in budget authority and $1,300,000,000 in outlays in fiscal year 1982 and $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983.".

Mr. BAKER. Mr. President, I thank the managers of the bill and I thank the minority leader.

DEPARTMENT OF DEFENSE SUPPLEMENTAL APPROPRIATION AUTHORIZATION ACT, 1981

The Senate continued with the consideration of the bill.

Mr. TOWER. Mr. President, those are all the amendments that I know of that Senators intended to offer to the supplemental appropriation bill, with the exception of the amendment of the Senator from Arkansas. I would suggest that he avail himself of that opportunity now as there may not be time later.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. BUMPERS. On my time.

The PRESIDING OFFICER. The Chair will inform the Senator that the Senator has no time——

Mr. STENNIS. Mr. President, I yield time to the Senator.

UP AMENDMENT NO. 57

(Purpose: To prohibit use of funds in connection with the reactivation of the battleship U.S.S. *New Jersey*)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an unprinted amendment numbered 57.

On page 5, between lines 17 and 18, insert the following new subsection:

"(c) None of the funds authorized to be appropriated by this title may be used to carry out any work in connection with the reactivation of the battleship United States ship *New Jersey*.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum, on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, the amendment at the desk is very simple. I believe almost every Member here has seen the "Dear Colleague" letter, and they have heard this debate before on the floor of the Senate.

This amendment would prohibit the use of $89 million in the fiscal year 1981 defense supplemental appropriation from being used to reactivate the 38-year-old battleship *New Jersey*.

I offer this amendment because it makes no more economic or military sense to proceed with the reactivation of the *New Jersey* today than it did last year, when the Senate and the House conference committees deleted the funds for this project in the 1981 defense budget.

I know that my colleagues are familiar with most of the arguments that were made last year as to why we should or should not reactivate one or more of these World War II battleships in the course of the next few years. So I will be as brief as I can on this amendment and try to point out that it will not serve our goal of using limited resources in the most efficient and effective manner for a strong national defense.

I wish to emphasize that I am not asking that the $89 million be taken out of the budget. All I am asking is that we not spend that $89 million to reactivate the *New Jersey*—at least, not now. It is my belief—and it is my principal argument here—that the money required to reactivate the *New Jersey* can be more effectively used elsewhere. The proponents argue that reactivation of the *New Jersey* would be a simple and inexpensive "quick fix" to the Navy's problems, that it would be an effective weapons platform, and that it would be a highly visible symbol of American resolve.

Unfortunately, even a cursory review of the facts shows that the *New Jersey* would be an expensive, highly vulnerable vessel of questionable military utility which would simply siphon off very scarce Navy manpower from the newer and more effective ships which we are going to build and which I intend to support.

Let us talk about some of the costs of this ship and its reactivation. In the fiscal year 1981 budget debated last year, it was estimated that the reactivation would cost $270 million, with the overhaul to be completed within 12 months. I want to reemphasize those figures. Last year, it was estimated that it would cost $270 million and that it could be done in 12 months. Understand that that was what we called a class F estimate, which is something not too far from flying over a ship in a helicopter and saying, "I believe it will cost about $270 million to reactivate that ship."

We have two former Secretaries of the Navy in the U.S. Senate—the distinguished Senator from Virginia (Mr. WARNER), who I notice has just left the floor, and the distinguished Senator from Rhode Island (Mr. CHAFEE), who will be here in a moment to speak in support of this amendment. He will make the argument that a class F estimate is not good enough for the U.S. Senate to say, with any degree of precision or definiteness, that these figures are accurate.

We started off last year with a total estimated cost of $270 million, and by last fall, it was up to $294 million. Today, in this supplemental, the estimate, which is still a class F estimate, is $326 million, and the job is now supposed to take 21 months.

No one in this body honestly believes that we are going to reactivate the *New Jersey* for $326 million. Nobody in this body actually believes that this job is going to take 21 months. Everything inside that ship will have to be torn out, including every inch of wiring. That ship was commissioned in 1943, under World War II conditions and with WW II technology, long before the days of guided missiles and new types of charges designed to penetrate the thickest of thick hulls.

I know that the *New Jersey* has three hulls on it, 16 inches thick, and that it is a majestic ship. It is a very heavy ship. It is a beautiful thing to see out on the ocean. But that is not what we are voting on here. We are not voting on beauty or majesty. We are voting on how we can spend our defense dollars to provide the U.S. Navy with the most cost effective and most serviceable ships to keep the sea lanes open.

The Navy is basically structured for one purpose today, and that is to keep the sea lanes open so that we can get men and materials to any place in the world; and the Soviet Union's Navy is designed to do one thing, and that is to deprive us of that right and that capability.

The Chief of Naval Operations, Admiral Hayward, conceded yesterday before the Appropriations Subcommittee on Defense that this new, projected total cost of $326 million is nothing more than a ball park estimate and that the Navy would not be able to get a firm fix on the cost until it actually broke the seals on the *New Jersey* and saw what had to be done.

Mr. President, I am simply asking the U.S. Senate not to jump into a project without having any better estimate and not knowing what shape that ship will be in once they break the seals. We need a class A or class B estimate so that we can know what we are actually voting on.

Who here knows what we are going to put on the ship? They say there are going to be some guided missiles on it. They say they are going to leave those big guns on it which have a capacity to shoot 20 miles. Admiral Hayward also said yesterday that the current plans are for the battleship *New Jersey* to be an "austere" air and weapons platform, but that its capabilities would be significantly increased at the time of its first overhaul. So even if the $326 million figure were accurate, it would only represent a fraction of the money that ultimately is going to be spent on this one ship.

The battleship *New Jersey* is 41,000 tons. The new guided missile nuclear cruiser, the U.S.S. *Arkansas*, is a *Virginia*-class cruiser of 11,400 tons. I know that the Senator from Texas (Mr. TOWER) will agree with me that the four *Virginia*-class ships are magnificent. Senators should go and see these ships. They have the most modern technology. They have the most modern command and control centers in the U.S. Navy and awesome firepower. They also have awesome ability to defend themselves and to defend a battle task group headed by an aircraft carrier.

One need not spend very much time aboard a new nuclear cruiser and hear the commanding officer of that ship state its capacity before being sold on the effectiveness of that ship. At my age, I am not opposed to everything that is getting old, but reactivation of the 38-year-old *New Jersey* does not really make much sense.

We are all in a big sweat to build our Navy. We are trying to reach a 550- or 600-ship Navy, and I intend to vote for it. I consider the Navy to have been the stepchild of the defense forces of this country for the past many years.

At one time when I was in Newport News, I asked Admiral Kidd, who was commander of all our Atlantic Forces, "Admiral, if you had a choice between a *Nimitz*-class aircraft carrier and a warehouse full of spare parts, which would you take?"

He said, "Senator, that's no contest. I'll take the spare parts."

You cannot resurrect 1904's technology. If you are not going to use 1904's technology, on which the whole construction of the battleship *New Jersey* is based, we are going to have to reconfigure everything.

Finally, I want my colleagues to think about this: This is just a downpayment on the life-cycle costs of that ship. It is going to cost $60 million a year to operate. Assuming, as the Navy does, an additional service life of 15 years, the American taxpayers are being asked to spend $900 million, which obviously is underinflated, to keep the battleship *New Jersey* afloat.

That figure says nothing about the 2,000 badly needed men who could man 4 ships the size of the U.S.S. *Virginia*, with the comparable firepower of this ship, 500 men to man one of those ships, and 2,000 for this one, and the U.S.S. *Virginia* has a life expectancy twice as long as that of the *New Jersey*.

I know that persuasive and compelling arguments based on the *New Jersey*'s armor, can be made for this reactivation. But I believe most Navy people will tell you that the thickness of the hull is not what is important about a ship. What is important is the weaponry it carries to defend itself. If it has the ability to electronically confuse guided missiles or destroy them, if it has the ability to determine what is in the air, what is on the surface, and what is under the water, and to eliminate the threat before it

can be destroyed, that is what is important and what today's ships are built to do.

Some proponents of this reactivation say the *New Jersey* would be the most survivable ship in the U.S. Navy.

Now, that is hard for me to believe. I think that is based more on that 16-inch hull than it is anything else. And it is hard for me to believe that, with today's munitions and the munitions that the Soviet Union has, that this ship, even with that hull, is going to be all that survivable.

It is a very big ship—three times the length of a football field—but look at some of the Soviet weaponry. There is, first of all, the Styx missile, with a range of 25-nautical miles. It is deployed on four separate Soviet ships type. Will the Styx missile destroy the U.S. *New Jersey*?

Then there is the Shaddock. It is deployed by the Soviet's five ship types and it has a range of 250 miles, its a cruise missile. And there is the Siren, a missile with a 60-mile range. Then there is the SSN–7, with a range of 30 miles, which is on all the Soviet Charlie class submarines. And then there is the SSN–12, with a 300-mile range on the Kiev class aircraft carrier. Then there is the Soviet cruise missiles, the Kipper the Kangaroo, and the Kelt. They can be launched from the Blinder, the Bear, and the Badger airplanes.

So let me again remind my colleagues that we have a ship here which is not really all that survivable. My guess would be that the *Virginia* class cruisers and other ships in the Navy would probably be just as survivable—maybe more so—with a much longer lifespan for the same amount of money.

You know, the *New Jersey* was brought out of mothballs in 1950 for the Korean war. We had already locked it up after World War II. We brought it out in 1950 and then deactivated it in 1957. Then we brought it out again in 1968 for the Vietnam war.

Let me give you a brief review of what it did in the Vietnam war. It had a very limited utility value there. After spending somewhere between $25 million and $50 million in 1968, which now translates into $326 million, it was sent to Southeast Asia, where it faced no enemy air or sea forces. We could patrol up and down the Vietnam coast, bombarding the coastline with a reasonable assurance that no MIG's and no Soviet submarines were going to give us a minute's trouble. And they did not.

So there is the *New Jersey*, recently activated, patrolling 20 miles outside the Vietnam coast with its big 16-inch guns. But its effectiveness was so limited because of the 20-mile radius of the guns that the Navy finally just pulled it out.

Why? The Vietcong simply moved inland a couple of miles. They knew what the range of those guns were—20 miles. The *New Jersey* did not dare move in any closer for fear that Vietcong gunnery along the coast of Vietnam would destroy the ship. It was vulnerable then, even with no aircraft or submarines to worry about. But now, the proponents say it is the most survivable ship in the U.S. Navy.

Those shells were costing $2,000 each. They were not hurting anybody and they were not hitting anybody. So the *New Jersey* came home to be put back in mothballs just 20 months after being reactivated.

The U.S. Navy currently is short 20,000 midgrade skilled enlisted personnel and 2,600 middle grade officers. Last year, more than half of the service's midgrade petty officers who had reenlisted for a second tour changed their minds and left the Navy after 8 years. Although there are some encouraging signs that the recent pay increases may help the Navy's retention problem, only time is going to produce the experienced, seasoned sailors and officers necessary to man the kind of fleet we are talking about building.

Let us not dilute the manpower we have by placing 2,000 men on a ship with a highly questionable ability to defend itself, when we could man four ships with similar firepower with the same number of people.

It would take 90 officers and 1,950 enlisted men to man the *New Jersey*. And I can tell you that we have four ships tied up down in Newport News because we do not have the personnel to man those ships.

There has been some concern in the papers, and the Armed Services Committee has held some hearings on whether the United States has the industrial shipbuilding capacity to build all the ships scheduled to enter Navy inventories over the next 10 years.

We ought to recognize that reactivation of the *New Jersey* would require a major effort of almost 2 years in an American shipyard, and that obviously it is going to consume a lot of people and a lot of money that could otherwise be freed up to build other more efficient, more effective ships.

Mr. President, I do not consider myself to be any more or any less cost conscious that any other Member of the Senate. I am for defense. I am not for quite as much defense as this new administration is requesting, but I will vote for the lion's share of it. It will question every weapons system to make certain that it is cost effective and that the taxpayers and the men in the services are getting the benefit of the best technology.

For all the reasons I have outlined and others, Mr. President, I would consider reactivation of the *New Jersey* one of the least cost-effective things the Navy could do. This is not going to make America that much more secure. There are alternatives that would make us much more secure. Bear in mind that we still have a shortage of spare parts; and that we have a shortage of maintenance personnel.

I am not taking the $89 million away from the Navy. They could reprogram this money for things they want and need. And I want them to have it.

So I want to summarize by saying that you are dealing with a $326 million figure here that everybody knows is right off the top of somebody's head. The Navy says it. They do not mind admitting it.

Moreover, you do not know what you are going to get with this money. You do not know the weaponry; you do not know the capability. The Navy is going to leave those 16-inch guns on board, and you have already seen how effective those 16-inch guns were in Vietnam.

As a result, we ought to at least postpone this decision and let the Armed Services Committee get a definitive estimate on what it is going to cost and what we are going to get for the money in fiscal year 1982.

The distinguished Senator from Texas, in the Armed Services Committee, made the motion to take the aircraft carrier *Oriskany* out of this supplemental, and I applaud him for that, I think. I have never had the same reservations and objections about the *Oriskany* that I have had about the battleships *Iowa* and *New Jersey*. The *Oriskany* might very well have provided a new flight deck for us in a short period of time, and would have served a visible and effective role in the Navy. But I cannot understand taking a 38-year-old ship of World War II technology out of mothballs and spending perhaps $326 million, or maybe $500 million.

The reason I think the Senator from Texas made the move he did was because the cost estimates kept increasing to the point where it was over a half-billion dollars to reactivate that aircraft carrier. I applaud him although I never had the objections to the *Oriskany* that I do to the *New Jersey* or the *Iowa*. But if I had known those cost figures were going to escalate the way they did, I might have felt differently about it.

Now, I am prepared to yield 5 minutes or such time as the Senator from Wisconsin may wish. Is the Senator from Wisconsin prepared to go now?

Mr. PROXMIRE. I am prepared, but I understand the Senator from Texas wants to respond.

Mr. BUMPERS. I yield the floor. I reserve the remainder of my time.

Mr. TOWER. Mr. President, there are so many things which have been said by the distinguished Senator from Arkansas that I can take issue with. Nonetheless, I will confine myself to responding, to relatively few of those. I know there are other members of the committee on the floor who would like to address themselves to these issues as well.

First, the Senator from Arkansas said that the Marines did not think the *New Jersey* was worth anything to them. The Marines thought otherwise, and General Barrow has been one of the strongest supporters of this. I do not know whether the Senator from Arkansas has ever been in Vietnam or whether he was there during the hostilities. I was and I was with the Third Marine Division up in that area and had the opportunity to visit with General Davis up there. They were very pleased with the new dimension that the 16-inch guns gave to them. Here is General Davis' report—if the Senator from Arkansas wants to contradict this he has got to take on the Marine Corps, the guys actually fighting over there.

Mr. BUMPERS. As a former Marine that is going to be tough for me to do.

Mr. TOWER. Let me read what Gen. R. G. Davis, commanding general of the Third Marine Division, said:

Accuracy. The 16"/50 GFCS has been consistently more accurate and more responsive to spots than any other Naval Gunfire control system used in Vietnam.

Penetration. The 16" projectile has a greater ability to penetrate hard targets than any other naval gun, artillery piece or air dropped weapon.

All-Weather Capability. Although there were many days when adverse weather prohibited air support of ground units, this weather did not restrict the use of naval gunfire support from the New Jersey.

Improved Morale. Since the arrival of the battleship in Southeast Asia, the mere fact of its presence has had a noticeable effect on the morale of friendly troops.

Now, that says a great deal for the 16-inch gun. Those are the Marines talking, so obviously they disagree with the Senator from Arkansas.

But the 16-inch guns alone are not what we are talking about. Let us talk about other aspects of this ship.

The Senator from Arkansas, who assisted in the launching of that ship, the U.S.S. *Arkansas*, said about that ship, "a magnificent guided missile cruiser with an unbelievable amount of firepower. You talk about majesty in motion, that ship is a magnificent ship."

Mr. President, I am delighted that the Senator feels that way about the U.S.S. *Arkansas*. It is a good ship. But let me make a comparison or two here. It has no armorplating and no offensive strike capability other than those provided by its 5-inch guns. It takes 5 years to build one, and it would cost $1.2 billion to $1.6 billion in fiscal year 1982 dollars.

We are talking about 21 months and $326 million to reactivate the *New Jersey*. Let us look at the comparison of the offensive capabilities.

The *Arkansas* has two ASW helicopters; two SAM/ASW missile launchers; two 5-inch guns; two triple torpedo tubes; and two close-in weapons systems.

On the other hand—by the way, it has no armor—the *New Jersey* has 9 16-inch guns; 20 5-inch guns; 4 close-in weapons systems; 16 Harpoon missiles; and 32 Tomahawk missiles. The 16-inch guns, the Harpoon missiles and the Tomahawk missiles are force projection weapons. The Tomahawk missile with its 700- to 900-mile range is a force projection weapon, and the Harpoon is an antishipping weapon.

I might also note that the Senator from Arkansas said it would take 2,000 men. The Navy estimates are around 1,567. That would leave additional space on that ship because you are not putting the full complement that you would have on it in its old configuration for a large detachment of Marines. This will be an excellent system for forcible entry, and would afford a great force projection dimension to our rapid deployment capability.

So, in terms of cost-effectiveness we are really getting, I think, a cost-effective system here.

The Senator from Arkansas repeatedly calls it a 38-year old system. When you are talking about ships, you deal with service life. Let us not be misled by that. It is easy to mislead people, and this is misleading.

The service life of the *New Jersey* is a little over 13 years; the average service life of all the *Iowa*-class battleships is 10.7 years. The average service life of all the combat vessels in the U.S. Navy is approximately 15 years, so the remaining three *Iowa*-class battleships have a lower average service life even than the *New Jersey* which has a longer service life than any of the others. The *New Jersey* has a shorter service life than the average combatant vessel of the U.S. Navy today.

Now, this is a golden opportunity to utilize something that is useful. People want us to save money on defense, to go the most cost-effective way, to get the biggest bang for the buck. This is the way to do it because in this battleship you have got a flexible platform for the addition of all sorts of modern systems and an enormous amount of firepower. It will have more firepower than anything else in the fleet except the aircraft carrier.

It will be the most survivable surface vessel afloat. There is nothing wrong with that 12-inch hull, and my friend from Arkansas gave it 4 more inches than it needed. Actually above decks there is some 16 inches of armorplating.

It makes a highly survivable vessel. The reason we do not put a 12-inch hull on them anymore is because we cannot afford to. The CGN, the praises of which have been sung here by the Senator from Arkansas, has no armorplating. So we are looking at a far more vulnerable system there.

Looking at it overall, without going into all of the details, I think we should conclude that this is an enormously cost-effective program. We can still bring the *New Jersey* in for almost one-fourth the cost of one CGN. That is a pretty good buy.

Friends and neighbors, and I hope the people of the United States, will applaud us for our efforts to make use of something that we know can have a viable capability for the remainder of this century.

Mr. BUMPERS. Mr. President, I thought the Senator from Wisconsin wanted to speak.

Mr. TOWER. I will go ahead and use some time on this side.

I yield to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to the amendment proposed by the distinguished Senator from Arkansas. I think he is just as wrong as he can be.

Mr. President, the Navy is desperately short of ships. We have about 450. We need between 600 to 700 ships.

With Mideast problems and the need for a strong Indian Ocean presence, we need more ships, especially for purposes of patrolling that area.

Now, as to this particular ship, the *New Jersey* can be reactivated in about 21 months. The cost is attractive, between one-fourth and one-fifth the cost of a new one. A new ship would cost $1.5 billion. This ship can be remodeled for about $326 million.

The *New Jersey* will add significant capability to the fleet. It can be used as a cruise-missile platform in which it could carry 32 Tomahawks, plus 16 Harpoon missiles.

It has heavy firepower, 16-inch guns, to support landing forces.

It has a potential flagship capability for a rapid deployment force.

It can maintain a presence with Third World countries.

It can fill in for carriers when they are drawn down; it can refuel other ships, including its own escorts.

Mr. President, the *New Jersey* is the fastest, the most survivable, and has the greatest endurance of any nonnuclear ship in the fleet.

Why not do this? Why spend $1.5 billion when we can spend $326 million and do the job? It just does not make sense to do otherwise.

Now, some of those who oppose this say you cannot get the manpower. I want to say that the military pay raises have increased enlistments and retention. Furthermore, this particular ship has a fascination for people who want to go in the Navy. It has high interest from recruits. Over 300 people have already volunteered to serve on this ship.

Adm. Harry Train, the commander of the Atlantic Fleet, says he will guarantee a crew of 1,500 people. That is what it takes.

The skill levels for sailors manning the *New Jersey* are not as high as some ships. It is a nonnuclear ship, and it will not require the skilled manpower that would be necessary in certain other ships.

This reactivation is supported by prominent naval and defense officials, and I think they know more about it than the public generally because they are experts in it.

The Chief of Naval Operations last year supported it in spite of the fact that the administration was against it. The administration last year was wrong. The administration this year is right. They are supporting it. Admiral Hayward is again supporting it this year.

General Barrow, the Commandant of the Marine Corps, supports it; the Secretary of the Navy, the Honorable John Lehman, supports it; the Secretary of Defense, the Honorable Caspar Weinberger, supports it; and last year it was approved by the House and Senate authorization committees. We only lost it here finally by, I believe, three votes.

Mr. President, this is an opportunity to help the taxpayers of this country. This is an opportunity to get a ship and get it quickly, a ship of the kind this Navy needs, and we are unwise if we do not go forward and build this ship at one-fourth to one-fifth the cost of a new one.

Someone said that this would be an old ship even if it was remodeled. That is not true. The Navy says they could do this work and bring it up to date to produce a modern vessel by spending less than $350 million instead of spending $1.5 billion.

Mr. President, I hope that the amendment of the Senator from Arkansas does not pass and that the Navy will be given the word to go forward. We need to go forward. We need more ships and we need them now, not later.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield myself 5 minutes on this matter.

Mr. President, this is a repeat matter in many ways. We had it up last year. The Senator from Arkansas brought it up.

There used to be a highly respected saying of, "Use what you have." I still have a pretty strong belief in that concept, especially when the Navy comes in and proposes that they use one of the old ships rather than push for a new one. Usually it is the other way.

Last year I voted on this same ship on the basis of priorities of money and manpower. I voted against it. It had an appeal to me then of a kind, and rather solid. But on the basis of priorities I thought it did not have any place in the bill last year.

Now the situation is different. We have more money than we had last year. We have a new chairman. We have better prospects on manpower. I really think it is worth the money, it is worth the experiment, and it is a very valuable weapon of its kind. Of course, times have changed a lot since it was built. I understand it is one of the finest pieces of shipbuilding we ever had up to its time. There is a basis now for making it into a cruise missile carrier, and also to be used for VSTOL aircraft, which I think we should emphasize and press for.

I think it is worth the money and I would like to see it move forward. I am convinced that it will have some value and it might be of splendid value when put to further uses or if similar ships can be redone.

For the reasons I have given, I am satisfied with it myself and do not support this amendment, even though offered in the best of faith for some reasons that have to be met, those which the Senator from Arkansas gave to challenge this item. But I believe in its prospective usefulness. It is certainly worth the try. I hope under those circumstances we will defeat the amendment.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Arkansas.

Mr. COHEN. Mr. President?

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield time.

Mr. COHEN. I believe our time is under the control of the Senator from Texas. I will take my own time.

Mr. President, just about a year ago Adm. Tom Hayward, the Chief of Naval Operations, said the United States enjoyed what he called a slim margin of superiority over the Soviets in any worldwide naval engagement. Admiral Hayward's predecessor, Adm. Jim Holloway, had been able to say the very same thing for each of the 4 years he was Chief of Naval Operations.

But this year the message changed. This year the calculations came out differently. This year Adm. Hayward came before Congress and told us and the American people in very stark and sobering language that the United States no longer held a clear margin of superiority over the Soviet Union. Soviet military power and influence had grown so much that even though our forces had continued to improve, the Soviet's gains were so great that any discernable U.S. advantage had been overcome. In his view the final outcome of any balance-of-power calculation between us and the Soviet Union had to be viewed as "muddy." As former Secretary of Defense Brown put it—

> As we built, they built. When we stopped, they kept building.

I think Admiral Hayward's grim message added a sad and depressing chapter to our country's naval history.

The Soviet Union has never been ambiguous in its goals—to impose a collectivist philosophy on the nations throughout the world. This is a doctrine to which they are devoted and dedicated.

But in recent years we have seen the expression of its goals become bolder and the extension of its power more arrogant and ruthless.

In part, I think that we in the United States are responsible for this imbalance, this growing imbalance, in global power because we let self-doubt seize us by the throat and we allowed confusion to flow through our national veins. Our disorientation and indecision have been taken by our enemies and allies alike as evidence of a lack of military power and the absence of any moral purpose. But I think there is time to reverse this decline if we have the will and commitment to reverse it. As our new Secretary of the Navy has stated recently:

> It must be clearly understood by all members of the services, by all officials in the Government, and by the American public that our national security demands maritime superiority and nothing less; no euphemisms, no fancy academic hedgewords.

Nothing less. Maritime superiority.

That brings us to today's discussion. I do not think the Senator from Arkansas is in opposition to getting more ships into the fleet as quickly as possible. But I think he is erroneous when he suggests that anyone on the Armed Services Committee or anyone in the Pentagon is suggesting that there is a simple, inexpensive quick fix. There is no such thing as a simple, inexpensive quick fix today. But we do have to ask the question, how does the *New Jersey* reactivation cost compare with some of the alternatives?

Three-hundred million dollars is certainly not inexpensive. It is expensive by any standards. But, as compared to the U.S.S. *Arkansas*, it is not. If the U.S.S. *Arkansas* were built today, it would cost between $1.2 billion and $1.6 billion in 1982 dollars. So we must again ask, expensive as compared to what?

In terms of its age, again the Senator from Arkansas talks about a 36-year-old ship. Well, that is not how long it was used—its actual service life—which Senator TOWER pointed out was less than 14 years. According to the Senator from Arkansas, we cannot resurrect the 1940's technology, and I agree. We also cannot resurrect 1940's quality, and that is something that the *New Jersey* possesses—quality in terms of its armament and capabilities in terms of its speed and firepower.

I will tell the Senator from Arkansas if the Navy were only going to reactivate the *New Jersey* and put it out to sea as it is now, I would not support it. We are going to reactivate it and put it to sea in a way in which it will be competitive, and even superior, to what we have to face on the open seas.

I was frankly surprised that the Senator from Arkansas was going to suggest that he might even give consideration to supporting the *Oriskany*.

Our committee held some hearings on this proposed reactivation, and the very same arguments that have been used against the reactivation of the *New Jersey* have suddenly been used to favor possibly the reactivation of the *Oriskany*, that is, we would get an added platform in a short time.

The fact is that the evidence before the committee showed that the *Oriskany* was maybe 4 years away, not 2, at a cost of over $500 million in a class F estimate.

So, I do not know how the Senator from Arkansas would be in a position to even lend moral support to the reactivation of the *Oriskany*, when in fact, the evidence would indicate it would not be a new platform in a short time, but in a very long time.

That is really the reason we are calling for the reactivation of the *New Jersey*. We can get it out in 21 months. Six months will be needed for planning and the balance of that time to do the actual work.

I would urge my colleagues to reject the amendment of the Senator from Arkansas and to authorize the funding for the *New Jersey* to give us a ship that will have firepower, endurance, durability, and flexibility.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. BUMPERS. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator has 32 minutes remaining.

Mr. BUMPERS. I yield such time as the Senator from Rhode Island desires.

Mr. CHAFEE. Mr. President, I realize the Armed Services Committee has given serious consideration to this matter, but let us not think that the Armed Services Committee is infallible or that the Secretary of the Navy, the Defense Department, or anyone else is infallible. Let us look at the Senate report of June 20, 1980, not quite a year ago, from the Armed Services Committee dealing with the ship *Oriskany*.

As you will recall, Mr. President, at that time the Armed Services Committee came to this floor recommending that two ships be pulled out of mothballs and reactivated. They were the *Oriskany*, an aircraft carrier, CV–34, and the *New Jersey*.

Here is what they had to say about the *Oriskany*:

> The committee recommends authorization of $304 million for reactivation of an Essex class carrier—40,000-ton displacement—the U.S.S. *Oriskany* (CV–34).
>
> The funding provides for activation and repair of the Oriskany and installation of critical communications and other equipment required to assure compatibility with current fleet standards. The actual ship

overhaul will require 15 to 18 months with deployment anticipated in 1983. This is in contrast to 5 to 6 years required for new ship construction. The expected service life is approximately 5 years.

Do those words not ring a bell? This is the Armed Services Committee talking a year ago:

The reactivation of the Oriskany is an effective near-term measure to increase fleet resources at reasonable cost. The addition will provide some interim relief of the strain on current naval forces. . . .

So, there you have it. Now let us hear what the committee had to say a year later. This is the committee that had told us that it would take 15 to 18 months. And by the way, the Appropriations Committee knocked out the *Oriskany* and knocked out the *New Jersey*. Then the Armed Services Committee rethought the matter. This is what they had to say this year, not even a full 12 months later:

The request for $146 million for advanced material procurement to commence reactivation of *Oriskany* is denied. The committee feels that the estimates of the length of time required to fully activate *Oriskany* of 34 to 42 months from full authorization in fiscal year 1982, do not constitute a credible near-term improvement in the Navy's offensive capability.

Mr. President, what happened to this estimate? In 1 year, they say 15 to 18 months; the next year, it suddenly leaped to 34 to 42 months.

The report goes on:

The modest improvement in capability that is provided in a ship that already has some 26 years of active service life does not justify the added strain that will be placed on the Navy personnel system by the requirement to provide over 2,000 ship's company personnel in the mid-1980's, nor does it justify the expense reflected in the total reactivation cost estimates of $518 million which have risen from an initial estimate of $305 million.

Now, Mr. President, anybody can make mistakes, and we recognize that. This is a hard-working committee that tries to be careful and, indeed, they are careful. But they made a mistake on the *Oriskany* and, Mr. President, they are making the same mistake on the *New Jersey*.

We have heard the distinguished senior Senator from Maine just say that the *New Jersey* will be reactivated in 21 months. Now, Mr. President, we all recognize that we like to be optimistic and we try to be optimistic. But the suggestion that the *New Jersey* will be ready in 21 months is completely unrealistic.

Mr. COHEN. Will the Senator yield?

Mr. CHAFEE. Yes, I yield.

Mr. COHEN. Is he suggesting that the committee made a mistake in rejecting the *Oriskany*?

Mr. CHAFEE. I said that a year ago the committee came to this floor recommending the *Oriskany* with all the persuasive powers at their command. A year later, they have reversed this position. Less than a year ago, they said to us on the *Oriskany* that the actual ship overhaul would take 15 to 18 months. Less than a year later, they come back and tell us it will take 34 to 42 months.

A year ago I was opposed to the reactivation of the *Oriskany*, as was the Senator from Arkansas. As the Senator will recall, we did not go to a vote on that issue because we were defeated in the first amendment we attempted on the floor which was to deny funding to proceed with reactivation of the *New Jersey*. That amendment failed. I think the vote was 40 to 51. The *New Jersey* and the *Oriskany* were subsequently knocked out in the Appropriations Committee, however.

The point I am making here, Mr. President, is that the committee made a mistake last year in connection with the *Oriskany*. They recognized their mistake this year. But I think the same kind of careful thought should be applied to the *New Jersey* now as was applied to the *Oriskany*.

The committee is fallible, as any committee is.

Mr. COHEN. Mr. President, on the issue of the *Oriskany*, the committee acted on evidence that was presented to it last year and, on further investigation, found that there was a great deal of difference between the testimony of a year ago and that of this year. I think the committee ought to be commended for acting responsibly in this case and saying, yes, there has been a significant change in the time required to reactivate. There has not been a significant change in the time required for the *New Jersey*; the *New Jersey* is in considerably better shape than the *Oriskany*. That is the reason the committee rejected the *Oriskany* reactivation this time.

Mr. CHAFEE. Let us take a look at the estimates that come forward here in the latest report. The estimates for the *New Jersey* state that it will take $326 million and 21 months. Well, last year, the distinguished Senator from Arkansas said:

Let's put $1 million, let's put $2 million into a study of these ships and see if they can be brought back. Let's get some hard facts.

But we could not get those hard facts. No one accepted the $1 million or $2 million offer. The Committee on Armed Services was not satisfied with that. They wanted to proceed.

Now, how hard are these facts? I have here in my hand a conversation with Adm. Thomas B. Hayward on naval preparedness in the 1980's, by the American Enterprise Institute, hardly a subversive organization. On page 18, Admiral Hayward is saying:

We could generate a lot of offensive capability with these warships. It takes, however, about a half-billion dollars to overhaul and thoroughly modernize a battleship.

A half billion dollars. Yet this estimate is for $326 million, which indicates that these figures we are getting are not very firm. One figure is from the committee, the other is from the Chief of Naval Operations of the U.S. Navy.

Mr. President, that is the first point. The first point is that the estimates are soft. The second point is that the ship is estimated to have a useful life of 15 years, as I understand it from the committee. The language that they used is, "a credible near term offensive addition." That is the same language, practically verbatim, that they used last year with the *Oriskany*. But on the *Oriskany*, they were talking about 5 years; for the *New Jersey*, they say it is 15 years.

Mr. President, let us set those arguments aside. The primary problem facing the U.S. Navy today is personnel—not only the attraction, but the retention of the finest people we can get. You might have picked up the newspaper today and seen that the House Budget Committee eliminated the 5.3-percent military pay raise that was in the President's budget. This bodes ill for the retention of personnel in the military services.

Mr. President, you have noted that the amendment of the Senator from Arkansas does not eliminate this money. The money is left in the defense budget, and I think that is a wise move. I think that this is the kind of money that should be used for other ships or, indeed, if it can be moved from this section into personnel, then it can be used even more appropriately. Personnel is the area we have to concentrate on.

Personnel is a problem that goes back into the early seventies and it is a problem today. I was most disturbed, as I believe the members of the Committee on Armed Services who are present here today were, about the rejection in the House Budget Committee of that 5.3-percent military pay raise.

This ship is going to take—it seems to me the estimates vary—between 1,500 and 2,000 men. When you count all the support personnel, it will be easily 2,000 men. Yet we have personnel problems in manning the ships we have to have, Mr. President.

I think the wisest thing that the Senate could do this afternoon is adopt the amendment proposed by the Senator from Arkansas. Let us get our manpower problems under control. If we are building ships, let us build ships for the future.

It is said this reactivation costs no more than a frigate. Well, let us get a frigate. Let us get a frigate that will last 30 years, not a remodeled battleship that is older than the Secretary of the Navy, and has a vastly more limited life.

So, Mr. President, I support the amendment of the distinguished Senator from Arkansas and hope that the Senate will adopt it.

I yield back my time to the Senator from Arkansas.

Mr. WARNER. Mr. President, having control on this side, I yield myself such time as may be necessary.

Mr. President, the Senate Armed Services Committee has recommended approval of the administration request for funds for reactivating of the U.S.S. *New Jersey*.

The committee's rationale as stated in the committee report is that:

The Navy will gain an extremely credible near-term offensive addition at a cost roughly equivalent to that. . . . (of) a frigate.

The reactivation of the *Iowa*-class battleships would provide highly survivable, multipurpose offensive weapons systems that are clearly the equal of any battle cruiser the Soviets could deploy in the next decade.

The facts are that the *New Jersey* is in excellent condition; it is not an old ship in terms of active service life. It can be brought back into service within 21 months with a modern, updated weapons suite including: Tomahawk cruise missiles; Harpoon antiship cruise missiles; the Phalanx close-in weapons system; modern electronic warfare and radar equipment; and a modern communications package. It is the most survivable ship afloat today.

The issues in question are as follows:

COST

The argument has been made that the cost estimates are soft and unreliable and we are likely to have a major cost overrun.

It is true that the cost estimates are class F estimates. However, they were prepared by the Ship Cost Estimating and Analysis Division of Naval Sea Systems Command. They were prepared by economists, analysts and engineers who have substantial experience in this area. The Navy has experience in reactivation of the *New Jersey*. It was estimated that the reactivation of the *New Jersey* in 1967—class F estimate—would cost $24 million—1967 dollars. The actual cost was $21 million, or 12.5 percent under the estimate and it took 1 year. The reactivation was approved in August 1967, and the *New Jersey* fired her first shots off Vietnam in September 1968. The pricing is thus based on known condition and past experience. The estimates for the addition of the modern weapons system, environmental systems, and habitability improvements are based on the Navy's experience with other ships which have been modernized with the same systems—that is, Phalanx close-in weapons system, sewage pollution control equipment, conversion to Navy distillate fuel.

Furthermore, to replicate the *New Jersey* under today's conditions would cost an estimated $2 to $3 billion. In fact, the U.S.S. *Arkansas* (CGN-41), a nuclear-powered guided missile cruiser that is about one-fifth the size of the *New Jersey* and currently has no offensive capability, aside from two 5-inch guns, and no armor for increased survivabiilty, would cost about $1.5 billion and would take some 5 years to construct.

AGE

The argument has been made that the *New Jersey* is an "old" ship—World War II vintage.

While it is true that the ship was commissioned in 1943, in terms of service life the *New Jersey* is a young ship, having been in active service for a total of 13½ years. This valuable investment was layed-up, or mothballed, at considerable expense so that she could be brought back to service when needed. The average age of the total of the four Iowa-class battleships is, in fact, even less at 10.7 years. The average age of the current Navy fleet is just under 15 years.

1940'S TECHNOLOGY

The argument has been made that we should not spend money on 1940's technology to meet the threats of the 1980's.

The answer to this is simply that the *New Jersey* will be outfitted with the most modern weapons systems available. The ship itself, as it exists at this moment, provides the survivable and mobile platform for those weapons systems.

The Tomahawk antiship and land-attack cruise missile is so new that the first ship will only receive it next year.

The Harpoon antiship cruise missile is the most modern available to the United States.

The other weapons systems are the same as those on our most modern combatants.

MANPOWER

The argument has been made that with the current shortage of experienced Navy manpower we should use our scarce manpower resources on new and more effective ships.

The answer to this argument is two-fold. First, there are no new and more effective ships available. It takes from 5 to 7 years to build a new combatant and, therefore, there is no more effective ship than a battleship with modern weapons systems such as those planned.

The second answer to the manpower issue is that there is every likelihood that the *New Jersey* can be manned without harming the fleet.

The proposed crew of the *New Jersey* would represent less than three-tenths of 1 percent of the Navy's 500,000 personnel. The Congress has recognized the manpower problem and has taken effective action to solve the problem including:

The Nunn-Warner bill;

The doctor's bill;

The 11.7-percent across-the-board pay raise; and

The fair benefits package.

Also, there are several manpower initiatives that are likely to be approved this year including further compensation initiatives and a GI bill.

The trends have been positive in recent months. Retention of career personnel is up considerably and the return of prior enlisted personnel to the Navy has gone up from 800 a month to over 1,000 a month.

The Chief of Naval Operations has testified that the manpower requirements can be met.

SUMMARY

Mr. President, in sum I believe that the reactivation of the *New Jersey* is a sound proposal. It will provide a highly capable ship in the near term and at a modest cost.

The administration supports this program, the Navy supports this program, and the Armed Services Committee supports it.

I urge my colleagues to defeat the amendment of the Senator from Arkansas.

With the permission of the distinguished Senator from Rhode Island, former Secretary of the Navy and former colleague for many years, may I propound some questions?

Mr. CHAFEE. Certainly, Mr. President.

Mr. WARNER. Mr. President, great emphasis has been placed by the former distinguished Secretary of the Navy on the fact that we have only a class F estimate with which we are going before the Senate to justify bringing this ship out of inactive status. I am certain that the distinguished Senator from Rhode Island understands what makes up a class F estimate. My question to him is as follows: Does he recall another battle in this Chamber in which, ironically, the two of us, again, were on opposite sides, and the ship was the U.S.S. *Saratoga*? And does he recall the estimate class for that ship, which he supported sending to the Philadelphia Naval Shipyard?

I wish to refresh the memory of the Senator from Rhode Island. It was a class F estimate on which the distinguished Senator from Rhode Island, very persuasively, in this Chamber, managed to get sufficient votes to send that ship to the Philadelphia Naval Shipyard. And he was joined by no other than the distinguished Senator from Arkansas, who, likewise, supported the rehabilitation of the U.S.S. *Saratoga*, based on a class F estimate.

My question today, to both distinguished Senators, is this: If class F is so insufficient for this ship, why was it sufficient for the U.S.S. *Saratoga?*

Mr. CHAFEE. I will reply to the distinguished Senator from Virginia, who is very well respected in these areas. He had an outstanding career as Secretary of the Navy. He is making a splendid contribution to the Armed Services Committee and is a most effective member.

Mr. WARNER. I learned under the tutelage of the Senator from Rhode Island for 3 years, as his chief apprentice.

Mr. CHAFEE. The Senator could not have had better training. [Laughter.]

I wish to make a couple of points. So far as the *Saratoga* is concerned, it was not a question of whether the *Saratoga* should be overhauled or not. The *Saratoga* was going in for an overhaul. So let us get on with the job. The question was whether it should go to Newport News or Philadelphia. But there was no question about it being overhauled; whereas, this is a fundamental question as to whether to proceed at all with this battleship.

Second, if the Senator will review the record carefully, I did not speak on the floor in connection with the *Saratoga*, to the best of my memory. If I did, I will be corrected. But I do not recall it, and my remarks must have been brief. Undoubtedly, they were persuasive. I voted for it; there is no question about that.

This is the point, Mr. President: We have here an estimate by the Committee on Armed Services that the overhaul of this vessel will be $326 million. Here is the Chief of Naval Operations—and I do not know who can be referred to more than the Chief of Naval Operations—speaking at a group that is "in" these days. Who is more "in" than the American Enterprise Institute? That is the inner sanctum. This is what the Chief of Naval Operations says:

> It takes, however, about a half billion dollars to overhaul and thoroughly modernize a battleship.

"About" does not get you down to $326 million.

Mr. WARNER. Mr. President, I have the floor, and I yielded for a question.

Mr. BUMPERS. Mr. President, will the Senator from Virginia allow me, on my time, to give an answer to the question raised about the *Saratoga*?

Mr. WARNER. I yield.

Mr. BUMPERS. The *Saratoga* was an aircraft carrier which was 20 years old. It had been on duty for 20 years. What we were voting on—and I would vote again tomorrow to do the same thing—was to what we call SLEP the *Saratoga*, which is to extend its life expectancy.

Here is a ship that the commanding officer knows about. He knows every little rust spot on that ship. We extended the life of the *Saratoga* by 15 years by sending it to Philadelphia to extend the life expectancy.

A class F estimate is always questionable, but the Navy has never opened and inspected the *New Jersey*, and it has been in mothballs for 12 long years. That thing may be a rust bucket for all we know.

Mr. WARNER. I respectfully disagree with the Senator. The U.S. Navy Board of Inspection and Survey inspected the *New Jersey* in 1977 and found the hull and machinery in excellent condition. That Board declared the *New Jersey* fit for further service.

Mr. President, I point out that the argument is being used that a class F estimate is so worthless that it cannot substantiate the justification for bringing this ship out. Yet, it was used as a basis for the SLEP program, a program costing in excess of $500 million—money approved by this body on the basis of a class F cost estimate.

It is interesting that the Senator brings up the commanding officer, because, to show the interest of the Department of the Navy, a former commanding officer of the *New Jersey*, a former chief weapons engineer aboard the *New Jersey*, and some of the main battery officers who served on the *New Jersey* are going to be among those who will work on it while she is in the yard.

With respect to the issue of manpower, we likewise had the same issue in connection with the *Saratoga*. There, it was irrefutable that, by virtue of the *Saratoga* going to the Philadelphia Naval Shipyard, some 1,500-plus sailors were removed from the active fleet. If the manpower argument is so persuasive in connection with the *New Jersey*, why did it fail in connection with the *Saratoga*? I ask that of the distinguished Senator from Rhode Island.

Mr. CHAFEE. We are going back some time in the arguments so far as the *Saratoga* is concerned.

I believe the point was that, in connection with the *Saratoga*, the argument for Newport News was that it could be overhauled at a so-called home port, where there would be sleeping quarters for the personnel.

Mr. WARNER. To refresh the distinguished Senator's recollection, there were insufficient qualified shipfitters in Philadelphia to maintain the workload at a pace desired by the Navy. Therefore, 1,500-plus sailors were literally pressed into duty aboard that ship in Philadelphia, removing them from the active fleet for almost 3 years.

Mr. CHAFEE. I do not recall all the arguments back and forth as to the *Saratoga*. I was not deeply involved in that. I voted for the Philadelphia overhaul.

However, I think we should get on with the problem we have here. The question is this: Do we as a government, as representatives of the people, who want strong armed services, want to spend a half billion dollars overhauling a ship and getting it into commission—a ship which, at best, even with the most optimistic answers of the proponents, will have a 15-year life—when we can spend the money and get what we should be getting, a modern ship?

Let us not play around with sounding glorious trumpets for past memories by getting on with a ship that we have not inspected.

Mr. WARNER. Will the Senator yield on my time?

Mr. CHAFEE. I yield.

Mr. WARNER. What is it that you are going to get for $326 million in terms of a modern ship?

Mr. CHAFEE. You are not going to get anything, either a modern ship or an overhaul of this ship, for $326 million, according to the Chief of Naval Operations, and you are not going to get anything in 21 months. I think we all recognize that.

I am surprised that we have estimates coming in that this ship can have turrets taken off, can be overhauled, and can have this retrofitting that has to be done in 21 months. That is less than 2 years. I do not know who dreamed up that figure.

I believe we should move on. If we should have frigates, let us get them. But let us not be dealing with ships that are out of style and costly to operate.

Mr. WARNER. How many frigates can you get for $326 million?

Mr. CHAFEE. I do not think you can get one.

Mr. WARNER. No. You are right. You cannot.

Mr. CHAFEE. You are not going to get this ship.

Mr. WARNER. You are getting a powerful ship for this figure—with the reactivation of the *New Jersey*.

I believe it is in the RECORD already, but if it is not, I ask unanimous consent to have printed in the RECORD a letter from the Secretary of the Navy, dated April 2 of this year, to Senator COHEN, which states why and how this ship can be brought out in 21 months.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE NAVY,
Washington, D.C., April 2, 1981.

Hon. WILLIAM S. COHEN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR COHEN: This letter is in response to your request to verify the briefing materials on the reactivation of the carrier *Oriskany* and the battleship *New Jersey* which were left with your staff last evening. That material shows a cost of $89m in FY 81 and $237m in FY 82 for the *New Jersey*.

All of the information provided in that briefing material was approved by me and is as accurate as we can make it. To review, it is our intention to do the following to *New Jersey:*

Upgrade habitability.

Update radars by adding the SPS 49 Air Search Radar.

Provide 2–4 helo spots aft.

Convert to Navy distillate fuel.

Add: Sewage collection capability, eight armored box launchers for Tomahawk (32 missiles), four Quad Cannisters for HARPOON (16 missiles), four Close-in Weapons Systems (Anti-Cruise Missile Rapid Fire Gun Systems), AN/SLQ 32 Electronic Warfare System and Modernized communication.

Of course, as with any overhaul of this nature, there may be certain unanticipated problems which we uncover that could require a change in our cost estimate. Such problems may cause us to come back to you later. However, based on our recent inspections and on our past experience in reactivating this ship, we are not presently aware of any significant problems that could affect the level of funding and will immediately report to you any significant deviations from cost estimate and delivery schedule.

I noted that the briefing sheets did not include the time involved in completing Phase I of the battleship reactivation. We have estimated that once we have an approved program we would require six months planning time and fifteen months of industrial effort.

I regret the confusion caused by the differing numbers presented in the past. Questions relating to the VLS options for Phase I left unsettled the advisability of removing the no. 3 turret in Phase I or Phase II. Those uncertainties are now resolved and are reflected in the information above.

You have my personal assurance that I will closely monitor the cost and delivery time of this reactivation.

Sincerely,

JOHN LEHMAN.

Mr. COHEN. Mr. President, will the Senator yield?

Mr. WARNER. I yield.

Mr. COHEN. I was interested in the response of the Senator from Rhode Island, when he said:

Who believes that you can reactivate this ship in 21 months?

In fact, I am told that the ship was built in 1 year and 1 day. The testimony from the Navy now is that they can reactivate it in less than 2 years.

Second, so far as the cost estimates are concerned, in 1968 we completed a reactivation of the *New Jersey*. There was then an estimate of approximately $24 million to reactivate, and the Navy spent only $21 million, or 12.5 percent under the estimated cost. So they do already have a record.

Third, the Senator from Texas indicated in his statement that they are going to use some of the same people to reactivate it this time as they did in the late 1960's, when they came under cost with a class F estimate.

Mr. WARNER. And at that time the reactivation was accomplished in 12 months. Am I correct?

Mr. COHEN. That is correct.

Mr. CHAFEE. But, gentlemen, gentlemen. You are not suggesting on the floor of the Senate that this reactivation is anything similar to the last reactivation? What they did in the late 1960's, in effect, was to take this battleship out of mothballs. They did not make any significant changes to it. But you are proposing putting a whole series of missiles on it. Certainly the Senator from Maine is not sug-

gesting that this is a similar operation to that in 1968, is he?

Mr. COHEN. I am not suggesting it, but I am suggesting that they have a proven record of reactivating it once, and this reactivation will be much more significant. Still, it will not take a great deal more time to put on the firepower described by the Senator from Texas. Moreover, the afterturret will not be removed, but will remain in operation along with the weapons system modernizations.

I want to touch on a point made by the Senator from Virginia. I do not understand the manpower argument because that is raised when the Senator from Rhode Island suggests that because they are going to kill the 5.3-percent pay raise in the House, they are necessarily going to kill the manpower initiatives. Then is he suggesting we come back to this body and say that because they killed the manpower initiatives, we should delay taking any action on rebuilding our force structure? You should not look at the existing manpower programs and then shape the shipbuilding to conform with it. You have to go forward with a reconstruction program and then deal with the manpower that is needed.

Congress has gone on record in recent years with the Nunn-Warner bill, which has had a tremendous impact on retention of petty officers; in addition, we have had the doctors' bill, and we have had the 11.7-percent pay raise of last year. We have taken the initiatives needed to help the Navy retain personnel.

I do not believe we should say, "Look at our manpower and then build our fleet of ships to conform to the manpower." Let us build the ships first, and make the manpower conform to the ships.

Mr. WARNER. Mr. President, I point out to the distinguished Senator from Rhode Island that the turrets are not to be removed under the program that is proposed. They will all remain intact.

I should like to go back with my distinguished colleague, the former Secretary of the Navy, and refresh his recollection as to when he became Secretary. I believe it was in January or February 1969. This ship then joined the fleet, under the operational control of the then Chief of Naval Operations. Am I correct?

Mr. CHAFEE. That is correct.

Mr. WARNER. Would the Senator from Rhode Island care to comment on the distinguished record of that ship during the time it was on active duty?

Mr. CHAFEE. I certainly will. It was a very fine ship, but we did not keep it.

Mr. WARNER. Does the Senator——

Mr. CHAFEE. Let me answer the question. You have opened the floodgates, and you will get the flood.

The ship proved ineffective in the mission for which it was designed—ineffective in the Vietnam war.

It was tremendously costly to operate. It required a very substantial number of crew, I would say over 1,500 men, and we deactivated it. It was not worth it. It was a fiasco, truly.

Mr. WARNER. Will the Senator yield?

Mr. CHAFEE. And the Senator knows this well. We sent it back into mothballs.

Mr. WARNER. Mr. President, if the Senator would yield, does he recall which watch it was sent back into mothballs under? Was it his or mine? It happened to have been my watch after he departed. And I will never forget the circumstances under which this ship was deactivated.

I respectfully contest the statements made by the distinguished Senator from Rhode Island. The ship was very effective. As a matter of fact, it was so effective that we were ordered to take it out of active service because its belligerency and its antagonism was impeding the progress of the peace talks at that time.

Mr. CHAFEE. It was so effective, you sent it to Bremerton.

Mr. WARNER. I beg the Senator's pardon.

Mr. CHAFEE. It was so effective, you sent it to Bremerton.

Mr. WARNER. Against my recommendations. I went down and personally saw the Secretary of Defense and was ordered from the White House that that ship should be deactivated because it was impeding the peace negotiations.

Mr. CHAFEE. Mr. President, I wonder if the Senator from Arkansas would yield me 3 minutes.

The PRESIDING OFFICER. The Senator from Virginia has the floor.

Mr. WARNER. Mr. President, I yield the floor at this time.

Mr. BUMPERS. Mr. President, I yield to the Senator from Rhode Island such time as he may need.

Mr. CHAFEE. Mr. President, this is very serious business. I do not think we want to get back into the 1960's and the 1970's. Let us look at what is happening right now.

Last year, the Senate Armed Services Committee stated the following in its report dealing with the *New Jersey*, in which they asked for $294 million, and you can correct me if the weapons suit was vastly different. I believe it included a missile system of Harpoon and Tomahawk missiles. They stated the activation overall would require about 12 months.

Mr. President, this is what the Armed Services Committee said last year. This year, they are saying 21 months and it is obvious that these figures are very, very fuzzy. They said, with firmness, last year that it would take 12 months and was going to only cost $294 million. Now, the figure is up to $326 million and the time has gone to 21 months.

Mr. President, I think all of us who deal with ship construction and major ship overhauls know that there is nothing more inaccurate than an estimate on how long it is going to take to do something to a ship. You can take the figure you get and double it and you will probably be close to it.

So, Mr. President, I think that what we want to do is proceed with the ships that we need in the Navy, proceed with the frigates or whatever the Armed Services Committee decides we need for the long haul, and not use our money and not use our energy and not use our manpower in a ship that, at best, has very limited usefulness.

I thank the Senator from Arkansas for yielding.

Mr. BUMPERS. Mr. President, I promised the Senator from Wisconsin 5 minutes. He has been on the floor from time to time. I do not see him now. I will just take a couple of minutes and hope that perhaps he will show up in the meantime. I will, Mr. President, if I may, just make a couple of comments.

The Senator from Virginia has asked the Senator from Rhode Island what kind of ship he can get for $326 million and the Senator from Rhode Island honestly and correctly replied, "Not much." But he also correctly and honestly replied—

You are not going to get the *New Jersey* for $326 million, either.

Last year, in May, when we debated this on this floor, the Navy was asking that both the *Oriskany* and the *New Jersey* be retrofitted, taken out of mothballs and reactivated. I will give you three guesses—and you will miss—as to how much the Navy said it would cost to reactivate both of those ships. The figure was $560 million. Two fine ships, one of the most majestic battleships ever to sail the ocean, the *New Jersey*, and a fine aircraft carrier which would give us a new deck, both for $560 million.

And now the Navy says—

We no longer want the *Oriskany* because the cost of it alone is about $525 million, but we still want the *New Jersey* at a cost of $326 million.

Mr. President, and distinguished colleagues, we are talking about, in 10 months, the Navy changing its estimates from $560 million to $900 million for the two ships. I applaud the Armed Services Committee for voting to eliminate the *Oriskany*. In 1967, when the Navy said they wanted to reactivate the battleship *New Jersey*, they pointed out a whole host of things that they thought they might occur and they gave the U.S. Senate a cost estimate.

Now back in those days we did not have inflation like we have now. And those changes, the things they found when they took that ship out of mothballs, because of some effort on their part, did not really cost too much to redo. I will just give you just a brief summary.

SUMMARY

1. The *New Jersey's* reduction gears had developed cracks, where the rim and the wedge join, prior to its last lay-up.

2. All but two of the outboard line shaft bearings are lignum vitae. When this type bearing is placed out of commission, provisions must be made to keep the staves wet. This prevents their drying out. It was found that this was not done at the time to lay-up. All the wood staves had dried up and became loose in their bushings.

3. Several bearings for vital engine room equipments, including the main engines, were found to be wiped or oversize to a degree that they required replacement.

A few examples are:

a. Twenty bearings in the eight Ship Service Turbo Generators.

b. Fourteen bearings in the 12 Main Feed Pumps.

c. Forward and aft bearings on the number two HP turbine and the after bearing of number three turbines.

4. Due to the numerous cracks in their depths, found in the propellers, all four required replacement. This caused considerable delay in drydock.

5. The packing from the 5 inch gun recoil piston rod assemblies had not been removed. This packing entrapped moisture which, over

New Jersey's ten year lay-up, caused considerable pitting. All these assemblies required extensive repairs or replacement.

6. When the 16 inch gun counter, recoil cylinder packing was removed during deactivation, it had been cut. This rendered the packing worthless for re-use. It took several weeks before a manufacturer was found who would make new packing.

7. One of the most serious discrepancies found was that, at some unknown time, the port 16 inch gun of number-one turret had locked with the number-two turret.

When the shipyard went to order a replacement trunnion bearing, it was found that none was available in the Navy supply system. A bearing was finally borrowed from the U.S. Army at the Aberdeen Proving Grounds which keeps a 16-inch gun for test purposes.

And the list goes on and on.

Does anybody believe that we are going to reactivate this ship for $326 million? Does anybody believe it is going to be done in 21 months? The history is just so conclusively otherwise.

Now let me finally make this point. We are leaving $3 million in this budget, in this supplemental, for research and development and to find out the condition of the *New Jersey* and to come back to the U.S. Senate with a business-like proposition and say, "Members of the Senate, this ship is going to cost *x* number of dollars."

Now it is not easy to vote against the battleship *New Jersey*, one that has World War II fame, at a time when the people of this country are really up in arms about our defense posture. They want to spend more money, but they want a lean, trim Army, Navy, Marine Corps and Air Force. They do not want us to spend money foolishly. They want us to spend money wisely and they want the biggest bang for their buck.

We are leaving $3 million in here so the Navy can go down there and cut into the ship and find out what kind of shape it is in. We are not reactivating a ship for the Vietnam war. All you had to do then was take it out of mothballs and even then you saw the problems the Navy ran into. But that is just peanuts compared to what proponents are talking about doing to this ship. It is going to have an entirely different firepower system. Every wire in that ship will have to be torn out and replaced to accommodate the whole new systems that are going to be put in it.

If last year you could get both of these ships for $560 million and 10 months later they are going to cost $900 million, I invite you to consider what the U.S.S. *New Jersey* is ultimately going to cost us.

So, Mr. President, all I am asking for, and I might be the first one to vote for the *New Jersey*, but I would like to know what they are going to put on it and I would like to have some definitive cost estimate before we embark on such a mammoth undertaking.

Mr. President, I suggest the absence of a quorum on my time, unless the other side wishes to be heard.

Mr. HARRY F. BYRD addressed the Chair.

The PRESIDING OFFICER (Mr. COHEN). Will the Senator withhold his quorum call request?

Mr. BUMPERS. I rescind my request for the quorum call.

The PRESIDING OFFICER. Who yields time?

Mr. HARRY F. BYRD, JR. Will the Senator from Texas yield for a question?

Mr. TOWER. I yield to the Senator for a question.

Mr. HARRY F. BYRD, JR. The committee report states the total procurement for fiscal year 1981 and fiscal year 1982 amounts to $326 million for the *New Jersey* reactivation. I assume that the $326 million quoted in the report is the total cost to reactivate the *New Jersey*.

Mr. TOWER. That is the total estimated cost. There is $89 million of that included in fiscal 1981 so that we can advance the time of introduction into the inventory.

Mr. HARRY F. BYRD, JR. And while the committee report mentions the total amount for the 2 years, fiscal 1981 and fiscal 1982, the ship will not be in operation until 1983, but this would still be the total cost; is that right?

Mr. TOWER. That is the estimate, I would say to the Senator from Virginia, that this is the Navy's current estimate. I would have to say in all honesty that it could turn out to be more than that. I would, of course, like to see a repeat of the happy experience we had when we reactivated it in the first place. It cost 12.5 percent below the original estimate. I cannot say to what extent we might go over that cost. Nonetheless, I would say even if the final cost is substantially over the current Navy estimate, and anything is possible when one considers the cost of a modern cruiser, the reactivation of the *New Jersey* battleship is an excellent way to invest money and give us a bigger bang for the buck because of the flexibility that we have in adding new and modern systems to this already formidable platform.

Mr. HARRY F. BYRD, JR. Does the Senator from Texas feel reasonably certain that this ship can become operational in 21 months?

Mr. TOWER. I feel reasonably sure it can.

Mr. HARRY F. BYRD, JR. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. I wonder if the Senator from Texas would respond to the statement made by Admiral Haywood that the cost would be $0.5 billion. I recognize that that was a statement he made, about $0.5 billion, so I am not going to pin him down to $0.5 billion. But, nonetheless, it is a long way from $326 million.

Mr. TOWER. What is the date Admiral Haywood made that statement?

Mr. CHAFEE. This was in June of 1980, which was a far earlier statement.

Mr. TOWER. All I can say is that the Secretary of the Navy, John Lehman, has endorsed the $326 million figure in a letter to the committee, dated April 2, 1981, only 5 days ago. So I would have to accept the Secretary of the Navy's position as being the latest one stated.

Mr. WARNER. Mr. President, will the Senator from Texas yield?

Mr. CHAFEE. It is my turn now.

I want to ask just one more question, if I might, of the Senator. What bothers me, I want to ask the chairman of the committee again, is this discrepancy that comes in the two reports, the report of last year and the report of this year on time. What has taken place that has changed these estimates so drastically? In other words, last year, and I read from the report of the Armed Services Committee in which it stated that the *New Jersey* activation, the anticipated service life is 15 years, and the time to overhaul, to accomplish this activation, will require about 12 months, and yet a year later, less than a year later, the same committee tells us—and I understand there is less work anticipated—that it will take 21 months.

I wonder if the chairman could give us any help with those differences in time. As I understand it, the activities that were planned last year were far more ambitious than this year.

First, am I correct that last year you did plan to take off the turret, did you not, under that plan?

Mr. TOWER. That is incorrect. Last year we did not plan to take off the turret.

Mr. CHAFEE. And now that was going to take 12 months. Suddenly you do not take off the turret which, of course, is tremendously difficult, and yet it is going to take 21 months. What is the problem? Why are the figures so drastically different?

Mr. TOWER. I think because what was contemplated at the time was not the kind of program which is contemplated now. In other words, these are different systems.

Mr. CHAFEE. Can I read from the report?

Further, the funding allows for installation of a modern electronic warfare suite, a close-in weapon system (Phalanx radar-controlled gun), and additional missile systems consisting of Harpoon and Tomahawk missiles. The nine 16-inch guns and the two 5-inch guns will be retained. The activation overall will require about 12 months with possible initial deployment in 1982. The anticipated service life of the *New Jersey* is 15 years.

Mr. TOWER. Let me respond to the Senator from Rhode Island by saying that the original Navy estimate was 12 months for the overhaul as opposed to the overhaul now, and the fact of the matter is that the Navy had not actually planned to remove the turret in last year's estimate and does not plan to remove it now.

Mr. CHAFEE. Here I read, and I am talking about the exact same words in the 1980 report, "The activation overhaul will require about 12 months." This year's language, "The reactivation will take 21 months."

Mr. TOWER. An additional 6 months of that are in planning. Which was not included in last year's estimate. So we go through a 6-month planning process on that.

Mr. CHAFEE. I see.

The point I want to make, Mr. President, is I know the members of the Committee on Armed Services——

Mr. TOWER. We are actually looking at about 3 months more than what the original estimate was, 3 months.

Mr. CHAFEE. I share the concern of the members of the Committee on Armed Services about building up our fleet, and I think we have definitely got to get more ships and good ships in service.

It just seems to me a pity putting this type of money into a very expensive operation which is going to take considerable time which, I think when we are through, is going to cost closer to $.5 billion to get a ship which in its optimistic view as to estimates will have a service life of 15 years when we can get a fine ship, whether it is a frigate or something else that comes along, for this $.5 billion that will serve our Navy with credibility and excellence for close to 30 years.

So, Mr. President, it is for those reasons, plus the manpower reasons—and I am deeply concerned about the treatment of this budget in the House. As was pointed out, the House eliminated the 5.3-percent pay raise, and that just sends warning signals, Mr. President. I think we just have to invest every nickel we can in our personnel and our ships that are going to be here for many years to come.

I have completed my statement, and the Senator from Arkansas has the remainder of the time.

Mr. BUMPERS. Mr. President, I am reluctant to conclude the debate at this point. I promised the Senator from Wisconsin 5 minutes and we have been trying to find him without much success. I hate to delay the Senate any further.

I am now informed that he no longer wants to speak, so I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator from Texas.

Mr. TOWER. Mr. President, I am prepared to yield back the remainder of my time. However, let me say that much has been made of the manpower problems here. We are going to have to expand our end strength in order to man the number of ships in the Navy. We are looking at a 600-ship Navy at the minimum, possibly a 700-ship Navy.

This is going to result in increases in strength. But I might note the increase in strength for this ship has already been authorized, and in this supplemental there is a provision for an additional expansion of end strength in the services. So our manpower problem is something we are going to solve as we go along if we are to man any of these additional ships we expect to bring into the inventory. So I am not going to minimize the manpower problem at all. It is a very serious problem, and we are going to have to approach it on a comprehensive basis to solve it.

The first thing is the retention rate. We are making some progress on that, and I trust we will make more.

Then I think we are going to have to examine our overall manpower and reserve requirements and determine at some point in time, even if we decide to man only a 600-ship Navy and an Army of only 16 divisions, that we are going to have to go to the draft. We may have to do that.

So far as the United States and the United Kingdom are concerned, they are the only NATO powers that do not have a compulsory draft. But let us postpone that question for down the road.

Suffice it to say that we are going to do everything we can to resolve these manpower problems, but the additional end strength has already been authorized for this ship.

Mr. President, I am prepared to——

Mr. BAKER. Mr. President, before the Senator yields back his time will he yield to me to make an inquiry? May I inquire as to how many more amendments there are that the managers of this bill know of and how soon we may expect to reach final passage?

Mr. TOWER. We do not know of any amendments.

Mr. BAKER. Mr. President, I hope we can reach final passage.

Mr. CHAFEE. Mr. President, I will just take 1 minute. The manpower point we are making here—and I share the concerns of the Senator from Texas—is that this massive ship takes extra men to run it. They are needed to operate the suite of weapons that are on it as opposed to a smaller ship designed to be more efficient in terms of manpower. All Navy ships now, with their gas turbines and a host of other manpower-saving qualities about them, are designed to operate with as few people as possible.

The *New Jersey* was built in an era when manpower was not a cause of concern; 2,500 to 3,000 people made no difference. We had the men. But we do not have them now. We lack the people to operate this massive type of ship with the numbers of weapons that will be aboard it. That is the crux of the manpower argument that we face in reactivating this ship.

Mr. TOWER. Mr. President, I will only say that this ship was designed for a crew of around 2,700. We expect to operate it with 1,000 less than that. Actually, the figure given now is 1,562 men. We would not exceed that very much if we did exceed it. It would give the ship a capacity for carrying a sizable detachment of Marines, which will add to our forward deployment capability in the near term.

Mr. BUMPERS. Mr. President, I would like to make one further point. That is that this ship has a speed, unless the Navy does something different than what they have done in the past and there is no indication from anything I have seen that they can, such that this battleship cannot keep up with carrier task force. It will require its own battle group. I wanted to make that point.

Mr. TOWER. Mr. President, in looking at supervisory personnel, the Navy advises us that approximately 36 percent of the personnel on the battleship will be supervisory as opposed to approximately 46 percent on a CGN and approximately 67 percent on a frigate. So I think we are getting some economy in terms of skilled and experienced personnel.

Mr. COHEN. Will the Senator yield?

Mr. TOWER. I yield to the Senator from Maine.

Mr. COHEN. I have a copy of a letter that purportedly was sent to the Senator from Arkansas dated July 15, 1980, in which the question on the speed of the *New Jersey* was discussed. Quoting from "Jane's Fighting Ships" the letter listed a maximum speed of 35 knots, a figure which is consistant with that provided by the Navy for the U.S.S. *New Jersey*, which is comparable to any other ship in our inventory.

Mr. BUMPERS. Who is that letter from?

Mr. COHEN. From Howard Serig, Jr. I will withhold it, if the Senator does not recall having received it. My only reason for discussing this letter was to permit Senator BUMPERS, the addressee, an opportunity to respond to some of the more interesting comments made by Mr. Serig.

Mr. BUMPERS. Who is the author?

Mr. COHEN. A private citizen who has spent a considerable amount of time with naval matters, who is a maritime economist, who read the debates of a year ago.

Mr. BUMPERS. I guess I have letters from private citizens in my State who do not want it at all.

Mr. COHEN. Apparently the Senator does not read his mail as carefully as I do.

Mr. Serig rebutts some of the arguments that were made last year in the colloquy concerning the past service of the *New Jersey*.

The point I would like to make is that a table was included in this particular letter which listed the top speeds of the *New Jersey* and the *Eisenhower*, the *Nimitz*, the *Kennedy*, *America*, the *Enterprise*, and several other Navy surface ships. Again, the source of the data is "Jane's Fighting Ships", and you will find that the statement the Senator made that *New Jersey* would not be able to keep up with an aircraft carrier is erroneous. The battleships and the aircraft carriers have all demonstrated top speeds of around 35 knots.

Mr. TOWER. The Navy certified that the battleship will keep up with a carrier task force. There is no question about that.

Mr. BUMPERS. Mr. President, I hate to prolong this, but I want to say first of all that the Senator from Texas said that the cost of a CGN is now up to something like $800 million, even though the *Arkansas* and the *Virginia* cost $360 million. I assume the $800 million is the inflated price as to what those ships would cost now.

Mr. TOWER. If the Senator will yield, I will clarify that. I was speaking in 1982 dollars. The CGN costs $1.2 billion to $1.6 billion in 1982 dollars according to the Navy. I think we ought to compare 1982 dollars with 1982 dollars.

Mr. BUMPERS. But the Senator said that a CGN would cost between $1.2 billion and $1.5 billion. I do not know what the figure ought to be. Maybe the Senator from Maine would like to say who is right.

Mr. COHEN. Those were 1982 dollars in terms of what it would cost to build

those ships today. 1982 would be $1.2 to $1.6 billion.

Mr. BUMPERS. Let us get back to the speed of the *New Jersey*. The private citizen had the best intentions, but I am looking at information from the U.S. Navy. It says the *New Jersey* has eight Babcox-Wilcox boilers, four shafts with Westinghouse geared turbines, 212,000 horsepower, with a speed of 33 knots.

The Senator from Maine says the *New Jersey* would be the fastest ship we have. That is going to come as a great surprise to some of the people on these *Nimitz*-class carriers because they are used to going 40 knots and above.

Mr. PROXMIRE. Mr. President, I support the purpose of the amendment of my colleague from Arkansas. I will vote for it. I want to commend him for taking this step. The Navy does not need a battleship in this day and age. Battleships will no more improve our defense than would the horse cavalry. Unfortunately this amendment does not go far enough. It should reduce the amount of the supplemental bill by the amount requested for the battleship. It makes no sense to say that the Navy cannot use this money for a battleship but the Navy can use it for something else.

We should not be giving the Navy shopping around money. It is as if a child came up to the parent and said, "Dad, or Mom, I would like $100 to buy a pair of high buttoned shoes for my wardrobe." And the parent responds by saying, "You don't need high buttoned shoes because they are out of date and no longer useful, but here is $100 to shop around and see what else you can buy."

How ridiculous it is in a time when we are trying to reduce the budget and eliminate the deficit, a time when we are trying to reduce Government expenditures and eliminate waste, a time when we are reducing and eliminating social programs because we can no longer afford them—how ridiculous in such a time to be handing over shopping around money to the Navy.

How can we justify saying to a Government agency that we do not need programs for which you have requested funds, but here are the funds, spend them anyway?

The fact that a number of us apparently are willing to do just that, is a sign of the times. It demonstrates that the momentum that has built up in favor of strengthening our defenses has become a stampede. It suggests that we are prepared to throw money at the Pentagon in order not to get run over by those who are clamoring for a greater defense budget, whether or not it contributes to greater defense.

Picture, if you will, all of us on horseback galloping along in front of the stampede. One brave soul turns to the others and shouts, "I'm sure glad we are going this way, but shouldn't we slow down a little bit?" and then spurs his horse and gallops on with the rest.

I favor strengthening the defense program. Over the years I have called attention to numerous areas of waste in defense. It makes no sense then and it makes no sense now to spend taxpayers' money on unnecessary, ineffective military programs.

We are not improving our national security by voting money to take a battleship out of mothballs. Telling the Navy not to spend money for that purpose while giving it the money to spend for some unknown purpose is irresponsible and indefensible.

Nevertheless, I shall vote for this amendment because I doubt if the Navy could find anything else as wasteful as reviving the battleship. The battleship. They have to be kidding. But if we say no battleship but keep the money, we make a clear copout.

Mr. MITCHELL. Mr. President, I support the Bumpers amendment which would delete from this supplemental authorization the $92 million proposed for long-lead purchases for the reactivation of the battleship *New Jersey*.

I strongly believe our naval forces must be updated and expanded. There is no question that the growth of Soviet naval power over the past decade—coupled with our manpower shortages and the reduced resources we have devoted to our own naval forces—today find us in a situation in which we must make up for lost time, and mount an aggressive effort to upgrade the fleet. I have supported legislation with that goal in mind in the past and I will continue to give it my strong support this session.

It is for that reason that I rise to support the Bumpers amendment. This amendment would delete from the bill funds proposed for a purpose which will not add to our naval capabilities. Instead, the proposed reactivation of the *New Jersey* will drain needed resources at a time when we should be focusing on the modernization of the fleet, not on retrofitting aged battleships.

The *New Jersey* is a 38-year-old battleship which has been mothballed since 1957 except for a 1-year stint of action in the Vietnam war.

The proposal to finance its retrofitting with modern weapons at an overall cost of $255 million did not survive conference with House of Representatives last year.

If we had unlimited funds with which to finance each and every desirable addition to our Armed Forces, and if we had the manpower to amply man every ship of the fleet with plenty of seamen left over, the proposal to reactivate the *New Jersey* would warrant debate, along with a number of other, lesser priorities.

But the fact is that we do not have unlimited funds, and most importantly, we simply lack the manpower to adequately man our modern vessels. We cannot afford the investment of a minimum of 1,300 seamen on a ship whose age will always make her more vulnerable to modern missiles, whose service life expectancy is not more than 15 years, and whose mission remains ill-defined.

At a time when the chairman of the Armed Services Committee has suggested that we may well need a 700-vessel fleet, or even more, at a time when our military manpower strategy demands ever more funding and ever more attractive recruitment incentives, it makes no sense to reactivate an old ship, at a total cost which remains unknowable, and for purposes which remain undefined when we have other priorities and far more urgent ones.

When up to half the Navy's F–14's cannot fly because of a lack of spare parts, when many ships already at sea are reported to lack the manpower on board to qualify them as combat-ready, the diversion of resources for such a purpose is indefensible.

There are no reliable cost estimates of the total costs of reactivating this battleship. Last year, the claim was made that reactivation would cost $294 million, and of this the Senate appropriated $255 million. This year's report contains the information that a total of $326 million will be needed.

Last year, the Senate was informed that the principal argument for this proposal was the speed with which the reactivated ship could join the fleet. Last November, during debate on the Defense appropriations bill, we were assured it would be seaworthy within 12 months. Yet this year, a scant 6 months later, we find that reactivation will take at least 21 months.

Last year, there was no compelling evidence that either the cost estimates or the time estimates were based on hard data. And the changes in the last 6 months make it clear that there is no better data available today than there was last year. If the principal purpose of reactivation is to procure a short-term, inexpensive vessel, then the change in the time and cost estimates ought to be of concern to every one of us.

And most importantly, despite the action of the Congress in improving military pay and recruitment incentives, there is no compelling evidence that enlistments have taken a sufficiently drastic upturn to assuage our manpower shortage.

I support increased military readiness. I support increased recruitment efforts and improved manpower programs. I will vote for funds that effectively lead to those goals. But I do not believe we are doing any favor to the armed services of our country or to our military readiness posture by simply rubber-stamping each and every request that is made, with no concern as to its costs, its timeliness, its purpose or our ability to properly take advantage of it.

In this case, we are asked to reactivate an old ship—38 years old—at a cost which has risen substantially since last July, and with a delivery date which has stretched out by 75 percent since last November. And the mission for this ship remains undefined.

I simply do not believe that this is the best possible use of our limited defense dollars. The urgent need for modern vessels comparable to the Soviet naval forces makes it imperative that we devote our resources and our time to meeting that challenge. I do not think reactivating an old ship represents a sufficiently clear priority at this time for us to devote funds to that purpose.

I hope the amendment will be adopted.

Mr. TOWER. Mr. President, does anybody else wish to be heard?

Mr. BUMPERS. I am prepared to yield back the remainder of my time.

Mr. TOWER. Mr. President, I yield back the remainder of my time.

Mr. BUMPERS. Mr. President, I yield back the remainder of my time, and I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. GOLDWATER). Is there a sufficient second?

Mr. TOWER. Mr. President, I move that the amendment of the Senator from Arkansas be laid on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. BUMPERS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Arkansas. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Oregon (Mr. PACKWOOD) and the Senator from Indiana (Mr. QUAYLE) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from New Jersey (Mr. BRADLEY) and the Senator from Tennessee (Mr. SASSER) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 69, nays 23, as follows:

[Rollcall Vote No. 79 Leg.]

YEAS—69

Abdnor	Ford	Mathias
Andrews	Garn	Mattingly
Armstrong	Glenn	McClure
Baker	Goldwater	Melcher
Bentsen	Gorton	Moynihan
Boren	Grassley	Murkowski
Boschwitz	Hart	Nickles
Burdick	Hatch	Nunn
Byrd, Harry F., Jr.	Hawkins	Percy
Byrd, Robert C.	Hayakawa	Pressler
Cannon	Heflin	Riegle
Chiles	Heinz	Rudman
Cochran	Helms	Schmitt
Cohen	Hollings	Simpson
Cranston	Huddleston	Specter
D'Amato	Humphrey	Stennis
Danforth	Jackson	Stevens
DeConcini	Jepsen	Symms
Denton	Johnston	Thurmond
Dixon	Kassebaum	Tower
Dole	Kasten	Wallop
Domenici	Laxalt	Warner
East	Long	
	Lugar	

NAYS—23

Baucus	Kennedy	Pryor
Bumpers	Leahy	Randolph
Chafee	Levin	Roth
Dodd	Matsunaga	Sarbanes
Eagleton	Metzenbaum	Stafford
Exon	Mitchell	Tsongas
Hatfield	Pell	Weicker
Inouye	Proxmire	

NOT VOTING—8

Biden	Packwood	Williams
Bradley	Quayle	Zorinsky
Durenberger	Sasser	

So the motion to lay on the table Mr. BUMPERS' amendment (UP No. 57) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

Mr. TOWER. Mr. President, we cannot hear the ruling of the Chair on the motion to table.

The PRESIDING OFFICER. The Senate will be in order. Senators who are in the well will please remove themselves or the Chair will start naming names.

The motion to table is agreed to.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I inquire of the distinguished majority leader as to what the business is for the remainder of the day and for the week.

Mr. BAKER. I thank the distinguished minority leader.

As soon as we have final passage of this measure, there will be no more votes tonight.

It is my hope that we can lay down the export trading bill tonight but have no debate on it. It will be the pending business after we dispose of the leadership time, special orders, and routine business in the morning.

I expect that tomorrow we will have a reasonably busy day with that and other routine matters. It will not be a late day. We will take care of minor details as they may come up on Thursday, and it is my hope that we can arrange a pro forma session of the Senate on Friday.

Mr. ROBERT C. BYRD. I thank the Senator.

DEPARTMENT OF DEFENSE SUPPLEMENTAL APPROPRIATION AUTHORIZATION ACT, 1981

The Senate continued with the consideration of S. 694.

● Mr. HART. Mr. President, I generally support the bill as reported, and I recommend that my colleagues do likewise. We need to move rapidly to address some specific deficiencies in our defense establishment, and this bill does that effectively. Especially beneficial are its provisions to:

Provide more spares for military equipment. In the past, we have underinvested in spares, with the result that too much of our equipment is often inoperable. Increased spending for spares is a necessary part of our attempts to increase readiness.

Increase manpower levels to allow the services to benefit from improved retention.

Increase several Navy R. & D. programs, especially the highly important program to upgrade the Mark-48 torpedo.

The committee made several major changes in the bill which improve it substantially over the Defense Department's request. These include:

Adding long-lead funds for the LSD-41, in preparation for full authorization in fiscal year 1982. The Navy had not planned to request this ship before fiscal year 1983. We cannot afford such delays in building up our deficient amphibious lift capability.

Eliminating funds for reactiviating the carrier *Oriskany*. The escalating costs of the reactivation, coupled with the Navy's unimaginative plan for an all A-4 air wing which would have tied the *Oriskany* to a large carrier, made the originally attractive reactivation plan cost-ineffective. As the committee report states, this action in no way reflects negatively on the desirability of new construction light carriers. The funds saved by canceling the *Oriskany* reactivation could in fact be profitability applied to authorizing a new light carrier in the fiscal year 1982 bill.

Restructuring the funds requested for increased production of the M-1 tank. It increasingly appears that the M-1 betrays a service fascination with technological complexity at the price of reliability, maintainability, and ruggedness. Technical uncertainties often remain as a system begins production, and the Army is making valiant efforts to ascertain whether the M-1 is reliable. Nevertheless, both the turbine engine and the highly complex fire control system may eventually prove to be unfixable, resulting in a tank with inherently poor readiness. The committee's action prudently paces the program to permit these issues to be resolved according to evidence yet to be accumulated. It may, in addition, be necessary to begin consideration of alternatives, such as a new model of the M-60 with special armor.

Despite these and other positive elements of the bill, some of the programs do need further consideration. Three prominent programs in particular appear to require in-depth reevaluation:

Recommissioning of the battleships. While the Marines do need improved landing fire support, the battleships are increasingly presented as multipurpose warships, capable of independent operations. As World War II demonstrated, battleships are highly vulnerable to enemy aircraft, and they are also likely to be quite vulnerable to modern submarines. It is not clear they will be cost-effective investments, especially since they require large crews. The cruisers of the *Salem* class might provide comparable or superior gunfire support for the Marines at substantially less operating cost.

The F-18 naval fighter. The committee wisely denied funding to increase the F-18 buy, but it is increasingly apparent that the entire program should be canceled, as I urged several years ago. The cost is escalating at a high rate, to the point where the superior F-14 may be less expensive. The aircraft continues to encounter serious technical problems. Replacing the F/A-18 with more F-14's, A-7's, and AV-8B's might both save money and provide a more capable force.

The Army's infantry fighting vehicle. This vehicle continues to appear inadequate for the modern battlefield, thanks to its inadequate armor, lack of a quick-reaction antitank weapon, and high sil-

houette. It is by most accounts inferior to the Soviet BMP which has been in the field for over 10 years. A combination of variants of the proven M–113, coupled with a heavy IFV such as the Israeli Merkava derivative, might provide far better capability at equivalent or less cost. The Army's continued support for the IFV program appears to be yet another case of failing to think conceptually about the future battlefield.

I hope the committee and the Senate as a whole will consider these programs carefully in relation to the fiscal year 1982 bill. We cannot hope to improve our defense simply by increasing the budget, without careful analysis of what we are buying and how it relates to the battlefield.●

Mr. TOWER. Mr. President, if there are no further amendments, I ask for third reading.

The PRESIDING OFFICER. Without objection, the committee amendment in the nature of a substitute is agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. TOWER. Mr. President, I do not intend to ask for the yeas and nays. I am prepared to have a voice vote.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 694) was passed, as follows:

S. 694

An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Defense Supplemental Authorization Act, 1981".

TITLE I—PROCUREMENT OF AUTHORIZATION AND APPROPRIATIONS

AUTHORIZATION OF APPROPRIATIONS

SEC. 101. (a) In addition to the funds authorized to be appropriated under title I of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces of the United States for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, as authorized by law, in amounts as follows:

AIRCRAFT

For aircraft: for the Army, $128,000,000; for the Navy and Marine Corps, $47,600,000; for the Air Force, $716,625,000.

MISSILES

For missiles: for the Army, $27,000,000; for the Air Force, $228,269,000; for the Marine Corps, $10,700,000.

NAVAL VESSELS

For naval vessels: for the Navy $172,100,000.

TRACKED COMBAT VEHICLES

For tracked combat vehicles: for the Army, $796,000,000; for the Marine Corps, $11,300,000.

(b) Of the total amount authorized to be appropriated in subsection (a) for the XM–1 Main Battle Tank, the sum of $336,700,000 may not be obligated or expended unless and until the Secretary of Defense certifies in writing to the Committees on Armed Services of the Senate and the House of Representatives that (1) the durability performance results of the RAM–D testing program for such tank do not present an unacceptable level of risk in terms of satisfying the Army's operational mission requirements, and (2) such results support the procurement of such tanks in a number greater than the 360 for which funds were appropriated before the date of the enactment of this Act.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. In addition to the funds authorized to be appropriated under title II of the Department of Defense Authorization Act, 1981, funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces for research, development, test, and evaluation, as authorized by law, in amounts as follows:

For the Army, $79,500,000; for the Navy (including the Marine Corps), $139,900,000; for the Air Force, $339,200,000; for the Defense Agencies, $41,000,000.

TITLE III—ACTIVE FORCES

INCREASE IN AUTHORIZATION OF END STRENGTHS

SEC. 301. Section 301 of the Department of Defense Authorization Act, 1981 (Public Law 96–342; 94 Stat. 1082), is amended to increase the active duty personnel end strengths of the Navy, Marine Corps, and Air Force by striking out "537,456", "188,100", and "564,500" and inserting in lieu thereof "540,456", "190,600", and "569,000", respectively.

TITLE IV—RESERVE FORCES

INCREASE IN AUTHORIZATION OF AVERAGE STRENGTHS

SEC. 401. Section 401(b) of the Department of Defense Authorization Act, 1981 (Public Law 96–342; 94 Stat. 1084), is amended to increase the number of Reserve component members authorized to serve on full-time active duty with the Marine Corps Reserve for the purpose of organizing, administrating, recruiting, instructing, or training by striking out "67" and inserting in place thereof "133".

TITLE V—CIVILIAN PERSONNEL

INCREASE IN AUTHORIZATION OF END STRENGTH

SEC. 501. Section 501(a) of the Department of Defense Authorization Act, 1981 (Public Law 96–342; 94 Stat. 1085), is amended by striking out "986,000" and incerting in place thereof "1,010,600".

TITLE VI—MILITARY TRAINING STUDENT LOADS

INCREASE IN AUTHORIZATION FOR AIR NATIONAL GUARD OF THE UNITED STATES

SEC. 601. Section 601(a)(9) of the Department of Defense Authorization Act, 1981 (Public Law 96–342; 94 Stat. 1087), is amended by striking out "1,930" and inserting in lieu thereof "2,509".

TITLE VII—MILITARY CONSTRUCTION

ARMY

SEC. 701. (a) In addition to the amounts authorized for acquisition and construction by title I of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1749), the following amount is authorized for the location specified:

UNITED STATES ARMY, EUROPE

Various Locations, $1,800,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $1,800,000.

NAVY

SEC. 702. (a) In addition to the amounts authorized for acquisition and construction by title II of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1752), the following amount is authorized for the location specified:

UNITED STATES MARINE CORPS

Marine Corps Air Station, El Toro, California, $2,000,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $2,000,000.

AIR FORCE

SEC. 703. (a) In addition to the amounts authorized for acquisition and construction by title III of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1756), the following amounts are authorized for the locations specified:

AIR TRAINING COMMAND

Laughlin Air Force Base, Texas, $4,700,000.

STRATEGIC AIR COMMAND

K. I Sawyer Air Force Base, Michigan, $540,000.

SPECIAL PROJECT

Various Locations, Special Project, $50,000,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $55,240,000.

DEFENSE AGENCIES

SEC. 704. (a) In addition to the amount specified for minor construction projects by section 403 of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1761), the Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $900,000.

(b) There is authorized to be appropriated for fiscal year 1981 for the purposes of subsection (a) the sum of $900,000.

MILITARY FAMILY HOUSING

SEC. 705. Section 510(a) of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1767), is amended—

(1) by striking out "$276,100,000" in clause (1) and inserting in lieu thereof "$260,078,000"; and

(2) by striking out "$1,880,760,000" in clause (2) and inserting in lieu thereof "$1,896,782,000".

AIR NATIONAL GUARD OF THE UNITED STATES

SEC. 706. In addition to the amount specified in section 701(3)(A) of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1774), the Secretary of Defense may establish or develop facilities for the Air National Guard of the United States in an amount not to exceed $6,500,000.

LIMITATIONS APPLICABLE TO USE OF FUNDS

SEC. 707. (a) Authorizations contained in this title shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1749), in the same manner as if such authorizations had been included in that Act.

(b) For the purposes of the limitations set forth in section 603 of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1768), the amounts authorized to be appropriated for titles I through V of that Act shall be deemed to be increased, respectively, by the amount authorized to be appropriated by sections 601 through 605.

MODIFICATION OF PRIOR YEAR AUTHORIZATION FOR FAMILY HOUSING UNITS AT TINKER AIR FORCE BASE

SEC. 708. (a) Section 501(c) of the Military Construction Authorization Act, 1980 (Public Law 96–125; 93 Stat. 940), is amended by striking out "three hundred thirty-two units" in the item relating to Tinker Air Force Base and inserting in lieu thereof "two hundred units".

(b) The authorization for construction of,

or acquisition of sole interest in, family housing units at Tinker Air Force Base, Oklahoma, contained in section 501 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 940), as amended by subsection (a), is hereby modified to authorize construction of such family housing units on base at Tinker Air Force Base.

TITLE VIII—MISCELLANEOUS PROVISIONS

AMENDMENTS RELATING TO CONTINUOUS SUBMARINE DUTY INCENTIVE PAY

SEC. 801. (a) Section 301c of title 37, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out "(1)" after "(a)";

(B) by striking out "subsection (b)" in the first sentence and inserting in lieu thereof "subsection (c)";

(C) by striking out paragraph (2) and inserting in lieu thereof the following:

"(b)(1) Subject to regulations prescribed by the President, a member who is entitled to basic pay is also entitled to continuous submarine duty incentive pay under this subsection instead of submarine duty incentive pay authorized under subsection (a) of this section if such member holds or is in training leading to a submarine duty designator, remains in the submarine service on a career basis, and meets the requirements of paragraph (2) of this subsection."; and

(D) by redesignating pargraph (3), (4), and (5) as paragraph (2), (3), and (4), respectively;

(2) in subsection (b), as designated by clause (1)(C)—

(A) by striking out "subsection (b)" in the third sentence of paragraph (3), as redesignated by clause (1)(D), and inserting in lieu thereof "subsection (c)"; and

(B) by inserting after the first comma in paragraph (4)(A)(i), as redesignated by clause (1)(D), "while serving as an operator or crew member of an operational submersible, including undersea exploration and research vehicles,";

(3) by redesignating subsections (b), (c), (d), and (e) as subsections (c), (d), (e), and (f), respectively;

(4) by strfiking out "subsection (b)" in subsection (e), as redesignated by clause (3), and inserting in lieu thereof "subsection (c)"; and

(5) by striking out "subsection (a)" in subsection (f)(1), as redesignated by clause (3), and inserting in lieu thereof "subsection (b)".

(b) The amendments made by this section shall take effect as of January 1, 1981.

(c) Persons who become eligible for continuous submarine duty incentive pay for any period during the fiscal year ending September 30, 1981, by virtue of the amendments made by this section shall be paid exclusively from funds heretofor appropriated for such fiscal year for the payment of pay and allowances of members of the Navy (Department of the Navy Account: Military Personnel, Navy Appropriation Symbol No. 1711453).

ACCRUED LEAVE

SEC. 802. Section 10 of the Military Pay and Allowances Benefits Act of 1980 (Public Law 96-579; 94 Stat. 3359) is amended—

(1) by inserting "(a)" after "SEC. 10."; and

(2) by adding at the end thereof the following new subsection:

"(b) The amendment made by subsection (a) shall be effective in the case of any member of the Armed Forces assigned to a deployable ship, mobile unit, or other duty designated for the purpose of section 701(f) of title 10, United States Code, after September 30, 1979.".

Mr. TOWER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

A bill to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes."

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator will suspend while Senators leave the Chamber.

Mr. TOWER. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendment to S. 694.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask unanimous consent that the bill as passed to printed in full, with amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, in which Senators may speak up to 5 minutes each, for not to exceed 20 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOBART TAYLOR, JR.

Mr. PELL. Mr. President, Hobart Taylor, Jr., died of amyotrophic lateral sclerosis this past April 2 at Lyford Cay in the Bahamas.

A brilliant and wise lawyer, he was well known to many of us as a friend and as a colleague in one of the many roles in Government or business he filled with such distinction. Among his Government responsibilities were those of Special Counsel to President Kennedy's Committee on Equal Employment Opportunity, Special Assistant and Associate Legal Counsel to President Johnson, and Director of the Export-Import Bank. Amongst the great business corporations of which he was a director were Westinghouse, Aetna Life Insurance, the Great Atlantic & Pacific Tea Co., Standard Oil of Ohio, Eastern Airlines, and Burroughs Corp.

Particularly important from the viewpoint of his family and friends, he was a gentleman of taste, discernment, and learning. His two lovely homes in Washington and Middleburg were filled with elegant objects d'art which gave pleasure to those who had the good fortune to visit him.

All of us who knew him or whose lives were touched by him extend our condolences to his widow, Carole Angermeier Taylor; his sons, Hobart and Albert Taylor; his mother, Mrs. Charlotte Wallace Taylor; his former wife, Mrs. Lynette Taylor; and his stepchildren, Edward Rader and Teresa Warner, and grieve with and for them in this great loss.

I ask unanimous consent to have printed in the RECORD a sensitive appraisal of him by his old friends Broadus Butler and George Reedy, as well as the obituary that appeared in the Washington Star of April 5, 1981.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HOBART TAYLOR, JR., 60, DIES; WAS COUNSEL TO PRESIDENTS

Hobart T. Taylor, businessman, corporate director, political and civic activist and legal counsel to Presidents Kennedy and Johnson, died Thursday at Layford Cay in the Bahamas of amyotrophic lateral sclerosis. He was 60.

With the Kennedy White House, Mr. Taylor served as special counsel to the President's Committee on Equal Employment Opportunity and acted as its executive vice chairman until 1965. He also held the position of special assistant to then-Vice President Lyndon Johnson. In 1964 President Johnson named him associate White House legal counsel.

In those posts, Mr. Taylor was a liaison to the executive branch for blacks and other minorities who had begun demanding more legal rights. Generating jobs in the private sector and banishing discrimination in the public and private employment markets were considered his chief preoccupations.

Mr. Taylor left the White House in 1965 to become the director of the Export-Import Bank of the United States.

Returning to private practice in 1968, he was a partner with the firm of Dawson, Riddell, Taylor, Davis and Holroyd until 1979 when he became counsel for Jones, Day, Reavis and Pogue of Washington.

A native of Texarkana, Texas, Mr. Taylor received a bachelor's degree from Prairie View State College in 1939 and a master's from Howard University in 1941. He took a doctorate of law degree in 1943 from the University of Michigan where he was editor of the Michigan Law Review. He also held four honorary degrees.

He was admitted to the Michigan Bar in 1944 and named shortly thereafter research assistant to the chief justice of Michigan. He was subsequently promoted to the post of assistant prosecuting attorney and corporation counsel for Michigan's Wayne County.

He was named president of the Beneficial Life Insurance Co. of Detroit in 1959.

Mr. Taylor's extensive business interests included board of director memberships in Aetna Life Insurance, A&P, Standard Oil of Ohio, Westinghouse, National Urban Corp., Eastern Airlines and the Burroughs Corp.

Mr. Taylor held alumni awards from his three alma maters and service awards from the National Urban League, the National Association for the Advancement of Colored People, the National Business League, the Jewish Federation Council of Los Angeles and the U.S. departments of Labor and Navy. In 1969 he was designated a Commandeur de l'ordre National de la Republique de Cote d'Ivoire (Ivory Coast) and in

1973 was the first American black to our South Africa as a visiting lecturer and guest of the South African Foundation.

He was a member of the Democratic National Committee, vice chairman and trustee of the Wolf Trap Foundation for the Performing Arts, governor and a member of the executive committee of the American National Red Cross, trustee with the U.S. Supreme Court Historical Society and member of the Commission on Postal Service and the President's Commission on Executive Exchange under President Carter.

He leaves his wife, Carole; his former wife, Lynette; his mother, Charlotte Wallace Taylor of Houston; two sons, Hobart III and Albert; a stepson, Edward Rader, and a stepdaughter, Teresa Warner.

A memorial service is scheduled for 4 p.m. Friday at the Washington Cathedral, Massachusetts and Wisconsin avenues NW.

The family suggests that expressions of sympathy be in the form of contributions to the Hobart Taylor Jr. Memorial Fund at the Baylor University Medical College, Houston, Texas.

OUR FRIEND HOBART

(By Broadus Butler)

Hobart Taylor, Jr., was a friend—not an ordinary friend—but a complex enigma to most of his friends, because he demanded that they rise to the challenges of the times and demonstrate in his own person how these challenges could be met and coverted into opportunities for the kinds of achievements which combined personal greatness with genuine national service.

Hobart finished Prairie View College at age 18 and at age 22, he had completed both a Masters Degree at Howard University and an Bachelor of Laws degree at the University of Michigan. He was appointed a research assistant to the Michigan State Supreme Court immediately upon graduation and served both in private practice and in the office of Wayne County Prosecutor, first as Assistant Prosecuting Attorney and then as Chief of the Civil Division. In 1958, he organized the law firm of Taylor, Patrick, Bailer and Lee. But as fate would have it, each of the partners was so brilliant and exceptional in his own right that each had to respond to a special calling which combined public and private service. Hobart's was extra special, and into it he called his partners, his friends and their friends, provided they brought with them three requirements: high intellect, mature energy, and a capability to produce real results. Those who brought those qualities to Hobart received in return an unparalleled quality of loyalty that seemed to be inexhaustable.

Hobart's very special calling came in 1961 when out of the friendship begun between his father, Speaker Sam Rayburn and Vice President Lyndon Johnson and out of the long personal knowledge of both the Vice President and the Speaker of Hobart's exceptional talents, Hobart was called to Washington where for the first time in the long history of Federal responsibility for Civil Rights to the nation, the Vice President combined enforcement of the law with maximum encouragement to the corporate sector and to the educational community to exercise voluntary initiative to minimize the need for that enforcement.

He placed both faces of that difficult coin in the hands of Hobart Taylor, Jr., by appointing him Special Assistant to the Vice President, Executive Vice Chairman of the President's Committee on Equal Employment Opportunity and Executive Vice Chairman of the President's Plans For Progress Committee. The Kennedy tragedy of November 1962 brought the Vice President to the Office of President and Hobart to the role of Associate Counsel to the President, with the combined responsibilities more firmly supported by both President Lyndon B. Johnson and Vice President, Hubert H. Humphrey. In 1964, he broadened his services to the international areas in service to developing countries as a Director of the Export-Import Bank.

All across the country—mostly early in the morning and very late at night—friends received calls from Hobart. Some friends he knew and some friends personally he had not yet met. But to him, they were friends of his calling; and, if they were not, they soon would be. His calling was simple, change the traditional practices of job discrimination into new and creative opportunities for minorities and women to participate fully in the mainstream of American productivity without discrimination. Hobart created honorable ways for corporate America to do that voluntarily, and he on occasion required that it be done, even involuntarily. Within a year, more than 363 companies had signed pledges to do it voluntarily, and that voluntarism for the first time gave substantive meaning to "affirmative action." On the preparation side, the education and training institutions had to be transformed in attitude and in curricular orientation to bring to that affirmative action by business and industry an educated and trained cadre from the heretofore denied minority and female person. To accomplish that task, he forged the strongest pattern of cooperation between predominantly Negro institutions, major universities and corporate entities which has ever existed. And it was all done to open new educational opportunities with the insurance of transferability into career and professional employment.

Of equal importance to the positive statistical changes which were engendered was an atmosphere generated by Hobart which was translated into legislation with the enthusiastic support of business, industry and education, which placed into the Civil Rights Act of 1964 a specific provision to transform the President's Committee on Equal Employment Opportunity into a statutory Commission on Equal Employment Opportunity and which continued the voluntary effort from Plans For Progress into the National Alliance of Businessmen.

It took friends from all walks of life in meeting after meeting both national and local. It took private corporate and philanthropic commitment and federal and state cooperation and legislation to forge that accomplishment; but more than that, it took two very special friends to understand each other and to keep the mission firmly on track when both were misunderstood even by the multitude of other friends across the nation who now were producing and fulfilling opportunities.

I hope that some day American history will properly record that in the field of actual translation of domestic civil and humane goals into constructive and rewarding realities for the greatest number of people, in every calls and condition of life, President Lyndon Baines Johnson was the most productive and empathetic of Presidents. He himself created that to the guidance, counsel and productivity of Hobart Taylor, Jr., which helped to make him so. History also should some day record that Hobart Taylor, Jr., was the most successful Negro Presidential staff aide in the actual record of real gains across the entire spectrum of civil rights goals. This was so because President Johnson backed up his own commitment by directing all of the resources imagery and powers of the Presidency to assure the things which Hobart's role required beyond his own creative ingenuity for success. That combination had never existed before in the Executive Branch or anywhere in the Federal government, because that quality of friendship had never existed between any President and a Negro member of his staff.

Each now has gone to a transcendent reward which shall endure undiminished through the ages. Now it is left to the dedication of their friends to collectively fulfill the final requirement of justice to which both brought great service. Even that final requirement was articulated in May 1963 when Vice President Johnson was honored with a distinguished Service Award by the National Press Club and those two friends put together a brief speech which contained this telling passage:

"But we would be doing ourselves and our country a disservice if we assumed that those successes meant that full and complete justice has been achieved. Quite the contrary! Justice is not a partial thing which can be measured in terms of percentages. Any degree of injustice is complete injustice. Until we achieve complete justice, we can regard progress only as a series of steps toward that goal. Each step should hearten us; but should not lull us into self-satisfaction that the job has been done."

We now face a nation and a world which presents to us a sober reminder of that wisdom. Those of us who commit ourselves among his friends—and we are legion—have Hobart to inspire within us a new determination to complete his dream for all of us. He wanted us all to be as complex, enigmatic, bright and moving as he was and as God gives us the courage to be. All that he asked is that in the time remaining to us, we, in our own way, produce opportunities and challenges for others and add another step towards justice for all as he did in his own way.

TRIBUTE TO HOBART TAYLOR

(By George Reedy)

Hobart Taylor was a classic example of the right man, in the right place, at the right time. In the 1960's, the struggle to secure equal entitlement for all men and all women reached a crucial stage. The walls erected by bigotry had been battered heavily by courageous pioneers leading people who refused to be denied any longer their rightful place in the sun. One final push was needed so dreams would become legal reality reinforced by the creation of structures dedicated to the eradication of the ugly blot of prejudice in our society.

The final push required leaders who were rare. They had to be men and women who were deeply sensitive to historic injustices that had divided the United States since early times. At the same time, they had to be men and women who had transcended bitterness and understood the pressing need for solution rather than revenge. Hobart Taylor was that kind of man and his collaboration with Lyndon B. Johnson in the Senate, in the vice presidency, and the White House, was one of history's more fortunate turns.

The friendship between the two men had rich results. Hobart Taylor served Lyndon B. Johnson as a lawyer not only in the field of civil rights but in many other areas of governmental problems. Happily, Lyndon Johnson was a man who knew how to take his advice. It is obvious of the problems to which the two addressed themselves are still far from a solution. But long and decisive steps have been taken toward the ultimate goal of a society where men and women are judged solely on their merits and Hobart Taylor should be recorded in the chronicles of humanity as a major and driving force in that progress.

Mr. CRANSTON. Mr. President, I join the Senator from Rhode Island in paying tribute to Hobart. He was a neighbor of mine, with his family, when I

first came to the Senate 12 years ago. I became well acquainted with him and his family. They were very good friends and very helpful to me in my initial period in Washington, in the Senate.

He had an outstanding record of public service in many, many ways. He was of great service in the White House and in many other roles in public life and private life.

I simply want to pay my respects to him and to express my sympathy to his wonderful family. He leaves some very fine members of his family to carry on in his tradition.

COMMITTEE ON ARMED SERVICES RULES OF PROCEDURE

Mr. TOWER. Mr. President, on March 26, 1981, the Committee on Armed Services adopted certain revisions to its rules of procedure. These revisions are designed to clarify various procedures of the committee and to insure that the committee's rules are not inconsistent with the Standing Rules of the Senate.

In accordance with rule XXVI 2 of the Standing Rules of the Senate, I ask unanimous consent that the complete text of the rules of procedure for the Committee on Armed Services be printed in the RECORD.

There being no objection, the rules were ordered to be printed in the RECORD, as follows:

COMMITTEE ON ARMED SERVICES

RULES OF PROCEDURE

(Adopted March 26, 1981)

1. Regular Meeting Day and Time. The regular meeting day of the committee shall be each Thursday at 10:00 a.m., unless the committee or the chairman directs otherwise.

2. Additional meetings. The chairman may call such additional meetings as he deems necessary.

3. Special meetings. Special meetings of the committee may be called by a majority of the members of the committee in accordance with paragraph 3 of Rule XXVI of the Standing Rules of the Senate.

4. Open Meetings. Each meeting of the committee, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by the committee or a subcommittee thereof on the same subject for a period of no more than fourteen (14) calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated below in clauses (a) through (f) would require the meeting to be closed, followed immediately by a record vote in open session by a majority of the members of the committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

(a) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States,

(b) will relate solely to matters of committee staff personnel or internal staff management or procedure;

(c) will tend to charge an individual with a crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy or will represent a clearly unwarranted invasion of the privacy of an individual;

(d) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

(e) will disclose information relating to the trade secrets or financial or commercial information pertaining specifically to a given person if—

(1) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

(2) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

(f) may divulge matters required to be kept confidential under other provisions of law or Government regulations.

5. Presiding Officer. The chairman shall preside at all meetings and hearings of the committee except that in his absence the ranking majority member present at the meeting or hearing shall preside unless by majority vote the committee provides otherwise.

6. Quorum. (a) A majority of the members of the committee are required to be actually present to report a matter or measure from the committee.

(b) Except as provided in subsections (a) and (c), and other than for the conduct of hearings, six members of the committee shall constitute a quorum for the transaction of such business as may be considered by the committee.

(c) Three members of the committee, one of whom shall be a member of the minority party, shall constitute a quorum for the purpose of taking sworn testimony, unless otherwise ordered by a majority of the full committee.

(d) Proxy votes may not be considered for the purpose of establishing a quorum.

7. Proxy Voting. Proxy voting shall be allowed on all measures and matters before the committee. The vote by proxy of any member of the committee may be counted for the purpose of reporting any measure or matter to the Senate if the absent member casting such vote has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded.

8. Announcement of Votes. The results of all rollcall votes taken in any meeting of the committee on any measure, or amendment thereto, shall be announced in the committee report, unless previously announced by the committee. The announcement shall include a tabulation of the votes cast in favor and votes cast in opposition to each such measure and amendment by each member of the committee who was present at such meeting. The chairman may hold open a rollcall vote on any measure or matter which is before the committee until no later than midnight of the day on which the committee votes on such measure or matter.

9. Subpoenas. Subpoenas for attendance of witnesses and for the production of memoranda, documents, records, and the like may be issued by the chairman or any other member designated by him, but only when authorized by a majority of the members of the committee. The subpoena shall briefly state the matter to which the witness is expected to testify or the documents to be produced.

10. Hearings. (a) Public notice shall be given of the date, place and subject matter of any hearing to be held by the committee, or any subcommittee thereof, at least 1 week in advance of such hearing, unless the committee or subcommittee determines that good cause exists for beginning such hearings at an earlier time.

(b) Hearings may be initiated only by the specified authorization of the committee or subcommittee.

(c) Hearings shall be held only in the District of Columbia unless specifically authorized to be held elsewhere by a majority vote of the committee or subcommittee conducting such hearings.

(d) Witnesses appearing before the committee shall file with the clerk of the committee a written statement of his proposed testimony at least 24 hours not including weekends or holidays prior to a hearing at which he is to appear unless the chairman and the ranking minority member determines that there is good cause for the failure of the witness to file such a statement.

(e) Confidential testimony taken or confidential material presented in a closed hearing of the committee or subcommittee or any report of the proceedings of such hearing shall not be made public in whole or in part by way of summary unless authorized by a majority vote of the committee or subcommittee.

(f) Any witness summoned to give testimony or evidence at a public or closed hearing of the committee or subcommittee may be accompanied by counsel of his own choosing who shall be permitted at all times during such hearing to advise such witness of his legal rights.

(g) Witnesses providing unsworn testimony to the committee may be given a transcript of such testimony for the purpose of making minor grammatical corrections. Such witnesses will not, however, be permitted to alter the substance of their testimony. Any question involving such corrections shall be decided by the chairman.

11. Nominations. Unless otherwise ordered by the committee, nominations referred to the committee shall be held for at least seven (7) days before being voted on by the committee. Each member of the committee shall be furnished a copy of all nominations referred to the committee.

12. Real Property Transactions. Each member of the committee shall be furnished with a copy of the proposals of the Secretaries of the Army, Navy, and Air Force, submitted pursuant to 10 U.S.C. 2662 and with a copy of the proposals of the Director of the Federal Emergency Management Agency, submitted pursuant to 50 U.S.C. App. 2285, regarding the proposed acquisition or disposition of property of an estimated price or rental of more than $50,000. Any member of the committee objecting to or requesting information on a proposed acquisition or disposal shall communicate his objection or request to the chairman of the committee within thirty (30) days from the date of submission.

13. Legislative Calendar. (a) The clerk of the committee shall keep a printed calendar for the information of each committee member showing the bills introduced and referred to the committee and the status of such bills. Such calendar shall be revised from time to time to show pertinent changes in such bills, the current status thereof, and new bills introduced and referred to the committee. A copy of each new revision shall be furnished to each member of the committee.

(b) Unless otherwise ordered, measures referred to the committee shall be referred by the clerk of the committee to the appropriate department or agency of the Government for reports thereon.

14. Except as otherwise specified herein, the Standing Rules of the Senate shall govern the actions of the committee. Each subcommittee of the committee is part of the committee, and is therefore subject to the committee's rules so far as applicable.

15. Powers and Duties of Subcommittees. Each subcommittee is authorized to meet, hold hearings, receive evidence, and report to the full committee on all matters referred to it. Subcommittee chairmen shall set dates for hearings and meetings of their respective

subcommittees after consultation with the chairman and other subcommittee chairmen with a view toward avoiding simultaneous scheduling of full committee and subcommittee meetings or hearings whenever possible.

GENOCIDE IS AN INTERNATIONAL CRIME

Mr. PROXMIRE. Mr. President, the Genocide Convention has been before the U.S. Senate for 31 years. During this time, every major as well as minor point has been carefully scrutinized many times. Yet the convention's opponents continue to criticize it.

Today I would like to address the critics assertion that genocide is not a proper subject for treatymaking, which must deal only with external affairs. They argue that genocide is not an international crime; treatment by a state of its nationals is a matter of domestic jurisdiction.

There is no basis, Mr. President, for this argument. From a historical perspective, international treaties have dealt with human rights since the 16th century. In the 19th century, the United States itself participated in a number of treaties regulating the slave trade. Moreover, the United States has ratified treaties relating to activities of its own citizens when those activities have an international character—natural conservation, narcotics, public health. And certainly, Nazi actions during World War II and the subsequent Nuremberg Tribunal demonstrated that genocide was quintessentially an international concern.

In the last 50 years, U.S. treatymaking shows a long line of activity in areas having a direct impact on subjects of domestic concern. Examples of such agreements include the Conventions for the Regulation of Whaling (1931 and 1946); the International Convention for the Prevention of Pollution of the Sea by Oil (1954); the Convention on Narcotic Drugs (1961); the Tokyo Convention on Offenses and Certain Other Acts Committed on Board Aircraft (1963); and the Hague Convention for the Suppression of Unlawful Seizure of Aircraft (1970).

In the international system, Mr. President, as within nations and smaller systems, a crime is what that system defines it to be. The commission of genocide, involving mass action, is necessarily of concern to the community of nations if only because it threatens the stability of the international order. Genocide was proclaimed "a crime under international law" by U.N. General Assembly Resolution 96(I), in December of 1946. To date, 85 countries have ratified this Convention on the Prevention and Punishment of the Crime of Genocide thereby making it clear that genocide is considered to be a crime against the law of nations.

Mr. President, the only way this hideous crime can be controlled is through a united policy of condemnation by the world community. As the leader of the Western World, it is our duty to take part in this condemnation of the crime of genocide, just as we took the lead in guiding the convention through the United Nations after the Second World War. I urge my colleagues to support the passage of the Genocide Convention and reaffirm our country's long commitment to human rights by ratifying this important treaty.

OIL COMPANIES' ACQUISITIONS OF MINING COMPANIES

Mr. BRADLEY. Mr. President, the sudden flurry of merger activity between oil companies and mining companies is cause for sober reflection. I do not think that bigness is necessarily bad or that the Congress should dictate private investment decisions. However, these mergers are strong evidence that the petroleum industry is in good financial health, to say the least; that subsidies and tax benefits to this industry are unnecessary; and that while we sing the budget song on Capitol Hill, we just might be missing an economic power grab of historical proportions. I convey not only my fears but those of many businessmen who have called me alarmed that their companies might be the next victim of a takeover bid.

Mergers between oil and coal companies are not new. Oil company diversification into coal production began on a large scale in 1963, when Gulf Oil acquired Pittsburg and Midway Coal. Since then many other oil and gas companies have entered the coal industry, some via mergers such as Conoco with Consolidated Coal in 1966 and Occidental with Island Creek Coal in 1969, others via new entries into the coal business such as Exxon with its Exxon Coal in 1970 and Arco with its Thunder Basin Coal in 1977. The pace of acquisition appears to have accelerated recently. In 1 week in March, SoCal offered $4 billion for Amax and Sohio bid $1.8 billion for Kennecott. Seagrams attempted, apparently unsuccessfully, to buy St. Joe Minerals for $2 billion—$2 billion that the liquor distiller had made on the sale of oil properties.

U.S. oil and gas companies produced about 19 percent of the Nation's coal in 1978, the latest data now available. These 46 firms also owned about 23 percent of recoverable coal reserves in this country. The eight major oil companies (Exxon, Texaco, Standard of Indiana, Shell, Arco, Mobil, and Standard of California) together produced less than 3 percent of the Nation's coal in 1978 and together owned about 7 percent of recoverable coal reserves. Manipulation of coal markets by oil and gas companies at this level of patricipation appears unlikely.

However, to insure that proposed corporate mergers receive careful attention by the FTC and Justice Department, the Congress passed the Hart-Scott-Rodino amendment to the Clayton Act. Effective in 1978, this legislation requires large firms to notify the FTC and DOJ in advance of closure on a proposed deal. The FTC's premerger notification office has 15 days to review the case—30 days if the offer is other than a cash deal. DOJ has the same opportunity. Either agency can file in Federal court for a preliminary injunction blocking the proposed merger. All premerger notifications are strictly confidential to avoid stock market manipulation. One can only assume that each of the recent merger proposals has been submitted to the FTC and the Department of Justice.

Only if these proposed mergers receive careful scrutiny for possible anticompetitive implications can we believe that the public will be protected from monopolistic behavior. If budget cuts or lax enforcement of antitrust laws jeopardize the effectiveness of these safeguards, we should press the warning siren. An antitrust division that fails to scrutinize one of the bigger mergers in our Nation's history is an antitrust division that is prepared to give away much to special interests and it could be a prelude to actions which will devastate the public lands and the consumer alike.

Another troubling aspect of these mergers is one of perception. These large purchases—billions of dollars cash—make it all too evident that some sectors of the U.S. economy are cash rich while others struggle to pay rising energy prices. Also, the memory is fresh of oil company executives supporting crude oil decontrol with implicit and explicit promises that oil company profits would be ploughed back into oil production. One could easily have gotten the impression that oil production in this country after decontrol would increase dramatically, when we all knew that the best we could hope for was a temporary respite from the inevitable production decline. These mergers are evidence that revenues from decontrol are not going exclusively into oil exploration and development. This specific perception problem would have been less severe had the oil company executives said frankly that they would invest—as might be expected—in the projects that yield their shareholders the greatest return on their investment.

This lack of candor, combined with the oil industry's enormous economic and political power, makes me wonder whether our resources will be developed soundly with an eye to future generations as well as the bottom line. Since the oil industry focuses on the bottom line, public officials must protect the interests of the next generation. Public officials in this administration, or any administration must recognize their special responsibility to protect the environment against great private pressures and to recognize that antitrust activity in the resource area is more important than in almost any other area.

Mr. President, what should we conclude from these mergers? First of all, large companies growing larger are not necessarily bad. If the capabilities of one company complement the potential of another, then public and private interests may coincide. We should be encouraged that the capital necessary to drill for oil, mine coal, develop solar energy, and produce synthetic fuels is available to our energy industry.

Second, I certainly would not want anyone other than corporate management to decide how to spend their reve-

nues. Along with the freedom to invest as they see fit goes the responsibility for failure. Public interests are served when private incentives encourage responsible investment.

Third, I do not believe that rich industries should be prohibited from investing in any other industry, as long as they play by the antitrust rules established by law. And it is here, Mr. President, where I begin to have concerns. While the share of coal production currently controlled by oil and gas companies suggest that we have little cause for alarm today, we have not recently heard from the referees. Does the silence emanating from the FTC and Department of Justice indicate that they have examined these mergers for anticompetitive implications and agree that we have no cause for concern? Or does it indicate that the referees are asleep? I, and perhaps the American people as well, would like to hear from the referees.

The final conclusion we should draw from these mergers is that the energy industry appears to be doing quite well. Despite the moaning we heard 2 years ago about the need for cash to explore and drill for more oil, the windfall profit tax does not appear to have had the depressing effects predicted by the industry. Indeed, these mergers suggest that the cash-rich industry may be receiving too many benefits from the Federal Government. In light of these mergers, should tax breaks still be given for exploration and well development costs? Is this the time to eliminate the last remnants of the percentage depletion allowance? And, Mr. President, why should the Federal Government provide subsidies in the form of loan guarantees to such energy companies as Texaco, Tosco, Occidental, Mobil, Union Oil, Ashland, Tenneco, Phillips, and Sohio? These are among the many firms who have applied to the Synthetic Fuels Corporation for subsidies to seek new sources of energy. May I suggest that investments in human capital, in railroads and seaports—so blatantly neglected by the Reagan budget—may be from the Nation's perspective better uses of scarce capital.

So, Mr. President, I speak today to raise the public policy issues surrounding these mergers. I do not condemn the energy companies for diversifying into coal and for providing mining companies with needed capital. But, I call on the FTC and Department of Justice to fulfill their responsibility to the American people, and I question the need for any subsidies to the energy companies; they appear to be doing just fine without our help.

THE SUCCESS OF EMPLOYEE STOCK OWNERSHIP

Mr. LONG. Mr. President, I would like to call to the attention of my colleagues a recent article that appeared in the Wall Street Journal. This article reports on the success of employee stock ownership in the Chicago & North Western Transportation Co.

As we begin to focus on incentives for expanding and renewing this Nation's productive resources, I hope that we will keep in mind this fine example of employee stock ownership and that we will take the time to ask just who will be the long-term beneficiaries of such incentives. If we are to have a strong free enterprise system over the long term, we would be well advised to enact incentives not only for expanded capital investment but for expanded capital ownership as well.

A recent study (from the National Bureau of Economic Research) indicates that for the majority of American families their most important asset is now their right to someday draw a social security payment from the Federal Government—a transfer payment. That is a poor showing for a nation that prides itself on a strong private property approach to economic matters. This is one of the reasons why I have long been an enthusiastic supporter of expanded ownership and particularly of plans that enable working Americans to gain a stake in the enterprise for which they work.

As a step in that direction, I am preparing to introduce legislation that would expand the incentives for corporations to finance their growth or their transfers in ownership in such a way that employees will have an opportunity to own stock in the companies for which they work. I urge Senators to cosponsor this badly needed legislation.

It is my hope that we can support the President's effort to reduce the cumbersome size to which the Federal Government has grown. Yet it is clear that unless we work to build economic self-sufficiency and more net worth into the American population, in the future we will be forced to rely more and more upon welfare, social security and various other Government transfer payments to care for the needs of the American people.

Unless we are to endorse the "trickle-down" approach of the past, we must begin to encourage techniques of finance (such as employee stock ownership plan financing) that will encourage American business to spread the benefits of economic growth more broadly among the American people (and particularly among working Americans).

What would be the long-term effect of beginning to transform this troubled economy of ours into one in which working Americans have the interest and the incentive of capital ownership? At the very least, a program of expanded ownership would bring with it a better understanding of how a free enterprise system works, and a greater awareness of the costs and the tradeoffs of Government programs.

Expanded ownership could also have a positive effect on our relationship with other nations. We need a working model of what we would advocate for other nations. It is shortsighted for us to expect others to move in the direction of a private property, free enterprise economy when we ourselves have such a poor distribution of productive wealth. It would be helpful if we could show people all over the world how our increasing prosperity spreads out and reaches people in all walks of life. We have the opportunity to do that with a broad-based program of expanded ownership.

In addition, as this article indicates, employee stock ownership can have a positive effect on labor-management relations. This is hardly surprising; we all know that ownership counts. It can create a climate wherein a unity of interest and incentive can emerge. If a company succeeds, its success is widely shared, and its eventual success or failure is placed in the hands of those upon whom its success or failure will largely depend. If we want to get the most "bang-for-the-buck" from new incentives for capital investment, we should insure that those new incentives are coordinated with incentives for expanded capital ownership.

I recommend to my colleagues that they read this article and that they join as cosponsors of the bill I will soon introduce ttiled "The Expanded Ownership Act of 1981."

I ask unanimous consent that the article from the Wall Street Journal be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOME WORKERS AT THE C&NW FIND POSITIONS ASTOUNDINGLY REWARDING

(By John Curley)

When Chicago & North Western Transportation Co. was sold to its employes for $50 a share in 1972, Mary L. Brawka, a statistician, bought 30 shares for sentimental reasons. "My whole family worked for the railroad," she says. "It was part of me."

The investment turned out to be a gold mine. A boom in the value of the stock has changed her life and the lives of thousands of other C & NW employes. An original investment of $1,000 is worth $72,000 today.

"I never could have sent my daughters to law school and medical school without that stock," says Mrs. Brawka, who earns $20,000 a year. She still has about $60,000 of stock left. Jeff Green, a yardmaster who makes $25,000 a year, figures his original investment of a few thousand dollars is worth $90,000 today. "When I retire, I'll buy some land in Texas and watch the armadillos," he says.

A BIG SPLIT

The initial issue of 72,000 shares in 1972 quickly soared to $660 a share and was split 60-for-one. After languishing below $10 for a few years, the stock began rising again in 1978. Yesterday, the stock closed at $58 bid.

The stock's price has risen because investors see C & NW as a survivor in the Midwest. (The Rock Island is liquidated and the Milwaukee Road is down to a third of its original size.) The company has also been slicing off unprofitable lines and plowing money back into equipment.

UNAWARE MILLIONAIRES

"There are a lot of millionaires walking around that company, and some don't even know it," says James G. Smith, a broker for Davis, Skaggs & Co. in San Francisco. About half of the 4.4 million shares outstanding are held by one-third of the 11,000 employes.

Many in the company say the stock has helped management-employe relations. But sudden wealth has brought problems, too. One high-ranking officer fears kidnapping. A director of special operations gripes about the $24,000 he paid in taxes on the sale of 3,000 shares. For some employes, capital gains taxes can be more than their annual salaries. As a result, many don't want to sell, preferring instead to leave the stock to their children.

Another problem is jealousy. Raymond

Ucciferri, an engineer with about $214,000 of stock, says envious fellow workers tried to sabotage his car by putting screws and bolts in the tires. Nobody has been hurt, though.

"Some guys call me money-hungry," he says. "I tell them, 'Yeah, but it sure tastes good.'"

UNITED PARCEL SERVICE INNOVATES

Mr. CANNON. Mr. President, during the course of congressional debate on the question of trucking deregulation last year, one theme was expressed time and time again. We were told in no uncertain terms that there are two things in the trucking business that are inherently unprofitable. One is transportation of small packages and the other is providing service to rural and isolated communities. Yet, day-after-day and year-after-year one company—United Parcel Service—does nothing but provide transportation of small packages and it offers service to virtually every community throughout the United States.

Some of my friends in the trucking industry will argue that UPS is the exception that proves the rule. From everything I can tell, however, the record of United Parcel Service simply proves that a combination of superior service at competitive rates is the key to success. Indeed, the service provided by UPS is so well respected that the traditional suggestion, usually made in jest, that we turn the postal service over to UPS, is becoming a virtual cliche. UPS has always been an innovator and a leader in the motor carrier industry.

It comes as no surprise, then, that UPS is the first major trucking firm to utilize a very important provision of the Motor Carrier Act of 1980 that will ultimately lead to a much more competitive transportation system in this country. I am referring to the provision in the new law which allows motor carriers to increase or decrease their transportation rates without interference from the Interstate Commerce Commission, so long as the change stays within a zone prescribed in the statute. UPS has recently filed for a general rate increase of 4.2 percent.

Mr. President, you may wonder why I would rise in praise of a rate increase. I assure you that I am not endorsing increased transportation rates. But I am genuinely pleased to see a motor carrier taking advantage of the freedom that is guaranteed by the new law.

The concept of increased rate freedom for motor carriers is premised on the belief that competition itself will be an effective regulator of prices within the industry. I think that this principle is validated by the fact that UPS has opted for an increase that is far less than that which they are actually able to take under the provisions of the Motor Carrier Act. In short, then, I would congratulate United Parcel Service for this innovative decision and hope that we will see more use of the zone of rate freedom by other carriers in the future.

While on the subject, I wish to bring to the attention of the Senate one other activity that UPS has been involved in and which provides very exciting possibilities for fuel conservation in the future. I am talking about its joint effort with Texaco to develop a vehicle engine that has extraordinary new capabilities. The engine is called the UPS 292SC. Incredibly, it is designed to run equally well on either gasoline or diesel or any mixture of the two. It has also been tested to run on alcohol, gasohol, and apparently can even run on motor oil. There was a very interesting article published recently in the Commercial Car Journal describing this engine and the potential energy and environmental benefits. I ask unanimous consent, Mr. President, that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ENGINE OF THE FUTURE!

(By Dave Ritchie)

Billions of dollars and as many or more words have been expended by governments, manufacturers, "think-tank" research groups, famous technical wizards, obscure backyard inventors and assorted kooks and shysters to promote an alternative engine concept.

Some experts say we ought to get rid of all gasoline engines and replace them with diesels. Others favor more exotic stuff. At times the list of possible alternatives has included rotary engines, gas turbines, steam power, Stirling engines, electrics, hybrids, flywheel power and special fuels such as alcohols, hydrogen and even peanut oil.

With so much being said about the need for an alternative engine, it's ironic that no one has actually come up with one that gives the least hint of practicality. No one, that is, but the unlikely combination of a major U.S. oil company and the world's largest commercial vehicle fleet.

In the incredibly short span of under three years, United Parcel Service and Texaco, Inc. have pooled their talents to produce a six-cylinder motor that combines the best qualities of both gasoline and diesel power so well that for the short term, at least, it promises to be that much-sought-after Holy Grail—a true alternative engine.

The engine is called the UPS 292 SC. It's so new that only one exists in a UPS vehicle. There's another now being tested on a dynamometer at Texaco's Beacon, N.Y., research center; and a third is undergoing durability tests at Ricardo Consulting Engineers, Ltd. in England. Parts for perhaps 10 or 12 more exist in an unfinished state. Not more than 1500 miles and a couple of hundred dyno hours have been accumulated on the three engines running now. But results so far are very impressive.

For example: The UPS 292 SC isn't a gas engine, as we know it. Nor is it a diesel. But it runs equally well on both gasoline and diesel fuel . . . or any mixture of the two. It has also run on other liquid fuels—alcohol, gasohol, even (once by accident) 10W-40 motor oil—though no serious testing has been done with these yet.

None of the fuels it is capable of burning require any engine changes or modifications. It's simply a case of filling the tank with whatever happens to be available and turning the key to start.

Speaking of starting, the UPS 292 SC has spark plugs and a distributor like a gas engine; and fuel injectors like a diesel. But like neither engine, it needs no choke, glow plugs or ether to get going on the coldest of mornings. Again, it's simply a case of turning the key.

Revving fairly high (over 3,000 rpm), the engine is as peppy and tractable as any similar-size gas job. But it gets diesel-style fuel economy along with inherently low exhaust emissions. Unlike a diesel, however, it's light in weight and low in vibration. In fact, it's built on a production gas engine block assembly, so it's a natural for retrofitting in gas power applications.

This curious combination of diesel and gas engine characteristics, along with an amazingly unfussy appetite for almost any liquid fuel, is exactly what led UPS to Texaco in the first place.

Since the 1940s, Texaco had been developing something called TCCS (Texaco Controlled-Combustion System). Its original objective was to eliminate engine "knock" or detonation due to the relatively poor quality of gasoline available at that time. Back then all refiners were working on solutions to the knock problem. Most, Texaco included, ultimately chose to alter the fuel's chemistry, thus producing higher and higher octane "antiknock" gasolines.

But a few engineers at Texaco thought the same result could be achieved by changing the engine, instead of the fuel. By combining the fuel injection system of a diesel with the ignition system of a gasoline engine, along with special intake porting to initiate—and a deeply cupped piston to intensify—a cyclone-like swirl of gases in the combustion chamber, they came up with an engine concept that required neither high octane nor high cetane fuel ratings. In fact, the engine proved insensitive to both.

To understand what that means, it's necessary to realize that as far as fuels are concerned, octane and cetane ratings are really opposite ends of the same yardstick. Octane numbers measure a fuel's ability to resist detonation or self-ignition. Cetane ratings describe how easily a fuel will self-ignite. A fuel that's high in one will be extremely low in the other, and vice-versa.

To put it another way, in gasoline engines, preignition and detonation are undesirable. So a high-octane fuel is required. But diesel engines virtually depend on detonation for auto-ignition. Consequently high cetane is a must. In between the two types of fuels is a wide range of liquids with octane and cetane values too low to be useful in either gas or diesel engines.

In the Texaco combustion system, however, ignition is taken care of by a powerful, long duration spark. This does away with the diesel's need for a high-cetane fuel and the extremely high compression ratios necessary to generate the heat of ignition. At the same time, Texaco's system eliminates detonation by burning the fuel only as fast as it is injected into a tornado of swirling air in the combustion chamber. So the fuel's octane rating also becomes unimportant.

What is important is that by designing the knock out of the engine, instead of out of the fuel, Texaco had devised a combustion system that takes advantage of all sorts of liquid fuels, including gasoline, diesel and the relatively unrefined "wide boiling range" fuels that separate them.

This one unique quality perhaps more than any other, made the TCCS concept extremely attractive to UPS engineers, who in the mid-'70s began frantically searching for a practical alternative to the 35,000 gasoline engines that power the fleet's familiar brown "package cars."

For years the company had been evaluating various small diesels inside-out and upside-down. And while they credited diesel power with excellent fuel economy, the fleet's automotive people found it wanting in many other crucial areas.

Existing small diesels were too heavy, too noisy, too slow, too expensive and too difficult to retrofit into their large gas-powered fleet, said a company spokesman—publicly.

Coming at a time when small diesels were

just being "discovered" by pseudo-experts as the "obvious" answer to the nation's deteriorating energy situation, such news was unwelcome in many quarters.

Meanwhile, UPS engineers and Texaco research people were getting together to see if any of the gas engines used by the package fleet could be easily modified to the TCCS concept. Two years of preliminary lab work, including a full program of experimental single-cylinder engine tests, resulted in last winter's announcement that a small number of prototype engines would be built on the six-cylinder 292-cu. in. GM block which powers a large part of the UPS fleet (see *CCJ*, Feb. '80, pg. 103).

The UPS 292 SC engine shown here is one of the first prototypes to be completed. The "SC" stands for "stratified charge." And though the engine does indeed make use of the stratified-charge principle, it should not be confused with other more complicated, less successful stratified charge designs.

With the exception of cam, lifters and pistons, the basic engine block is a stock GMC 292. Crankshaft, bearings and rods are all standard. The pistons are special high-compression (13:1 vs. stock 8:1) slugs with deep-cup combustion chambers machined into their crowns. At top dead center they all but contact the cylinder head, forcing the already rapidly whirling intake air charge to speed up like a skater in a scratch-spin as it crowds into the confined diameter of the cup.

To prevent the valves from fouling the pistons in such close quarters, the cam has a quick-lift, low-overlap profile designed to operate with commercially available hydraulic roller lifters.

The cast iron cylinder head is all-new. It was designed to accommodate Texaco's special port shapes that impart an initial 10,000-rpm spin to air entering the cylinders on the intake stroke—as well as the precise location of injectors and spark plugs prescribed by Texaco research engineers—into a package already encumbered by existing stud pushrod hole, oil and coolant passage patterns. This work, and also the casting, machining, engine assembly and initial run-ins were carried out by Ricardo Consulting Engineers, Ltd. in England.

Most of the external changes are visible from the right side of the engine. Conspicuous at front is a new Ricardo-designed gear case that provides drive and mounting for both ignition distributor and the Stanadyne Roosa Master fuel injection pump. Special metallurgy changes made by Stanadyne allow critical parts of the fuel-lubricated pump to operate without damage on "dry" fuels such as gasoline. Pressure lines snaking out of the pump head lead to each cylinder's pencil injectors, in close proximity to which are nestled the spark plugs.

The Texaco Ignition System (TTIS) uses a high frequency alternating spark current, the duration of which corresponds to a number of degrees of crankshaft rotation rather than a relatively constant split-second of discharge time as in conventional systems. The distributor rotor is an off-the-shelf item, but the distributor cap has extra-wide segments inside to transfer the long-duration spark current. Both spark timing and duration are controlled by electronic "black box" circuitry, and the system is triggered by electrical impulses from each of the engine's injector nozzles.

Since the speed and power of the engine are controlled by the amount of fuel injected, rather than by a throttle, intake manifold vacuum isn't sufficient to operate a power brake system. A diaphragm-type vacuum pump from an Olds diesel has been mounted on the engine's original mechanical fuel pump boss (below and to the rear of the injection pump) and is operated by an eccentric on the camshaft.

Hanging off the left side of the engine is a simple plenum-type intake manifold and split exhaust headers, the outlets of which eventually join in a single exhaust system. The split exhaust has no special significance for the 292 SC except to avoid a single manifold's tendency to crack from repeated expansion and contraction at high mileages.

Installed in one of UPS' P-600 package cars, the new engine weighs only 50 lbs. more than the standard GM 292-cu. in. gas engine it replaces. Vehicle changes to accommodate the installation were minor, confined to such things as a new throttle cable, new wiring to ignition components, new fuel lines, filters and pump, new exhaust pipe, and the inclusion of certain long-life components such as a heavy-duty air cleaner and silicone rubber hoses.

Since August when the installation was made, UPS has been busy running the 292 SC-powered vehicle side by side with an identical but conventionally powered truck over various courses devised by the company's engineering department to simulate typical stop-and-go package delivery cycles. Increases in fuel economy over the standard engine have varied anywhere from approximately 20 percent during open highway operation to 142 percent at idle.

Idle exhaust emissions have been found to be within New Jersey's and California's current light-duty and Oregon's heavy-duty gas engine standards—without any add-on emission control devices. Noise levels, while slightly higher than the standard gas-powered vehicle, are well within BMCS' maximum for exterior noise, and just on the allowable maximum for interior noise—again with no special countermeasures taken.

A complete rundown of the engine's test record is available in SAE Paper #801429 by J. M. Lewis of UPS and W. T. Tierney of Texaco. Suffice to say, this editor recently participated in a side-by-side test run in which the UPS 292 SC beat the standard powerplant by over 45 percent in miles-per-gallon as measured by fuel consumption counters accurate to a hundredth of a gallon over a 4.7-mile stop-and-go course. Just to make sure this wasn't a fluke, a second run of 3.1 miles' length registered a whopping 53 percent advantage in mpg—favoring the 292 SC.

The new UPS engine is absolutely fascinating. It sounds a little like a diesel, due to the rap of the fuel injection system. But it isn't nearly as loud. It ran smoothly and vibrated less than the standard gas engine in the control vehicle. But that may have been because the gas job was started up from cold. Any difference in power, performance or pickup between the 292 SC and the GM engine on which it is based was virtually undetectable.

UPS plans to have 10 more prototypes built within six months for further development and testing. After that, if all goes well, 500 more will take to the road for fleet-wide evaluation. Eventually, the entire 35,000-vehicle fleet could be converted, but UPS is taking things one step at a time.

The real beauty of the engine isn't so much its flawless success—though that certainly amounts to plenty—but in the apparent potential that lies ahead. Keep in mind the UPS 292 SC is just in the first prototype—and probably a crude one at that. No fine tuning for economy, emissions, noise or performance has really been attempted.

Its most profound significance is that it can make use of just about any liquid fuel, including "contaminated" mixtures of gas and diesel, and the so-called "wide boiling range" cuts that take only half the refinery energy to produce as unleaded gasoline.

The UPS 292 SC—or something very much like it—could be the engine of the future . . . and not just for UPS.

MAYOR GORDON PAQUETTE, BURLINGTON, VT.

Mr. LEAHY. Mr. President, recently Gordon Paquette, mayor of Burlington, Vt., for 10 years, left office. Burlington is my hometown and Mayor Paquette is a close personal friend of mine and my family. Like all Burlingtonians, I admire and appreciate the work he has done during the past decade. Largely because of his efforts, vision and dedication, Burlington is now one of the most desirable cities in the country.

On behalf of my family and myself I want to wish Gordy Paquette and his lovely wife Mary the very best and to express the appreciation of all Burlingtonians and all other Vermonters for his efforts.

I ask unanimous consent to include in the RECORD at this point very appropriate editorial comments made by our hometown paper, the Burlington Free Press, regarding Mayor Paquette. They express the feelings of so many of us.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MAYOR KNOWN AS FIGHTER FOR PROGRESS

During his five terms in office, former Mayor Gordon Paquette, who lost his bid for a sixth term to Bernard Sanders in a stunning upset, won a reputation as a champion of progress for the city by supporting projects that would make it more attractive to residents and visitors.

He laid his political career on the line on several occasions to insure that his proposals won voter approval.

His administration spanned a period of mushrooming growth in Chittenden County. He spent much of the time in developing appropriate responses to the boom. That much federal money was poured into the city to assist it in meeting demands for services and facilities is largely due to his finesse in dealing with government agencies.

The development of Burlington Square during his tenure brought a substantial amount of new revenue into city coffers. The complex is the largest taxpayer in the city.

Recognizing the need to revitalize the city's downtown business district to preserve its reputation as the state's major retail shopping center, he threw his weight behind the plan to create the Church Street Marketplace and campaigned hard for approval of a bond issue to make it a reality. During his last year in office, he oversaw the first phase of the pedestrian mall's construction. The remainder of the work is scheduled for completion this year. Once finished, it is expected to add new flavor to downtown shopping.

Paquette was one of the prime movers in the development of the Chittenden County Transportation Authority in 1973 when the Burlington Rapid Transit Co. went out of business in June of that year. He lent the city's moral and financial support to the transit system which provides service to Winooski, South Burlington, Essex Junction, Essex and the city. The authority's buses will serve the Church Street Marketplace when it is completed.

Paquette's administration ran the city efficiently and provided essential services without making heavy demands on the taxpayers. Only this year did Paquette seek a hefty 65-cent hike in the tax rate and the increase, as much as anything else, probably contributed to his defeat at the polls.

His successor will have some rather large shoes to fill when he tries to cope with the

problems that will develop in the next two years.

Even though Paquette may feel humbled by his defeat in the city election at the hands of a newcomer to Burlington politics, he can look back at a record of solid accomplishments during his 10-year tenure with a good deal of satisfaction.

For that, the citizens of the community owe him their thanks.

JUAN TRIPPE, FOUNDER OF PAN AMERICAN WORLD AIRWAYS

Mr. CANNON. Mr. President, I wish to give recognition to the passing of Juan Trippe, founder of Pan American World Airways. He is recognized as the pioneer of over-ocean flying and as the dean of airline executives around the world.

The founder of Pan Am in 1927, Mr. Trippe guided his company for more than four decades until his retirement on May 7, 1968, as chairman and chief executive. He served as honorary chairman and as an active member of the board of directors until his retirement from the board on May 13, 1975.

On October 19, 1927, when Pan Am made its first flight, it had $300,000 in assets and a 90-mile route between Key West, Fla., and Havana, Cuba. At the time of Mr. Trippe's retirement as chairman, Pan Am had assets of more than $1,000,000,000 and a route system of some 80,000 miles linking the United States with some 85 lands on 6 continents.

In addition to scheduled commercial services, the corporation Mr. Trippe organized now operates an international chain of hotels, is the prime contractor to the Air Force at Cape Kennedy and the down-range tracking stations, markets aircraft for business and private use, and provides essential airlift in support of U.S. Government commitments throughout the world. Under Mr. Trippe's direction Pan Am was the first airline to fly across the Pacific, was first across the Atlantic, first to order and fly American-made jets, and first to order the Boeing 747.

He has been decorated by more foreign governments than any other private American citizen. His career has been marked by continuing efforts to bring air travel within the means of the average man.

Mr. Trippe organized Pan American Airways in March 1927, and America's first international air carrier was born. Even while corporate details were being worked out, Pan Am was awarded the United States as well as the Cuban airmail contract between Havana and Key West, Fla. Mr. Trippe had already assembled a staff and had purchased two Fokker trimotor land planes. He met deadlines, launching the 90-mile flight from Key West to Havana on schedule on October 28. Within a year the fledgling airline, now with 118 employees and 5 aircraft, began to expand its routes southward, pushing across the Caribbean to South America. The step-by-step development of an airways network through Latin America was underway.

On November 22, 1935, Mr. Trippe saw his plans to conquer the oceans begin to assume reality when Pan Am's Martin M–130 flying boat, the *China Clipper,* rose from San Francisco Bay, and proceeded to Hawaii. From there it continued on an island-hopping route to the Philippines.

When war broke out in Europe, the character of Pan Am's transatlantic operation changed. The clippers now were filled with important diplomatic and military passengers and high-priority cargo.

From the moment of the attack on Pearl Harbor, Pan Am went on a war footing, abandoning temporarily plans for commercial expansion. The airline helped train military crews in long-range flight. Its bases were put at the disposal of the Armed Forces and its aircraft were operated for the military. Special air services across both the Atlantic and Pacific were established to supply the fighting fronts. When peace returned, the company resumed its route development and on June 17, 1947, another long-range Trippe plan reached fruition when Pan Am opened the first scheduled round-the-world service.

We all owe a debt of gratitude to this able man and I am sure my colleagues join me in mourning his passing.

TRIBUTE TO W. GORDON LEITH, A FARMER COOPERATIVE LEADER

Mr. DOLE. Mr. President, I pay tribute today to one of the truly gifted farmer cooperative leaders of recent decades. I refer to W. Gordon Leith, corporate vice president and secretary of Farmland Industries, who retires on June 8 after more than 30 years of service to that organization and a lifetime commitment to the farm cooperative movement. It has been a pleasure and honor to know Gordon personally and to follow his many accomplishments.

Gordon has provided wise counsel to Farmland's four presidents and helped make it the largest farmer cooperative in the country. His thorough knowledge of business practices is matched by a keen understanding of and strong commitment to the principles of cooperation.

He is unbending in his conviction that farmer cooperatives can survive and grow only if they remain true to these principles, a message that he has articulated not only within the farmland system but throughout the farmer cooperative community. In the process, Gordon has developed a national and international reputation as one of the few great cooperative philosophers of the day. The cooperative movement has been enriched by his vision, his energy and his commitment.

Mr. President, the farm community will lose a truly great cooperative thinker when Gordon Leith retires on June 8. Those of us who represent U.S. agriculture in Washington salute his leadership and wish him the best in the years ahead.

AVIATION TECHNOLOGY NEEDS

Mr. CANNON. Mr. President, on February 17, 1981, the day before the administration presented its fiscal year 1982 budget plan, I summarized in detail my view of the urgency for renewed support of NASA's aviation research and technology development programs in order to check the recent decline in our aviation industry's world leadership.

You will recall that my motivation was not based upon lost prestige for our Nation. Rather it was based upon future lost jobs for our people—hundreds of thousands at stake. It was based upon future lost contribution to our net trade balance—billions of annual dollars at stake.

It was based upon future flight of airline capital abroad for purchase of foreign large transport aircraft, rotorcraft, commuter aircraft—billions of dollars at stake.

No, Mr. President, it is not a chauvinistic clamor for retention of world leadership in aviation that drives me.

Rather it is the duty of any of us who can understand the factors that determine the soundness of our economy to stand up in support of those national investments which are necessary to that strong economy which always has been, and I hope always will be, the foundation for our Nation's standard and quality of life.

Subsequently to my address on February 17, two very opposite developments occurred and are continuing. For one thing the new administration has proposed a national budget for fiscal year 1982 which provides a 9-percent increase over the fiscal year 1981 budget while containing a 4-percent decrease in current dollars for aeronautics programs.

This is about a 14-percent real decrease in level of effort. To do this to vital research activities underlying the one industry which has provided the largest net contribution of any sector of our economy to our trade balance, about $13 billion in 1980, which alone accounts for about half a million employees in every State of the Union, constitutes a questionable judgment.

Mr. President, the other development since my address of February 17 has been the breadth of response from the many leaders of industry who are foursquare behind my plea that this Congress and this Government provide the research and technology development investment that yields such vast benefits to our economy. Let me extract and quote a few representative remarks, and with your consent, include those complete responses in the RECORD.

From Harry J. Gray, chairman of United Technologies:

The aeronautics industry, indeed, is a significant contributor to U.S. well-being. Continued leadership is essential both economically and militarily. I view with concern the rising challenge from Europe and Japan. I am confident of our ability to prevail in a fair competition, but it seems that others can twist the rules to suit their convenience. Certainly, lack of a consistent, coordinated U.S. policy has hamstrung our efforts.

From Ed Cortright, president, Lockheed-California Co.:

I am reasonably familiar with the government/industry teamwork, which has characterized U.S. leadership in aviation since the Wright Brothers. There is no doubt in my mind that this teamwork must continue if

we are to retain the many benefits which have accrued to our nation over the years from our leadership in aviation. As strong as our industry is, it is not prepared to assume responsibility for the vast amount of research carried out under government sponsorship within the magnificently equipped government laboratories.

From Brian H. Rowe, senior vice president and group executive, General Electric:

Such a massive change in the NASA aeronautical propulsion program may disrupt some of the important work in advanced aeronautical technology. I am concerned that a continuing change in the government role in support of advanced aeronautical technology may lead to a weakening of the competitiveness of the U.S. aircraft engine industry in the future.

From Arthur J. Burrows, vice president, Avco Corp.:

Unless something is done to assist the "private-profit" aerospace industry of the United States in a manner comparable to the way the rest of the world assists their aerospace industry, it is difficult to see how we can continue to survive.

From Lionel D. Alford, president, Boeing Military Airplane Co.:

There is no question but that we face an increasing competitive environment from foreign companies backed by government financing. The only way for companies in the United States to maintain leadership is to lead in new technology; and as you have stated, that means investments both by the companies and our Government.

From Chester A. Rembleske, vice president engineering, Beech Aircraft Corp.:

There is no doubt that foreign competition is rapidly closing the technological advantage that the U.S. has held since the very beginning of the aviation industry.

From R. A. Fuhrman, Lockheed Missiles and Space Co., Inc.:

First, I concur wholeheartedly with your view that it would be tragic for the United States to lose its long standing preeminence in the commercial aircraft market. Your Senate talk ably reviews the importance of the industry to our national economy and our international trade. I also agree that a soundly conceived, well-executed program of research and development is necessary to the maintenance of our leadership.

From Allen E. Puckett, chairman, Hughes Aircraft Co.:

However, it is also true that the aeronautical component of NASA's budget has decreased in priority over the years while space activities have received most of the attention. I might hope that in the present process of budget scrubbing it will be possible to re-examine the aeronautical content of the NASA budget and to recognize its very direct contribution to the economic health of the country.

From John B. Jackson, president, Federal Systems Division, IBM:

We must foster an environment which encourages innovation and technical excellence by U.S. companies. That in turn will allow us to start to overcome our balance of trade and balance of payments problems.

From John C. Brizendine, president, Douglas Aircraft Co.:

Inadequate funding of aeronautics research and development has damaged our ability to attain national objectives of greater productivity, true economic growth, and improved international competitive posture.

From Paul G. Schloemer, group president, Parker Hannifin Corp.:

Aeronautics is one of the few remaining areas where our nation has a leadership position. I am personally convinced that continuing the policies of recent years will lead to further deterioration of our industry's position vis a vis foreign competition.

From I.G. Hedrick, presidential assistant for corporate technology, Grumman Aerospace Corp.:

The aircraft industry and our position of world leadership in it is one of our country's most valuable assets and should be jealously guarded. It is one of the few remaining areas where a U.S. product is considered, worldwide, to be the best—in performance, in quality, and in competitive costs.

From John J. Casey, chairman, Braniff International:

Unquestionably, your analogy as to the potential of our industry taking the same path as the United States automobile industry . . . is indeed one that cuts to the very heart of our existence. It is mandatory we initiate all necessary programs to ensure our country's dominance during these crucial economic conditions.

From Robert B. Ormsby, president, Lockheed-Georgia Co.:

There are three NASA programs, in particular, which the Lockheed-Georgia Company wishes to see accelerated and which I would like to bring to your attention. These are: the propfan development program, the advanced composite materials development effort, and the fundamental research activity in the NASA laboratories.

Mr. President, I find it both perplexing and troublesome that so many leaders of industry see the clear economic value of increased Government investment in aeronautics technology for the national economy, while an administration elected to strengthen that economy proposes instead to weaken an industry which is contributing so much to our economy. I sincerely hope that describes nothing more serious than a temporary lapse of good judgment.

And I hope further, Mr. President, that my colleagues will join with me to correct that lapse. This will require my colleagues' support on the Budget Committee, the Appropriations Committee, and on the floor of this Chamber for the NASA fiscal year 1982 budget level already proposed by the Commerce Committee under the able direction by my valued colleague, Chairman BOB PACKWOOD, coupled with the keen insight of Senator JACK SCHMITT, chairman of the Subcommittee on Science, Technology, and Space.

INTERNATIONAL TERRORISM ACTIVITIES FOSTERED BY THE SOVIET UNION

Mr. THURMOND. Mr. President, there is now extensive evidence that the Soviet Union and two of its chief surrogates—Cuba and the Palestinians—have provided the majority of the weapons, training programs, and sanctuary for a worldwide terror network aimed at the destabilization of Western society. This situation is spelled out in detail in "The Terror Network," a new book by Claire Sterling to be published in April by Reader's Digest Press/Holt, Rinehart, and Winston.

An article adapted from Miss Sterling's book appeared in the New York Times magazine on March 1, 1981.

Mr. President, I will briefly summarize this article to bring it to the attention of my colleagues in the Senate.

Miss Sterling reminds us that terrorists use violence not to punish their victims, but to intimidate their audience; to impose their political will on others by force when they cannot do it by democratic means. Leftwing terrorism is not built upon authentic revolutionary goals of justice and equity for the working class. Rather, it seeks everywhere to dismantle free societies, forcing constitutional governments to behave like police states.

There is a multitude of disparate terrorist groups operating throughout the world today, Mr. President. All are indigenous to their countries, and all began as offshoots of relatively nonviolent movements that promote certain political, economic, religious or ethnic principles. But now more than 140 such terrorist bands from 50-odd countries on 4 continents are linked together in a conspiratorial network, assisting one another and receiving indispensable aid from the Soviet Union and its proxy states.

The heart of the Soviet strategy is to provide this terrorist network with the goods and services necessary to undermine the industrialized democracies of the West—especially the United States of America.

Thus we find, Mr. President, that this network is now, in large measure, made up of men and women superbly trained in such countries as Cuba, Lebanon, or Hungary. They move about the world, armed to the teeth with modern Soviet weapons. Just recently, the State Department charged that the Russians and the Moscow-backed government in Afghanistan had provided the hijackers of a Pakistani airliner with additional weapons and had interfered with negotiations for release of the hostages.

Further, it should not go unnoticed that none of the major terrorist attacks have been directed against the Soviet Union or any of its satellites or client states.

What can be done about this, Mr. President? Governments under siege can directly confront the Soviet Union, Cuba and the Palestinians, using the weapons of diplomacy and trade, to halt the transfer of terrorist goods and services, as we are doing in El Salvador.

They can mobilize world opinion against the network, as Secretary of State Alexander M. Haig, Jr. did in his first news conference in office, and raise the issue in the United Nations and other international forums. Given the dimensions of the problem, it seems unlikely that the West and the Soviet Union can settle any other issues between them as long as world terrorism goes unchecked.

Mr. President, I ask unanimous consent that the text of Miss Sterling's article, entitled Terrorism: "Tracing the International Network," which appeared in the March 1, 1981 issue of The New York Times Magazine, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TERRORISM: TRACING THE INTERNATIONAL NETWORK

(By Claire Sterling)

Four well-groomed men bearing sawed-off shotguns approach a car on a busy street in Milan; bullets rip through the body of the passenger, chief of one of the city's largest hospitals. The Red Brigades, the nation's most-feared terrorist group, claims responsibility. In Northern Ireland, a band of armed men uses explosives to blast its way into the castle of Sir Norman Stronge, an 86-year-old Protestant leader and long time speaker of Northern Ireland's Parliament; the bodies of Sir Norman and his son, James, 48 years old, are found later, bullets through their heads, and guerrillas of the Irish Republican Army (I.R.A.) say it was their work.

Such incidents—these two within the last few weeks—are the stuff of everyday headlines. But last month, at his first news conference as Secretary of State, Alexander M. Haig, Jr., made them the focus of diplomatic confrontation. He warned that international terrorism had become "rampant," and he charged the Soviet Union with consciously seeking to "foster, support and expand" terrorist activities around the world. Specifically, he accused Moscow of "training, funding and equipping" those who kill for political profit.

The reaction to Secretary Haig's charges was in many ways predictable. The Soviet Union called such talk "a gross and malicious deception" and insisted that the "control center of international terrorism" was, in fact, the Central Intelligence Agency headquarters in Langley, Va. Journalists who interviewed Government intelligence experts—including some C.I.A. aides—quoted officials to the effect that there was no hard evidence to support Mr. Haig's accusations. And many Americans shook their heads despairingly at what sounded to them like nothing more than an old cold warrior's refrain, a broadside political attack against a safe and familiar target.

Until a few years ago, I might have been among those head-shakers. Generations of Americans, raised on Depression fare, find it hard to shake off a belief in the aspirations of the political left. But I have spent the last two and a half years researching leftist terrorist groups, talking to government officials and police in 10 countries from Sweden to Lebanon, examining court records and interviews in the public prints. I now know better. There is massive proof that the Soviet Union and its surrogates, over the last decade, have provided the weapons, training and sanctuary for a worldwide terror network aimed at the destabilization of Western democratic society.

The network, as described by dozens of captured terrorists and volumes of courtroom testimony, consists of a multitude of disparate terrorist groups, helping out one another and receiving indispensable aid from not altogether disinterested outsiders.

A few years ago, the C.I.A. reported that more than 140 such terrorist bands from 50-odd countries on four continents were linked in one way or another.

One example: On July 26, 1974, a customs inspector at the Orly airport in Paris discovered that Yutaka Furuya, a passenger on a flight from Beirut was carrying several forged passports, $10,000 in counterfeit money and papers tying him to the Japanese Red Army terrorist group. It turned out he was on his way from a Palestinian base in Lebanon to kidnap a wealthy Japanese businessman in West Germany, and that he was to have logistic support from the German Red Army Faction.

After his arrest, fellow Japanese terrorists occupied the French Embassy in The Hague and demanded Furuya's release. They used explosives stolen by a Swiss anarchist group from a military depot in Zurich, and they were directed by Carlos the Jackal, a Venezuelan who was running terrorist operations in Europe from George Habash's Popular Front for the Liberation of Palestine.

Such connections within the terrorist network have long been evident. What is now beginning to emerge is the degree to which the links in this network have been purposefully forged—and continue to be maintained—by the Soviet Union and its two chief proxies in this regard, Cuba and the Palestinians.

Not until Secretary Haig's charges, and a similar statement a day earlier by the President of Italy, Alessandro Petrini, had any Western government publicly accused Moscow of a major role in fostering the network. Most of the governments under siege are still reluctant to do so. They are unwilling to risk their relationship with Moscow—or with the oil-rich nations supporting the Palestinian connections of the network. They also seem to want conclusive proof that the Soviet Union has created and is the phantom mastermind of these terrorist bands.

It's not that simple. Such direct control of the terrorist groups was never the Soviet intention. All are indigenous to their countries. All began as offshoots of relatively nonviolent movements that expressed particular political, economic, religious or ethnic grievances.

Moreover, some of the support Moscow hands out in the third world goes to anticolonial groups that are militant but not terrorist. Time and again, however, authentic left-wing liberation movements slip over the line from organized resistance to terrorist violence. That line is hard to define, as is the very concept of terrorism itself. Lenin's definition—"the purpose of terror is to terrorize"—is a useful beginning. The terrorist uses violence not to punish the victim but to intimidate the audience, to impose his political will by force when he cannot achieve it by democratic means.

The heart of the Russians' strategy is to provide the terrorist network with the goods and services necessary to undermine the industrialized democracies of the West. More than half of the international terrorist attacks since 1968, according to the C.I.A., have taken place in Western Europe and North America. The most deadly have come in a strategic crescent from Turkey westward through Italy and up to Ireland. And, as Italy's Red Brigades have made clear, the ultimate objective is "the supreme symbol of multinational imperialism," the United States.

It is not happenstance that none of the major terrorist attacks have been directed against the Soviet Union or any of its satellites or client states.

Some terrorist bands have suffered their share of setbacks in the last year or two. In Turkey, for example, "The Anarchy"—the warfare between left and right terrorists that accounted for 4,000 deaths in 1980—has almost ground to a halt since the new military regime took over. More than 21,000 alleged terrorists, more or less evenly split between left and right, have been jailed. In Spain, estimates of the number of hardcore Basque terrorists in Eurkad ta Askatasuna (E.T.A.) remain at between 100 and 200, but there have been signs of public disenchantment. Early last month, the murder of a nuclear engineer led to widespread antiterrorist protests; a few days later, however, the demonstrations turned in E.T.A.'s favor after a suspected terrorist died while being held by the police.

Still, it is dangerous to draw conclusions from apparent symptoms of weakness in the terrorist network. Public knowledge of the workings of a particular terrorist band usually comes from one that is in trouble, whose members have been arrested and are talking. Moreover, some terrorist groups have flourished during these same years; the Provisional I.R.A., for example, has been able to maintain between 200 and 250 fully armed members in spite of the growing war-weariness within its Roman Catholic constituency.

The network, with Moscow's aid, has come a long way in the last decade. Once dependent upon large numbers of ill-equipped amateurs untrained in modern guerrilla tactics, the network is now in large measure made up on professionals, superbly trained, moving about the world in yachts and helicopters, flush with money picked up in multi-million-dollar kidnappings and bank robberies, armed with walkie-talkies, electronic eavesdropping devices—and even heat-seeking, ground-to-air Strela missiles. They have strings of safe houses at home and established gateway routes to assured sanctuaries abroad. It takes only a handful of them to paralyze a nation.

The roots of the terrorist network can be traced directly to the Tricontinental Congress held in Havana in January 1966. More than 500 delegates passed resolutions emphasizing the need for close collaboration between "socialist countries"—i.e., the Soviet Union and its satellities—and "national liberation movements." Significantly, resolutions covered not only third-world groups but also "democratic workers and student movements" of Western Europe and North America. The delegates' purpose, they said, was to devise "a global revolutionary strategy to counter the global strategy of American imperialism."

It was, unmistakably, a call for a Guerrilla International. And the call was heeded. Ten months later, a new cluster of more than a dozen training camps for guerrilla fighters from all over the world was opened in Cuba. The man in charge was Col. Vadim Kotchergin of the K.G.B. It was the first major move by the Soviet Union in the emergence of the Guerrilla International.

To be sure, Fidel Castro had been operating his own schools for guerrillas since 1961, starting with recruits from Latin America and Africa. By 1964, Palestinians and Europeans had jointed the ranks. But the addition of Colonel Kotchergin's camps added a new dimension. The men who were trained in these camps provided the first generation of leadership for the terrorist decade to come.

The stage was set in 1968, that amazing year when, from Berkeley to Tokyo, a generation born after the last great war declared its own war on society in a brief but stunning show of strength. The whole planet seemed to be lurching leftward toward revolution. Then, it was over, and the vast majority who had lived through the experience left it behind. But many of those with a true vocation for revolutionary violence had found one another.

These beginners knew nothing of the terrorist trade; they lacked money, weapons, fast getaway routes and safe havens abroad. We will never know how far they might have gone on their own, because they were never really left on their own. By 1970, any aspiring terrorist band could count on Cuba or the Palestinian resistance.

The revolutionary decade of the 1960's had been focused in Latin America as Fidel Castro preached his gospel of spontaneous,

popular revolution. But that vision had faded as the Soviet presence in Cuba increased, and now the fulcrum of revolution had moved to the Middle East.

The Palestinians now had their own camps for foreigners. Starting in Syria, Lebanon and Jordan, they spread over the decade to South Yemen and then down into Moscow's new African client states, Angola and Mozambique. The Palestinians also set up such camps in Algeria and in Libya, with the help of Libyan money and literally billions of dollars' worth of Soviet armament. Cubans taught in most of these camps, East Germans in many, North Koreans in some.

It was in South Yemen, however—by then a Soviet satellite state tightly controlled by the K.G.B.—that a kind of postgraduate school in international terrorism emerged. The list of foreign guests in the camps around Aden included members of West Germany's Baader-Meinhof gang, Italy's Red Brigades, the Basque E.T.A., the Provisional I.R.A., the Japanese Red Army, the Tupamaros of Uruguay and the Turkish and Iranian undergrounds.

For most of them, the hosts were George Habash and his military commander, Wadi Haddad, of the Marxist Popular Front for the Liberation of Palestine. It was this group, more than any other among the half-dozen in the Palestine resistance, that was most committed to internationalizing the struggle with Israel. The group's strategy; to develop a multinational terrorist hit team that would force their cause upon the world's attention. One early operation, carried out jointly with El Fatah through Black September, was the massacre at the Olympic Games in Munich in 1972. Soon, however, the Habash-Haddad front, operating out of Aden, went its own way. Among its missions: The raid on a meeting in Vienna of the Organization of Petroleum Exporting Countries in December 1975 in which 11 Arab oil ministers were taken hostage; the occupation of the French Embassy in the Netherlands in September 1975; the destruction of the West German Embassy in Stockholm in February 1976; the hijacking of a French plane to Entebbe in June 1976 and of a Lufthansa plane to Mogadishu in Somalia in October 1977,

A second major watershed in Moscow's support of the terrorist network came after the October War of 1973. For the first time, the Arab military performance was impressive enough to persuade leaders such as the P.L.O.'s Yasir Arafat that there was some chance of a diplomatic road to peace. The most intransigent foes of a negotiated settlement with Israel reacted by forming the Palestine Rejection Front. And the Soviet Union, committed to an anti-Israel policy, began to lavish ever greater financial and logistical support on the rejectionists.

The Cubans started arriving in large numbers to train guerrillas in the Middle East. At the same time, Moscow organized extensive military and guerrilla courses for the Palestinians—in the Soviet Union and in East Germany, Czechoslovakia, Hungary and Bulgaria. By 1977 more than 50 such courses a year were running in the Soviet bloc, 40 of them within the Soviet Union itself, involving thousands of guerrilla cadets. In addition, all the Palestinian guerrilla formations—totaling more than 16,000 men—are today wholly armed with Soviet bloc weapons.

Throughout this period, the Russians insisted that such support of the Palestinian cause was simply a matter of supporting an indigenous liberation movement; they have denied any connection between the support and any international terrorist activities. In reality, however, there has been a straight transfer of terrorist skills and equipment from Moscow to the Palestine resistance to the terrorists of Europe and beyond, with the knowledge and assistance of the Russians themselves.

Soviet-bloc arms were being shipped from Eastern Europe to the Middle East, then transshipped to Western European terrorists through a Bulgarian staging post or via Libya. (The imprisoned co-founder of Italy's Front Line, Fabrizio Giai, said: "Never—never!—could the Palestinians have delivered Kalashnikovs and other Soviet-bloc weapons to us or anybody else without the Soviet Union's permission.") And privileged sanctuaries for German, Spanish and Italian terrorists were sprouting up all over Eastern Europe. Four German terrorists wanted for the 1977 kidnapping and murder of the industrialist Hanns-Martin Schleyer, for example, were tracked down by West German detectives taking sunbaths on a beach in Bulgaria. Top Italian terrorists were practically commuting to Prague. And the movement of personnel and tactics between and among the Russians, the Palestinians and the individual national terrorist groups was growing ever greater and more sophisticated.

The record of Soviet involvement with the terrorist network is clear, as in the case histories of the three target nations cited below.

TURKEY

Masked gunmen burst into cafes. "Are you rightist or leftist?" they would demand, and then slaughter one side or the other—or both. Anybody sitting at a ground-floor window, watching television, became fair game for the terrorists. Entire cities took sides: Erzurum, near Turkey's border with Iran, was rightist; Kars, on the Russian border, was leftist. One dared not journey from one to the other.

In 1977, 250 political murders were committed in Turkey; in 1979, the number reached 1,500; last year it climbed above 4,000—the world's worst case of raging terrorist warfare. Not until the army took over power last summer and started its massive arrests of suspected terrorists did the bloodshed begin to diminish.

There were a host of logical reasons for the violence in Turkey. A closed, medieval Islamic society had been suddenly transformed by Kemal Ataturk's post-World War I revolution, swept into the modern age, but political corruption had rotted the beginnings of parliamentary government. Endemic poverty and a 50 percent youth unemployment had stirred textbook urban unrest. Leftist revolutionary groups appeared. But the explanation for the burst of terrorism in Turkey is to be found elsewhere: in the Soviet Union.

Vladimir N. Sakharov used to work for the K.G.B.'s Department VIII, which encompasses the Arab states, Afghanistan, Iran, Yugoslavia, Albania, Greece and Turkey. When he defected in 1971, he told American interrogators about three major Soviet missions in his zone. They were:

1. To sabotage Saudi Arabia's oil fields and, if possible, dislodge its pro-Western monarchy.

2. To build terrorist cells in the Arab oil sheikdoms around Kuwait and the Persian Gulf, offering scholarships and guerrilla training in the Soviet Union.

3. To mount—as reported in John Barron's book "KGB"—a "brutal campaign of urban terrorism, kidnapping and assassination against Turkey."

Generally speaking, Turkey has rated little public attention in the Western world. Yet it is a land mass of enormous importance, the North Atlantic Treaty Organization member charged with defending the eastern entrance to the Mediterranean; its strategic importance to the West has increased dramatically since the fall of the Shah in Iran. Turkey has been coveted by the Russians since the days of the first czars.

According to Sakharov, the latest expression of that desire began in the early 1960's when the K.G.B. began recruiting promising young left-wing Turks for a terrorist movement. They were eventually shipped secretly to Syria for guerrilla training, with the arrangements made by two K.G.B. agents working out of the Soviet Embassy in Damascus. Turkey's terrorist cadets soon were enrolled in other Palestinian camps, from Lebanon and Jordan to South Yemen, and taken in hand by Habash and Haddad. By 1970, a group of them had already been caught by police in the act of mounting a terrorist hit. Time and again in the years that followed, Turkish graduates of Palestinian camps—Russian-supervised or located in Russian-run South Yemen—were picked up as they made their way back home, loaded down with Soviet-bloc weapons.

For the most part, these newly trained terrorists joined a sprawling youth group called Dev Gene and its military arm, the Turkish Peoples Liberation Army. Its bombings, shootings, holdups, kidnappings and killings of police brought about the declaration of martial law in 1971. Two years later, the Turkish Army kept its word and held free elections. Meanwhile, the Liberation Army and its smaller associates in the left-wing underground had dug deeper, built up enormous new arsenals of Soviet-bloc weapons (40,000 guns were seized by police over the next four years) and tightened its ties with the Habash-Haddad front.

The Palestinians, too, had worked assiduously under martial law to build up terrorist cadres in Turkey. As their noted hijacker Leila Khaled proudly announced to the Istanbul daily Hurryet on May 26, 1971, Habash's Popular Front for the Liberation of Palestine (P.F.L.P.) was "sending instructors to Turkey in order to train Turkish youth in urban guerrilla fighting, kidnappings, plane hijackings and other matters . . . in view of the fact that it is more difficult than in the past for the Turks to go and train in P.F.L.P. camps abroad." The P.F.L.P. "has trained most of the detained Turkish underground members," she added.

Eventually the leftist terrorists of Turkey came to be splintered among dozens of Marxist revolutionary bands. But rightist terrorism has a clearer profile. It belongs to Col. Arpasian Turkes, whose Paramilitary Idealists are also known as the "Gray Wolves"—they howl when their leader appears before them. The colonel was a late starter in political terrorism, depending initially on a neo-Nazi party. By the time he turned his Gray Wolf terrorists loose in the early 1970's, he could justifiably claim to be responding to Communist provocation. The terrorists left-wing retaliated, and the two-way kill rate rose inexorably. Right-wing military officers supplied weapons to right-wing killers, while the Soviet Union accelerated shipments to the leftists. Huge consignments of Soviet-bloc arms were smuggled in from Bulgaria, trucked overland or shipped by sea. On June 3, 1977, Turkey's security officers stopped the Greek cargo vessel Vasoula in the Bosporus, coming from Varna, Bulgaria. She was carrying 67 tons of armaments, much of it earmarked for the left-wing underground in Turkey. The Turkish Government's protest to Bulgaria got nowhere.

Late in 1978, martial law was imposed again, but the level of violence continued to soar. The terrorism was producing a corpse an hour when the army once again took over the nation last summer. As was true in its earlier interventions in 1960 and 1971, the armed forces said they were seeking to rescue, rather than replace, a democratic order under siege. They kept their promise those

times, restoring civilian rule, and most observers are reasonably sure they will do so again. Meanwhile, the terrorist kill rate has dropped from one an hour to one a week.

NORTHERN IRELAND

When Northern Ireland's shooting war started in 1969, the Protestants had all the guns. The Roman Catholic Provisionals had nothing but a few moldering weapons left from the I.R.A.'s storied battle for freedom, about half a century before. They had to rely at first on American weapons—trickling in, three or four at a time, in the false bottoms of suitcases—and on American dollars.

The millions of Irish Americans who bankrolled the Provos thought they were supporting a continuation of the conflict that ended in 1922 with Ireland's winning its independence from Great Britain. The Protestant majority in the six Northern counties still under British control had been freezing Roman Catholics—many of them wretchedly poor—out of jobs, housing and public life. The I.R.A. presented itself as engaged in an open and aboveboard war against religious persecution: a war to reunite the North with the South.

In fact, as the Provisional I.R.A.'s newspaper, An Phoblacht, has made clear, it was and remains a war "to demolish the colonial regime in the Northern war zone and the Quisling regime in the Free State of Ireland"—in other words, a war against both North and South. It was also a war to "educate the workers to destabilize capitalism and international imperialism," as the Provos told Controinformazione, the house organ of Italy's Red Brigades.

The I.R.A. has come a long way since its early days of dependence upon the United States. Fund raising is mostly done at home nowadays, by means of protection packets, brothels, massage parlors and bank stickups. And the incoming hardware is largely Soviet made. It took only a few years to make the transformation with the help of the international terror network.

The first definitive signal the Provos received that their weapons shortage might be ending came in the autumn of 1971. An unknown man, using the all purpose name of "Mr. Freeman," dropped by to say that 4.5 tons of modern arms made in Czechoslovakia might be available. Maria McGuire, who wrote a book about life among the Provos, later reported that one of their leaders, David O'Connell, wandered on the Continent from Paris to Berne to Amsterdam to make the connection, "followed by the Czech and Soviet secret police." Then he made contact with Omnipol, an arms factory in Prague run by the Czech security police, who in turn had been tightly controlled by the K.G.B. since the 1968 Soviet invasion. O'Connell eventually did order 4.5 tons of bazookas, rocket launchers, hand grenades and the like, but the 166 crates were intercepted by police in Amsterdam. While the Provos were shattered by the loss of their first big arms consignment, their source was assured from that point on.

By then, the I.R.A. was getting to be a focus of worldwide revolutionary interest second only to the Palestinian resistance. The first I.R.A. contingents were dispatched to Jordanian guerilla camps in 1969 and were soon drawn into George Habash's inner circle. In October 1971, Provo leaders were guests of honor in Florence at the historic conference that started Europe's Guerrilla International.

Assembled by Giangiacomo Feltrinelli, the radical Italian millionnaire publisher, and the ultra-left Potere Operaio (Workers Power), delegates from 14 countries agreed to coordinate international terrorist plans. It was, according to British and Irish Government sources, an unprecedented and dangerous development.

The keynote address, on the Palestinian resistance, was given by Italy's radical Marxist thinker, Antonio Negri. The delegates then spent a full day listening to the I.R.A.'s Seamus Costello as he analyzed the experience of Europe's oldest guerrilla army. Arrangements were made at the meeting to smuggle weapons in heavy trailer trucks across the Continent to the I.R.A.

In May 1972, I.R.A. leaders sat in at the first international terrorist summit, organized by George Habash in Baddawl, Lebanon. And two months later, in Paris, Habash's Palestinian Front and the armed bands of 12 other nationalities signed a formal "Declaration of Support" for the Provisional I.R.A. Fifty Provos were selected for advanced guerrilla training in Lebanon. Before long, there was a steady flow of I.R.A. men to South Yemen for work with Wadi Haddad. There, on the shooting range, in Haddad's private movie house at camp, they mingled with the men at the top.

The connection began to pay off at once. During 1972, the Habash-Haddad front held a series of secret meetings in Dublin, organizing the multinational terrorist team that would operate under Carlos the Jackal. When a million dollars' worth of weapons were divided up among them, the Provisionals got the lion's share. Soon, Carlos himself was taking the trouble to procure explosives for the Provos from an anarchist weapons supply in Zurich. Italy's Red Brigades hailed the I.R.A. as "an unrenounceable point of reference for generalized warfare of the European continent." The operational plans of Cuban intelligence for 1972 stipulated that "Cuba would train the I.R.A. in terror and guerrilla warfare tactics." Col. Mummar el-Quaddafi of Libya offered "arms and support for the revolutionaries of Ireland." Within a year the cargo vessel Claudia steamed out of Tripoli toward the coast of Ireland bearing 250 Kalashnikov rifles and other weapons—five tons of the very best Soviet bloc hardware—for the I.R.A. It was seized by the Irish Navy.

By 1976, the Provos were training in Libyan guerrilla camps, as they were still doing last year. Eyewitnesses have reported their presence at such sites as Tokra, northeast of Benghazi, where Cuban instructors offer the world's most advanced courses in sabotage, and at Camp Az-Zauiah studying weaponry, explosives, sabotage and psychological warfare with guerrillas from West Germany, Spain, Greece and Brittany.

Every move to arm and train the I.R.A. has pushed it further toward its ultraleft benefactors, who see Northern Ireland as a prized battleground. Civil war in the six counties puts great strains on the United Kingdom, which is interlocked with the entire Western structure of trade, industry, banking and military alliances. No wonder that the Soviet Union, as early as 1972, was sponsoring a worldwide campaign "against British repression in Ireland," piloted by hoary front groups like the International Union of Students, the World Federation of Democratic Youths and the World Peace Council.

All this has brought Northern Ireland closer than any other country in the West to the kind of conflict that Marxist revolutionaries call a civil war of long duration. And the Provos show no signs of wanting to reach a political settlement.

Like the most extreme of their Protestant counterparts, they have consistently blocked every possible peaceful solution. In 1973 they helped kill off a power-sharing plan in a new Northern Ireland Assembly by planting 48,000 pounds of explosives. "We see no future in power-sharing," they said. Later in 1973 they helped consign the promising Sunningdale agreement to oblivion by breaking their own cease-fire—the last they would ever agree to—after just three weeks. "There is absolutely no question of another cease-fire or truce," they later declared. In the summer of 1979, they killed off the best proposition yet for a federated Ireland, "the Fitzgerald plan," by blowing up Lord Mountbatten on his fishing boat.

The Fitzgerald plan was "unacceptable" they said flatly, a week after Mountbatten's death. Their spokesman was Ruairi O'Bradaigh, an I.R.A. man of 30 years' standing and president of their lawful political arm, the Provisional Sinn Fein. "We do not want a confederation of the South with the North," he declared. "Nor do we want an independent Ulster. We want a general dismantling of the existing establishments in the Irish Republic and Ulster both."

What then does the Provisional I.R.A. have in mind for its own version of a free and united Ireland? "We want a Democratic Socialist Republic," replied O'Bradaigh, something "third-worldish," a bit like "Allende's Chile," flavored with thoughts from Colonel Qaddafi's "Green Book," "similar to Communism but not exactly like it"; Marxist in analysis, if not necessarily in practice, designed to "nationalize industries, control the means of production and distribution and take over agriculture under state-run cooperatives"; emphatically "not German Social Democracy" and not quite a dictatorship of the proletariat either, but almost. "We could not risk having parties around who want to bring colonialism back. There would have to be a reckoning with them."

Meanwhile, as the Provos keep saying, the 12-year-old war must go on. By late 1978, the Roman Catholic Bishop of Londonderry observed: "The Catholic community, like the whole community in the North, is sick and tired of the Provisional I.R.A." But it is doubtful whether the Provos take much notice. They do not really require to be loved. They never did need more than a few hundred professional guerrillas to hold down a British army 30 or 40 times their size. So long as they can count on the international terror network for hardware and sanctuary, their civil war can probably last in perpetuity.

ITALY

In May 1975, Carlo Fioroni, a 31-year-old Italian high-school teacher, was arrested in Switzerland while attempting to change $100,000 of Italian ransom money into Swiss francs. Back in Italy, Fioroni was convicted and imprisoned for his role in the terrorist kidnapping and murder of his closest friend. Four years later, from his prison cell, he provided the public with its first authentic look inside the Italian terrorist movement.

During that same year, 1979, a judge in Padua offered his prognosis of the nation's political health: "It seemed to me that . . . a tragic moment was approaching for the community—insurrection and civil war." There was a terrorist attack somewhere in the country once every three hours.

Fioroni described a complex political-paramilitary structure that was Europe's most sophisticated model of modern revolutionary warfare. His revelations sent shock waves through the nation.

Throughout the decade, Italians had been sure that their terrorist affliction was a native cancer, free of foreign influence. To be sure, Italy lacked the religious confrontation that had ignited Ireland or the ethnic hatred that had fired Basque terrorism. But, as expert analysts pointed out, it did offer causes enough for the outbreak: The nation had been relentlessly misgoverned for 30 years. Social and economic deformities abounded. Moreover, Italy's Communist Party, the largest in the West, had been moving toward partnership with the political establishment, leaving a huge revolutionary vacuum on the left.

Thus, left-wing intellectuals of the left refused to perceive the terrorists as anything but misguided revolutionaries and resolutely closed their eyes to possible foreign links. Italy's allies shared this view. As late as 1978, the C.I.A. refused an Italian Government request for help in finding the kidnapped former Premier, Aldo Moro, on the ground that there was no evidence that the Italian Red Brigades had any international connections.

In fact, the Italian terrorists were intimately connected with the global terrorist network. Their apparatus had two tiers. One was an open and legal political arm, the Autonomous Area, operating seminars, international conferences, counterculture bookshops and a chain of private broadcasting stations. Its leaders were the intellectual gurus of Italy's left. The other tier was a secret, terrorist branch. It included dozens of different units—the Red Brigades, with 500 armed members, and smaller bands, such as Front Line, with 200 to 300 more. The two tiers were mutually supporting, with a so-called Second Society of hundreds of thousands of law-abiding citizens offering the terrorists acceptance and protection. And whole apparatus was closely linked to the Soviet Union and its terrorist surrogates, seeking to destabilize a major Western democracy.

Fioroni was the first important member of the underground to talk publicly about its connections with the I.R.A. and the German and Basque terrorists. Not until 1980 was the Soviet link first established: Half the founding leaders of the Red Brigades and several top leaders of the Autonomous Area had been trained by the K.G.B. in special camps in Czechoslovakia before 1968. Patrizio Peci, a former member of the Red Brigades' High Strategic Command, then confirmed that this training of cadres had continued througout the 1970's.

Peci added: "All the arms reaching the Italians, of whatever make or provenance save those taken from policemen and Carabinieri, were coming from a single distribution center stocked by Palestinian formations." Consignments picked up off the Lebanese coast and off-loaded in Venice, he said, had been divided among Italians, Germans, I.R.A. Provisionals and Spanish Basques.

More than 1,000 accused terrorists were in prison by the end of 1980, and some 100 of them made detailed confessions. Police raids turned up scores of safe houses, tons of weapons and archives covering 10 years of terrorist growth. "Operationally speaking, the worst is over," Gen. Umberto Capuzzo, the national commander of the Carabinieri, said a few weeks ago. Yet even as he spoke, there was evidence that his optimism might have been misplaced. New terrorist incidents have occurred. And the deadly curve seems to be rising again.

The nations of Europe have made a start on a coordinated approach to combatting the international terrorist network—a kind of counterterror network. The interior ministers of all 10 Common Market nations, along with those of Spain, Austria and Switzerland, have been meeting periodically on the matter for nearly three years. They have found ways: harmonizing their technical procedures, from car-plate identification to fingerprinting, and sharing their computerized information.

West Germany's computers in Weisbaden, for instance, now give officials throughout Europe access to 10 million items of information on the life histories, travels, dental work, reading habits and musical preferences of known terrorists all over the world. Other nations are creating similar data banks. There has also been an increased exchange of antiterrorist expertise as more nations set up their own special commando units modeled on West Germany's Leatherheads (the G.S.G. 9), Britain's celebrated S.A.S. and the French Gendarmerie's Intervention Group (G.I.G.N.).

But direct action against individual terrorists cannot do the job alone. Leaders of the target nations are beginning to recognize the need to deal with the larger groups of law abiding citizens who lend the terrorists support—the accomplices among whom, as Mao put it, the terrorist can swim like fish in the sea. The technique of establishing such a two tier structure, as in Italy, has had a broad application among European terrorists.

The way was pointed more than a century ago, in Czarist Russia, by a Moscow revolutionary named Nicholas Ishutin. It was he who first suggested the combination: an underground terrorist force operating within the protective ring of an open political party of law-abiding citizens. The public arm preaches revolution, covers for the underground, shields it from the police. The terrorists are presented as authentic—if sometimes "misguided"—revolutionaries. And they need not fear informers because of what the Mafia calls Omeria, the law of silence.

The willingness of Secretary Haig and the President of Italy to go public with charges of Soviet involvement in the terrorist network may lend strength to a public-information attack on the two-tier technique. What is needed is extensive public debate—in the media, at the universities, among intellectuals in general—cutting through old romantic concepts. Left-wing terrorism is not built upon authentic revolutionary goals of justice and equity for the working class. It seeks everywhere to dismantle free societies, forcing constitutional governments to behave like police states. And civilians paired with the terrorists are peculiarly exposed to manipulation by the network's Soviet sponsor.

For all the value of government crackdowns and educational programs, these terrorists have noticeably improved their self-protective apparatus and tactics. Smaller bands are emerging, less vulnerable to infiltration, less susceptible to public pressure, and armed with the latest technological weapons of destruction.

There remains the other option open to governments under siege, the option they have been so loath to take. They can directly confront the Soviet Union, Cuba and the Palestinians, using the weapons of diplomacy and trade to halt the transfer of terrorist goods and services. They could attempt to mobilize world opinion against the network, raising the issue in the United Nations and other international forums. They could bring economic pressures on Moscow and the network's other linchpins.

In fact, given the dimensions of the problem, and the danger it poses to free nations everywhere, it seems hardly credible that the Soviet Union and the West can settle any other issues between them so long as the issue of world terrorism goes unresolved.

SENATOR PAUL LAXALT

Mr. THURMOND. Mr. President, because my distinguished colleague, Senator PAUL LAXALT of Nevada, is a longtime personal friend of President Ronald Reagan, there has been much media comment about the Laxalt-Reagan relationship.

A March 29, 1981, article by writer Phil Gailey in the Washington Star expresses much of my sentiment about the valuable role my Nevada colleague is playing in trying to turn around past unwise national policies.

As Americans, we can all give thanks for a dedicated patriot like Senator LAXALT who has such a unique position and can directly advise the President in the effort to solve our problems and insure less Government intervention into the life of the average citizen.

Mr. President, in order to share this excellent news story with my colleagues, I ask unanimous consent that this viewpoint be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NICE GUY PAUL LAXALT TRYING TO USE CLOUT "SELECTIVELY"

Paul Laxalt, the Senate's genial hotline to President Reagan, says he values his friends over power. Since landing in the center of power on Nov. 4, when his old friend Ronald Reagan won the White House, the Republican senator from Nevada has been gathering plenty of both.

When Laxalt speaks, people listen. So he is being careful not to abuse his influence on either end of Pennsylvania Avenue—a task made easier by his style and nature.

He has made a special effort not to undermine Senate Majority Leader Howard Baker. He has refused to allow himself to be used by fellow conservatives to drag the president into some right-wing political thickets at a time when Reagan is trying to keep attention on his economic program. And he has declared a moratorium on speaking engagements in an effort to hold down his public profile and to stay out of the news as much as possible.

Laxalt, the Senate's all-around nice guy, can be counted on to help out his colleagues on personal matters. Sen. Edward M. Kennedy, a liberal Democrat, used Laxalt to extend an invitation to Reagan to a memorial service being planned to honor Kennedy's late brother Robert. And Laxalt made sure the president understood the importance of attending a dinner honoring Sen. Strom Thurmond, the old conservative warhorse from South Carolina.

"If there's some matter a colleague might find it awkward to express to the president, I will insert myself on a selective basis," said Laxalt, whose friendship with Reagan goes back to the '60s when both were governors of neighboring states.

"On a typical day a senator will come to me and say he has been unable to get a response from the State Department, or some other office, and I try to help out if I can. And there always are invitations people want me to take to the president. I give him the ones I think are important."

As Reagan's long-time friend and confidante, Laxalt has been walking the line between old friendships and new power with hardly a wobble.

"Paul does everything with grace," said Sen. Orrin Hatch, R-Utah. "He knows almost instinctively what the president is thinking and feeling. With me he has got a lot of influence, I'd do almost anything he asked me to."

Laxalt said he is "very comfortable with the way I have been handling his unique status. "My relationship with the president is more personal than political, and I try to be careful not to abuse it," said the senator, who managed Reagan's presidential campaign and belongs to Reagan's "kitchen cabinet" of advisers.

A Senate friend says: "Paul doesn't have to tell the president what he thinks about something because they both think alike on most things anyway."

Laxalt, a silver-haired conservative who wears red turtle-hide boots that are as hard to find these days as a colleague who speaks ill of him, offers his advice to the president when asked, uses his influence to do small

favors for his colleagues on both side of the aisle and tries to serve as Reagan's "eyes and ears in the Senate."

Some Senate watchers had predicted that Laxalt would play this latter role at the expense of Baker, the new majority leader. But so far that hasn't happened.

Far from challenging Baker's leadership, Laxalt has strengthened it. It was Laxalt who nominated Baker for the post after some Republican ideologues, who have never forgiven the Tennessee senator for supporting the Panama Canal treaties, tried to mount a movement to block Baker's ascension to the top Senate job.

And when some Republican senators tried to use him early on to make an end run around Baker, Laxalt refused to play along. "The one thing I won't do (with his White House connection) is to invade the prerogatives of Howard Baker," he said. "I don't want anybody to think they can go around the leadership through me."

Laxalt's deference, no doubt, has made life easier for Baker. He views Laxalt's special relationship with Reagan as a "valuable asset" to the Senate and adds, "Paul has invented a role for himself that is unique and is playing it exquisitely."

Baker, who invited Laxalt to sit in on all Republican leadership meetings, said he relies on the Nevada senator "extensively" in formulating Senate strategy and for "conveying the Senate view to the president and his inner circle."

Laxalt delivers both the bad and good news to his friend in the Oval Office. Last week, for example, Laxalt told Reagan that his credibility was on the line with some farm state senators on the issue of the grain embargo.

Reagan opposed the embargo during the presidential campaign but has been reluctant to lift it since taking office despite reminders of his campaign pledge to do just that.

"I try to give the president readings on the pulse of the Senate and the grain embargo is one example," he said. "I indicated to him the very intense feeling by some senators who view it as a matter of his credibility."

Some Republican conservatives would have preferred Laxalt as their Senate leader. But that's not his style. Unlike many of his colleagues, he has never sought power through the traditional route of committee chairmanships or large staffs.

"Paul is not interested in the mechanics and kind of responsibilities that go with leadership posts," said one Republican senator. "He prefers to exercise influence through personal relationships. In fact, some people think he is a little lazy. But he doesn't care about titles and all that. He knows he has influence with the president and can use it when he wants to."

Michael K. Deaver, a top Reagan aide, calls Laxalt "the strongest outside influence" on the president. The senator says he tries to use that influence "selectively."

For example, he confided to some of his Republican colleagues in the Senate his unhappiness with some of Secretary of State Alexander M. Haig's choices for top State Department posts. But when asked why he didn't go to Reagan with his objections, Laxalt said he wasn't about to run to the president every time he disagreed with a personnel decision."

"Paul knows that Reagan doesn't particularly care for some of the people his Cabinet officers selected for jobs, but they both understand that who conducts the orchestra is more important than who is playing clarinet or flute," said one Republican senator.

But another Republican colleague grumbled that Laxalt had refused to use his influence with Reagan to get more "true conservatives" named to key administration posts. "It was a well-known fact that during the transition you needed to touch base with Paul on job appointments," said this senator. "Some good names were brought to his attention, but there were very few he would push for."

More recently, Laxalt has disappointed some right-wingers by going along with Baker's effort to keep such controversial issues as abortion and school prayer off the Senate agenda, a decision that has the White House's blessing.

Still, in their hearts they know, as Sen. Jesse Helms put it, that Laxalt "reflects the president's thinking, he's a nice guy and his philosophy is right."

Paul Weyrich of the Committee for the Survival of a Free Congress believes conservatives should be a little more understanding of Laxalt's situation.

"I have always found him willing to respond to any conservative effort," said Weyrich. "The problem now is that he has incredible pressure on his time. He's a conduit to the president for everyone from me to Ted Kennedy."

RARE II REVIEW ACT OF 1981

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the text of the bill S. 842, the RARE II Review Act of 1981, which I introduced on March 31, 1981, be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 842

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "RARE II Review Act of 1981".

SEC. 2. The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation (hereinafter referred to as "RARE II"); and

(2) Congress has received the RARE II final environmental statement issued January 4, 1979, and has received Executive Communication 1504 of April 16, 1979, recommending certain areas for inclusion in the National Wilderness Preservation System.

SEC. 3. (a) No justice, judge, or court of the United States shall have jurisdiction to hear, determine, or review, or to issue any writ, process, order, rule, decree, or comment with respect to the legal or factual sufficiency of the RARE II final environmental statement (dated January 1979).

(b) The provisions of this section shall apply with respect to any order of a court, department, or agency of the United States or of any State whether issued before or after the enactment of this Act: *Provided,* That this section shall not be construed to limit judicial authority to determine the authority of the Secretary of Agriculture to conduct RARE II in areas subject to the provisions of the Eastern Wilderness Act of 1975 (Public Law 93–622, 88 Stat. 2096).

SEC. 4. (a) The Congress hereby determines and directs that with respect to national forest lands west of the one hundredth meridian:

(1) the RARE II review and evaluation of national forest lands, except those lands remaining in the further planning category upon enactment of this Act or those lands recommended for wilderness, shall be deemed, for the purposes of all land management plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94–588), to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System;

(2) lands recommended for wilderness in the RARE II final environmental statement but not placed into the National Wilderness Preservation System by Act of Congress before January 1, 1985, shall after that date no longer be considered as recommended for wilderness and shall be governed by the provisions of paragraph (1) of this section and section 7 of this Act; and

(3) lands remaining in further planning upon enactment of this Act and (A) not recommended for wilderness by September 30, 1985, or (B) recommended for wilderness by September 30, 1985, but not placed into the National Wilderness Preservation System by Act of Congress before January 1, 1988, shall after those respective dates no longer be considered as remaining in further planning or recommended for wilderness and shall be treated as lands governed by the provisions of paragraph (1) of this section, and section 7 of this Act.

SEC. 4. (b) The Congress hereby determines and directs that with respect to national forest lands east of the one-hundredth meridian:

(1) areas which were subject to the RARE II review and recommended for wilderness, shall become Wilderness Study Areas as defined in the Eastern Wilderness Act (88 Stat. 2096, Public Law 93–622) upon enactment of this Act: *Provided* That such areas shall after January 1, 1983, notwithstanding any other provision of law, be managed for uses other than wilderness, unless Congress otherwise directs, and shall be deemed, for the purposes of all land management plans required for such areas by the Forest and Rangeland Renewable Resource Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94–588) to have been given adequate consideration of the suitability of such areas for inclusion in the National Wilderness Preservation System.

(2) areas subject to the RARE II review and not recommended for wilderness shall be managed for uses other than wilderness, unless Congress shall otherwise direct, and shall be deemed, for the purposes of all land management plans required for such areas by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94–588) to have been given adequate consideration of the suitability of such areas for inclusion in the National Wilderness Preservation System.

SEC. 5. Unless expressly authorized and directed by Congress, the Secretary of Agriculture shall not conduct any further statewide, regional, or national roadless area review and evaluation of National Forest System lands for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

SEC. 6. The designation of any wilderness area shall not lead to the creation of protective perimeters or buffer zones around any such wilderness area. The fact that nonwilderness activities or uses can be seen or heard from areas within a wilderness shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

SEC. 7. The Secretary of Agriculture shall not review any National Forest System lands for inclusion in the National Wilderness Preservation System unless expressly authorized by joint resolution of Congress adopted after the effective date of this Act; and no such lands shall be managed for protecting their suitability for possible wilderness designation unless authorized to be reviewed pursuant to this section.

DISASTER LOAN ASSISTANCE

Mr. PRYOR. Mr. President, last Thursday I introduced S. 865, a bill to amend the Small Business Act to provide equity for disaster relief applicants. At that time, I inadvertently failed to request unanimous consent to have the text of the legislation printed in the RECORD. I therefore request unanimous consent that the text of S. 865 be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 865

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (c) of section 7 of the Small Business Act (15 U.S.C. 636(c)) is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding section 5(b)(6) and any other provision of law, any application for assistance under paragraph (1), (2), or (4) of subsection (b) shall be acted upon by the Administration under the rules and regulations in effect on the date such application is received by the Administration. For purposes of the preceding sentence, the determination of the rules and regulations in effect on a certain date shall be made without regard to any rule or regulation prescribed after such date."

MESSAGE FROM THE PRESIDENT RECEIVED DURING RECESS

Under the authority of the order of the Senate of April 2, 1981, the Secretary of the Senate on April 6, 1981, received a message from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received on April 6, 1981, are printed at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

REVISED BUDGET PROPOSALS FOR FISCAL YEAR 1982—MESSAGE FROM THE PRESIDENT—PM 42

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying documents; which, pursuant to the order of February 19, 1981, was referred jointly to the Committee on Agriculture, Nutrition, and Forestry, the Committee on Armed Services, the Committee on Banking, Housing, and Urban Affairs, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, the Committee on Finance, the Committee on Foreign Relations, the Committee on Governmental Affairs, the Committee on the Judiciary, the Committee on Labor and Human Resources, the Committee on Rules and Administration, the Committee on Small Business, the Committee on Veterans' Affairs, and the Select Committee on Indian Affairs:

To the Congress of the United States:

On March 10, 1981, I forwarded to the Congress a fully revised 1982 Budget with specific proposals for fiscal year 1981 and 1982 and clearly stated targets for 1983 through 1986. I have already submitted to the Congress the supplemental budget requests, rescissions and deferrals for 1981 and budget amendments for 1982 necessary for the Congress to act upon my proposals.

My Budget Reform plan, first presented February 18th and submitted in detail on March 10th, was one of four parts of my comprehensive program for the Nation's economic recovery. The Budget plan called for substantial budget savings and a redirection of Federal Government activities. It included more than 200 proposals for spending reductions, user charges and off-budget savings that are necessary to put the Federal Government on a path toward fiscal responsibility.

We have already provided extensive information on the proposed budget savings. However, I want to be sure that the Congress and the American people fully understand the reasons for the planned budget savings. Accordingly, I have directed the Office of Management and Budget to compile a document to make available additional details on the specific savings proposals.

I hope that this information will be useful to the various committees and subcommittees of the Congress as they consider my proposals.

RONALD REAGAN.

THE WHITE HOUSE, *April 7, 1981.*

MESSAGES FROM THE HOUSE

At 11:19 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to section 451(a) of Public Law 96-374, the Speaker appoints as members of the National Commission on Student Financial Assistance the following Members on the part of the House: Mr. CLAY and Mr. BAILEY of Missouri; and the following from private life: Mr. John Brademas, of New York, and Mr. Kenneth Ryder, of Massachusetts.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 618. An act to convey certain interests in public lands to the city of Angels, Calif; and

H.R. 1528. An act to provide an exception to the requirements of the act of August 30, 1980 (26 Stat 391; 43 U.S.C. 945), with regard to certain lands in Riverside County, Calif.

At 1:45 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that pursuant to Public Law 301 of the 78th Congress, the chairman of the Committee on Merchant Marine and Fisheries has appointed the following Members on the part of the House to serve as members of the Board of Visitors to the U.S. Merchant Marine Academy for the year 1981: Mr. BIAGGI, Mr. DONNELLY, Mr. MCCLOSKEY, and Mr. JONES of North Carolina, ex officio.

The message also announced that pursuant to the provisions of title 46, United States Code, section 1126c, the Speaker appoints as members of the Board of Visitors to the U.S. Merchant Marine Academy the following Members on the part of the House: Ms. FERRARO and Mr. CARNEY.

At 3:45 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House has passed the following joint resolution:

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1543. An act to confirm a conveyance of certain real property by the Central Pacific Railway Co. and Southern Pacific Co. to A. C. Taber and his wife, Mary Taber.

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 618. An act to convey certain interests in public lands to the city of Angels, Calif.; to the Committee on Energy and Natural Resources.

H.R. 1528. An act to provide an exception to the requirements of the act of August 30, 1980 (26 Stat. 391; 43 U.S.C. 945) with regard to certain lands in Riverside County, Calif.; to the Committee on Energy and Natural Resources.

H.R. 1543. An act to confirm a conveyance of certain real property by the Central Pacific Railway Co. and Southern Pacific Co., to A. C. Taber and his wife, Mary Taber; to the Committee on Energy and Natural Resources.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-875. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the National School Lunch Act and the Child Nutrition Act of 1966; to the Committee on Agriculture, Nutrition, and Forestry.

EC-876. A communication from the Secretary of Agriculture, transmitting, pursuant to law, the annual animal welfare enforcement report; to the Committee on Agriculture, Nutrition, and Forestry.

EC-877. A communication from the Deputy Secretary of Defense, transmitting, pursuant

to law, reports on eight violations of the Anti-Deficiency Act occurring between 1969 and 1980; to the Committee on Appropriations.

EC-878. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Weak Internal Controls Make Some Navy Activities Vulnerable to Fraud, Waste, and Abuse"; to the Committee on Armed Services.

EC-879. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "DOD's Use of Remotely Piloted Vehicle Technology Offers Opportunities for Saving Lives and Dollars"; to the Committee on Commerce, Science, and Transportation.

EC-880. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize appropriations for certain maritime programs for fiscal years 1982 and 1983; to the Committee on Commerce, Science, and Transportation.

EC-881. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on a cost-benefit analysis of increased natural gas pipeline safety regulation; to the Committee on Commerce, Science, and Transportation.

EC-882. A communication from the Secretary of Energy, transmitting notice of a review of a municipal waste comprehensive plan, pursuant to law; to the Committee on Energy and Natural Resources.

EC-883. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the fifth annual report on the child support enforcement programs; to the Committee on Finance.

EC-884. A communication from the Chairman of the United States International Trade Commission, transmitting, pursuant to law, the annual report on trade between the United States and the nonmarket economy countries; to the Committee on Finance.

EC-885. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements other than treaties, entered into by the United States within the past 60 days; to the Committee on Foreign Relations.

EC-886. A communication from the Acting Commissioner of the Immigration and Naturalization Service, transmitting, pursuant to law, orders suspending deportation of certain aliens under section 244(a)(1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC-887. A communication from the Chairman of the National Council on Educational Research, transmitting, pursuant to law, notice that tne annual report of the Council is incomplete and will be delayed by 2 months; to the Committee on Labor and Human Resources.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Joseph Robert Wright, Jr., of New York, to be Deputy Secretary of Commerce.

Raymond A. Peck, Jr., of the District of Columbia, to be Administrator of the National Highway Traffic Safety Administration.

(The above nominations reported from the Committee on Commerce, Science, and Transportation with the recommendation that they be confirmed subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

NOMINATION OF RAYMOND A. PECK

● Mr. DANFORTH. Mr. President, I rise today to support the nomination of Raymond A. Peck, Jr., to be Administrator of the National Highway Traffic Safety Administration (NHTSA).

Mr. Peck has been asked to fill a job which is important to the health and safety of the American public and to our national economy. Deaths and injuries on our public highways have reached staggering proportions. The National Safety Council reports that during 1980 alone more than 53,000 men, women, and children were killed and over 2,000,000 people suffered disabling injuries in automobile accidents. The direct and indirect cast to society of these deaths and disabling injuries is astronomical.

In 1979 motor vehicle accidents cost $35.8 billion in lost wages, medical expenses, insurance administration costs, and property damage. Additional indirect costs stem from society's assumption of financial support through social security and other Government programs for crash victims and their dependents or survivors.

In light of these figures, no one should underestimate the importance of promoting motor vehicle safety. Government has a legitimate and essential role to play in promulgating practical regulations designed to reduce the numbers of people killed and maimed on the Nation's highways. Mr. Peck has assured the Senate that he recognizes NHTSA's vital role and will strive to further it.

Recent history notwithstanding, there is no reason why NHTSA should not be able to work harmoniously with the private sector, particularly the automobile industry. Safety can and should be demanded of all manufacturers who wish to sell their products to American motorists. In view of the generally superior safety records of cars built in America, the domestic auto makers will be making a grave mistake if they fail to seize the opportunity to take the lead on auto safety. This is not a time for minimal compliance with, or elimination of, safety regulations, but rather a time for affirmative leadership in auto safety design. If traffic deaths continue to increase as automobiles get smaller and more fuel efficient, it could well turn out that, in just a few years, the market may demand better auto safety as suddenly as it demanded better fuel economy. Foresight is the key.

Regardless of who has the lead, basic auto safety cannot be treated as an option, like fancy hubcaps. Where the industry fails to provide basic needs, NHTSA should provide practical regulations. While it is, of course, legitimate for NHTSA to consider the present crisis in the domestic industry, the companies' financial difficulty should not be used as an excuse for rolling back presently existing safety regulations.

I am sure I speak for all of my colleagues in wishing Mr. Peck well. His job will be difficult. He should realize, however, that if NHTSA fails to demand basic auto safety, the Congress will be called upon to step in and mandate auto safety by law.●

By Mr. PERCY, from the Committee on Foreign Relations:

Thomas J. Pauken, of Texas, to be Director of the ACTION Agency (together with majority and additional views) (Exec. Rept. 97-6).

(The above nomination reported from the Committee on Foreign Relations with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Lionel H. Olmer, of Maryland, to be Under Secretary of Commerce for International Trade.

William H. Morris, Jr., of Tennessee, to be an Assistant Secretary of Commerce.

Richard T. Pratt, of Utah, to be a member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1981.

Richard T. Pratt, of Utah, to be a member of the Federal Home Loan Bank Board for the term expiring June 30, 1985.

John S. R. Shad, of New York, to be a member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1982.

John S. R. Shad, of New York, to be a member of the Securities and Exchange Commission for the term expiring June 5, 1986.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CANNON:

S. 878. A bill to amend the Internal Revenue code of 1954 to provide an investment tax credit for the installation of certain fire prevention equipment; to the Committee on Finance.

By Mr. GORTON (for himself and Mr. JACKSON).

S. 879. A bill to amend the Uniform Time Act of 1966 to provide that daylight saving time shall begin each year on the last Sunday in March rather than the last Sunday in April; to the Committee on Commerce, Science, and Transportation.

By Mr. HATFIELD:

S. 880. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer conscientiously opposed to participation in war may elect to have his income, estate, or gift tax payments spent for nonmilitary purposes; to create a trust fund (the World Peace Tax Fund) to receive these tax payments; to establish a World Peace Tax Fund Board of Trustees; and for other purposes; to the Committee on Finance.

By Mr. RUDMAN (for himself, Mr. WEICKER, Mr. HATCH, Mr. HUDDLESTON, Mr. BAUCUS, and Mr. HAYAKAWA):

S. 881. A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy; to the Committee on Small Business.

By Mr. DURENBERGER (for himself and Mr. JEPSEN):

S. 882. A bill to amend the Privacy Act of 1974 to impose additional restrictions on

the maintenance and disclosure of mailing lists by Government agencies; to the Committee on Governmental Affairs.

By Mr. CRANSTON (for himself and Mr. HAYAKAWA):

S 883. A bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks, of California; to the Committee on Environment and Public Works.

By Mr. HELMS:

S. 884. A bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HEINZ:

S. 885. A bill to amend sections 593, 7701, and 856 of the Internal Revenue Code with respect to tax treatment of loans secured by stock in cooperative housing corporations; to the Committee on Finance.

By Mr. ANDREWS (for himself and Mr. BURDICK):

S. 886. A bill to authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Louis L'Amour; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ANDREWS:

S. 887. A bill for the relief of Tore Johansen; to the Committee on the Judiciary.

By Mr. DURENBERGER (for himself, Mr. PACKWOOD, Mr. HATFIELD, Mrs. KASSEBAUM, Mr. LEVIN, Mr. HEINZ, Mr. MOYNIHAN, Mr. MELCHER, Mr. MATSUNAGA, and Mr. TSONGAS):

S. 888. A bill to provide effective programs to assure equality of economic opportunities for women and men, and for other purposes; to the Committee on Finance.

By Mr. LONG (for himself, Mr. ROTH, Mr. BENTSEN, and Mr. WALLOP):

S. 889. A bill to amend the Internal Revenue Code of 1954 to reduce the capital gains tax on the sale of certain interests in qualified small corporations; to the Committee on Finance.

By Mr. SCHMITT (for himself, Mr. GRASSLEY, Mr. LAXALT, Mr. SPECTER, Mr. DECONCINI, Mr. HATCH, Mr. SIMPSON, Mr. EAST, Mr. DENTON, Mr. NUNN, Mr. ZORINSKY, Mr. BURDICK, Mr. LUGAR, Mr. STEVENS, Mr. PRESSLER, Mr. KASTEN, Mr. THURMOND, Mr. HARRY F. BYRD, JR., Mr. GARN, Mr. MCCLURE, Mr. TOWER, Mr. GOLDWATER, Mr. HELMS, Mr. ARMSTRONG, Mr. SYMMS, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. WARNER, Mr. JEPSEN, Mr. MATTINGLY, Mr. ABDNOR, Mr. ANDREWS, Mr. NICKLES, Mr. D'AMATO, and Mr. QUAYLE):

S. 890. A bill to amend title 5, United States Code, to improve procedures for the issuance of agency rules; to the Committee on the Judiciary.

By Mr. ROTH (by request):

S. 891. A bill to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes; to the Committee on Governmental Affairs.

By Mr. ROTH (for himself and Mr. CHILES) (by request):

S. 892. A bill to amend the Federal Grant and Cooperative Agreement Act; to the Committee on Governmental Affairs.

By Mr. ROTH (by request):

S. 893. A bill to amend and extend the authority of the President to reorganize the executive branch of the Government under chapter 9 of title 5, United States Code; to the Committee on Governmental Affairs.

By Mr. CANNON (for himself, Mr. SCHMITT, Mr. LAXALT, and Mr. ANDREWS):

S. 894. A bill to exempt rural electrical cooperatives from fees under the Federal Land Policy and Management Act of 1976; to the Committee on Energy and Natural Resources.

By Mr. MATHIAS (for himself, Mr. KENNEDY, Mr. BIDEN, Mr. CHAFEE, Mr. CRANSTON, Mr. METZENBAUM, Mr. MOYNIHAN, and Mr. WEICKER):

S. 895. A bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes; to the Committee on the Judiciary.

By Mr. BAKER (for himself and Mr. SASSER):

S. 896. A bill to designate the control tower at Memphis International Airport the "Omlie Tower"; to the Committee on Commerce, Science, and Transportation.

By Mr. THURMOND:

S. 897. A bill to permit members and former members of the uniformed services who are entitled to retired or retainer pay and who have not elected to participate in the survivor benefit plan under subchapter II of chapter 73 of title 10, United States Code, for a limited period, to participate in such plan, and for other purposes; to the Committee on Armed Services.

By Mr. PACKWOOD (for himself, Mr. STEVENS, Mr. GOLDWATER, and Mr. SCHMITT):

S. 898. A bill to amend the Communications Act of 1934 to provide for improved domestic telecommunications, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HOLLINGS:

S. 899. A bill to provide a noncontributory educational program for veterans and members of the Armed Forces of the United States in order to recognize satisfactory and honorable service, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. HEINZ:

S. 900. A bill to assure that job skills training, and employment opportunities are furnished through Opportunities Industrialization Centers and other community based organizations of demonstrated effectiveness in certain block grant programs involving the creation of urban jobs in enterprise zones, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HATFIELD:

S. 901. A bill to preserve and protect the Georgetown Waterfront for the recreational use of the public; to the Committee on Energy and Natural Resources.

By Mr. COCHRAN:

S. 902. A bill to assure consumers an adequate supply of cotton, rice, and soybeans at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. QUAYLE:

S. 903. A bill to amend title 18, United States Code, to provide increased penalties for any person convicted of using a firearm to commit certain Federal crimes or carrying a firearm during the commission of such crimes, and for other purposes; to the Committee on the Judiciary.

S. 904. A bill to amend title 18 to provide penalties for the assault or murder of Presidential and Vice Presidential staff members; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. 905. A bill to require the inspection of imported meat and meat food products, to require the grading of meat and meat food products, to require the Secretary of Agriculture to establish a labeling system for meat and meat food products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HUMPHREY (for himself and Mr. LEVIN) (by request):

S. 906. A bill to authorize certain transactions involving the acquisition and disposal of strategic and critical materials for the national defense stockpile; to the Committee on Armed Services.

By Mrs. KASSEBAUM (for herself, Mr. THURMOND, Mr. KENNEDY, Mr. MATHIAS, Mr. DODD, Mr. TSONGAS, Mr. EXON, Mr. PERCY, Mr. HAYAKAWA, Mr. LEVIN, Mr. GLENN, and Mr. CRANSTON):

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day"; considered and passed.

By Mr. DOLE (for himself and Mr. JEPSEN):

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981 as "National Cystic Fibrosis Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CANNON:

S. 878. A bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for the installation of certain fire prevention equipment; to the Committee on Finance.

TAX CREDIT FOR INSTALLATION OF CERTAIN FIRE PREVENTION EQUIPMENT

Mr. CANNON. Mr. President, a major drain on our economy and the lives of our fellow citizens is the occurrence of fire. The number of fires in the United States, and the resulting death rates per capita, are among the highest in the industrialized world.

In 1979 alone, there were 2.7 million fires reported and 90,000 reported injuries. In addition to the human tragedies that are untold in these preliminary statistics of the U.S. Fire Administration, the economic implications from fires in that 1 year are also staggering: Over $5 billion in direct property losses and more than $15 billion in other costs such as insurance premiums and fire department protection.

These sad figures suggest a problem of national proportions, with huge social and economic costs. On a number of occasions, the Congress has addressed this situation, including creating the U.S. Fire Administration (under the Federal Emergency Management Agency) to work towards reducing U.S. fire losses. In 1979, the Congress reauthorized programs under the Federal Fire Prevention and Control Act of 1974 and directed the Fire Administration to conduct a study of the effectiveness of smoke detectors, heat detectors, and sprinkler suppression systems in saving lives, preventing injuries, and limiting property damage in fires.

The report to Congress and the President by the Fire Administration was released last month and reveals widespread public acceptance of detectors, improving technologies in remote alarm systems, and technological breakthroughs that will bring affordable sprinkler systems into residences.

But, in the meantime, the death toll will continue until sprinkler systems are considered as essential to a building's construction as a floor or ceiling.

The purpose of the legislation that I am introducing today is to provide tax

incentives for the installation of fire protection features in such buildings as profitmaking nursing homes and boarding houses for the elderly and other health care facilities, hotels, high-rise buildings, restaurants, clubs, lounges, and other commercial facilities.

Specifically, S. 878 would amend the Internal Revenue Code of 1954 to provide an investment tax credit to those businesses for the installation of 14 categories of fire prevention equipment including automatic sprinkler systems, fire detection systems (including smoke detectors), fire alarm systems (including remote alarm systems), fire separation walls, fire doors, fire pumps, equipment for the programing of elevators (with standby power to assure operation and access for firemen during a blaze), and any fire-ready rooms or closets containing firefighting tools and supplies.

These specific items would be eligible for investment tax credit (ITC) treatment. Businesses would be allowed a credit against their income tax liability for 10 or 20 percent of the cost of their qualifying investment in fire prevention equipment. Sprinkler systems—the most effective fire stopper—would qualify for a 20-percent credit. Among the remaining categories, any fire prevention property that does not currently qualify for the investment tax credit would qualify for a 10-percent credit. Any such property that does currently qualify for the ITC would be entitled to an additional 10-percent credit, for a total of 20 percent. These latter provisions are patterned after the business energy investment credits.

In order to minimize the amount of lost Federal revenues, these incentives are designed to be limited, but effective. A further limitation on cost is a sunset provision which would end the credit in 5 years, giving adequate time to retrofit or to install protective measures in existing or planned structures. At the end of the 5-year period, the Congress would be free to assess the effectiveness of the incentive and to decide if it should be continued.

While smoke detectors are generally inexpensive and are now found in half the homes in America, and while technological innovations are making residential sprinkler systems affordable at 1 to 2 percent of the cost of a new home, installations in the commercial structures targeted by this legislation are far more expensive propositions. Given the current economic realities facing the United States, a limited tax incentive is warranted for businesses which must often provide for the safety of dozens, hundreds, or thousands of people at a time.

It is my hope that the residential sprinkler technology will catch on since it has now been more affordable than ever before.

I would now like to add a personal note as to my growing interest in fire protection. Besides the fact that the Federal Emergency Management Agency is under the legislative purview of the Committee on Commerce, Science, and Transportation, of which I am ranking minority member, I have shared the anguish of my colleagues over the senseless deaths and injuries of many elderly persons in nursing homes across this land.

National estimates supplied for me by the Fire Administration reveal an astounding average of 4,872 nursing home fires and 89 deaths per year during the 1977–79 period. The effect of fire on the aged is even worse than these grim statistics reveal, however. These figures do not include fires and deaths in boarding houses catering primarily to elderly clientele or halfway houses and facilities for the physically or mentally handicapped with a large share of elderly persons. There are great numbers of elderly persons in these latter types of housing who are unprotected from the grim reaper which comes as fire.

In 1979 testimony before the House Select Committee on Aging, Subcommittee on Health and Long Term Care, former U.S. Fire Administrator, Gordon Vickery, explained that many care facilities for the aged escape building and fire safety code requirements; namely those facilities which are unlicensed by the States. Vickery stated flatly:

> I am suggesting that the fire protection required for these occupancies is not sufficient to adequately protect persons who are physically or mentally limited . . . . [T]he levels of fire protection contained in the residential section of building and fire codes are not adequate to protect de-institutionalized occupants housed in boarding homes throughout this country.

The absence of sprinklers in nursing homes was also cited as a major factor in deaths in nursing home fires studied in a 1978 report by the Urban Institute and the National Fire Protection Association.

While the 20 nursing homes in Nevada have, thus far, been spared the grief that has befallen homes in other States, we have not been spared the tragedy and loss occasioned by hotel fires. My general concern over fires in elderly care facilities has now been riveted into a recognized need for legislation. Nearly 100 people have lost their lives in Nevada hotels in the past 5 months. In the MGM Grand fire of November 21, 1980, 84 people perished and in the Las Vegas Hilton fire of February 10, 1981, another eight died.

As part of an exemplary effort to see that these tragedies never repeat themselves, a distinguished panel of Nevadans appointed by Gov. Robert List has compiled a list of recommendations, including tax incentives to help with the financial burden of retrofitting these hotels with fire protection equipment. In its report of March 11, 1981, the Governor's Commission on Fire Safety Codes specifically stated:

> The Commission further recommends that the Congressional Delegation of the State of Nevada move toward the development of reasonable incentives for the private sector for retroactive application of new fire and life-safety features. This could translate into tax incentives such as investment credits, accelerated depreciation schedules and tax credits. The Commission further urges the Congressional Delegation to consider calling national committee hearings in this regard and to submit appropriate bills in the United States Senate and the United States House of Representatives.

State legislation responsive to these recommendations is being formulated and discussed in Nevada at this time. The step that I am taking today on the Federal level will also be helpful to the cause of fire prevention.

With 550 hotels and motels in Nevada, my State plays host to 22 million tourists from the other 49 States who visit those hotels and motels. The legislation being introduced in the form of S. 878 is important to every other Senator who should never want to see in their own States the loss of life and property that has befallen Nevada recently. No State is immune from fire tragedy. Two weeks after the MGM Grand holocaust, 26 hotel guests in a Stouffer's Inn in Harrison, N.Y., died.

The time is tragically right for consideration and passage of this bill. It comes at a time when we read almost weekly of another nursing home fire, another restaurant or club inferno, another hotel blaze. S. 878 is being introduced in the wake of the congressionally mandated report by the U.S. Fire Administration on fire protection systems and the recent report of the Nevada Governor's Commission on Fire Safety Codes. The limited and carefully circumscribed tax incentives provided by this legislation are vitally important to helping end the devastation wrought by fire in this Nation.

By Mr. GORTON (for himself and Mr. JACKSON):

S. 879. A bill to amend the Uniform Time Act of 1966 to provide that daylight saving time shall begin each year on the last Sunday in March rather than the last Sunday in April; to the Committee on Commerce, Science, and Transportation.

LEGISLATION TO EXTEND DAYLIGHT SAVING TIME

Mr. GORTON. Mr. President, the bill I am introducing today would begin daylight saving time a month earlier every year. Now daylight saving time begins on the last Sunday in April. This bill would have it begin on the last Sunday in March.

The history of uniform time zones in this country is long, complex, and fascinating. Established standards of time within the United States first came into use in 1883. United States and Canadian railroads that year adopted a four-zone system to govern their operations and reduce the confusion resulting from some 100 conflicting local Sun times observed in terminals across the country.

During World War I, agitation for "daylight saving" which had been successfully tried in Europe and which was advocated as a measure to conserve fuel and increase national efficiency, led Congress to make time standards a matter of Federal legislation. The resulting Standard Time Act and the duties of the Interstate Commerce Commission under it rested on the commerce clause and the weights and measures clause of the Constitution.

The act approved on March 19, 1918, was entitled, "An act to save daylight and

to provide standard time for the United States." It served a twofold purpose. It divided the territory of the continental United States into five zones—eastern, central, mountain, Pacific, and Alaska. It also provided that the standard time of each zone should be advanced 1 hour for 7 months of each year, beginning on the last Sunday in March and ending on the last Sunday in October, so that during that period the standard time in each zone should be 1 hour in advance of the mean astronomical time of the degree of longitude governing each zone, respectively. That is exactly what this bill proposes.

Mr. President, there have been numerous changes in the daylight saving time system since the original 1918 legislation. Except during wartime, daylight saving time was an option left to the various States. By the summer of 1961, daylight saving time had spread to areas with a total population of roughly 102 million people (about 56 percent of the population) comprising all or parts of 27 States and the District of Columbia.

But the confusion attending the annual change from daylight saving time and back at some points or areas while others maintained standard time was aggravated by a number of factors, including the wide differences in length of the daylight saving periods observed in different places.

The 89th Congress enacted the Uniform Time Act of 1966 which amended and supplemented the 1918 act. One of the many features of this bill was the adoption of April to October daylight saving time. The principal reason for these dates was that those were the dates in use by 90 percent of the people then observing daylight saving time.

In 1973, Congress enacted the Emergency Daylight Saving Time Energy Conservation Act of 1973 (Public Law 93-182)—providing for year-round daylight saving time. The following year Congress provided for an 8 month daylight saving time period, from the last Sunday in February until the last Sunday in October. The year after that the Nation returned to 6 months of daylight saving time. These time changes and their effects were studied and provide support for the bill I am introducing today.

Mr. President, there are several reasons for enactment of this legislation. There are reasonable grounds to believe that advancing daylight saving time will produce modest gains in the areas of energy conservation and traffic safety. But the two principal reasons for making this change are: First, that it is a step toward combating this Nation's rapidly rising violent crime rates; and second, that it conforms the start of daylight saving time to the reality of most peoples' lifestyles and preferences.

As the March cover stories for both Time and Newsweek demonstrate, violent crime is mounting. In February, Chief Justice Warren Burger warned about a reign of terror in American cities. It is a fundamental responsibility of both the States and the Federal Government to take actions within their proper spheres of authority which will combat this violent crime epidemic. Expanding daylight saving time is one modest piece in the larger puzzle of actions this Congress can take to fight violent crime.

The administration's final report on the operation and effects of daylight saving time (July 1975) showed that there was consistently less violent crime for DST periods when compared with similar periods of standard time. Furthermore, the data from Washington, D.C., during the periods studied showed decreases in violent crime of 10 to 13 percent. The high correlation between hourly patterns of violent crime and daylight is strong support for increasing the duration of daylight saving time.

An independent reason for an earlier start for daylight saving time, Mr. President, is that it is popular. It conforms to the desires of the majority of people in this Nation. The administration's study of daylight saving time showed that of the people who had an opinion of 8 months daylight saving time, as opposed to 6 months, almost twice as many preferred the longer period. In April, the beginning of spring, a longer evening of daylight is far more valuable to the vast majority of our people than daylight between 5 and 6 in the morning.

Mr. President, I am aware that there are some areas across the country that are content with the 6-month daylight saving time period. I have attempted to take a modest approach in this bill and seek an extension of only 1 month of daylight saving time rather than 2. A 2-month extension—that is, beginning daylight saving time on the last Sunday in February—would provide a symmetrical daylight to darkness system. Thus, sunrise and sunset at the start of daylight saving time would be the same time as at the end of daylight saving time in October. Although I acknowledge the logic and increased benefits of an 8-month system, my bill only seeks a 7-month system. It returns us to the daylight saving time system originally established by the 1918 act. This should adequately address the concerns of those areas of the country that have reservations over increased daylight saving time. It poses a minimal amount of dislocation, while presenting us with the potential for significantly reducing violent crime, and at the same time, more adequately corresponding to the living styles and preferences of the majority of our Nation's people.

By Mr. HATFIELD:

S. 880. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer conscientiously opposed to participation in war may elect to have his income, estate, or gift tax payments spent for nonmilitary purposes; to create a trust fund (the world peace tax fund) to receive these tax payments; to establish a world peace tax fund board of trustees; and for other purposes; to the Committee on Finance.

WORLD PEACE TAX FUND ACT

● Mr. HATFIELD. Mr. President, today I am reintroducing the World Peace Tax Fund bill to amend the Internal Revenue Code of 1954 in order to provide a way for conscientious objectors to elect to have their tax payments spent for nonmilitary purposes.

As each of us know, from the large volume of mail and personal visits from those conscientiously opposed to war, our present tax system is working a grievous injustice against people who, while not required to bear arms, must still pay for others to do so and for the continuing and widening arms race. Requiring taxes for current military outlay from people whose moral and spiritual background and framework forbid them participation in violent means of conflict resolution is a dark blot upon our national human rights policy.

It is my strong conviction that we as a body should move to permit citizens opposed to war on moral and theological grounds, and who have entered responsibly into the rigors of demonstrating conclusively their conscientious status, the opportunity to have that portion of their income, estate, and gift taxes normally spent by the military directed to peace-related activities instead.

William Penn argued this very issue with the English monarch in 1711. Since the first Congress this matter has been upon the legislative agenda. But today, as the specter of nuclear conflagration widens, and we as a nation become more ensnared by the worldwide arms race, it is not only an issue of equity but of urgent moral policy. It is time to declare in an unequivocal fashion that we as a nation give support to peacemakers. It is time to extend the long honored principle of conscientious objection to payment of taxes for the military. No citizen should be forced to violate compelling opposition to violence. And, yet, today citizens in each of our States are under threat of imprisonment if they persist in following the highest good that they know. Others of our constituents are choosing to earn less money than they could in order to maintain a nontaxable income level.

The World Peace Tax Fund Act would not lower total tax payments or diminish tax obligations, as many current deductions now do. Rather, it recognizes deep convictions and removes the awful dilemma facing conscientious objectors to disregard their moral beliefs or disobey the laws of the land. Under this measure, conscientious objection would be determined by the criteria established by the Selective Service Act.

Those who qualify, then, may choose to have an appropriate percentage of their tax dollars transferred by the Treasury into a trust fund to be established by the bill. The percentage would be figured each year according to the amount of budgeted "current military outlay."

An estimated 0.5 to 9 percent of income taxpayers would use the World Peace Tax Fund checkoff if it became law. This is based on the membership of the Church of the Brethren, Mennonites and Quakers—Friends—who are the principal supporters of WPTF, and have a combined membership of 540,000. A survey taken at the time of the Calley sentence in 1971 by Harris indicated 9 percent thought a soldier not justified

in shooting an enemy in war, and is the only indication known of a poll of the public at large on conscientious objection.

The WPTF fund would be approximately $180,058,000 if 0.4 percent of income taxpayers used the fund and $4,501,450,000 if 10 percent used it.

This fund, administered by a board of citizens appointed by the President and Congress, would disburse funds to programs of a peace-related nature.

The 1979 World Peace Tax Fund bill has been redrafted to include several new activities which would be eligible to receive these transfer funds. The National Academy of Peace and Conflict Resolution, which had a 2-year study commission authorized in the Educational Services Act of the 95th Congress, would be a most fitting recipient. Another concordant option added to this version is a "retraining of workers displaced by conversion from military production." These alternatives are bold symbols as well as practical ways to begin to redirect our energies as a nation committed to bringing a wider peace in our troubled world.

The denominational church support for this bill is wide and growing: The U.S. Catholic Conference, an organization of Catholic bishops, declared in 1973:

We encourage legislative efforts which offer citizens, who object for reasons of conscience to paying taxes to support military programs, the option of allocating a portion of their tax payment to fund peace and development oriented programs.

The 10-million-member Methodist denomination, while not a traditional "peace church," such as the Quakers, Mennonites, or the Brethren, supports the world peace tax fund concept. William Willoughby, of the Washington Star, reported from Portland, Oreg., on May 5, 1976:

The General Conference of the United Methodist Church, the country's second largest Protestant denomination gave its endorsement to individuals who, for reasons of conscience, withhold a portion of their tax dollars which would be used for war and promoting the arms race.

The action, included in a comprehensive resolution on world peace and matters directly related to it, is reflective of a growing feeling in many churches in the United States that they should not be forced into supporting programs with which they have strong moral and theological conflicts.

It does hold as one of its official statements the assertion that "what the Christian citizens may or may not do is to obey persons rather than God, or overlook the degree of compromise in even our best acts, or gloss over the sinfulness of war."

The resolution said, "Christian teaching supports conscientious objection to all war as an ethically valid position." It also asserts that ethical decisions on political matters must be made in the context of the competing claims of Biblical revelation, church doctrine, civil law, and one's own understanding of what God calls him or her to do.

Further, the resolution, approved by the General Conference of the United Methodist Church, states:

We therefore, support all those who conscientiously object; to preparation for or participation in any specific war on all wars; to cooperation with military conscription; or to the payment of taxes for military purposes; and we ask that they be granted legal recognition.

The United Church of Christ passed a supportive resolution during its 1977 general synod meeting:

Whereas, we look for guidance from the life, teaching and suffering of Jesus; his passion for human well-being; his solidarity with the vulnerable against the false order of the day; his embodiment of peacefulness and courage in his ministry; his readiness to stand against the imperialism of his day with the whole of his life, and

Whereas, we must look for alternatives to war to settle international conflicts, and;

Whereas, a bill to establish a World Peace Tax Fund, i.e., H.R. 4897 and S. 880, has been introduced in Congress which would amend the Internal Revenue Code to provide that taxpayers conscientiously opposed to participation in war may elect to have their income, estate, or gift tax payments spent for nonmilitary purposes, and;

Whereas, we recognize the dilemma of conscientious objectors who wish to pay their full share of taxes but cannot accede to thus participating in war which is against their beliefs, and;

Whereas the Quaker, Brethren, Mennonite and United Methodist churches have already acted in this area;

Therefore be it resolved that the 11th General Synod of the United Church of Christ gives full support to the swift passage of legislation establishing a World Peace Tax Fund and urges individual members of the UCC to write their appropriate legislators.

Possibly the most compelling affirmative statement to date came from the October 7 and 8, 1978, New Call to Peacemaking Conference in Green Lake, Wis.:

This meeting, a cooperative effort of Brethren, Friends and Mennonites, was called to renew the Historic Peace Churches' commitment and promotion of nonviolence as a way of life. This statement represents a distillation of the resolutions and recommendations developed by 27 small groups, each of which met four times during the course of the Conference. Prior to the Green Lake Conference there were some 26 regional conferences in 13 regions involving more than 1,600 people.

CONFRONTING MILITARISM AND THE ARMS RACE

Because our security is in Jesus Christ, we reject reliance on "national security." We reaffirm our membership in Christ's kingdom and in the global community by denouncing national and military idolatry. Because the earth is the Lord's we declare that the resources presently wasted on national military systems in all countries should be transferred to meet the genuine needs of the world's people.

CONVERSION TO A PEACE ECONOMY

With awareness of the destructive, wasteful, and inflationary effects of military-related expenditures, we support:

1. Research and action toward economic conversion to non-military production, with assistance for those who are temporarily unemployed during the process.

2. Transfer of tax monies from the military budget to programs meeting human needs.

WAR TAX RESISTANCE

1. We call upon members of the Historic Peace Churches to seriously consider refusal to pay the military portion of their federal taxes, as a response to Christ's call to radical discipleship.

2. We challenge ourselves and also our congregations and meetings to uphold war tax resisters with spiritual, emotional, legal, and material support.

3. We call on our church and conference agencies to enter into dialogue with employees who ask, for reasons of moral conviction, that their taxes not be withheld.

4. We suggest that alternative "tax" payments be channeled into a peace fund initiated by the New Call to Peacemaking or into existing peace funds of constituent groups.

5. We call on our denominations, congregations and meetings to give high priority to the study of war tax resistance in our own circles and beyond.

WORLD PEACE TAX FUND

In keeping with our past support of alternative service provisions for conscientious objectors to the draft, we urge support for congressional enactment of a World Peace Tax Fund as an alternative to compulsory financial support of war and preparation for war.

Thomas Jefferson said, in the Virginia Statutes of Religious Freedom in 1799, that—

To compel a man to furnish contributions of money for propagation of opinions which he disbelieves, is sinful and tyrannical.

I am strongly persuaded that this bill is sound in its approach to the reduction of tyranny against a certain portion of our population.

Legally, it has precedent in the selective service statutes which have recognized an individual's right to alternative civilian service. Federal courts have also exempted individuals, for religious reasons, from social security taxes.

PRECEDENTS FOR TAX EXCEPTIONS FOR CONSCIENTIOUS OBJECTORS

First. Section 1402(e) of the Internal Revenue Code provides an exemption from payment of self-employment taxes for duly ordained, licensed or commissioned ministers and members of religious orders, or for Christian Science practitioners upon their filing an application for exemption together with a statement that they are conscientiously opposed to, or because of religious principles, they are opposed to participation in an insurance plan like that provided by the Social Security Act.

Second. Section 1402(h) of the Internal Revenue Code similarly relieves members of qualified religious faiths, primarily the Amish, of the duty to pay the social security tax. By this code provision, enacted in 1965, Congress acknowledged and accommodated the conscientious objection of the Amish, to participation in insurance plans. The tax exemptions provided by section 1402(e) and 1402(h) of the Internal Revenue Code were modeled after the exemption of conscientious objectors from the draft.

Third. The revised conscription bill of February 24, 1864, contained provision for conscientious objectors which allowed them to be considered noncombatants "or shall pay the sum of three hundred dollars to such person as the Secretary of War shall designate to receive it, to be applied to the benefit of the sick and wounded soldiers," U.S. Statutes at Large, 38th Congress, 1st session, XIII, page 9.

Fourth. In 1863 Secretary of War Stanton made the following proposition to the Society of Friends, Baltimore. He proposed to create a special fund for the benefit of the Freedman and to exempt Friends from military service upon the payment of $300 into this fund. Such

payment may not be as in other cases to the district provost marshal, but to his fiscal agent at Washington to be credited on his books to the Freedman, and that Friends can have the disbursement of it through their own agents, and laborers.

Fifth. A memorial of the Society of People, commonly called Shakers, contained a brief statement of the principles and reasons on which their objections and conscientious aversion to bearing arms, hiring substitutes, or paying an equivalent in lieu thereof, are founded, in 1818, addressed to the Legislature of New Hampshire.

We are not ungrateful to God for the privileges and freedom we enjoy, nor do we forget the patriotic Legislature of 1808, who considered our conscientious scruples, and sacred rights in the fifth section of the militia bill; and concurred with the constitution and rights of man, that we should, and of right ought to be exempt from military duty, and from all equivalents on that account.

Morally, the fund not only nurtures the individual conscience opposed to war, but it acknowledges the deeper held and recently elucidated American social commitment to peace.

Tangibly, the peace fund is a way this Nation, following the lead of President Carter, can speak out for human rights and the sanctity of life, and call into question our high expenditures to arm ourselves and the world. It is a way that we can show our commitment to a SALT III reduction in nuclear arms levels and greater security for our country and the world.

And finally, the world peace tax fund allows those who are personally committed to nonviolence to practice it legally in the support of the kind of compassionate human service which has always been our best defense.

This bill is similar to House bill H.R. 4897, introduced in the 1st session of the 95th Congress by Representative RONALD V. DELLUMS of California with 28 cosponsors. It is my understanding that the bill will be reintroduced shortly in the House.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 880

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "World Peace Tax Fund Act."

SEC. 2. WORLD PEACE TAX FUND.

(a) CREATION OF TRUST FUND.—There is hereby established within the Treasury of the United States a special trust fund to be known as the "World Peace Tax Fund" (hereinafter referred to as the "Fund"). The Fund shall consist of such amounts as may be transferred to the Fund as provided in this section.

(b) TRANSFER TO FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—

(1) IN GENERAL.—There are hereby transferred to the Fund amounts equivalent to the sum of the amounts designated during the fiscal year by individuals under sections 2210, 2506, and 6099 of the Internal Revenue Code of 1954 for payment into the Fund. Such amounts shall be deposited into the Fund, and shall be available only for the purposes provided in section 8 of this Act.

(2) METHOD OF TRANSFER.—The amounts transferred by paragraph (1) shall be transferred at least monthly from the general fund of the Treasury to the Fund on the basis of estimates by the Secretary of the Treasury of the amounts, referred to in paragraph (1), received in the Treasury. Proper adjustments shall be made in the amounts subsequently transferred to the extent that prior estimates were in excess of or less than the amounts required to be transferred.

SEC. 3. INCOME TAX PAYMENTS TO WORLD PEACE TAX FUND.

(a) IN GENERAL.—Subchapter A of chapter 61 of the Internal Revenue Code of 1954 (relating to returns and records) is amended by adding at the end thereof the following new part:

"PART IX—DESIGNATION OF INCOME TAX PAYMENTS FOR TRANSFER TO WORLD PEACE TAX FUND

"SEC. 6099. DESIGNATION BY INDIVIDUALS.

"(a) IN GENERAL.—Every eligible individual (other than a nonresident alien) whose income tax liability for any taxable year is $1 or more may designate that his income tax payment for that year shall be paid into the World Peace Tax Fund established by section 2 of the World Peace Tax Fund Act.

"(b) DEFINITIONS.—As used in this section—

"(1) ELIGIBLE INDIVIDUAL.—

"(A) IN GENERAL.—The term 'eligible individual' means an individual who certifies on his return of tax that he is conscientiously opposed to war in any form, and who—

"(i) has been exempted from combatant service and training in the Armed Forces of the United States as a conscientious objector under section 6(j) of the Military Selective Service Act (50 U.S.C. App. 456(j)), or prior corresponding law, or

"(ii) demonstrates to the satisfaction of the Secretary that he is conscientiously opposed to participation in war in any form within the meaning of such section.

"(B) VERIFICATION.—The Secretary may require any taxpayer who makes a designation under subsection (a) to provide such additional information as may be necessary to verify his status as a person conscientiously opposed to participation in war in any form.

"(C) CHALLENGE OF STATUS.—If the Secretary determines that a taxpayer who makes the designation provided for by subsection (a) is not entitled to make that designation, then the Secretary may bring an action, in the United States district court for the district in which that taxpayer has his residence, for a declaratory judgment as to whether the taxpayer is entitled to make that designation as a person conscientiously opposed to participation in war in any form.

"(2) INCOME TAX LIABILITY.—The term 'income tax liability' means the amount of the tax imposed by chapter 1 on an individual for any taxable year (as shown on his return) reduced by the sum of the credits (as shown on his return) allowable under subpart A of part IV of subchapter A of chapter 1, other than the credit allowed by section 31.

"(3) INCOME TAX PAYMENT.—The term 'income tax payment' means the amount of taxes imposed by chapter 1 and paid by or withheld from an individual for any taxable year not in excess of his income tax liability.

"(c) MANNER AND TIME OF DESIGNATION.—A designation under subsection (a) may be made with respect to any taxable year,

"(1) at the time of filing the return of the tax imposed by chapter 1 of such taxable year, and

"(2) at any other time (after the time of filing the return of the tax imposed by chapter 1 for such taxable year) specified in regulations prescribed by the Secretary.".

(b) CLERICAL AMENDMENTS.—The table of parts of subchapter A of chapter 61 of such Code is amended by adding at the end thereof the following:

"Part IX.—DESIGNATION OF INCOME TAX PAYMENTS FOR TRANSFER TO WORLD PEACE TAX FUND.".

(c) QUESTION PLACED ON RETURN; INSTRUCTIONS.—

(1) Subpart B of part II of subchapter A of chapter 61 of such Code (relating to income tax returns) is amended by adding at the end thereof the following new section:

"SEC. 6017B. WORLD PEACE TAX FUND DESIGNATION INFORMATION.

"Each return with respect to the tax imposed by chapter 1 shall include the question 'Are you conscientiously opposed to participation in war in any form?', together with an opportunity to respond affirmatively or negatively to the question. Each publication of instructions with respect to such return shall include an explanation of the purpose of the World Peace Tax Fund and the criteria for determining whether one meets the requirements of section 6(j) of the Military Selective Service Act (50 U.S.C. App. 456(j)), and shall state that only a person who meets those criteria may indicate an affirmative response to that question on the return and may make the designation provided by section 6099.".

(2) The table of sections for such subpart is amended by adding at the end thereof the following new item:

"Sec. 6017B. World Peace Tax Fund designation information.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to—

(1) taxable years beginning after December 31, 1978, and

(2) any taxable year ending before January 1, 1979, for which the time for filing a claim for refund or credit of an overpayment of tax has not expired on the date of enactment of this Act.

(e) RULES APPLICABLE TO RETURNS OF TAX FOR TAXABLE YEARS ENDING BEFORE JANUARY 1, 1979.—

(1) PENALTIES FOR FAILURE TO PAY TAX.—Any civil or criminal penalty imposed on an individual for failing or refusing to pay all or a part of the tax imposed by chapter 1 of the Internal Revenue Code of 1954 shall be vacated and set aside if the person upon whom the penalty was imposed—

(A) pays the tax due (with interest), and

(B) establishes to the satisfaction of the Secretary of the Treasury that his failure or refusal to pay was based upon his conscientious objection to participation in war in any form within the meaning of section 6(j) of the Military Selective Service Act (50 U.S.C. App. 456(j)) or prior corresponding law.

(2) DISPOSITION OF AMOUNTS COLLECTED.—There are hereby transferred to the Fund amounts equal to the sum of the amounts paid into the Treasury by persons under the provisions of paragraph (1).

SEC. 4. ESTATE TAX PAYMENTS TO WORLD PEACE TAX FUND.

(a) IN GENERAL.—Subchapter C of chapter 11 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new section:

"SEC. 2210. DESIGNATION OF ESTATE TAX PAYMENTS FOR TRANSFER TO WORLD PEACE TAX FUND.

"(a) IN GENERAL.—An eligible individual (within the meaning of section 6099(b)(1)) may elect that the tax imposed by section 2001 on his taxable estate shall be transferred when paid to the World Peace Tax

Fund established under section 2 of the World Peace Tax Fund Act. The election may be made by the executor or administrator of the estate under written authority of the decedent.".

(b) CLERICAL AMENDMENT.—The table of contents for subchapter C of chapter 11 of such Code is amended by adding at the end thereof the following:

"Sec. 2210. Designation of estate tax payments for transfer to World Peace Tax Fund.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to the estates of decedents dying after December 31, 1978.

SEC. 5. GIFT TAX PAYMENTS TO WORLD PEACE TAX FUND.

(a) IN GENERAL.—Subchapter B of chapter 12 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new section:

"SEC. 2506. DESIGNATION OF GIFT TAX PAYMENTS FOR TRANSFER TO WORLD PEACE TAX FUND

"(a) IN GENERAL.—An eligible individual (within the meaning of section 6099(b)(1)) may elect that tax imposed by section 2501 shall be transferred when paid to the World Peace Tax Fund established under section 2 of the World Peace Tax Fund Act.".

(b) CLERICAL AMENDMENT.—The table of contents for subchapter B of chapter 12 of such Code is amended by adding at the end thereof the folowing:

"Sec. 2506. Designation of gift tax payments for transfer to World Peace Tax Fund.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to gifts made after December 31, 1978.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

(a) CERTIFICATION BY COMPTROLLER GENERAL.—As soon after the close of each fiscal year as may be practicable, the Comptroller General shall determine and certify to the Congress and to the President the percentage of actual appropriations made by the United States from the Federal Funds Budget during the preceding fiscal year which were made for a military purpose. The certification shall be published in the Congressional Record upon receipt by the Congress.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is hereby authorized to be appropriated each year a certain portion of the Fund to the World Peace Tax Fund Board of Trustees for obligation and expenditure in accordance with the provisions of this Act. This portion is determined by applying the percentage figure derived in subsection (a) above to the money transferred to the Fund in each fiscal year, and adding to that sum all moneys in the Fund previously authorized to be appropriated to the Board of Trustees but not yet appropriated. Moneys remaining in the Fund shall accrue interest according to the prevailing rate in long-term Government bonds.

(c) SURPLUS COVERED INTO GENERAL FUND.—The remaining portion of the Fund is authorized to be appropriated to the general fund of the Treasury of the United States. No part of the money transfered to the general fund under this subsection shall be appropriated or any expenditures, or otherwise obligated, for military purposes.

SEC. 7. BOARD OF TRUSTEES.

(a) ESTABLISHMENT OF BOARD.—There is established a World Peace Tax Fund Board of Trustees (hereinafter referred to as the "Board") which shall be composed of 11 members appointed as follows:

(1) nine members, not more than five from the same political party, appointed by the President, by and with the advice and consent of the Senate, from among individuals who have demonstrated a consistent commitment to world peace and international friendship and who have had experience with the peaceful resolution of international conflict; and

(2) two members, who shall also meet the above criteria, one of whom shall be appointed by the President pro tempore of the Senate from among the Members of the Senate, and one of whom shall be appointed by the Speaker of the House of Representatives from among the Members of the House, and both of whom shall serve ex officio.

(b) TERMS OF OFFICE.—The term of office of each member of the Board shall be six years, except that the term of office for four members initially appointed under subsection (a)(1) shall be three years. Members may serve until their successors are appointed, except that if any member appointed under subsection (a)(2) ceases to serve as a Member of Congress, his term of office on the Board shall terminate at the time he ceases to serve as a Member of Congress. Each member shall be eligible for reappointment for one additional term, but no person shall serve for more than twelve years as a member of the Board. Six Trustees shall constitute a quorum.

(c) FILLING OF VACANCIES.—Any vacancy in the membership of the Board shall not affect its powers and shall be filled in the same manner in which the original appointment was made. The term of office of any person appointed to fulfill the unexpired term of a member shall consist of the unexpired portion of such member's term.

(d) CHAIRMAN.—The Board shall elect a Chairman from among its members.

SEC. 8. DUTIES OF THE BOARD.

(a) PAYMENTS.—The Board may make payments as authorized by appropriation Acts, by way of grant, loan, or other arrangement, under such conditions and upon such terms as it considers necessary.

(b) RESEARCH FUNDS; NONDOMESTIC PROGRAMS.—Funds designated for the purpose of research may be directed to governmental or nongovernmental, national, or international organizations. Funds for nondomestic programs involving the providing of goods and services shall be restricted in distribution to the United Nations and associated agencies.

(c) ELIGIBLE ACTIVITIES.—Activities eligible to receive money from the Board shall include but not be limited to:

(1) the National Academy of Peace and Conflict Resolution;

(2) research directed toward developing and evaluating nonmilitary and nonviolent solutions to international conflict;

(3) disarmament efforts;

(4) retraining workers displaced by conversion from military construction;

(5) international exchanges for peaceful purposes;

(6) improvement of international health, education, and welfare; and

(7) programs for providing information to and education of the public about the above activities.

(d) APPLICATIONS.—The Board shall publish regulations for the submission of applications for funds by persons and agencies, and shall determine the eligibility of such persons and agencies to receive payments or loans. Before approving the application of any such person or agency the Board shall determine, after a comprehensive review of all the functions and activities of the person or agency requesting approval, that such functions and activities have a nonmilitary purpose.

(e) SUBMISSION OF BUDGET.—The Board shall submit its budget to the Congress, shall report to the President and to the Congress annually on its activities, and shall provide a complete accounting of all funds received and disbursed pursuant to this Act.

(f) DISPLACEMENT OF OTHER FUNDS.—It is the intent of this Act that the Fund shall not operate to release money for military expenditures which, were it not for the existence of the Fund, would otherwise have been appropriated for nonmilitary expenditures.

SEC. 9. SUBMISSION OF BUDGET.

Notwithstanding any other provision of law, the Comptroller General shall carry out the activities and review of the Board which would be carried out by the Office of Management and Budget if the Board were an agency within the executive branch of the Government; and may establish such requirements as he deems necessary to carry out his authority under this section. The Office of Management and Budget shall not have jurisdiction over the Board. The Board shall submit its budget, requests for appropriations, and related reports to the Congress in accordance with such requirements and procedures as the Comptroller General may establish.

SEC. 10. POWERS AND ADMINISTRATIVE PROVISIONS.

(a) COOPERATION OF OTHER AGENCIES.—Each department, agency, and instrumentality of the Federal Government, including independent agencies, is authorized and directed to cooperate with and furnish to the Board, to the extent permitted by law, upon request made by the Chairman, such information as the Board may require to fulfill its duties under this Act.

(b) EXECUTIVE DIRECTOR; EXPERTS AND CONSULTANTS.—Subject to such regulations as the Board may adopt, the Chairman may—

(1) appoint and fix the compensation of an Executive Director and such additional staff personnel as he deems necessary; and

(2) procure temporary and intermittent services to the same extent as authorized by section 3109 of title 5, United States Code.

(c) COMPENSATION.—Members of the Board shall be compensated at the maximum rate permitted by law under the General Schedule for Government employees or consultants, on a per diem basis, and shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of their duties as members of the Board.

SEC. 11. DEFINITIONS.

For the purposes of this Act—

(1) "military purpose" means any activity or program conducted, administered, or sponsored by an agency of the Government which effects an augmentation of military forces, defensive and offensive intelligence activities, or enhances the capability of any person or nation to wage war,

(2) "actual appropriations for military purpose" includes but is not limited to amounts appropriated by the United States in connection with—

(A) the Department of Defense;

(B) the Central Intelligence Agency;

(C) the National Security Council;

(D) the Selective Service System;

(E) activities of the Department of Energy that have a military purpose;

(F) activities of the National Aeronautics and Space Administration that have a military purpose;

(G) foreign military aid, and foreign economic aid made available to any country for the purpose of releasing local funds for military activities; and

(H) the training, supplying, or maintaining of military personnel, or the manufacture, construction, maintenance, or development of military weapons, installations, or strategies;

(3) "agency" means each authority of the Government of the United States, whether or not it is within or subject to review by another agency, but does not include—

(A) the Congress; or

(B) the courts of the United States; and

(4) "person" includes an individual, partnership, corporation, association, or public or private organization other than an agency.

SEC. 12. SEPARABILITY.

If any section, subsection, or other provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of this Act and the application of such section, subsection, or other provision to other persons or circumstances shall not be affected thereby.●

By Mr. RUDMAN (for himself, Mr. WEICKER, Mr. HATCH, Mr. HUDDLESTON, Mr. BAUCUS, and Mr. HAYAKAWA):

S. 881. A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy; to the Committee on Small Business.

SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

Mr. RUDMAN. Mr. President, today I am introducing a bill with Senators WEICKER, HATCH, HUDDLESTON, BAUCUS, and HAYAKAWA, to amend the Small Business Act so as to significantly strengthen the role of this Nation's smaller, technology based firms in federally funded research and development projects. The issue addressed in this legislation is one which plays an underlying role in the ability of this Nation to maintain its national security, to achieve energy independence, increase productivity, and preserve the quality of life we all enjoy. Our national strength and confidence in these areas depends upon maintaining a leading role in technological superiority. In a time characterized by our declining productivity and an increasing inability of our Nation to compete in the world economy, it is our feeling that technological development holds the best hope for putting this Nation back on its feet and in a position of preeminence in the world market once again.

The President has made it clear that the initial thrust of this administration will be to focus on the various methods of stimulating the economy and enhancing our national productivity. Historically, individuals, and small businesses have been responsible for a major portion of the significant innovations in this country. The importance of small business and the role it must play in this effort is clear. Numerically, 97 percent of all U.S. business is considered small business. Small business accounts for approximately one-half of private employment in this country and 43 percent of the gross national product. In my home State of New Hampshire, for example, smaller businesses employ nearly 87 percent of the work force. But perhaps even more importantly, small business has traditionally been a leader in the field of innovation and technology. A recent study by the Office of Management and Budget found that from 1953 to 1973 almost half of all major U.S. innovations came from firms with less than 1,000 employees. This fact takes on a larger meaning when one considers that the Senate Small Business Committee has found that almost 50 percent of American economic growth stems from technological innovation and that traditionally, small firms have produced innovations and technical breakthroughs more efficiently than some of the larger businesses. In addition, small, high-tech firms have been shown by the National Science Foundation to be far more cost effective than larger companies when engaging in research, producing up to 24 times more innovations per research and development dollar.

The 1977 OMB study concluded that small business firms have inadequate access to Federal research and development moneys and that "our country will lose significant high technology capabilities" in the absence of a concerted effort to increase small business research and development awards. The study also found that larger businesses, those with more than 1,000 employees use four times the number of research and development employees to develop and market the same number of innovations. Despite these facts, small business' share of Federal research and development funds is still about the same as it was 4 years ago: between 3 and 4 percent of the total Federal research and development effort. This legislation would establish within all major Federal agencies with research and development budgets in excess of $100 million a proven mechanism, based on the successful National Science Foundation small business innovative research program, to facilitate small business participation in Federal research and development projects.

There can be little doubt that over the years small business has served as the economic backbone of this Nation and has compiled an impressive record in job creation and employment growth. This is particularly true of technology-based firms. In 1979, Prof. David L. Birch of the Massachusetts Institute of Technology prepared a study for the Department of Commerce on the "job generating process." In that report he concluded that small businesses with less than 21 employees created 66 percent of all new jobs in the private sector between 1969 and 1976. The study was based on a sample of 5.6 million businesses, representing 80 percent of all private sector employment. Firms with 250 or less employees produced 90 percent of the 6.8 million jobs created from 1965 to 1976. A similar study in Canada, conducted by the Canadian Federation of Independent Businesses, found that those businesses with fewer than 21 employees created 72 percent of all new jobs in that nation for the period 1969 to 1977.

Mr. President, I am a dedicated advocate of the free enterprise system, and in no way an opponent of big business. Nor do I care to shut off funds for valuable university research. But, I do believe it is necessary for us to look at methods of giving small business its fair share of Federal research and development dollars considering its proven ability to offer possibilities for the future of technological development.

During the past decade, the growth of productivity in the United States has been well below that of all leading industrial nations, most notably, Japan and Germany, even though both nations rely heavily on foreign oil and pay more for their energy than we do. With the current decline in our research and development spending and the consequent reduction in new technologies, we must use the limited resources in a way which insures maximum benefits. I believe the answer lies in a comprehensive and coordinated approach to improving our methods of producing innovative technology. Hence, this bill simply requires that agencies having research and development budgets over $100 million establish a small business innovation research (SBIR) program to enable small firms to develop new products and processes that fall within areas of national need as designated by the agency. The program is modeled after the highly successful National Science Foundation small business program which provides for a three-phased approach to funding small, high technology firms. The Small Business Innovation Research Act provides for the following developmental stages:

PHASE I

Small businesses submit proposals to the appropriate agency concerning that agency's research and development objectives. Those judged by the agency to be the most promising projects would receive up to $50,000 to determine if the research is technically feasible.

PHASE II

If the initial research proves successful and the idea marketable, additional funding ranging from $100,000 to $500,000 would be provided. Special consideration would be given to those proposals that attract the attention of outside, private capital.

PHASE III

Actual production and marketing is financed by private capital. In other words, the Government pays for the research on the Federal objectives, while private capital pays for the commercial applications of the research.

In conclusion, I feel it is important to note that this program would require no additional Federal money. Rather, since the lion's share of the Federal grants are partially contingent upon a demonstrated interest in the project within the private sector, and private capital bears the risk of transferring the technology to the marketplace, the legislation attempts to use Federal research and development funds in a way most likely to result in the development and commercialization of new technologies. Redirection of Federal priorities and aid to a failing economy are two cornerstones of President Reagan's administration. The Small Business Innovation Research Act will help build the foundation necessary to support the President's goals.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 881

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Small Business Innovation Research Act of 1981".

SEC. 2. (a) The Congress finds that—

(1) technological innovation creates jobs, increases productivity, competition, and economic growth, and is a valuable counterforce to inflation and the United States balance-of-payments deficit; and

(2) while small business is the principal source of significant innovations in the Nation, the vast majority of federally funded research and development is conducted by large businesses, universities, and Government laboratories.

(b) Therefore, the purposes of this Act are—

(1) to stimulate technological innovation;

(2) to use small businesses to meet Federal research and development needs; and

(3) to increase private sector commercialization of innovations derived from Federal research and development.

SEC. 3. Section 9(b) of the Small Business Act is amended—

(1) by striking out "and" at the end of clause (2);

(2) by striking out the period at the end of clause (3) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(4) to develop and maintain a source file and an information program to assure each qualified and interested small business concern the opportunity to participate in Federal agency Small Business Innovation Research programs;

"(5) to coordinate with participating agencies a schedule for release of SBIR solicitations, and to prepare a master release schedule so as to maximize small businesses opportunities to respond to solicitations;

"(6) to independently survey and monitor the operation of SBIR programs within participating Federal agencies; and

"(7) to report annually to the Committee on Small Business of the Senate and the Committee on Small Business of the House of Representatives on the SBIR programs of the Federal agencies and the Administration's information and monitoring efforts related to the SBIR programs.".

SEC. 4. Section 9 of the Small Business Act is amended by adding at the end thereof the following new subsections:

"(e) For the purpose of this section—

"(1) the term 'Federal agency' means an executive agency as defined in section 105 of title 5, United States Code, or a military department as defined in section 102 of such title;

"(2) the term 'funding agreement' means any contract, grant, or cooperative agreement entered into between any Federal agency and any small business for the performance of experimental, developmental, or research work funded in whole or in part by the Federal Government;

"(3) the term 'Small Business Innovation Research program' or 'SBIR' means a program under which a portion of a Federal agency's research or research and development effort is reserved for award to small business concerns through a simplified, standardized acquisition process having a first phase for determining, insofar as possible, the technical and economic feasibility of ideas proposed under the program, and a second phase, the awarding of which shall take into consideration the potential commercial applications of the research or research and development, to further develop the proposed idea to meet the particular agency needs; and a third phase where private capital pursues commercial applications of the research or research and development; phase three may also involve follow-on production contracts with some agencies for products or processes intended for use by the United States Government; and

"(4) the term 'research' or 'research and development' means any activity which is (A) a systematic study directed toward fuller scientific knowledge of the subject studied; (B) a systematic study directed specifically toward applying new scientific knowledge to meet a recognized need; or (C) a systematic application of new scientific knowledge toward production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements. Such term does not include studies related to the social sciences or the humanities.

"(f) Each Federal agency which has a research or research and development budget in excess of $100,000,000 for any fiscal year beginning with fiscal year 1982 shall expend not less than two-thirds of 1 per centum of such budget for fiscal year 1982, not less than six-tenths of 1 per centum for fiscal year 1983, and not less than 1 per centum of such budget for all subsequent fiscal years with small business concerns specifically in connection with a Small Business Innovation Research program which meets the requirements of this Act and regulations issued hereunder. Funding agreements with small business concerns for research or research and development which result from competitive or single source selections other than under an SBIR program shall not be counted as meeting any portion of the percentage requirements of this section.

"(g) Each Federal agency required by subsection (f) to establish a Small Business Innovation Research program shall in accordance with this Act and regulations issued hereunder—

"(1) establish an agency Small Business Innovation Research program;

"(2) determine categories of projects to be in its SBIR program;

"(3) issue SBIR solicitations in accordance with a schedule determined cooperatively with the Small Business Administration;

"(4) receive and evaluate proposals resulting from SBIR proposals;

"(5) select awardees for its SBIR funding agreements;

"(6) administer its own SBIR funding agreements (or delegate such administration to another agency);

"(7) make payments to recipients of SBIR funding agreements on the basis of progress toward or completion of the funding agreement requirements; and

"(8) make an annual report on the SBIR program to the Small Business Administration.

"(h) In addition to the requirements of subsection (f), each Federal agency which has a budget for research or research and development in excess of $20,000,000 for any fiscal year beginning with fiscal year 1982 shall establish goals specifically for funding agreements for research or research and development to small business concerns, and no goal established under this subsection shall be less in annual dollars than the amount of research or research and development awards made to small businesses in 1981.

"(i) Each Federal agency required by this section to have an SBIR program or to establish goals shall report annually to the Small Business Administration the number of awards pursuant to grants, contracts, or cooperative agreements over $10,000 in amount and the dollar value of all such awards, identifying SBIR awards and comparing the number and amount of such awards with awards to other than small business concerns.

"(j)(1) The Administrator of the Office of Federal Procurement Policy, in conjunction with the Small Business Administration, shall promulgate and issue appropriate regulations, in accordance with the provisions of subsections (f), (g), and (h) and within one hundred and twenty days after the date of enactment of the Small Business Innovation Research Act of 1981, for conduct of Small Business Innovation Research programs within the Federal Government.

"(A) provide for simplified standardized and timely SBIR solicitations, proposals, and evaluation processes; and

"(B) require Federal agencies to coordinate SBIR solicitation release schedules with the Small Business Administration.

"(2) The National Science Foundation and the Small Business Administration shall furnish the Administrator of the Office of Federal Procurement Policy advice and assistance in the promulgation of regulations under this section.".

SEC. 5. The amendments made by this Act do not authorize the appropriation of funds.

Mr. WEICKER. Mr. President, I am pleased to join with Senator RUDMAN in introducing the Small Business Innovation Research Act of 1981.

Last year, delegates to the White House Conference on Small Business ranked innovation high on their list of priorities for small business. Recognizing this concern, the Small Business Committee, which I chair, created a special Innovation and Technology Subcommittee. This subcommittee is chaired by my very able colleague, Senator RUDMAN.

The bill we are introducing today, I believe, addresses not only the concerns raised by the White House Conference participants, but goes to the heart of solving what is a very real problem for our country today. And that is our rapidly falling rate of productivity and innovation.

During the last decade, productivity levels in the United States have fallen well below those of all leading industrial nations. At the same time, there has been a sharp upturn in the annual growth rate of out trade competitors, most notably, Japan and Germany.

A decrease in innovation has sadly, gone hand in hand with this sag in our productivity. I would venture a guess that it is this slowndown in innovation—this lag in the development of new technologies—that is the major cause of dulling of our competitive edge in the world market.

The Small Business Innovation Research Act of 1981 is designed to help solve these problems. It will increase productivity by encouraging businesses to engage in the kind of enterprises that create new jobs and tax revenues at a rapid rate. At the same time, it will help to reduce inflation by generating new technologies, which in turn will lead to more and better products for less.

Mr. President, the innovation problem is a complex one. Over the past several years, research by the Small Business Committee has shown that small businesses provide more than half of all major innovations. Small firms traditionally produce up to 24 times more innovations per R. & D. dollar than larger companies. The ratio of innovations to sales is one-third greater in small high-technology companies than in larger

ones, and the cost per R. & D. scientist is about half as much.

Big businesses, on the other hand, are increasingly reluctant to begin new work on innovation. William Norris, chairman of the board of Control Data Corp., acknowledged this reluctance at a recent conference on technological innovation sponsored by the National Governors' Association. As he put it:

> Many big corporations, with their vast resources and well established markets, are for the most part avoiding risks and are primarily increasing profits by emphasizing improvements in existing products. The rising cost of innovation, investor pressure for immediate earnings and greater uncertainty of an unstable economy have increased the tendency of large corporations to avoid the risks associated with truly major innovative products or services.

Clearly then, big business is not going to provide the answer to our productivity/innovation problem. The solution must be to somehow make it possible for smaller firms—which have already shown they can provide more than their share of ideas, at a lower cost—to pick up the slack.

While many small, innovative companies are clamoring to try out their new ideas, they are faced with the problems of raising sufficient private capital to begin. Because high technology concerns—which have a far greater need for outside financing than other businesses—are perceived as a high-risk venture, investors are often unwilling to fund them. Although some of these firms have recently been more successful in attracting capital, many still go begging.

Our bill attacks this problem by creating legislation that would require Federal agencies with R. & D. budgets over $100 million to establish a Small Business Innovation Research (SBIR) program within their agency. This program's purpose would be to enable small firms to develop new products and processes that fall within areas of national need as designated by the agency. The SBIR concept is modeled after the highly successful National Science Foundation small business program, which provides for three-phased funding of small, high-technology firms. This funding would take place as follows:

PHASE I

Small business concerns would be invited to submit to an agency research proposals concerning that agency's R. & D. objectives. Of the proposals submitted, those judged by the agency to be most promising would be funded up to $50,000 to determine if the research is technically feasible.

PHASE II

If the initial research proves successful and the idea appears workable, additional funding ranging from $100,000 to $500,000 would be provided. Phase II proposals that have attracted the attention of outside, private capital are given special consideration in the evaluation process.

PHASE III

Actual production is financed by private capital.

In summary, the Government pays for the research on the Federal objectives (phase I and II) and private capital pays for the commercial applications of the research (phase III).

Implementation of the program would call for each qualifying agency to set aside 1 percent of its total, annual R. & D. budget for small business. It would be phased in over 3 years to allow agencies ample time to prepare their programs and to make whatever organizational adjustments are necessary. Each agency would select its own research topics, conduct its own periodic solicitations, and make its own awards.

The Small Business Administration would play a significant role in the oversight of this program by coordinating the release of program solicitations and monitoring the awarding of grants. The SBA in turn will report to the Small Business Committee, which will take an active part in seeing that the program is implemented fully and correctly.

The program would require no additional Federal money. Rather, it would use our limited R. & D. funds in the way most likely to result in tangible economic benefits. I believe it is uniquely suited to our current needs since the lion's share of the Federal grant is partially contingent on a show of interest by the private sector, and private capital bears the greater cost of production and commercialization.

If enacted, this legislation would develop the largely untapped potential of our existing small, high-technology companies, and help get new technologies into the marketplace.

In Japan, research and development is already a top priority. That country's Ministry of International Trade and Industry recently said that Japan's future economic security will be achieved through technological innovation. It further recommended that the government increase its R. & D. budget consistent with a long-term vision for technological development. While Japan formerly borrowed, applied, and improved upon imported technologies—many of them American—it is now planning to develop its own.

We must begin now to do the same. The Small Business Innovation Research Act affords us a unique opportunity to do just this. While the program envisioned in this bill will greatly assist Federal agencies in meeting their R. & D. objectives, it will also do much more. By using our most efficient resource—the small, high-technology firm—to develop new products and processes, the program will benefit inventors and investors—both public and private—as well as society as a whole.

By Mr. CRANSTON (for himself and Mr. HAYAKAWA):

S. 883. A bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks, Calif.; to the Committee on Environment and Public Works.

IMPROVEMENTS ON REDBANK AND FANCHER CREEKS, CALIF.

Mr. CRANSTON. Mr. President, I introduce for appropriate reference a bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks in California. This is the same legislation which Senator HAYAKAWA and I sponsored in the 96th Congress and is identical to H.R. 2321 introduced in the House recently by Congressmen PASHAYAN and COELHO.

The Redbank and Fancher Creeks, their tributaries and related streams are located on the western slope of the Sierra Nevada Mountains. Because the streams are uncontrolled, flooding has occurred frequently over the past 30 years. The most serious flood damage occurred in 1969 and resulted in Fresno County being declared a national disaster area. Lesser damages occurred in 1938, 1952, 1955, 1956, 1965, 1972, and 1978.

In 1956 Congress authorized a project investigation for the Redbank and Fancher Creeks stream system, and in 1977 the district engineer of the corps recommended Federal participation in a project to protect the Fresno-Clovis area. In July 1980, the Board of Engineers for Rivers and Harbors approved the project, having a 1.6 to 1 benefit/cost ratio.

The proposed project is a straightforward flood control project with several small detention reservoirs. The principal features include a 13,000-acre-foot reservoir on Fancher Creek, a 1,500-acre-foot reservoir on Redbank Creek, and an enlarged Big Creek Reservoir.

In addition to flood protection, the Redbank-Fancher Creeks project will produce significant water conservation and groundwater management benefits. Under current requirements, project costs will be shared with the Federal Government providing $41,600,000, the State $9,477,000 and local authorities $6,023,000 plus all the operation and maintenance costs.

The Redbank-Fancher Creeks project is supported by the county of Fresno, the cities of Fresno and Clovis, the Fresno Irrigation District, the Fresno Metropolitan Flood Control District, the Kings River Conservation District, the California Water Commission and the California Department of Water Resources. I am unaware of any controversy surrounding the project or any environmental objections to it.

I hope the 97th Congress will move forward with early authorization of the Redbank-Fancher Creeks project to avoid unnecessary project delays and resulting increased costs to the taxpayers.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 883

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, substantially in accordance with the plans and subject to the conditions recommended by the Chief of Engineers, is authorized to construct the project for flood control on Redbank and Fancher, Creeks, California: Report of the Board of Engineers for Rivers and Harbors, dated July 30, 1980, at an estimated cost of $42,000,000.

By Mr. HELMS:

S. 884. A bill to revise and extend programs to provide price support and pro-

duction incentives for farmers to assure an abundance of food and fiber, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURE AND FOOD ACT OF 1981

Mr. HELMS. Mr. President, the Senate Committee on Agriculture, Nutrition, and Forestry is nearing the conclusion of a month-long schedule of hearings on the future of Federal farm programs and related topics. Current farm and food statutes expire in 1981, and the Agriculture Committee has actively sought the options of specialists in both the public and private sectors as to the course agricultural policy should take in the years head.

Drawing extensively from the hearings and upon completion of almost a year of policy research and assessment, I am pleased to introduce today the Agriculture and Food Act of 1981.

Before discussing the specifics of my legislation, I would offer a perspective of the long view. In the first place, why should there be Government farm programs at all—what is their justification? Second, where does the Nation stand in 1981 in terms of Federal agricultural policy—how did we reach this point? Where should we be headed in terms of farm policy?

The essential purpose of any successful farm policy has always been to try to provide a basic stability in the the agricultural sector so that farmers may establish their planting and marketing strategies efficiently and effectively. And, because farmers must make such decisions well in advance of the return they receive from the sale of their crops—and in the face of inherently unpredictable forces such as weather and world market conditions—Federal farm policy has sought to provide a basic stability in the form of income assurances such as loan rates, target prices, reserves, and other mechanisms.

Farmers benefit by such elements of predictability in an inherently unpredictable business, and so does the consuming public, as evidenced by the fact that America is blessed with an abundance of food unimagined elsewhere in the world—and at costs to the consumer, in terms of a percentage of disposable income, less than anywhere else.

Mr. President, it is important to note that consumers have nothing to fear from increased farm prices. Only 6 cents of the cost of a 1-pound loaf of bread represents the actual cost of the wheat in it. The amount the consumer pays includes the cost of labor, processing, and distribution of the product. In fact, if other factors remained constant, the price of wheat would have to be $25 per bushel—better than a fivefold increase—to push the price of bread up to $1 a loaf.

In fact, for all food products, the farm share of the average food dollar is only 39 cents. In 1980, the cost of the labor in food products exceeded the share of the cost that went to farmers for growing the food in the first place.

Everyone should be aware that farmers are the ultimate consumers—the least able of any in the economic chain to pass their cost through because of the very nature of harvest economics and market forces. Because of this, farmers will never be in a position to make profits unless and until the general economy is brought under control.

In a very real sense, then, the problems which farmers face today have very little to do with defects in agricultural commodity legislation. Farmers are being devastated by inflation, rampant regulation, and other forces beyond their control.

However, policy management and initiatives of the past 4 years have resulted in unreasonable high levels of Government regulation and manipulation of agricultural production, prices, and incomes. These policies have resulted in a return of the United States to the status of a residual supplier of grain to the world, reduced producer prices and incomes, hiked production costs, and increased Government expenditures, thereby reducing the most efficient utilization of the productive capacity of the American farmer.

The paramount feature of farm policies, from the time of the Great Depression until the late 1960's, was direct Government involvement in farmers planting and marketing decisions. Starting with the Agriculture Act of 1970 and continuing through the Agriculture and Consumer Protection Act of 1973, and culminating in the Food and Agriculture Act of 1977, Congress has gradually shifted the course of American agriculture away from that kind of direct Federal involvement in the farmer's business.

The 1977 act firmly established the predominance of market orientation in agricultural policy. The bill I offer today continues that progression toward the goal of minimizing Government interference in agriculture and maximizing the farmers' opportunity to derive a fair profit from the marketplace.

As we undertake our efforts to reauthorize farm programs, I should mention that farm commodity legislation must have as little cost to the taxpayers as possible. The severe budget crisis now with us—and which will continue to be with us in the decade ahead—has created a situation in which public support for costly programs of any kind is greatly diminished.

Indeed, the budget situation may be the most fundamentally important dynamic with which we must deal, and it certainly gives adequate cause for us to design farm programs in such a way as to assure that treasury costs will be minimal. To ignore that dynamic could threaten all farm programs and expose farmers to the prospect of a return to roller coaster economic conditions or burdensome production controls.

While the 1977 act is certainly a milestone in establishing basic market orientation of Federal farm policy, it has permitted Federal manipulations which have made real profits for farmers elusive. While it creates conditions where profitability is possible, its defect is that it does not encourage a psychology of profitability for farmers.

Too often the policy of the past 4 years has been to keep farmers barely marginal, dependent upon Government payments for survival. It is time to look ahead to a market dynamic which provides producers the full return they deserve.

As opposed to the down-side price protection of target prices, my legislation offers the up-side price encouragement of an unfettered farmer-owned reserve and expanded exports.

My legislation reallocates the resources of the Government from the maintenance of farm subsistence to the enhancement of farm profitability. Its outlook is upbeat, forward-looking, and as progressive as the free enterprise system itself.

As the principal challenge of Federal farm policy makes its transition from the management of surpluses to the management of shortages, a market-oriented, farmer-held reserve, in conjunction with a recoverable nonrecourse loan, can be the fundamental mechanism for an effective farm policy that provides profits for farmers, and that does not cause price distortions damaging to consumers.

The central focus of Federal farm policy for appropriate commodities should be such a farmer-held reserve and nonrecourse loan. If a reserve is allowed to function properly, reliance upon target prices is unnecessary. With target prices unnecessary we can reduce emphasis upon the need for income transfer and maintenance as the central focus of farm policy, and establish profits in the marketplace instead. And, we can significantly reduce treasury exposure of our programs at the same time.

Farmers and traders will be able to calculate their planting and marketing strategies on predictable market forces and upon events which can be anticipated much more effectively than the current mix of Federal manipulations and the marginal income subsistence psychology that has recently come to dominate farm policy thinking.

A production, supply-side orientation to the management of farm policy can meet the challenges of the 1980's by emphasizing the importance of production for a profit, market forces, and a minimum Federal manipulation of those forces.

If we establish the farmer-held reserve under conditions which the Federal Government has little opportunity for manipulation—and then only in the most unusual of circumstances—we can set the conditions where farmers will once again be in control of their affairs. Yet, we will have used the Government to establish conditions which are predictable, and which utilize the advantages of the free enterprise system in keeping production in balance with demand.

This is truly a supply-side agricultural program which I propose today. An economic incentive for the producer is the surest way of assuring the consumer of an abundant supply of food. What is more important, a strong and healthy agricultural sector with farmers making profits will accrue to the benefit of the entire economy.

Self-styled consumer organizations can be expected to view with alarm my proposal. I suspect that they will complain that my program offers price enhancement to farmers. To them I say that is precisely correct: and it is long overdue.

My bill will not artificially inflate prices, but it will allow market forces to work their will. That means that while the reserve and nonrecourse loan assures farmers of an opportunity to obtain prices which cover their costs of production, it also means that the very existence of the reserve will prevent prices from being artificially high. With the loan rate established at a fixed percentage of the market price, it will assure a proper balance of commodities in the reserve.

So, my bill will enhance the role of the private sector in American agriculture. The farmer will be free to make a profit and to make the planting, production, and marketing decisions which he is uniquely qualified to make. The Government can provide the reserve mechanism and the loan without manipulations and adjustments, confining its energies to disseminating necessary information, promoting international trade, and carrying out basic research and other functions beyond the scope of the individual.

Mr. President, this legislation demonstrates that the scope of American agriculture and all who depend on it is truly broad. My legislation encompasses a host of farm-related topics, and I will attempt to summarize its various provisions. It is important to view these provisions as a total package, however, rather than isolating any single detail.

COMMODITY PROGRAMS

In the dairy program, the price support for milk will be set at between 75 and 90 percent parity, with semiannual adjustments at the discretion of the Secretary of Agriculture. This should provide an additional measure of flexibility for the Secretary to adjust the support price to the appropriate level relative to the demand for dairy products.

This legislation extends current authority for supporting wool and mohair without change.

Wheat, feed grains, rice and soybeans will have their loan rate levels calculated as a percentage of a 5-year moving average of annual cash market prices for each commodity, not counting the high year and low year. Such a system will assure the crop producer that interim financing will be available at a level which will not interfere with market operations or force the Government to acquire burdensome stocks.

The percentages for feed grains, rice, and soybeans will be 75 percent of this moving average in 1982, and from 65 to 85 percent of this average in 1983 and following years. For wheat, the loan rate will be not less than 85 percent of this market average, consistent with the current relationship of support levels between crops. The Secretary shall consider such factors as world demand and cost of production in setting these levels, and in no case may the loan rates fall below the 1981 levels.

A paid land diversion will replace the less cost-effective set-asides and normal crop acreages of the expiring act. Target prices are not reauthorized, and disaster payments will be replaced by Federal crop insurance. For the first time in history, soybeans will be legally designated a basic commodity and will be specifically exempted from inclusion in the farmer-held reserve, as producers have requested.

In cotton, the current formula for calculating loan rates is retained, except that the minimum is increased to 55 cents per pound and target prices are not reauthorized. As in other commodities, a paid land diversion is authorized to the exclusion of other production control measures. The Secretary of Agriculture will be required to offer a recourse loan on seed cotton.

In peanuts, authority for the current program is extended through 1985, except that the price support for quota peanuts shall not be less than $650 per ton, safely below the current market price. A minimum annual poundage quota of 1.44 million tons is established, with authority to increase that amount for domestic needs or to allow for previous undermarketings. The deadline for contracting additional peanuts produced outside the quota is moved to April 15.

In cases of unintentional violations of peanut marketing procedures, my legislation places the authority for adjusting penalties upon the ASCS State and county committees where that authority belongs. Responsibility for storage loans and field supervision is vested specifically in the appropriate grower associations. In addition, my bill includes a new feature in law which permits peanut farmers and cooperatives to redeem peanuts from loan. This provision makes the peanut program better able to allow farmers to take advantage of favorable market conditions and can reduce the administrative and regulatory costs of the program.

Certainly, this program is structured differently from the other commodity programs, as it has historically been, and reasons for the differences remain valid. Peanuts are a specialty crop produced in a limited geographic area. The strict production controls of the program, which have been overwhelmingly endorsed by producers in referendums, have kept costs to the taxpayers virtually nil.

I might add, parenthetically, that the same is true for tobacco.

GRAIN RESERVES AND AGRICULTURAL EXPORTS

For the life of the farm bill, the Secretary of Agriculture is authorized to offer a higher loan rate for grain going into the farmer-owned reserve, as was done for the first time last year. Once farmers take out this loan on grain under the producer storage program it may not be "released" or sold until market prices reach a level calculated as the national average of the full cost of producing the grain, including land value and a return to management.

The cost of storage will be paid until market prices reach 115 percent of this "release" level, in order to less abruptly phase out the incentives for holding the grain. There would be no "call" price, the level at which the Government forces producers to sell the grain or borrow money to repay the loan. However, the Secretary of Agriculture would have the flexibility to establish rates of interest charged on loans.

While this may sound complicated, the net effect is simple. It places the producer in the driver's seat in terms of marketing decisions. It assures the consumer that there will be stocks of grain on hand when we encounter times of shortfall. It assures that the Government could not interfere with the reserve to artificially force down market prices. It provides income protection to the producer, but from the marketplace, not the U.S. Treasury.

Another forward-looking provision of this bill is appointment of a task force to study the concept of farm income protection insurance. Some have suggested this concept as an alternative to existing commodity programs, and we in Congress need further research into the suitability of such a system.

Current authorities for the farm storage program will be extended for the life of the farm bill. In addition, certain grain inspection authorities now vested in the Federal Government could be transferred to the States.

In keeping with our increased market orientation, my bill places increased emphasis on agricultural exports. An export credit revolving fund will be established to facilitate loans to commercial buyers on a continuing basis. As a means of controlling Federal outlays, appropriations for the fund are phased in over a period of 3 years.

My bill allows for a congressional veto of bilateral agreements covering agricultural commodities and extends the life of Public Law 480 through 1985.

When it comes to international marketing, our producers can compete with anyone in the world, as long as the rules of trading are fair. On those occasions when our competitors are unfairly subsidizing their exports to the detriment of the United States, we must be bold and firm to equalize this treatment. For these occasions, my legislation would authorize use of an export subsidy program to counter unfair practices abroad.

In addition, when our own Nation imposes export embargoes which single out the agricultural sector to bear the burden of foreign policy, then the farmer deserves protection. In addition to remedies in current law, this legislation authorizes payments to producers to make up the price differential if products are sold at depressed prices following something short of an across-the-board embargo.

Such a system would force the architects of our foreign policy to consider the costs of such a drastic and essentially unfair measure, as well as the perceived benefits. This remedy is preferable to tinkering with our basic commodity programs which were not designed to deal with foreign policy considerations.

Drastic increases in the loan rate in excess of market-clearing levels, for example, would make it even more difficult to market abroad the domestic surplus created by export embargoes, and could be even more damaging than the agricultural embargo itself.

FOOD STAMPS

Another vital issue which this legislation addresses is food stamps. I will highlight several of the most significant pro-

visions of the bill I am introducing today.

The purchase requirement, which was in place until 1977, will be reinstated, except for the elderly, blind, and disabled. This will require participants with some income to contribute a percentage of their incomes in exchange for food stamps of larger denominational value, while households with little or no income would not be required to pay anything. Such a requirement would result in substantial savings of tax dollars and will focus assistance on those least able to help themselves. Further, it restores the nutritional focus of the program rather than the income transfer focus which the program has taken on since the purchase requirement was eliminated in 1977.

One of the most frequently cited examples of abuse of the food stamp program has been the artificial splitting of households. Since those who pay for room and board are eligible for food stamps, some household members have "split off" to pay other members their room and board in order to file for food stamps separately. My bill would exclude all boarders from participation and would require related members of a single household to apply as one household, except that elderly parents could apply separately.

Individualized allotments, as proposed in my legislation, would allow the Secretary to tailor the USDA thrifty food plan to more accurately meet the nutritional needs of a specific household or a specific individual. Depending on age and sex, some people will need more and some less than the standard thrifty food plan in current law and, by individualizing allotments, true dietary need would be taken into account. The thrifty food plan currently assumes a four-person household with two middle-aged parents and two elementary school-aged children. This is then adjusted merely to reflect differing household sizes, not ages or sex of family members.

I am proud that my legislation will lead to the establishment of a workfare program in each State, so that able-bodied recipients must be available for community service work as a condition for participation. Simple equity demands that beneficiaries of Federal assistance perform useful tasks in exchange for those benefits. This proposal is modeled after the successful reforms in work experience programs implemented by President Ronald Reagan in the welfare program during his term as Governor of California.

My legislation will also prohibit a household from becoming eligible for food stamps or increases in food stamp benefits as a result of a member of that household going on strike. Working American taxpayers should not be required to subsidize other Americans who have consciously and voluntarily chosen not to work.

As another means of targeting assistance to the most truly in need, participation of nonworking recipients—except the elderly, blind, and disabled—would be limited to those with gross incomes of 100 percent of the poverty level or less. Households with some earned income would be permitted to earn 115 percent of the poverty level and still be eligible for participation.

In order to eliminate overlap, the duplications between the free school lunch and food stamp programs would be eliminated. During fiscal year 1982, the average monthly food stamp allotment change per student during the school year would be $11.50, and the average monthly free school lunch subsidy per student will be about $23.

My legislation will also require that a new recipient receive benefits for that part of the month for which assistance is needed. Under current law, a recipient certified at the end of the month still receives the full month's benefits, and prorating of the first month's benefits will more accurately apportion them to identified need.

This legislation also addresses the extensive fraud present in the program. I propose that we amend current law to make an individual found through a State administrative fraud hearing to be guilty of defrauding the program ineligible to receive further food stamp benefits for a full year following the hearing. Under current law, that disqualification period is just 3 months. Any individual found guilty of fraud by the courts, as opposed to a State administrative hearing, shall be ineligible for a minimum of 12 months. The maximum period of ineligibility in current law would be eliminated.

Under current law, in order to regain eligibility for food stamps once the disqualification period is over, an individual need do nothing more than pay back to the Federal Government the value of the food stamps he stole. He pays no interest, no penalty. That is not what I consider much of a disincentive to defraud the program. The legislation I am introducing today would require that anyone found defrauding food stamps pay back double the value of the food stamps he stole, either through cash payments or reductions in future benefits.

The legislation will also extend for the life of the farm bill the Secretary's authority to purchase and distribute surplus commodities for institutions, disaster relief, and needy families on Indian reservations and the U.S. Trust Territory of the Pacific Islands. Certain penalties for fraudulent misuse of these commodities are imposed.

Prior to our committee's consideration of the food stamp program, I will be proposing additional recommendations aimed at correcting a number of other abuses identified by our committee during food stamp hearings on March 16 and April 1.

These provisions taken as a whole, should serve to bring a well-intended program back into balance which can be supported by all Americans, without doing harm to the most truly needy.

AGRICULTURAL RESEARCH, EXTENSION, TEACHING, AND RESOURCE CONSERVATION

Some of the Nation's most cost-effective expenditures are made in the arena of agricultural research. Consistent with the current administration's philosophy, my legislation lends strong support to these truly worthwhile investments.

My proposal will reaffirm and strengthen the Federal-State partnership which is a bulwark of our efforts in research, extension, and teaching; while reducing unnecessary regulations.

Many highly respected economists advise us that we are entering an era of shortages, rather than the surpluses we have previously encountered. In past years, when such dire predictions have been made, farmers aided by technology from public and private research have abundantly responded to meet our needs. Today, however, the research base upon which we have relied for so long has been dangerously drawn down, as Federal support for agricultural research has lagged or been diverted to other pursuits. My legislation restores once more a priority on productivity.

I join with my distinguished colleague from Montana, Senator MELCHER, in endorsing further efforts in animal health science research. Other areas of emphasis include forestry, alternative fuel from renewable sources, nutrition education, higher education in agricultural sciences, and international agriculture. The terms of the Joint Council on Food and Agricultural Sciences and the National Agricultural Research and Extension Users Advisory Board are extended another 5 years, with the additional task of not only coordinating programs but making them more effective.

A number of schedule changes are made to conform to budgetary needs and an additional Assistant Secretary of Agriculture is authorized. Funds for support of agricultural research, extension and teaching would be authorized to be taken from permanent appropriations. Such an investment in our Nation's future productivity is long overdue.

My legislation also makes strides forward in the area of resource conservation. In order to target our limited Government assistance to the area where need is greatest, this bill authorizes a special areas conservation program. This program will target financial and technical assistance to areas having erosion and water management problems so severe that they are a major concern at the national level.

The Secretary of Agriculture will designate areas of crucial need. He will prepare a report, working with local people, that outlines the problems and the planned treatment strategies to remedy them.

The basis for providing financial and technical assistance to individual farmers and ranchers will be a long-term contract based on the farmer's conservation plan, as approved by the Secretary and the local soil and water conservation district. This is a well-proven method that assures the farmer of scheduled assistance and also assures the taxpayer that the conservation objectives will be achieved. The Secretary is directed to use existing delivery systems.

This legislation makes needed amendments in the small watershed program which provides flood protection and other valuable functions. On occasions when the Federal Government requires

that losses of fish and wildlife habitat resulting from small watershed projects should be mitigated, then the Federal Government should be permitted to pay a part of the cost of this mitigation.

As many rural citizens know, the conflicts and delays of water project policy during the past 4 years has been a disaster for rural America. My legislation will expedite the time-consuming and frustrating review process by raising the approval authority of the Secretary from $1 to $3 million.

Energy-generating components of small dams are expected to become increasingly important to the development of rural America in the years ahead. The bill will allow such a component to be considered in the cost-benefit ratio of a project, whether for resource conservation and development or a small watershed project.

Finally, my bill recognizes and makes possible voluntary work on applying conservation measures. There are a number of contributions which can be made as a result of private initiative, but again Federal regulations may interfere. My legislation will authorize the use of volunteers for conservation work without regard to civil service requirements. Voluntary service, of course, will be unpaid, but transportation, lodging and subsistence could be provided by the Secretary of Agriculture for those contributing to this worthy effort, and the volunteers would be covered for injuries on the job.

Mr. President, I recognize that this legislation is truly comprehensive and broad-ranging. Even this legislative package cannot fully capture the diversity and strength of American agriculture. However, it raises for public debate many issues which I believe are of signal importance. I am not necessarily wedded to its every detail, but I hope that Senators and the public will weigh and evaluate the provisions of this bill with these thoughts in mind.

This legislation is consistent with the free-market philosophy of myself and the Reagan administration, but it is even more than that. In a practical sense, I genuinely believe that this program offers the best hope for farmers to make real profits in the years to come.

At the current time, farmers receive the predominance of their income from the marketplace, while a small portion comes from the Government for certain commodities. Given the attitudes of the public and the restraints on public coffers, direct Government assistance can only be expected to stabilize, if not, in fact, to decline.

A much more promising alternative is to pursue higher prices in the international marketplace, the major source of increased farm revenues when those have historically occurred. The need for that increased profitability is critical, as family farmers face the ravages of inflated production costs, increased interest rates, and unmanageable debt loads. There is no time to lose.

At the outset of our hearings a month ago, I told our members that this task demanded our best efforts to determine priorities. The legislation I introduce today clearly places top priority on the marketplace as the means for enhancing the profitability of the American farmer.

I ask unanimous consent that this bill, along with a section-by-section analysis, be printed in the RECORD at this point.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Agriculture and Food Act of 1981.

TITLE I—DAIRY

DAIRY BASE PLANS

SEC. 101. Effective on January 1, 1982, section 8c(5)(B) of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, 7 U.S.C. 608c(5)(B), is further amended by striking all that follows the comma at the end of the clause (c) and inserting in lieu thereof the following: "(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among producers on the basis of their marketings of milk during a representative period of time, which need not be limited to one year, and (e) a provision providing for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order.".

LEGAL STATUS OF PRODUCER HANDLERS

SEC. 102. The legal status of producer handlers of milk under the provisions of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, shall be the same subsequent to the adoption of the amendment made by the Agriculture and Food Act of 1981 as it was prior thereto.

MILK PRICE SUPPORT

SEC. 103. Section 201(d) of the Agricultural Act of 1949, as amended, is amended to read as follows:

"(d) Effective for the period beginning on the effective date of the Agriculture and Food Act of 1981 and ending September 30, 1985, the Secretary is authorized to adjust the support price of milk at the beginning of each semiannual period after the beginning of the marketing year to reflect any substantial change in the parity index during the immediately preceding semiannual period. Any adjustment under this subsection shall be announced by the Secretary not less than thirty days prior to the beginning of the period to which it is applicable.".

TRANSFER OF DAIRY PRODUCTS TO VETERANS HOSPITALS AND THE MILITARY

SEC. 104. Section 202 of the Agricultural Act of 1949, as amended, is amended by striking out "1981" in subsections (a) and (b) and inserting in lieu thereof "1985".

DAIRY INDEMNITY PROGRAM

SEC. 105. Section 3 of the Act of August 13, 1968 (82 Stat. 750, as amended; 7 U.S.C. 450 1) is amended by striking out "1981" and inserting in lieu thereof "1985".

TITLE II—WOOL AND MOHAIR

EXTENSION OF PRICE SUPPORT PROGRAM

SEC. 201. Section 703 of the National Wool Act of 1954, as amended, is amended by—

(1) striking out "1981" in subsection (a) and inserting in lieu thereof "1985"; and

(2) striking out "1981" in subsection (b) and inserting in lieu thereof "1985".

TITLE III—WHEAT

LOAN RATES AND LAND DIVERSION PAYMENTS FOR THE 1982 THROUGH 1985 CROPS

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, title I of the Agricultural Act of 1949, as amended, is amended by adding after section 107A a new section 107B as follows:

"SEC. 107B. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases on the 1982 through 1985 crops of wheat at such level, not less than the higher of $3.20 per bushel or 85 per centum of the average market price of wheat in the United States, as determined by the Secretary, during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the supply of wheat, demand therefor (both domestic and world), estimated carryover, and the cost of producing wheat.

"(b)(1) The Secretary may make land diversion payments to producers of wheat if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Such land diversion payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines

necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this Section through the Commodity Credit Corporation.

"(f) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provisions for sharing, on a fair and equitable basis, in payments made under this section.".

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

Sec. 302. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938, as amended, shall not be applicable to the 1982 through 1985 crops of wheat.

NONAPPLICABILITY OF PROCESSOR AND EXPORTER CERTIFICATE REQUIREMENTS

Sec. 303. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period July 1, 1973, through May 31, 1986.

FINALITY OF DETERMINATIONS

Sec. 304. Section 405 of the Food and Agriculture Act of 1977 is amended by striking out "1981" and inserting in lieu thereof "1985."

SUSPENSION OF QUOTA PROVISIONS

Sec. 305. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

Sec. 306. Section 407 of the Food and Agriculture Act of 1977 is amended by striking out "1981" and inserting in lieu thereof "1985".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

Sec. 307. Section 408 of the Food and Agriculture Act of 1977 is amended by striking out "1981" and inserting in lieu thereof "1985".

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

Sec. 308. Section 107 of the Agricultural Act of 1949, as amended, shall not be applicable to the 1982 through 1985 crops of wheat.

TITLE IV—FEED GRAINS

LOAN RATES AND LAND DIVERSION PAYMENTS FOR THE 1982 THROUGH 1985 CROPS

Sec. 401. Effective only for the 1982 through 1985 crops of feed grains, title I of the Agricultural Act of 1949, as amended, is amended by adding after section 105A a new section 105B as follows:

"Sec. 105B. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchases on the 1982 crop of corn at such level, not less than $2.40 per bushel, as is equal to 75 per centum of the average market price of corn in the United States, as determined by the Secretary, during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The Secretary shall make available to producers loans and purchases on the 1983 through 1985 crops of corn at such level, which shall be not less than 65 per centum nor more than 85 per centum of the average market price of corn in the United States, as determined by the Secretary in the manner described in the first sentence of this paragraph, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains in the United States after taking into consideration the supply of feed grains, demand therefor (both domestic and world), estimated carryover, and the cost of producing corn, except that such level of loans and purchases shall not be less than $2.40 per bushel.

"(2) The Secretary shall make available to producers loans and purchases on each of the 1982 through 1985 crops of barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act: *Provided*, That in the case of oats, the level of loans and purchases shall be not less than 75 per centum of the level that loans and purchases are made available for corn, and in any year in which the production of oats is estimated by the Secretary to be less than the level of production for the 1980 crop year the level of loans and purchases shall be not less than 80 per centum of the level that loans and purchases are made available for corn, and on each of the 1982 through 1985 crops of grain sorghums at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value and average transportation costs to market of grain sorghums in relation to corn.

"(b)(1) The Secretary may make land diversion payments to producers of feed grains if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of feed grans to desirable goals. Such land diversion payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(f) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provisions for sharing, on a fair and equitable basis, in payments made under this section.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

Sec. 402. Section 105 of the Agricultural Act of 1949, as amended, shall not be applicable to the 1982 through 1985 crops of feed grains.

TITLE V—UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSION OF MARKETING QUOTAS AND RELATED PROVISIONS

Sec. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938, as amended, shall not be applicable to upland cotton of the 1982 through 1985 crops.

COTTON PRODUCTION INCENTIVES; LOAN RATES AND LAND DIVERSION PAYMENTS FOR THE 1982 THROUGH 1985 CROPS

Sec. 502. Effective only for the 1982 through 1985 crops of upland cotton, except as otherwise provided herein, section 103 of the Agricultural Act of 1949, as amended, is amended by adding at the end thereof a new subsection (g) as follows:

"(g)(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (i) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period, or (ii) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths quoted for Strict Middling one and three-thirty seconds inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average Northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot market for Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9): *Provided*, That in no event shall such loan level be less than 55 cents per pound. If for any crop the average Northern European price determined under clause (ii) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (i) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (i) of the first sentence of this paragraph. The loan level

for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection, shall, upon request of the producer during the tenth month of the loan period for the cotton, be made available for an additional term of eight months: *Provided*, That such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six month period. *Provided further*, That whenever the Secretary determines that the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of the law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available;

"(B) If a special quota has been established under this subsection during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (A) of this paragraph or the amount required to increase the supply to 130 per centum of the demand;

"(C) As used in clause (B) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four hundred and eighty-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established; and

"(D) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps an existing special quota period.

"(3) Any upland cotton imported into the United States while a special quota is in effect shall be regarded as having been imported under such quota and shall not be subject to import duties that would be applicable to such upland cotton in the absence of a special quota.

"(4) Notwithstanding any other provision of law, the foregoing provisions of this subsection with respect to extension of the loan period and to proclamation of the special quota shall become effective upon the effective date of the Agriculture and Food Act of 1981 even though the cotton may be of a crop prior to the 1982 crop.

"(5)(A) The Secretary may make land diversion payments to producers of upland cotton if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determmining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(6) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(7) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(8) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(9) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act, as amended (relating to assignment of payments), shall apply to payments under this subsection.

"(10) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provisions for sharing, on a fair and equitable basis, in payments made under this subsection."

"(11) The Secretary shall make available to producers recourse loans on seed cotton at such levels and under such terms and conditions as the Secretary determines necessary.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Section 603 of the Food and Agriculture Act of 1977 is amended by striking out "1982" and inserting in lieu thereof "1986".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. (a) Section 604(b) of the Food and Agriculture Act of 1977 is amended by striking out "1981" and inserting in lieu thereof "1985".

(b) Sections 103(a) and 203 of the Agricultural Act of 1949, as amended, shall not be applicable to the 1982 through 1985 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938, as amended, is amended by striking out "1981" in the last sentence and inserting in lieu thereof "1985".

PRELIMINARY ALLOTMENTS FOR 1986 CROP OF UPLAND COTTON

SEC. 506. Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938, as amended, shall again become effective as preliminary allotments for the 1986 crop.

TITLE VI—RICE

LOAN RATES AND LAND DIVERSION PAYMENTS FOR THE 1982 THROUGH 1985 CROPS

SEC. 601. Effective only for the 1982 through 1985 crops of rice, section 101 of the Agricultural Act of 1949, as amended, is amended by adding at the end thereof a new subsection (i) as follows:

"(i) Notwithstanding any other provision of law—

"(1) The Secretary shall make available to producers loans and purchases on the 1982 crop of rice at such level, not less than $8.01 per hundredweight, as is equal to 75 per centum of the average market price of rice in the United States, as determined by the Secretary, during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The Secretary shall make available to producers loans and purchases on the 1983 through 1985 crops of rice at such level, which shall be not less than 65 per centum nor more than 85 per centum of the average market price of rice in the United States, as determined by the Secretary in the manner described in the first sentence of this paragraph, as the Secretary determines will not substantially discourage the exportation of rice and will not result in excessive stocks of rice in the United States after taking into consideration the supply of rice, demand therefor (both domestic and world), estimated carryover, and the cost of producing rice, except that such level of loans and purchases shall not be less than $8.01 per hundredweight.

"(2) The Secretary may make land diversion payments to producers if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife

agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(4) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(5) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(6) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(7) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(8) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provisions for sharing, on a fair and equitable basis, in payments made under this subsection.".

SUSPENSION OF MARKETING QUOTAS AND OTHER PROVISIONS

SEC. 62. Sections 351, 352, 353, 354, 355, 356, and 377 of the Agricultural Adjustment Act of 1938, as amended, shall not be applicable to the 1982 through 1985 crops of rice.

CONFORMING AMENDMENT

SEC. 603. Section 705 of the Food and Agriculture Act of 1977 is amended by striking out "1981" and inserting in lieu thereof "1985".

TITLE VII—PEANUTS

ANNUAL MARKETING QUOTA AND STATE ACREAGE ALLOTMENT

SEC. 701. (a) Subsections (a) and (e) of section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358(a) and (e)) shall not be applicable to the 1982 through 1985 crops of peanuts.

(b) Effective for the 1982 through 1985 crops of peanuts, subsection (c)(1) of the section 358 of such Act (7 U.S.C. 1358(c)(1)) is amended by striking out the period at the end of the second sentence and inserting in lieu thereof a colon and the following: "*Provided further*, That the peanut acreage allotment for the State of New Mexico shall not be reduced below the 1977 acreage allotment as increased pursuant to subsection (c)(2) of this section.".

NATIONAL ACREAGE ALLOTMENT; NATIONAL POUNDAGE QUOTA; FARM POUNDAGE QUOTA; AND DEFINITIONS

SEC. 702. Effective only for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358) is further amended by adding at the end thereof the following new subsections:

"(k) Not later than December 1 of each year, the Secretary shall announce a national acreage allotment for peanuts for the next crop taking into consideration projected domestic use, exports, and a reasonable carryover, except that such allotment shall not be less than 1,614,000 acres.

"(l) Not later than December 1 of each year, the Secretary shall announce a minimum national poundage quota for peanuts for the next marketing year. The minimum national poundage quota for any crop shall be 1,440,000 tons increased by such additional quantity as the Secretary estimates will be necessary to meet the requirements for domestic edible and seed uses during the next marketing year.

"(m) For each farm for which a farm acreage allotment has been established, a farm yield for peanuts shall be determined. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977. In the event that peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(n) For each farm, a farm base production poundage shall be established equal to the quantity determined by multiplying the farm peanut acreage allotment by the farm yield determined in accordance with subsection (m) of this section.

"(o)(1) For each farm, a farm poundage quota shall be established by the Secretary for each marketing year equal to the farm base production poundage multiplied by a factor determined by the Secretary, such that the total of all farm poundage quotas will equal the national poundage quota for such marketing year. The poundage quota so determined, beginning with the 1982 crop for any farm, shall be increased by the number of pounds by which marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the farm poundage quota.

"(2) A quantity of peanuts equal to the quantity of peanuts undermarketed in any year may be produced and marketed in any subsequent year or years (undermarketing carry forward) and such quantity of peanuts shall be considered quota peanuts, except that in order to qualify for an undermarketing carry forward in any year a producer must have planted an acreage on the farm to peanuts in the preceding year equal to or greater than 50 per centum of the acreage allotment for the farm for peanuts for such preceding year.

"(3) In no case may the total marketings of a producer exceed actual production from the farm acreage allotment.

"(4) Notwithstanding the foregoing provisions of this subsection, if the total of all increases under paragraph (1) of this subsection in individual farm poundage quotas exceeds 10 per centum of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all increases does not exceed 10 per centum of the national poundage quota.

"(p) For the purposes of this part and title I of the Agricultural Act of 1949—

"(1) 'quota peanuts' means, for any marketing year, any peanuts which are eligible for domestic edible use as determined by the Secretary, which are marketed or considered marketed from a farm, and which do not exceed the farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year, any peanuts which are marketed from a farm and which are in excess of the marketings of quota peanuts from such farm for such year but not in excess of the actual production of the farm acreage allotment;

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, AND TRANSFER OF ACREAGE ALLOTMENT

SEC. 703. Effective for the 1982 through 1985 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358a) is amended—

(1) by striking out in subsection (a) ", if he determines that it will not impair the effective operation of the peanut marketing quota or price support program,";

(2) by striking out "may" each place it appears in subsection (a) and inserting in lieu thereof "shall"; and

(3) by adding at the end thereof the following new subsections:

"(i) Notwithstanding any other provision of this section, transfers shall be on the basis of the farm base production poundage, and the acreage allotment for the receiving farm shall be increased by an amount determined by dividing the number of pounds transferred by the farm yield for the receiving farm, and the acreage allotment for the transferring farm shall be reduced by an amount determined by dividing the number of pounds transferred by the farm yield for the transferring farm.

"(j) Notwithstanding the provisions of subsection (b)(1) of this section, farm acreage allotments and marketing quotas for peanuts may be transferred from one county to another in the same State in the case of any State in which the total farm peanut acreage allotment is 11,000 acres or less.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective only for the 1982 through 1985 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359) is amended—

(1) by inserting "(1)" after the subsection designation "(a)";

(2) by striking out in the first sentence of subsection (a)(1) of such section, as designated by clause (1) of this section, "75 per centum of the support price for" and inserting in lieu thereof "120 per centum of the support price for quota";

(3) by inserting after the first sentence of subsection (a)(1) of such section, as designated by clause (1) of this section, the following new sentence: "The marketing of any additional peanuts from a farm shall be subject to the same penalty unless the peanuts, in accordance with regulations established by the Secretary, are placed under loan at the additional loan rate under the loan program made available under section 108(b) of the Agricultural Act of 1949 and not redeemed by the producers or are marketed under contracts between handlers and producers pursuant to the provisions of subsection (l) of this section.";

(4) by striking out "normal yield" in subsection (a)(1) of such section, as designated by clause (1) of this section, and inserting in lieu thereof "farm yield";

(5) by adding at the end of subsection (a)(1) of such section as designated by clause (1) of this section the following new paragraph:

"(2) The Secretary shall authorize, under

such regulations as he shall prescribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations which were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight which do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered marketing violations except in cases of fraud or conspiracy."; and

(6) by adding at the end of such section the following new subsections:

"(f) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under section 359(c), are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(g) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts which the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(h) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108(c) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(i) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to April 15 of the year in which the crop is produced, except that if any handler contracts with a producer for additional peanuts at a price equal to or more than 105 per centum of the loan level of quota peanuts such peanuts may be utilized as quota peanuts if (1) such contract is approved before April 15 of the year in which the crop is produced, and (2) all of the producer's quota peanuts have been contracted for before or at the same time that the producer's additional peanuts are contracted for.

"(j) Subject to the provisions of section 407 of the Agricultural Act of 1949, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus (1) 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer, (2) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer but not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year. For the period from the date additional peanuts are delivered for loan to April 30 of the calendar year following the year in which such additional peanuts were harvested, the area marketing associations designated pursuant to section 108(c) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence in order to facilitate the orderly marketing of additional peanuts.".

REPORTS AND RECORDS

SEC. 705. Section 805 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRESERVATION OF UNUSED ALLOTMENTS

SEC. 706. Section 806 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRICE SUPPORT PROGRAM

SEC. 707. Effective for the 1982 through 1985 crops of peanuts, title I of the Agricultural Act of 1949 is amended by adding after section 107 a new section 108 as follows:

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1982 through 1985 crops of peanuts at such levels as the Secretary finds appropriate, taking into consideration the eight factors specified in section 401(b) of this Act, and any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the marketing year from which the level of support is being determined, except that the level of price support for the 1982 through 1985 crops shall not be less than $650 per ton. The levels of price support so announced may not be reduced by any deductions for inspection, handling, or storage, but the Secretary may make adjustments for location of peanuts and other adjustments authorized by section 403 of this Act.

"(2) The Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts for each of the 1982 through 1985 crops of peanuts. In determining the support level for additional peanuts, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets, but in no case may the level of price support for additional peanuts be set at a level which the Secretary estimates would result in the Commodity Credit Corporation incurring a loss on the price support program for additional peanuts for the marketing year concerned. The Secretary shall announce the level of price support for additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of price support, so announced, is to be in effect.

"(3)(A) In carrying out paragraphs (1) and (2) of this subsection, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative which is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section and in section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938, as amended. Loans made under this subparagraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938, as amended.

"(B) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type for quota peanuts handled under loans and for additional peanuts produced without a contract between handler and producer described in section 359(i) of the Agricultural Adjustment Act of 1938. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each grower. Net gains for peanuts in each pool shall consist of (i) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts, and (ii) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (i) of this subparagraph. Notwithstanding any other provision of this subsection, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower.".

TITLE VIII—SOYBEANS

PRICE SUPPORT FOR THE 1982 THROUGH 1985 CROPS

SEC. 801. Effective only with respect to the 1982 through 1985 crops of soybeans, title I of the Agricultural Act of 1949, as amended, is amended by adding at the end thereof a new section 114 as follows:

"SEC. 114. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases on the 1982 crops of soybeans at such level, not less than $5.02 per bushel, as is equal to 75 per centum of the average market price of soybeans in the United States, as determined by the Secretary, during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and pur-

chases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The Secretary shall make available to producers loans and purchases on the 1983 through 1985 crops of soybeans at such level, which shall be not less than 65 per centum nor more than 85 per centum of the average market price of soybeans in the United States, as determined by the Secretary in the manner described in the first sentence of this subsection, as the Secretary determines appropriate in relation to competing commodities after taking into consideration the supply of soybeans, demand therefor (both domestic and world), estimated carryover, and the cost of producing soybeans, except that such level of loans and purchases shall not be less than $5.02 per bushel.

"(b) Notwithstanding any other provision of law establishing a producer storage reserve program, soybeans shall not be considered an eligible commodity for such a program, and the Secretary shall not authorize payments to producers to cover the cost of storing soybeans.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans and purchases the Secretary may, nevertheless, make such loans and purchases in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.".

CONFORMING AMENDMENT

SEC. 802. Section 408(c) of the Agricultural Act of 1949, as amended, is amended by inserting "soybeans," immediately before the word "tobacco".

TITLE IX—GRAIN RESERVES; STORAGE FACILITY LOANS

PRODUCER STORAGE RESERVE PROGRAM FOR WHEAT AND FEED GRAINS

SEC. 901. Subsections (a) through (e) of section 110 of the Agricultural Act of 1949, as amended, are amended to read as follows:

"(a) The Secretary shall make available a program under which producers may store wheat and feed grains so as to promote orderly marketing for an extended period of time. The Secretary shall establish adequate safeguards to assure that commodities held under the program shall not be used in any manner to unduly depress, manipulate, or curtail the free market. The authority provided by this section shall be in addition to other authorities available to the Secretary for carrying out producer loan and storage operations.

"(b) In carrying out the producer storage program, the Secretary may provide original, extended, or supplemental price support loans for wheat and feed grains at such level of support and under such terms and conditions as the Secretary determines are necessary to encourage producers to store wheat and feed grains for extended periods of time in order to promote orderly marketing of the commodities involved. Among such other terms and conditions as the Secretary may prescribe by regulation, the program shall provide for (1) repayment of such loans in not less than three years; (2) payment to producers of such amounts as the Secretary determines appropriate to cover the cost of storing wheat and feed grains held under the program, such payments to continue until the maturity date of the loan or until the market price for the commodity involved equals or exceeds 115 per centum of the price specified in clause (5) of this subsection, whichever occurs first; (3) a rate of interest determined by the Secretary based upon the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except the Secretary may waive or adjust such interest in such manner and at such times as the Secretary deems necessary to promote the orderly marketing of wheat and feed grains; (4) recovery of amounts paid for storage, and for the payment of additional interest or other penalties, fees, or charges in the event such loans are repaid by producers before the maturity date of the loan and before the market price for wheat or feed grains has reached the price levels determined under clause (5) of this subsection; and (5) conditions designed to induce producers to redeem and market the wheat or feed grains securing such loans without regard to the maturity dates thereof whenever the Secretary determines that the market price for the commodity involved has attained a level which, as determined by the Secretary, equals or exceeds the average adjusted cost of production for the commodity involved for the three crop years immediately preceding the crop year for which the determination is made. The adjusted cost of production for the commodity involved for each of such years shall be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and shall include (i) variable costs, (ii) machinery ownership costs, (iii) general farm overhead costs, (iv) return for management comparable to the normal management fees charged by other comparable industries, and (v) land value, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(c) The Secretary shall not require producers to repay loans made under the producer storage program prior to the maturity date of such loans for reasons of increases in market prices above the levels determined under clause (5) of the second sentence of subsection (b) of this section, except that the Secretary may require producers to repay loans made under this section prior to the maturity date thereof if the Secretary determines that emergency conditions exist which require that such commodity be made available in the market to meet urgent domestic or international needs and the Secretary reports such determination and the reasons therefor to the President, the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives at least 14 days before taking such action.

"(d) The Secretary shall announce the terms and conditions of the producer storage program as far in advance of making loans as practicable. In such announcement, the Secretary shall specify the quantity of wheat or feed grains to be stored under the program which the Secretary determines appropriate to promote the orderly marketing of such commodities.

"(e) Notwithstanding any other provision of law, except as otherwise provided under section 302 of the Food Security Wheat Reserve Act of 1980 and section 208 of the Agricultural Trade Suspension Adjustment Act of 1980, whenever the producer storage program authorized by this section is in effect, the Commodity Credit Corporation may not sell any of its stocks of wheat or feed grains at less than 130 per centum of the price determined under clause (5) of the second sentence of subsection (b) of this section: *Provided*, That such restriction shall not apply to—

"(1) sales of such commodities which have substantially deteriorated in quality or as to which there is a danger of loss or waste through deterioration or spoilage;

"(2) sales or other disposals of such commodities under (A) the fifth and sixth sentences of section 407 of this Act; (B) the Act of September 21, 1959 (73 Stat. 574, as amended; 7 U.S.C. 1427 note), and (C) section 813 of the Agricultural Act of 1970; and

"(3) sales of corn for use in the production of alcohol for motor fuel at facilities that—

"(A) begin operation after January 4, 1980, and

"(B) whenever supplies of corn are not readily available, can produce alcohol from agricultural or forestry biomass feedstocks other than corn,

when sold at not less than the price at which producers may repay producer storage loans and redeem corn prior to the maturity dates of loans, as determined under clause (5) of the second sentence of subsection (b) of this section, or, whenever the fuel conversion price (as defined in section 212 of the Agricultural Trade Suspension Adjustment Act of 1980) for corn exceeds such price, at not less than the fuel conversion price.".

CONFORMING AMENDMENT

SEC. 902. Section 208(c)(2)(B) of the Agricultural Trade Suspension Adjustment Act of 1980 is amended by striking clause (i) and inserting in lieu thereof the following:

"(i) if there is a producer storage program in effect for the commodity, at not less than 130 per centum of the price determined under clause (5) of the second sentence of section 120(b) of the Agricultural Act of 1949, or".

FARM STORAGE FACILITY LOANS

SEC. 903. Section 4(h) of the Commodity Credit Corporation Charter Act (62 Stat. 1070, as amended; 15 U.S.C. 714b(h)) is amended by striking out "1981" and inserting in lieu thereof "1985".

TITLE X—MISCELLANEOUS

SPECIAL GRAZING AND HAY PROGRAM

SEC. 1001. Section 109 of the Agricultural Act of 1949, as amended, is amended by—

(1) amending subsection (a) by striking out "1981" and inserting in lieu thereof "1985";

(2) amending subsection (d) by striking out "acreage set-aside" and inserting in lieu thereof "land diversion"; and

(3) adding a new subsection (g) at the end thereof to read as follows:

"(3) For purposes of subsection (c) of this section the farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no program payment yield for wheat was established for the farm in the previous crop year, the Secretary is authorized to determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.".

ENFORCEMENT UNDER THE WHEAT AND WHEAT FOODS RESEARCH AND NUTRITION EDUCATION ACT

SEC. 1002. Section 1711 of the Wheat and Wheat Foods Research and Nutrition Education Act is amended to read as follows:

"SEC. 1711. (a) The several district courts of the United States are vested with jurisdic-

tion specifically to enforce, and to prevent and restrain any person from violating, any order or regulation made or issued pursuant to this title. Any civil action authorized to be brought under this title shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this title shall be construed as requiring the Secretary to refer to the Attorney General violations of this title whenever the Secretary believes that the administration and enforcement of the program would be adequately served by administrative action pursuant to subsection (b) of this section or suitable written notice or warning to any person committing such violation.

"(b)(1) Any person who violates any provisions of any order or regulation issued by the Secretary pursuant to this title, or who fails or refuses to pay, collect, or remit any assessment or fee duly required of him thereunder, may be assessed a civil penalty by the Secretary of not less than $500 or more than $5,000 for each such violation. Each violation shall be a separate offense. In addition to or in lieu of such civil penalty the Secretary may issue an order requiring such person to cease and desist from continuing such violation or violations. No penalty shall be assessed or cease and desist order issued unless such person is given notice and opportunity for a hearing before the Secretary with respect to such violation, and the order of the Secretary assessing a penalty or imposing a cease and desist order shall be final and conclusive unless the affected person files an appeal from the Secretary's order with the appropriate United States court of appeals.

"(2) Any person against whom a violation is found and a civil penalty assessed or cease and desist order issued under paragraph (b)(1) of this section may obtain review in the court of appeals of the United States for the circuit in which such person resides or has his place of business or in the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within thirty days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence.

"(3) Any person who fails to obey a cease and desist order after it has become final and unappealable, or after the appropriate court of appeals has entered final judgment in favor of the Secretary, shall be subject to a civil penalty assessed by the Secretary, after opportunity for a hearing and for judicial review pursuant to the procedures specified in paragraphs (b)(1) and (2) of this section, of not more than $500 for each offense, and each day during which such failure continues shall be deemed a separate offense.

"(4) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court of appeals has entered final judgment in favor of the Secretary, the Secretary shall refer the matter to the Attorney General who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.".

DEPARTMENT OF AGRICULTURE ADVISORY COMMITTEES

SEC. 1003. Title XVIII of the Food and Agriculture Act of 1977 is repealed.

FARM INCOME PROTECTION INSURANCE PROGRAM STUDY

SEC. 1004. (a) It is the sense of Congress that the concept of farm income protection insurance should be studied in order to determine whether such a concept might provide the basis for an acceptable alternative to the commodity price support, income maintenance, and disaster assistance programs currently administered by the United States Department of Agriculture for the benefit of American farmers. Toward this objective, the Secretary of Agriculture shall appoint a special task force to study and report upon such concept.

(b) The special task force appointed by the Secretary shall be composed of the following: a total of three representatives of agricultural commodity organizations and general farm organizations, three representatives of the private insurance industry (including stock companies, mutual companies, agents, or brokers), two full-time farmers, one official of the Federal Crop Insurance Corporation, one official of the Agricultural Stabilization and Conservation Service, two individuals from appropriate academic fields, and the designated representative of the Secretary of Agriculture. The designated representative of the Secretary shall serve as the chairman of the special task force.

(c) The study conducted by the special task force shall include, but not be limited to, an analysis of the following:

(1) the characteristics of a farm income protection insurance program;

(2) the feasibility of such a program as a substitute for the commodity price support, income maintenance, and disaster assistance programs administered by the Department of Agriculture for the American farmer;

(3) the appropriate roles of the private insurance industry and the Federal Government in the development, implementation, and administration of such a program;

(4) alternate mechanisms for administering such a program;

(5) the acceptability of such a program to farmers; and

(6) the costs associated with the development and implementation of such a program.

(d) Not later than eighteen months following enactment of this Act, the special task shall transmit to the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and the Committee on Agriculture of the United States House of Representatives copies of the report on farm income protection insurance and any legislative changes that the special task force recommends for purposes of establishing a farm income protection insurance program. Minority views, if submitted in a timely manner, shall be included in the report prepared and transmitted by the special task force.

(e) The Secretary of Agriculture shall provide such staff personnel, clerical assistance, services, materials, and office space as may be required to assist the special task force in carrying out its duties.

(f) In conducting its study and preparing its report and recommendations, the special task force may obtain the assistance of Department of Agriculture employees, and, to the maximum extent practicable, the assistance of employees of other Federal departments or agencies who may have relevant expertise in the areas of insurance, income maintenance, disaster assistance, agriculture, program management, and program evaluation.

(g) Members of the special task force shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in the performance of services under this section, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5 of the United States Code.

(h) The special task force shall be dissolved forty-five days after submission of the report required in subsection (d) of this section.

STATE AGENCY AUTHORITY FOR GRAIN INSPECTIONS AT EXPORT LOCATIONS

SEC. 1005. The first sentence of section 7(e)(2) of the United States Grain Standards Act (7 U.S.C. 79(e)(2)) is amended by inserting "(A)" before "which was performing", and by inserting after "1976," the following: "or (B) which performed official inspection at an export port location at any time prior to such date and was designated under subsection (f) of this section on the date of the enactment of this clause to perform official inspections at locations other than export port locations,".

TITLE XI—AGRICULTURAL EXPORTS

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

SEC. 1101. The Commodity Credit Corporation Charter Act (15 U.S.C. 714–714p) is amended by adding at the end thereof the following new section:

"SEC. 20. Agricultural Export Credit Revolving Fund.—

"(a) There is hereby established in the Treasury a revolving fund to be known as the Agricultural Export Credit Revolving Fund, which shall be available without fiscal year limitation, for (1) use in carrying out the provisions of section 5(f) of this Act, and (2) making loans for the construction or acquisition of facilities in foreign countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing agricultural commodities produced in and exported from the United States.

"(b) All sums received by the Corporation from the liquidation of loans made to carry out the purposes described in subsection (a) of this section shall be added to and become a part of such fund together with funds appropriated to such fund.

"(c) There are authorized to be appropriated to the Agricultural Export Credit Revolving Fund $300,000,000 for the fiscal year ending September 30, 1982, $500,000,000 for the fiscal year ending September 30, 1983, and $700,000,000 for the fiscal year ending September 30, 1984.

"(d) The Secretary shall submit an annual report to the Congress not later than December 1 of each year with respect to the export credit sales program carried out by the Corporation in the last fiscal year. Such report shall include the names of the countries extended credit under such program, the total amount of such credit in the case of each such country in such fiscal year, and a discussion and devaluation of the market development activities of the Corporation under this Act during such fiscal year. The first such report shall be submitted to the Congress not later than December 1, 1982.

"(e) The revolving fund created by this section is abolished effective October 1, 1985, and all unobligated money in such fund on September 30, 1985, shall be transferred to and become part of the miscellaneous receipts account of the Treasury.".

CONGRESSIONAL VETO OF BILATERAL COMMODITY SUPPLY AGREEMENTS

SEC. 1102. If the Government of the United States concludes a bilateral international agreement, other than a treaty, involving a commitment on the part of the United States to assure access by a foreign country or instrumentality thereof to United States agricultural commodities or products thereof on a commercial basis, the President shall immediately report such agreement to the Congress, setting forth in detail the terms of and reasons for negotiating such agreement. Such agreement shall not become effective if, within 30 calendar days of continuous session of Congress after the date of

receipt by the Congress of such report, both Houses of Congress adopt a concurrent resolution disapproving such agreement. In the computation of such 30-day period, there shall be excluded the days on which either House is not in session because of adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.

SPECIAL STANDBY EXPORT SUBSIDY PROGRAM

SEC. 1103. (a) In order to discourage foreign countries or instrumentalities thereof from using subsidies to promote the exportation of agricultural commodities, the Secretary of Agriculture is authorized and directed to formulate a special standby export subsidy program for agricultural commodities or products thereof produced in the United States. Such program shall be designed to neutralize the effects of export subsidy programs instituted by foreign countries or instrumentalities thereof to encourage exports of their agricultural commodities to foreign markets other than the United States.

(b) The Secretary shall implement the special standby export subsidy program formulated under subsection (a) of this section only after the President—

(A) makes a determination under section 301 of the Trade Act of 1974 (19 U.S.C. 2411), as amended, that action by the United States is appropriate to obtain the elimination of an act, policy, or practice of a foreign country or instrumentality that results in—

(i) substantial displacement of United States exports of agricultural commodities to foreign markets, or

(ii) prices for agricultural commodities in foreign markets materially below prices which suppliers of the same agricultural commodities produced in the United States must charge in order to supply such commodities to the same market;

(B) makes a determination that such act, policy, or practice of the foreign country or instrumentality concerned involves the use of export subsidies to encourage exports of such country's or instrumentality's agricultural commodities to foreign markets other than the United States;

(C) fails to reach a mutually acceptable resolution through consultations with the foreign country or instrumentality concerned; and

(D) is authorized under the dispute settlement procedures specified in the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade to undertake an export subsidy program to counter the export subsidies on agricultural commodities employed by the foreign country or instrumentality concerned: *Provided*, That the United States is obligated by international agreement to receive such authorization before undertaking measures to counter such export subsidies.

(c) In carrying out the special standby export subsidy program pursuant to subsections (a) and (b) of this section, the Secretary of Agriculture is authorized to use the funds and facilities of the Commodity Credit Corporation.

AGRICULTURAL EMBARGO RELIEF

SEC. 1104. Section 208 of the Agricultural Trade Suspension Adjustment Act of 1980 is amended by—

(1) amending subsection (a) to read as follows:

"(a) If the President or other member of the executive branch of Government causes the export of any agricultural commodity to any country or area of the world to be suspended or restricted for reasons of national security or foreign policy under the Export Administration Act of 1979 or any other provision of law, and if such suspension or restriction of the export of an agricultural commodity is imposed other than in connection with a suspension of or restriction on all exports from the United States to such country or area of the world, and if the Secretary of Agriculture determines that such suspension or restriction will result in a surplus supply of such commodity that will adversely affect prices producers receive for the commodity, the Secretary shall act to mitigate the adverse effect on prices by either—

"(A) establishing a gasohol feedstock reserve of the commodity, as provided in subsection (c) of this section, if the commodity is suitable for stockpiling in such a reserve;

"(B) establishing a food security reserve of the commodity, as provided in subsection (d) of this section, if the commodity is suitable for stockpiling in such a reserve;

"(C) making payments available to producers of the commodity, as provided in subsection (e) of this section; or

"(D) undertaking any combination of the measures described in clauses (A), (B), and (C) of this subsection.".

(2) inserting "(1)" after the subsection designation "(b)" and adding at the end of such subsection a new paragraph as follows:

"(2) Within thirty days after the export of any agricultural commodity to a country or area is suspended or restricted as described in subsection (a) of this section, the Secretary of Agriculture shall announce whether payments provided for in this section will be made on such commodity, and, if such payments are to be made, the Secretary shall also announce the average market price per unit received by producers for the commodity during the thirty-day period ending on the date of imposition of the export suspension or restriction."; and

(3) redesignating subsections (e), (f), (g), and (h) as (f), (g), (h), and (i), respectively, and inserting after subsection (d) a new subsection (e) as follows:

"(e)(1) The amount of the payment to which an eligible producer under this section shall be entitled to receive shall be the product of (A) the amount by which the average market price per unit of the commodity received by producers during the twelve-month period immediately following the date of imposition of the export suspension or restriction is less than the average market price per unit of the commodity received by producers during the thirty-day period immediately preceding the date of the imposition of the export suspension or restriction, and (B) the number of units of the commodity sold by the producer during the twelve month period immediately following the date of imposition of the export suspension or restriction: *Provided*, That, if the export suspension or restriction is in existence for a period of less than twelve months, the average market price per unit of the commodity received by producers after the imposition of the export suspension or restriction shall be the average market price per unit of the commodity received by the producer during the duration of the export suspension or restriction, and the quantity of the commodity eligible for the payments provided for in this section shall be that quantity sold by the producer during the duration of the export suspension or restriction. Any payments due producers under this section shall be paid within fifteen months of the date of imposition of the export suspension or restriction.

"(2) The Secretary of Agriculture is authorized to issue such regulations as are deemed necessary to carry out the provisions of this subsection, including regulations defining eligible producers and what constitutes a sale under this subsection.".

P.L. 480 EXTENSION

SEC. 1105. The Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by striking out "1981" in section 409 and inserting in lieu thereof "1985".

TITLE XII—FOOD STAMPS

PURCHASE REQUIREMENT

SEC. 1201. (a) Section 3(b) of the Food Stamp Act of 1977 (7 U.S.C. 2012(b)) is amended by inserting before the period at the end thereof "and any amount to be paid by such household for such allotment".

(b) Section 7(d) of the Food Stamp Act of 1977 (7 U.S.C. 2016(d)) is amended by striking out the third and fourth sentences.

(c)(1) Section 8 of the Food Stamp Act of 1977 (7 U.S.C. 2017) is amended by adding at the end thereof the following new subsections:

"(c) Notwithstanding any other provision of law, households, other than households containing a member who is sixty years of age or over or who receives supplemental security income benefits under title XVI of the Social Security Act or disability payments under title II of the Social Security Act, shall be charged for the allotments issued to them, and the amount of such charge shall represent a reasonable investment on the part of the household, but in no event more than 33 per centum of the household's income, except that—

"(1) allotments may be issued without charge to households with an income of less than $30 per month for a family of four under standards of eligibility prescribed by the Secretary; and

"(2) the Secretary shall provide a reasonable opportunity for any eligible household to elect to be issued an allotment less than the allotment authorized to be issued to such household under subsection (a) of this section.

The charge to be paid by any eligible household electing to exercise the option described in clause (2) of the preceding sentence shall be an amount which bears the same ratio to the amount which would have been payable under this subsection for an allotment issued to such household under subsection (a) as the allotment actually issued to such household bears to the allotment that would have been issued to such household under such subsection.

"(d)(1) Funds derived from the charges made for allotments shall be promptly deposited, in a manner prescribed in the regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. Such deposits shall be available, without limitation to fiscal years, for the redemption of coupons.

"(2)(A) The Secretary shall by regulation prescribe the manner in which funds derived from the distribution of coupons (charges made for allotments) shall be deposited by coupon issuers. Such regulations shall contain provisions requiring that coupon issuers promptly deposit such funds in the manner prescribed by the Secretary, except that such regulations shall, at a minimum, require that (i) such deposits be made at least weekly, and (ii) upon the accumulation of a balance on hand of $1,000 or more, such deposits be made within two banking days following the accumulation of such amount.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating the regulations issued under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(3)(A) Coupon issuers receiving funds derived from the distribution of coupons (charges made for allotments) shall be deemed to be receiving such funds as fiduciaries of the Federal Government, and such coupon issuers shall immediately set aside all such funds as funds of the Federal Government. Funds derived from the distribution of coupons (charges made for allotments) shall not be used, before the deposit of such funds in the manner prescribed by the Secretary, for the benefit of any person, partner-

ship, corporation, association, organization, or entity other than the Federal Government.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating subparagraph (A) of this paragraph shall be fined not more than $10,000 or a sum equal to the amount of funds involved in the violation, whichever is the greater, or imprisoned not more than ten years, or both, except if the amount of such funds is less than $1,000, then such issuer shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(4)(A) The Secretary shall by regulation require that upon the deposit, in the manner prescribed by the Secretary, of funds derived from the distribution of coupons (charges made for allotments), coupon issuers shall immediately send a written notice to the State agency, accompanied by an appropriate voucher, confirming such deposit. In addition to such other information deemed by the Secretary to be appropriate, such regulations shall require that such notice contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of such coupon issuer derived from the distribution of coupons (charges made for allotments) during the deposit period;

"(iii) the amount of the deposit;

"(iv) the name and address of the depository; and

"(v) an oath or affirmation signed by the coupon issuer or, in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in such notice is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide the notice required under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any notice required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(5)(A) The Secretary shall by regulation require each coupon issuer at intervals prescribed by the Secretary, but not less often than monthly, to send to the Secretary, or his designee, a written report of the issuer's operations during such period under the food stamp program. In addition to such other information deemed by the Secretary to be appropriate, the regulations shall require that the report contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of the coupon issuer derived from the distribution of coupons (charges made for allotments) during the report period;

"(iii) the total amount of deposits made by the issuer of funds derived from the distribution of coupons (charges made for allotments) during such period;

"(iv) the name and address of each depository receiving such funds from such issuer; and

"(v) an oath or affirmation, signed by the coupon issuer, or in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in the report is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide any report required under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any report required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(6) The Secretary may by regulation require State agencies to provide periodic reports to the Secretary, or his designee, containing a consolidation of the respective coupon issuer's notices to such State agencies at such intervals as the Secretary in his discretion deems appropriate.

"(7) The Secretary and the United States Postal Service shall jointly arrange for the prompt deposit of funds collected by the United States Postal Service on behalf of a State from charges made for coupon allotments.".

(2) The heading for section 8 of such Act (7 U.S.C. 2017) is amended to read as follows:

"VALUE OF COUPON ALLOTMENT AND CHARGES TO BE MADE"

(d) Section 15(a) of such Act (7 U.S.C. 2024(a)) is amended by inserting "purchase by and" before "issuance".

(e)(1) Section 18(a)(1) of such Act (7 U.S.C. 2027(a)(1)) is amended by inserting after the second sentence the following new sentence: "Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by such households for such allotments shall be transferred to and made a part of the separate account created under section 8(d)(1) of this Act.".

(2) Section 18(b) of such Act (7 U.S.C. 2027(b)) is amended—

(A) by striking out the first sentence and inserting in lieu thereof the following: "In any fiscal year the Secretary shall limit the value of coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for such fiscal year which is transferred in accordance with subsection (a) of this section to the separate account refererd to in such subsection."; and

(B) by adding at the end thereof the following new sentence: "If the Secretary determining that any of the funds in such separate account are no longer required to carry out the provisions of this Act, such portion of such funds shall be paid into the miscellaneous receipts of the Treasury.".

DEFINITION OF HOUSEHOLDS; BOARDERS; RELATEDNESS OF HOUSEHOLD MEMBERS

SEC. 1202. Section 3(1) of the Food Stamp Act of 1977 (7 U.S.C. 2012(1)) is amended—

(1) by striking out in clause (1) of the first sentence "or else pays compensation to the others for such meals,";

(2) by striking out in clause (2) of the first sentence "or else live with others and pay compensation to the others for such meals"; and

(3) by adding at the end thereof the following new sentence: "In any case in which one or more parents and one or more children of such parent or parents are living together, such living arrangement shall be considered one household for purposes of this Act unless one of the parents is 60 years of age or older.".

REPEAL OF DINE-OUT PROVISION

SEC. 1203. Clause (3) of section 3(g) of the Food Stamp Act of 1977 (7 U.S.C. 2012(g)(3)) is amended by striking out "private establishments" and all that follows down through "prices,".

INFLATION ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 1204. Section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended by striking out clauses (4), (5), and (6) in the second sentence and inserting in lieu thereof the following: "(4) adjust the cost of such diet every January 1 to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twelve months ending the preceding September 30, and".

INDIVIDUALIZED ALLOTMENTS

SEC. 1205. Section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)), as amended by section 1204, is further amended by striking out the period at the end of the second sentence and inserting in lieu thereof a comma and the following: "(5) make adjustments for household composition with respect to the age and sex of the members of the household.".

LOW INCOME ENERGY ASSISTANCE

SEC. 1206. Section 5(d) of the Food Stamp Act of 1977 (7 U.S.C. 2014(d)) is amended—

(1) by inserting "and" at the end of clause (9); and

(2) by striking out the comma after "program" in clause (10) and all that follows down through "assistance" at the end of clause (11).

WORKFARE PROGRAM

SEC. 1207. (a) Section 6(d)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(1) is amended—

(1) by striking out "or" at the end of clause (iii); and

(2) by striking out the period at the end and inserting in lieu thereof a semicolon and the following: "or (v) refuses without good cause to accept an offer of employment, under a workfare program established under section 11(e)(20), made by a State, a political subdivision of a State, a prime sponsor pursuant to the Comprehensive Employment and Training Act of 1973 (29 U.S.C. 812 et seq.), or any other public employer at a wage not less than the Federal minimum hourly rate under section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C.(a)(1)).".

(b) Section 11(e) of such Act (7 U.S.C. 2020(e)) is amended—

(1) by striking out "and" at the end of paragraph (18);

(2) by striking out the period at the end of paragraph (19) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(20) that the State agency shall establish and carry out a workfare program, in accordance with regulations issued by the Secretary pursuant to subsection (m) of this section, to provide employment to enable households to satisfy the requirements of section 6(d)(1)(v) of this Act.".

(c) Section 11 of the Food Stamp Act of 1977 (7 U.S.C. 2020) is further amended by adding at the end thereof the following new subsection:

"(m) Not later than sixty days after the effective date of this subsection, the Secretary shall issue regulations regarding the establishment and operation by State agencies of a workfare program which makes available public employment described in section 6(d)(1)(v), including regulations providing that such program—

"(1) may provide job counseling to insure that such members are matched with the most suitable employment available, taking into consideration the experience, training, and capabilities of such members;

"(2) may allow verified job search activities by each such member, not to exceed eight hours per week, as a credit for work performed;

"(3) may assist such members to obtain suitable employment outside such program;

"(4) shall not require any such member participating in any such workfare program for any week to work any hours during such week which when added to any other hours worked by such member for compensation in

cash or in kind in any other capacity during such week exceed forty hours; and

"(5) shall not be used by any employer to fill a job vacancy created by the action of such employer in laying off or terminating the employment of any regular employee not participating in any such workfare program in anticipation of filling the vacancy so created by hiring any employee participating in any such workfare program.".

(d) Section 16(a) of such Act (7 U.S.C. 2025(a)) is amended by striking out "and (5) fair hearings" and inserting in lieu thereof "(4) fair hearings, and (5) workfare programs established under section 11(e)(20) of this Act".

(e) Section 17(e) of such Act (7 U.S.C. 2026(c)) is amended—

(1) by striking out "and" before "the program's relative fairness"; and

(2) by striking out the period at the end and inserting in lieu thereof a comma and the following: "and the operation of a workfare program established under this Act, with particular emphasis upon the extent to which such workfare program reduces the need for food stamp benefits and helps to achieve the purposes of this Act.".

ADJUSTMENTS OF DEDUCTIONS

SEC. 1208. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended—

(1) by striking out the first and second sentences and inserting in lieu thereof the following: "In computing household income, the Secretary shall allow a standard deduction of $85 a month for each household, except that the monthly standard deduction for households in Alaska shall be $145, in Hawaii $120, in Guam $170, in Puerto Rico $50, and in the Virgin Islands of the United States $75."; and

(2) by striking out the colon before the proviso in clause (2) of the fourth sentence and all that follows down through the end of such clause and inserting in lieu thereof a comma and the following: "except that the amount of such excess shelter expense deduction may not exceed $115 a month in the forty-eight contiguous States and the District of Columbia, and may not exceed $200 in Alaska, $165 in Hawaii, $140 in Guam, $40 in Puerto Rico, and $85 in the Virgin Islands of the United States, or".

DISALLOWANCE OF DEDUCTIONS FOR EXPENSES PAID BY THIRD PARTY

SEC. 1209. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is further amended by adding at the end thereof the following new flush sentence: "A household shall not be entitled to a deduction for dependent care, excess shelter expense, or excess medical expense to the extent that such care or expense was paid for or on behalf of the household by a third party.".

PERIOD OF DISQUALIFICATION; REPAYMENT REQUIREMENT

SEC. 1210. Section 6(b) of the Food Stamp Act of 1977 (7 U.S.C. 2051(b)) is amended—

(1) in the first sentence—

(A) by striking out "three" in clause (1) and inserting in lieu thereof "twelve"; and

(B) by striking out "six and not more than twenty-four months, as determined by the court," in clause (2) and inserting in lieu thereof "twelve"; and

(2) by inserting "double" before "the value of" in clause (B) of the fourth sentence.

AGE CRITERIA FOR DEPENDENT CHILDREN

SEC. 1211. Paragraph (2)(B) of section 6(d) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(2)(B)) is amended by striking out "twelve" and inserting in lieu thereof "six".

ELIGIBILITY OF STRIKERS

SEC. 1212. (a) Section 6(d) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(4)) is amended—

(1) by striking out ", unless the household was certified for benefits under this Act immediately prior to such employment"; and

(2) in paragraph (4)—

(A) by striking out the colon at the end of the first proviso and inserting in lieu thereof a comma and the following: "but in no case may a household receive increased benefits under this Act as a result of a member of such household participating in a strike:"; and

(B) by striking out the colon at the end of the second proviso and all that follows down through the end of the sentence and inserting in lieu thereof a period.

(b) Section 6 of such Act (7 U.S.C. 2015) is further amended by striking out subsection (i).

ELIGIBILITY DISQUALIFICATION ON BASIS OF GROSS INCOME

SEC. 1213. (a) Section 6 of the Food Stamp Act of 1977 (7 U.S.C. 2015), as amended by section 1212(b), is further amended by adding at the end thereof the following new subsection:

"(i) No household, other than a household containing a member who is sixty years of age or over or who is receiving supplemental security income benefits under title XVI of the Social Security Act or disability payments under title II of such Act, shall be eligible to participate in the food stamp program for any month in which the reasonably anticipated monthly gross income of such household for the certification period involved exceeds the greater of—

"(1) one-twelfth of the nonfarm income poverty guidelines prescribed by the Office of Management and Budget for a household equal in size to the household requesting certification; and

"(2) in the case of a household with earned income, the sum of the amount described in paragraph (1) and an amount equal to 15 per centum of such amount (to compensate for taxes, mandatory deduction from salary, and work expenses).

For purposes of this subsection, the term 'gross income' means an amount equal to household income as determined pursuant to section 5(d) of this Act and without regard to deductions authorized in section 5(e) of this Act.".

(b) The amendment made by subsection (a) shall apply for the purpose of determining the eligibility of households to receive food stamp benefits in any period beginning after the effective date of this section for which such household applies to be certified to receive such benefits.

MODIFICATION OF PROVISIONS RELATING TO VALUE OF ALLOTMENT

SEC. 1214. Subsection (a) of section 8 of the Food Stamp Act of 1977 (7 U.S.C. 2017(a)) is amended to read as follows:

"(a)(1) The face value of the allotment which State agencies shall be authorized to issue to any household certified as eligible to participate in the food stamp program shall be an amount equal to the cost to such household of the thrifty food plan, reduced—

"(A) in the case of any household not charged for an allotment under this Act, by an amount equal to not more than 33 per centum of the household's income, as determined under section 5 of this Act, and

"(B) in the case of any household containing a member who attends a school which participates in the national school lunch program (carried out under the National School Lunch Act (42 U.S.C. 1751 et seq.)), by an amount determined under the provisions of paragraph (2) of this subsection.

The amount determined under this paragraph shall be rounded to the nearest whole dollar.

"(2) The value of the allotment of any household containing a member who attends a school which participates in the national school lunch program (carried out under the National School Lunch Act) shall be further reduced by an amount equal to an amount determined by multiplying—

"(A) the amount equal to the part of one-eighth of the monthly thrifty food plan for a family of eight persons, allocable per meal in a month, by

"(B) the national average of meals per month available under the national school lunch program during the preceding nine-month school year (as determined by the Secretary), by

"(C) the number of the members of the household eligible to receive meals under the national school lunch program, by

"(D) a national average school attendance factor prescribed by the Secretary.

In carrying out the provisions of this paragraph, the Secretary shall prescribe a national average school attendance factor based on the best available data. Any reduction in a household's allotment determined under this paragraph shall be applicable only to the nine months of each year which generally correspond to the school year of the State concerned, as determined by the State agency concerned.

"(3) Notwithstanding the provisions of paragraphs (1) and (2) of this subsection, the minimum allotment for households of one and two persons shall be $10 per month.".

PRORATING OF BENEFITS

SEC. 1215. Section 8 of the Food Stamp Act of 1977 (7 U.S.C. 2017), as amended by section 1201(c)(1), is further amended by adding at the end thereof the following new subsection:

"(e) The value of the allotment issued to any eligible household for the initial month or other period for which an allotment is issued to such household shall be a value which bears the same ratio to the value of the allotment for a full month or other period for which the allotment is issued as the number of days (from the date of the application) remaining in the month or other period for which the allotment is issued bears to the total number of days in the month or other period for which the allotment is issued. As used in this subsection, the term 'initial month' means (1) the first month for which an allotment is issued to a household, and (2) the first month for which an allotment is issued to a household following any period of more than thirty days during which such household was not participating in the food stamp program under this Act after a previous participation in such program.".

TERMINATION OF PROHIBITION FROM COUNTING VALUE OF COUPON ALLOTMENT AS INCOME FOR CERTAIN PURPOSES

SEC. 1216. Subsection (b) of section 8 of the Food Stamp Act of 1977 (7 U.S.C. 2017(b)) is amended to read as follows:

"(b) The value of the allotment provided any eligible household which is in excess of the amount charged such household for such allotment may not be considered income or resources for the purposes of any Federal, State, or local law relating to taxes.".

OUTREACH

SEC. 1217. (a) Paragraph (1) of section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(1)) is amended by striking out clauses (A), (B), and (C) and inserting in lieu thereof "not conduct food stamp outreach activities with funds provided under this Act;".

(b) Section 16(a) of such Act (7 U.S.C. 2025(a)), as amended by section 1207(d), is further amended—

(1) by striking out clause (1); and

(2) by redesignating clauses (2), (3), and (4) as clauses (1), (2), and (3), respectively.

RESTORATION OF WRONGFULLY DENIED BENEFITS

SEC. 1218. Section 11(e)(11) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(11)) is amended by striking out the semicolon at

the end and inserting in lieu thereof "based upon receipt of a request from a household for restoration of an allotment, except that any allotment or portion thereof for any period of time more than forty-five days before the date such request is received by the State agency shall not be restored;".

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1219. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended by striking out "and not in excess of $9,739,276,000 for the fiscal year ending September 30, 1981" and inserting in lieu thereof "not in excess of $10,439,276,000 for the fiscal year ending September 30, 1981; not in excess of $11,341,152,000 for the fiscal year ending September 30, 1982; not in excess of $11,738,154,000 for the fiscal year ending September 30, 1983; not in excess of $11,674,366,000 for the fiscal year ending September 30, 1984; and not in excess of $11,898,594,000 for the fiscal year ending September 30, 1985".

COMMODITY DISTRIBUTION PROGRAMS: EXTENSION OF AUTHORITIES, PENALTIES FOR FRAUD, AND MISCELLANEOUS PROVISIONS

SEC. 1220. (a) Section 4 of the Agriculture and Consumer Protection Act of 1973 is amended—

(1) by striking "1978, 1979, 1980, and 1981" in the first sentence of section 4(a) and inserting in lieu thereof "1982, 1983, 1984, and 1985"; and

(2) by adding at the end of section 4 the following new subsection:

"(c) Whoever embezzles, willfully misapplies, steals, or obtains by fraud any agricultural commodity or the product of any such commodity, or any funds, assets, or property derived from the donation of any such commodity, provided under this section, section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), or section 709 of the Food and Agricultural Act of 1965 (7 U.S.C. 1446a-1), whether received directly or indirectly from the United States Department of Agriculture, or whoever receives, conceals, or retains any such commodity, product, funds, assets, or property to his own use or gain, knowing such commodity, product, funds, assets, or property have been embezzled, willfully misapplied, stolen, or obtained by fraud shall, if such commodity, product, funds, assets, or property are of a value of $100 or more, be fined not more than $10,000 or imprisoned for not more than five years, or both, or if such commodity, product, funds, assets, or property are of a value of less than $100, shall be fined not more than $1,000 or imprisoned for not more than one year, or both.".

(b) Subsection (a) of section 5 of such Act is amended to read as follows:

"(a) In carrying out the supplemental feeding program (hereinafter referred to as the 'commodity supplemental food program') to which reference is made in section 4 of this Act, the Secretary of Agriculture shall pay to each State agency administering any such program, for each of the fiscal years 1982 through 1985, out of funds appropriated for such purpose from the general fund of the Treasury, an amount equal to the amount of the administrative costs incurred by State and local agencies in operating such program, except that the funds paid to any such agency in any fiscal year may not exceed an amount equal to 15 per centum of the amount appropriated for the provision of commodities to State agencies for such program.".

REPEAL OF INCREASES IN DEPENDENT CARE DEDUCTIONS FOR WORKING ADULTS AND MEDICAL DEDUCTIONS FOR THE ELDERLY AND DISABLED

SEC. 1221. Sections 104 and 105 of the Food Stamp Act Amendments of 1980 (94 Stat. 358) are repealed.

EFFECTIVE DATE

SEC. 1222. (a) Except as provided in subsection (b), the amendments made by this Act shall become effective on January 1, 1982.

(b) The amendments made by sections 1207(c), 1219, and 1221 shall become effective on the date of enactment of this Act.

TITLE XIII—REAUTHORIZATION OF THE AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

REAFFIRMATION OF FEDERAL-STATE PARTNERSHIP

SEC. 1301. Section 1403 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3102) is amended—

(1) in paragraph (2) by inserting "extension, and teaching," after "research," the first and second time that word appears;

(2) by striking paragraphs (3) through (7) and inserting in lieu thereof the following:

"(3) reaffirm the unique partnership between the Federal Government and the States, and emphasize that this partnership, through legislation and cooperative agreements, has been eminently successful;

"(4) reaffirm that the Federal-State relationship, through agricultural research, teaching, and extension, has provided the United States with the most productive and efficient food and agricultural system in the world; and

"(5) emphasize that the productivity and efficiency of this system may be increased by:

"(A) improving and strengthening the Federal-State partnership;

"(B) reducing unnecessary regulations; and

"(C) improving the cooperation among all who are involved in the food and agricultural sciences."

DEFINITIONS

SEC. 1302. Section 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103) is amended—

(1) in paragraph (2) by inserting ", and includes the continuum of basic, applied, and developmental research" before the semicolon;

(2) in paragraph (8) by striking out "social" and all that follows through the semicolon and inserting in lieu thereof the following:

"the physical science and the social science considerations of—

"(A) agricultural, aquacultural, and forestry production, processing, and marketing;

"(B) conservation and management of natural resources including soil, water, forests, rangeland, and wildlife and fisheries management;

"(C) home economics, human nutrition, and family life;

"(D) food safety and quality;

"(E) international food and agriculture;

"(F) rural community development;

"(G) agriculturally related issues including transportation, energy, the environment, and weather; and

"(H) youth development, including 4-H clubs;"; and

(3) by striking out paragraph (14) and inserting in lieu thereof the following new paragraphs:

"(14) the term 'cooperating forestry schools' means those institutions eligible to receive funds under the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;

"(15) the term 'teaching' means the formal classroom and laboratory instruction and training in the food and agricultural sciences conducted at colleges and universities and leading to baccalaureate and higher degrees; and

"(16) the term 'State cooperative institutions' or 'State cooperative agents' means institutions or agents designated by—

"(A) the Act of July 2, 1862 (12 Stat. 503; 7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act;

"(C) the Act of March 2, 1887 (24 Stat. 440; 7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(D) the Act of May 14, 1914 (38 Stat. 372; 7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act;

"(E) the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(F) subtitle E of this title.".

JOINT COUNCIL ON FOOD AND AGRICULTURE SCIENCES

SEC. 1303. (a) Section 1407(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(a)) is amended by striking out "five" and inserting in lieu thereof "ten".

(b) Section 1407(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(b)) is amended to read as follows:

"(b) The Joint Council shall be composed of not fewer than twenty-five representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and agricultural sciences, including land-grant colleges and universities; other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching; State agricultural experiment stations; State cooperative extension services; agencies within the Department of Agriculture which have significant research, extension, or teaching responsibilities; the Office of Science and Technology Policy; and other Federal agencies determined by the Secretary to be appropriate. Members shall be appointed for a term of three years by the Secretary from nominations made by the organizations and agencies described in the preceding sentence. The terms of members shall be staggered. At least one-half of the members of the Joint Council shall be appointed by the Secretary (insuring that regional differences are properly considered) from among distinguished persons engaged in agricultural research, extension, and teaching programs at land-grant colleges and universities and State agricultural experiment stations. To insure that other agricultural institutional views are considered by the Joint Council, two of the members of the Joint Council shall be appointed by the Secretary from among persons who are distinguished representatives of other colleges and universities having a demonstable capacity to carry out food and agricultural research, extension, and teaching. The Joint Council shall be jointly chaired by the Assistant Secretary of Agriculture responsible for research, extension, and teaching, and a person to be elected from among the non-Federal membership of the Joint Council.".

(c) Section 1407(d)(1) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(1)) is amended to read as follows:

"(1) The primary purpose of the Joint Council is to bring about more effective research, extension, and teaching in the food and agricultural sciences in the United States by improving planning and coordination of publicly and privately supported food and agricultural science activities and by relating Federal budget development and program management to these processes.".

(d) Section 1407(d)(2)(E) of the National Agricultural Research, Extension, and Teach-

ing Policy Act of 1977 (7 U.S.C. 3122(d)(2)(E)) is amended by striking out "efforts" and all that follows through "planning" and inserting in lieu thereof "of the food and agricultural sciences, by using the existing regional research, extension, and teaching organizations of State cooperative institutions to provide regional planning and coordination.".

(e) Section 1407(d)(2)(G) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)(G)) is amended to read as follows:

"(G) submit a report, not later than June 30 of each year—

"(i) specifying the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs;

"(ii) delineating suggested areas of responsibility among Federal, State, and private organizations in carrying out such programs; and

"(iii) specifying the levels of financial and other support needed to carry out such programs.

Each such report shall be submitted to the Congress, the Secretary of Agriculture, and the constituent organizations of the Joint Council. Minority views, if timely submitted, shall be included in such report.".

(f) Section 1407 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122) is amended by adding at the end thereof the following new subsection:

"(e)(1) The Federal Advisory Committee Act (5 U.S.C. app.) shall not apply to the Joint Council.

"(2) The meetings of the Joint Council shall be publicly announced in advance and shall be open to the public. Appropriate records of the activities of the Joint Council shall be kept and made available to the public on request.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1304. (a) Section 1408(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(a)) is amended by striking out "five" and inserting in lieu thereof "ten".

(b) Section 1408(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(b)) is amended—

(1) by striking out "twenty-one" and inserting in lieu thereof "twenty-five", and

(2) by amending paragraph (1) to read as follows:

"(1) eight producer members representing various geographical regions and production interests, including forestry and aquaculture," and

(3) by adding at the end thereof the following:

"Such members shall be appointed to serve staggered terms."

(c) Section 1408(f)(2) of the National Agricultural, Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(f)(2)) is amended—

(1) in subparagraph (E) by striking out "October 31" and inserting in lieu thereof "July 1", and

(2) in subparagraph (F) by striking out "March 1 of" and inserting in lieu thereof "February 20 of".

FEDERAL-STATE PARTNERSHIP AND COORDINATION

SEC. 1305. (a) Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended to read as follows:

"FEDERAL-STATE PARTNERSHIP AND COORDINATION

"SEC. 1409. (a) A unique partnership arrangement exists in food and agricultural research, extension, and teaching between the Federal Government and the governments of the several States whereby the States have accepted and have supported, through legislation and appropriations—

"(1) research programs under—

"(A) the Act of March 2, 1887 (24 Stat. 440; 7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(B) the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(C) subtitle E of this title;

"(2) extension programs under the Act of May 14, 1914 (38 Stat. 372; 7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act; and

"(3) teaching programs under—

"(A) the Act of July 2, 1862 (12 Stat. 503; 7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act; and

"(C) the Act of June 29, 1935 (49 Stat. 436; 7 U.S.C. 427 et seq.), commonly known as the Bankhead-Jones Act.

This partnership in publicly supported agricultural research, extension, and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed, and in many cases, site-specific needs of American agriculture. This partnership must be preserved and enhanced.

"(b) Section 3648 of the Revised Statutes (31 U.S.C. 529) and section 3709 of the Revised Statutes (41 U.S.C. 5) shall not apply to contracts, grants, and cooperative agreements made by the Secretary to further the Federal-State research, extension, and teaching partnership pursuant to the program specified in subsection (a) of this section. The Secretary may convey title to expendable and nonexpendable equipment and supplies, and other tangible personal property, to a contractor or a recipient of funds if such contractor or such recipient purchases such equipment, supplies, and property with contract, grant, or cooperative agreement funds, and if the Secretary, in his discretion, determines that so conveying title will further the objectives of the Department of Agriculture.".

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out the item relating to section 1409 and inserting in lieu thereof the following new item:

"SEC. 1409. Federal-State partnership and coordination."

SECRETARY'S REPORT

SEC. 1306. Section 1410 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3125) is amended by striking out "February 1" and inserting in lieu thereof "January 1".

SUPPORT FOR THE JOINT COUNCIL AND THE ADVISORY BOARD

SEC. 1307. Section 1412(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3127(a)) is amended to read as follows:

"(a) To assist the Joint Council and the Advisory Board in the performance of their duties, the Secretary may appoint, after consultation with the co-chairmen of the Joint Council and the chairman of the Advisory Board—

"(1) a full-time executive director who shall perform such duties as the co-chairmen of the Joint Council and the chairman of the Advisory Board may direct and who shall receive compensation at a rate not to exceed the rate payable for GS-16 of the General Schedule established in section 5332 of title 5, United States Code; and

"(2) a professional staff of not more than five full-time employees qualified in the food and agricultural sciences, of which one shall serve as the executive secretary to the Joint Council and one shall serve as the executive secretary to the Advisory Board.".

ADDITIONAL ASSISTANT SECRETARY OF AGRICULTURE

SEC. 1308. (a) Section 1413 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3128) is amended by adding at the end thereof the following new subsection:

"(c) In addition to the Assistant Secretaries of Agriculture now provided for by law, there shall be one additional Assistant Secretary of Agriculture, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of Agriculture, and who shall carry out such duties as may be prescribed by the Secretary of Agriculture."

(b) Section 5315 of title 5, United States Code, is amended in the item relating to Assistant Secretaries of Agriculture by striking out "(5)" and inserting in lieu thereof "(6)".

PROGRAM FOR COMPETITIVE, SPECIAL, AND FACILITIES GRANTS FOR AGRICULTURAL RESEARCH

SEC. 1309. (a) Section 2(b) of the Act of August 4, 1965 (79 Stat. 431; 7 U.S.C. 450i), is amended—

(1) by inserting after the third sentence the following:

"For purposes of the preceding sentence, high priority research shall include—

"(1) basic research aimed at the discovery of new scientific principles and techniques that may be applicable in agriculture and forestry;

"(2) basic and applied research in the various plant sciences;

"(3) basic and applied research in the various animal sciences;

"(4) basic and applied research in the various soil and water sciences and natural resources field;

"(5) basic and applied research in the field of human nutrition; and

"(6) research to develop new, promising crops, such as guayule and jojoba."; and

(2) by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987,".

(b) Section 2(c) of the Act of August 4, 1965 (79 Stat. 431; 7 U.S.C. 450i(c)) is amended—

(1) in paragraph (1) by inserting "research foundations established by land-grant colleges and universities," after "land-grant colleges and universities,"; and

(2) in paragraph (2)—

(A) by inserting ", research foundations, established by land-grant colleges and universities," after "land-grant colleges and universities", and

(B) by inserting ", such research foundations," after "such colleges and universities".

(c) Section 2(d) of the Act of August 4, 1965 (79 Stat. 431; 7 U.S.C. 450i(d)) is amended—

(1) by striking out "the purchase of equipment" and all that follows through the dash and inserting in lieu thereof "the renovation and refurbishment (including energy retrofitting) of research spaces in buildings or spaces to be used for research, and the purchase and installation of fixed equipment in such spaces. Such grants may be used for new construction only for auxiliary facilities and fixed equipment used for research in such facilities, such as greenhouses, insectaries, and research farm structures and installations. Such grants shall be made to—";

(2) in paragraph (1) by striking out "available; and" inserting in lieu thereof "available;".

(3) in paragraph (2) by striking out the period and inserting in lieu thereof a semicolon; and

(4) by inserting after paragraph (2) the following new paragraphs:

"(3) each cooperating forestry school not described in paragraph (1), in an amount which is equal to 10 per centum of the funds received by such school under the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et. seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(4) each college eligible to receive funds under the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.), including Tuskegee Institute, in an amount which is equal to 10 per centum of the funds received by such college under section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.".

AMENDMENTS TO THE RESEARCH FACILITIES ACT OF 1963

SEC. 1310. Section 4(a) of the Act of July 22, 1963 (77 Stat. 90; 7 U.S.C. 390c(a)), is amended by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987,".

FEDERAL SUPPORT OF HIGHER EDUCATION IN THE FOOD AND AGRICULTURAL SCIENCES

SEC. 1311. (a) Section 1417(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(a)) is amended to read as follows:

"(a)(1) The Secretary of Agriculture shall promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs.

"(2) The Secretary of Education shall delegate to the Secretary of Agriculture the authority to carry out all functions and duties under the Act of June 29, 1935 (49 Stat. 436; 7 U.S.C. 427 et seq.) applicable to the activities and programs for which funds under section 22 of such Act are available to the Secretary of Agriculture.".

(b) Section 1417 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152) is further amended by redesignating subsections (b), (c) and (d) as (c), (d), and (e), respectively, and inserting a new subsection (b) to read as follows:

"(b)(1) The Secretary may make grants to land-grant colleges and universities, and to other colleges and universities having a demonstrable capacity to carry out food and agricultural teaching, for a period not to exceed five years—

"(A) to strengthen institutional capacities to respond to State, national, or international educational needs in the food and agricultural sciences;

"(B) to attract students and educate them as needed in the food and agricultural sciences, and to attract needed professionals to provide for their professional improvement in the food and agricultural sciences;

"(C) to design and implement innovative food and agricultural educational programs; and

"(D) to facilitate cooperative agreements between two or more eligible institutions to maximize the use of faculty and facilities to improve their food and agricultural teaching programs.

Such grants shall be made without regard to matching funds, but each recipient institution shall have a significant ongoing commitment to the food and agricultural sciences generally and to the specific subject area for which such grant is to be used.

"(2) The Secretary may make competitive grants to colleges and universities for a period not to exceed five years—

"(A) to develop or administer programs to meet unique food and agricultural educational problems; and

"(B) to administer and conduct specialized programs to attract individuals for undergraduate and graduate programs and to administer and conduct graduate fellowship programs to meet regional and national objectives in the food and agricultural sciences.

Such grants shall be made without regard to matching funds provided by recipients.".

(c) Section 1417(e) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(d)), as redesignated by subsection (b) of this section, is amended by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987,".

TRANSFER OF FUNCTIONS

SEC. 1312. (a) There are hereby transferred to the Secretary of Agriculture all the functions of the Secretary of Education and of the Department of Education under the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.).

(b) There are hereby transferred to the Department of Agriculture the offices of the Department of Education established under the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.).

ALCOHOL AND INDUSTRIAL HYDROCARBONS

SEC. 1313. The sixth sentence of section 1419(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3154(a)) is amended—

(1) by striking out "four", and

(2) by striking out "and September 30, 1982" and all that follows through the period at the end thereof and inserting in lieu thereof the following: ", September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987: *Provided*, That the total amount of such appropriations shall not exceed $40,000,000 during the ten-year period beginning October 1, 1977, and shall not exceed such sums as may be authorized by law for any fiscal year subsequent to such period: *Provided further*, That not more than a total of $5,000,000 may be awarded to the colleges and universities of any one State.".

NUTRITION EDUCATION PROGRAM

SEC. 1314. The second sentence of section 1425(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3175(b)) is amended to read as follows: "Funds for carrying out the provisions of this subsection shall be distributed as follows:

"(1) One per centum shall be available to the Secretary for the administration of this subsection; and

"(2) The remainder shall be allocated to the States as follows:

"(A) Ten per centum of the available funds shall be distributed equally among all States; and

"(B) The remainder shall be allocated to each State in an amount that bears the same ratio to the total amount to be allocated as the population of the State living at or below 125 per centum of the income poverty guidelines prescribed by the Office of Management and Budget (adjusted under section 625 of the Economic Opportunity Act of 1964 (86 Stat. 697, as amended; 42 U.S.C. 2971d)), bears to the total population of all the States living at or below 125 per centum of the income poverty guidelines, as determined by the last preceding decennial census at the time each such sum is first appropriated: *Provided*, That, notwithstanding the foregoing, out of funds made available annually to carry out the provisions of this subsection up to the amount of funds last appropriated annually for such purpose prior to the enactment of the Agriculture and Food Act of 1981, each State shall be entitled to an allocation equal in proportion to the amount it received under such appropriations in relation to the amounts received by the other States.".

ANIMAL HEALTH AND DISEASE RESEARCH DEFINITIONS

SEC. 1315. Section 1430 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3192) is amended by deleting paragraph (1) and substituting in lieu therefor the following: "(1) the term 'eligible institution' means State agricultural experiment stations and accredited colleges of veterinary medicine;".

ANIMAL HEALTH SCIENCE RESEARCH ADVISORY BOARD

SEC. 1316. Section 1432(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3194(a)) is amended by striking "five" and inserting in lieu thereof "ten".

APPROPRIATIONS FOR RESEARCH ON NATIONAL OR REGIONAL PROBLEMS

SEC. 1317. (a) Section 1434(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196(b)) is amended to read as follows:

"(b) Funds appropriated under this section shall be awarded in the form of grants, for periods not to exceed five years, to eligible institutions.".

(b) Section 1434 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is amended by adding at the end thereof the following new subsection:

"(c) In order to establish a rational allocation of funds appropriated under this section, the Secretary shall establish annually priority lists of animal health and disease problems of national or regional significance. Such lists shall be prepared after consultation with the recommendations made in connection with the Joint Council, the Advisory Board, and the Board. Any recommendations made in connection with such consultation shall not be controlling on the Secretary's determination of priorities. In establishing such priorities, the Secretary, the Joint Council, the Advisory Board, and the Board shall consider the following factors:

"(1) any health or disease problems which cause or may cause significant economic losses to any part of the livestock production industry;

"(2) whether current scientific knowledge necessary to prevent, cure, or abate such a health or disease problem is adequate; and

"(3) whether the status of scientific research is such that accomplishments may be anticipated through the application of scientific effort to such health or disease problem.

"(d) The Secretary shall, to the extent feasible, award grants to eligible institutions on the basis of the priorities established pursuant to subsection (c).

"(e) In the case of multiyear grants, the Secretary shall distribute funds to grant recipients on a schedule which is reasonably related to the timetable required for the orderly conduct of the research project involved.".

EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1318. (a) Section 1444(c) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221(c)) is amended by striking out "administrative head for extension" and inserting in lieu thereof "extension administrator".

(b) Section 1444(d) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221(d)) is amended by striking out "submitted by the proper officials of such institution" and inserting in lieu thereof "submitted, as part

of the State plan of work, by the State director of the cooperative extension service".

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1319. Section 1458 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3291) is amended—

(1) by inserting "(a)" immediately after the subsection designation; and

(2) by adding at the end thereof new subsections (b) and (c) to read as follows:

"(b) The Secretary of Agriculture shall draw upon and enhance the resources of the land-grant colleges and universities, and other colleges and universities, for developing linkages among these institutions, the Federal Government, international research centers, and counterpart agencies and institutions in both the developed and less developed countries to serve the purposes of agriculture and the economy of the United States and to make a substantial contribution to the cause of improved food and agricultural progress throughout the world.

"(c) The Secretary may provide specialized or technical services, on a reimbursable basis, to colleges and universities carrying out international food and agricultural research, extension, and teaching activities. All funds received in payment for furnishing such specialized or technical services shall be deposited to the credit of the appropriation from which the cost of providing such services has been paid or is to be charged.".

AUTHORIZING FOR APPROPRIATIONS FOR EXISTING AND CERTAIN NEW AGRICULTURAL RESEARCH PROGRAMS

SEC. 1320. (a) Section 1463(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311 (a)) is amended by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.".

(b) Section 1463(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(b)) is amended by striking out "and $220,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof" "$220,000,000 for the fiscal year ending September 30, 1982, $230,000,000 for the fiscal year ending September 30, 1983, $240,000,000 for the fiscal year ending September 30, 1984, $250,000,000 for the fiscal year ending September 30, 1985, $260,000,000 for the fiscal year ending September 30, 1986, and $270,000,000 for the fiscal year ending September 30, 1987,".

AUTHORIZATION FOR APPROPRIATIONS FOR EXTENSION PROGRAMS

SEC. 1321. Section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3312) is amended by striking out "and $350,000,000 the fiscal year ending September 30, 1982, and inserting in lieu thereof "$350,000,000 for the fiscal year ending September 30, 1982; $360,000,000 for the fiscal year ending September 30, 1983, $370,000,000 for the fiscal year ending September 30, 1984, $380,000,000 for the fiscal year ending September 30, 1985, $390,000,000 for the fiscal year ending September 30, 1986, and $400,000,000 for the fiscal year ending September 30, 1987,".

RESTRICTION ON TREATMENT OF INDIRECT COSTS

SEC. 1322. Subtitle K of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311–3316) is amended by adding at the end thereof the following new section:

"RESTRICTION ON TREATMENT OF INDIRECT COSTS

"SEC. 1471. (a) Funds made available by the Secretary of Agriculture under—

"(1) the Act of March 2, 1887 (24 Stat. 440; 7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(2) the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;

"(3) section 1433 and section 1434 of this Act; and

"(4) subsection (c)(2) and subsection (d) of section 2 of the Act of August 4, 1965 (7 U.S.C. 450i);

shall not be subject to reduction for indirect costs incurred by the recipient involved.

"(b) No indirect costs shall be charged against funds made available by the Secretary of Agriculture in connection with cooperative agreements between the Department of Agriculture and State cooperative institutions if the cooperative program or project involved is of mutual interest to all the parties and if all the parties contribute to the cooperative agreement involved. This section does not preclude requiring appropriate payment of indirect costs incurred in connection with incidental contracts and grants between the Department of Agriculture and State cooperative institutions.".

COOPERATIVE STATE FORESTRY

SEC. 1323. (a) Section 1 of the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "It is also recognized that the provisions of this Act are essential to assist in providing the research background which undergirds the Forest and Rangeland Renewable Resources Planning Act of 1974, the Renewable Resources Extension Act of 1978, and the Soil and Water Resources Conservation Act of 1977.".

(b) Section 2 of the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a–1), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "If more than one institution within a State are certified as qualifying for assistance, then it shall be the responsibility of such institutions in agreement with the Secretary of Agriculture, to develop complementary programs of forestry research for the State.".

(c) Section 5 and section 6 of the Act of August 10, 1962 (76 Stat. 806; 16 U.S.C. 582a–4, 582a–5), commonly known as the McIntire-Stennis Act of 1962, are amended to read as follows:

"SEC. 5. (a) The Secretary shall prescribe such regulations as may be necessary to carry out this Act and to furnish such advice and assistance through a cooperative State forestry research unit in the Department of Agriculture as will best promote the purposes of this Act.

"(b) The Secretary shall appoint a council of not fewer than 16 members which shall be constituted to give representation to Federal and State agencies concerned with developing and utilizing the Nation's forest resources, the forest industries, the forestry schools of the State-certified eligible institutions, State agricultural experiment stations and volunteer public groups concerned with forests and related natural resources. The council shall meet at least annually and shall submit a report to the Secretary on regional and national planning and coordination of forestry research within the Federal and State agencies, forestry schools, and the forest industries, and shall advise the Secretary on the apportionment of funds. The Secretary shall seek, at least once each year, the advice of the council to accomplish efficiently the purposes of this Act.

"SEC. 6. Apportionments among participating States shall be determined by the Secretary after consultation with the council appointed under section 5. In making such apportionments, consideration shall be given to pertinent factors including non-Federal expenditures for forestry research by State-certified eligible institutions, areas of non-Federal commercial forest land, and the volume of timber cut annually. Three per centum of such funds as may be appropriated shall be made available to the Secretary for administration of this Act.".

ADDITIONAL AGRICULTURAL RESEARCH SUPPORT

SEC. 1324. The second sentence of section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c) is amended—

(1) by striking out "and (3)" and inserting in lieu thereof "(3)"; and

(2) by changing the period to a semicolon and inserting the following: "and (4) support food and agricultural research, extension, and teaching in order to meet the challenge of providing adequate food and fiber production for the United States and the world.".

EXCESS FEDERAL EQUIPMENT

SEC. 1325. Section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 (63 Stat. 84; 40 U.S.C. 483(d)(2)) is amended—

(1) in subparagraph (C) by striking out "or";

(2) in subparagraph (D) by striking out the period and inserting in lieu thereof "; or"; and

(3) by inserting at the end thereof the following new subparagraph:

"(E) property furnished by the Secretary of Agriculture to State and county extension services engaged in cooperative agricultural extension work under the Act of May 8, 1914 (7 U.S.C. 341 et seq.), to State agricultural experiment stations receiving funds under the Act of March 2, 1887 (7 U.S.C. 361a et seq.), and to colleges and universities receiving funds under the Act of July 2, 1862 (7 U.S.C. 301 et seq.) or the Act of August 30, 1890 (7 U.S.C. 321 et seq.).".

TITLE XIV—RESOURCES CONSERVATION

Subtitle A—Special Areas Conservation Program

FINDINGS

SEC. 1401. Congress finds that—

(1) studies by the Department of Agriculture indicate that billions of tons of soil are eroded annually from non-Federal lands in the United States, much of which represents soil eroded from cropland;

(2) nearly one-half of the four hundred and thirteen million acres of cropland have soils with moderate, high, or very high risk of damage by sheet and rill erosion;

(3) the severity of erosion-related problems varies widely from one geographic area to the next;

(4) some of the most productive agricultural areas of the United States are also those having the most serious and chronic erosion-related problems;

(5) solutions to such chronic erosion-related problems should be tailored to address the local social, economic, environmental, and other conditions unique to the area involved to ensure that the goals and policies of the Federal Government are effectively integrated with the concerns of the local community;

(6) certain range and pasturelands in the United States are producing less than their potential and therefore their productive capacity could be substantially improved by application of intensified range and pasture management practices; the protection of these lands is essential to controlling erosion, improving ecological conditions, enhancing wildlife and riparian habitats, improving water quality and yield, and meeting the need to produce food and fiber in a manner that is more energy efficient; and

(7) there is a need for—

(A) reducing seepage from on-farm and off-farm irrigation ditches and conveyance systems;

(B) improving water conservation and utilization; and

(C) installing measures to capture on-farm irrigation return flows.

FORMULATION AND IMPLEMENTATION OF SPECIAL AREAS CONSERVATION PROGRAM

SEC. 1402. (a) The Secretary of Agriculture (hereinafter in this subtitle referred to as the Secretary) shall establish a program for the conservation of soil, water, and related resources in special areas designated pursuant to section 1403 (hereinafter referred to as "designated special areas") by providing technical and financial assistance to owners and operators or groups of owners and operators of farm, ranch, and certain other lands at their request. Such assistance with respect to State, county, and other public land shall be limited to those lands that are an integral part of a private farm operating unit and under the control of the private land owner or operator.

(b) To carry out the program established under this subtitle, the Secretary may enter into contracts with owners and operators of farm, ranch, or other land in a designated special area having such control over the land as the Secretary deems necessary. Any such contract may be entered into with respect to land in a designated special area which is not farm or ranch land only if the erosion-related problems of such land are so severe as to make such contracts with respect to such land necessary for the effective protection of farm or ranch land in that designated special area. Contracts under this subtitle shall be designed to provide assistance to the owners or operators of such farm, ranch, or other land to make voluntary changes in their cropping systems which are needed to conserve or protect the soil, water, and related resources of such lands, and to carry out the soil and water conservation measures needed under such changed systems and uses.

(c) The basis for such contracts shall be a conservation plan approved by the Secretary and the soil and water conservation district in which the land on which the plan is to be carried out is situated. The Secretary shall provide to the landowner or operator, at their request, such technical assistance as may be needed to prepare and submit to the Secretary a conservation plan—

(1) which incorporates such soil and other conservation practices and measures as may be determined to be practicable to protect such land from erosion or water-related problems,

(2) which outlines a schedule for the implementation of changes in cropping systems or use of land or of water and of conservation measures proposed to be carried out on the farm, ranch, or other land during the contract period,

(3) which is designed to take into account the local social, economic, and environmental conditions, which will help solve the particular erosion or water-related problems of the designated area,

(4) which may allow for such varying levels of conservation application as are appropriate to address the problems and may be developed to cover all or part of a farm, ranch, or other land as determined to be necessary to solve the conservation problems,

(5) which may include practices and measures for enhancing fish and wildlife and recreation resources and for reducing or controlling agricultural-related pollution, and

(6) which identifies those conservation systems and measures, including planned grazing systems, needed to improve vegetative conditions, reduce erosion, and conserve water on range and pasturelands.

(d) Under any contract entered into under this subtitle, the land owner or operator shall agree—

(1) to carry out the plan for the owner's or operator's farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to subsection (f);

(2) to forfeit further payments under the contract and refund to the United States all payments received thereunder, including interest, upon violation by the owner or operator of the contract at any stage during the time the owner or operator has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board for the district in which the lands are located, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds, including interest, or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the contract; and

(3) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract.

(e) In return for an agreement by the landowner or operator under this section, the Secretary shall agree to share the cost of carrying out the conservation measures set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest. The portion of the costs to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the installation and, if applicable, the maintenance of the conservation treatment under the contract, including the cost of labor. The Secretary shall determine the amount of the shared costs to be borne by the Federal Government, taking into consideration the social and economic conditions unique to each designated geographic area and the degree of conservation to be achieved. The Secretary shall determine the maximum amount of cost-share assistance that may be provided to any single recipient. If adjustments from cultivated crops to permanent vegetative cover or changes in crop varieties are undertaken as conservation treatment, financial assistance may be provided with regard to the income lost as a result of such land use or crop adjustments.

(f) The Secretary may terminate any contract with a landowner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest and may agree to such modification of contracts previously entered into as the Secretary may determine to be desirable to carry out the purposes of the program or facilitate the practical administration thereof or to accomplish equitable treatment with respect to other similar conservation, or commodity programs administered by the Secretary.

(g) The Secretary may also enter into contracts with landowners or operators for the purpose of maintaining any conservation treatment established under this subtitle or other conservation treatment which has been adequately established, and to provide such assistance as is necessary to retain the treatment on the land. The provisions and administration of such contracts shall be in accordance with the requirements set forth in subsections (b) through (f).

PROGRAM TO BE DIRECTED AT SPECIFIC PROBLEMS

SEC. 1403. (a) The program established under this subtitle shall be directed toward identifying and correcting such erosion-related or water management-related problems as may exist within each designated special area. Assistance under this subtitle may be provided to any geographic area of the United States only if such area is first designated by the Secretary as having severe and chronic erosion-related or water management-related problems.

(b) In identifying a geographic area as a designated special area under this subtitle, the Secretary shall prepare and publish a report setting forth an assessment of the problems, objectives, and priorities in such area, and a schedule for the implementation of the program under this subtitle. The Secretary shall indicate in such report how the program as developed with respect to such area takes into consideration ongoing programs of Federal, State, and local agencies, including soil conservation districts, relating to soil and water conservation, pollution abatement, or the improvement or protection of forest land. The Secretary shall, within existing authorities, assure that all Department of Agriculture programs operating in a designated special area complement the conservation objectives outlined for such area.

CONTRACT LIMITATIONS

SEC. 1404. Special areas may be designated pursuant to section 1503 of this subtitle at any time within 10 years after the date of enactment of this Act. Contracts authorized by subsections (b) and (g) of section 1402 of this subtitle may be entered into at any time within 10 years after the designation of the special area to which they relate. Such contracts may not exceed 10 years in duration, and the amount of contracts that may be entered into in any one fiscal year shall not exceed such amounts as may be provided for in advance in appropriations Acts.

NOTIFICATION OF COMMITTEES OF CONGRESS

SEC. 1405. The Secretary shall submit a copy of each special area report developed and published pursuant to section 1403(b) of this subtitle to the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and to the Committee on Agriculture of the United States House of Representatives.

UTILIZATION OF SERVICES AND FACILITIES

SEC. 1406. In carrying out the provisions of this subtitle, the Secretary may utilize the services of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) and the technical services of the Department of Agriculture, soil and water conservation districts, and other State or local agencies. The Secretary may utilize the services and facilities of the Commodity Credit Corporation in carrying out the functions and responsibilities of the Secretary under this subtitle.

IMPROVEMENT OF TECHNOLOGY

SEC. 1407. The Secretary may expend funds directly or through grants for such research as is needed to assist in developing new or improving existing technologies for controlling erosion or water-related problems in designated special areas.

RULES AND REGULATIONS

SEC. 1408. The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this subtitle.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1409. There are authorized to be appropriated annually, to be available until expended, such sums as may be necessary to carry out the program authorized by this subtitle.

REPORT TO CONGRESS

SEC. 1410. The Secretary shall submit a report to Congress by January 1, 1986, and at each five-year interval thereafter, concerning the operation of the program provided for in this subtitle. Such report shall contain an evaluation of the operation of such program and shall include recommendations for such additional legislation as may be necessary to solve identified soil, water, and related resources problems in areas designated by the Secretary under this subtitle and to utilize new technology and research related to such problems.

PROTECTION OF PARTICIPANTS

SEC. 1411. No person shall be disqualified

from participating in, or suffer any forfeiture or reduction in benefits under, any other program administered by the Secretary by virtue of participation in the program provided for in this subtitle.

Subtitle B—AMENDMENTS TO THE SMALL WATERSHED AND RESOURCE CONSERVATION AND DEVELOPMENT PROGRAMS

AMENDMENTS TO SMALL WATERSHED PROGRAM

SEC. 1412. (a) Section 2 of the Watershed Protection and Flood Preservation Act (16 U.S.C. 1002) is amended by changing the period at the end thereof to a semicolon and inserting the following: "or any Indian tribe or tribal organization, as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b), having authority under Federal, State, or Indian tribal law to carry out, maintain, and operate the works of improvement.".

(b) Section 2 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1002) is further amended by striking out "$1,000,000" and inserting in lieu thereof "$3,000,000".

(c) Section 3(6) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1003(6)) is amended by inserting after the word "wildlife," the word "energy.".

(d) Section 4(1) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1004(1)) is amended by changing the semicolon at the end thereof to a colon and inserting the following: *"Provided further,* That the Secretary shall be authorized to bear an amount not to exceed one-half of the costs of the land, easements, or rights-of-way acquired or to be acquired by the local organization for mitigation for fish and wildlife habitat losses, and that such acquisition is not limited to the confines of the watershed project boundaries;".

(e) Section 5(3) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1005(3)) is amended by striking out "$1,000,000" and inserting in lieu thereof "$3,000,000".

(f) Section 5(4) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1005(4)) is amended by striking out "$1,000,000" and inserting in lieu thereof "$3,000,000".

AMENDMENT TO RESOURCE CONSERVATION AND DEVELOPMENT PROGRAM

SEC. 1413. Section 31 of title III of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1010) is amended by inserting after the words "dams and reservoirs," the words "developing energy resources,".

Subtitle C—VOLUNTEERS FOR CONSERVATION

AUTHORIZATION FOR USE OF VOLUNTEERS

SEC. 1414. The Secretary of Agriculture, hereinafter in this subtitle referred to as the Secretary, is authorized to recruit, train, and accept without regard to the civil service and classification laws, rules, or regulations, the services of individuals without compensation as volunteers for and in aid of interpretive functions, visitor services, conservation measures and development, or other activities related to matters administered by the Secretary through the Soil Conservation Service. The Secretary is authorized to provide for incidental expenses of such volunteers for items such as transportation, uniforms, logging, and subsistence.

STATUS AS FEDERAL EMPLOYEES

SEC. 1415. (a) Except as provided in subsection (b) of this section such volunteers shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, and Federal employee benefits.

(b) For the purpose of the tort claim provisions of sections 2671 through 2680 of title 28 of the United States Code, and for the purposes of chapter 81 of title 5 of the United States Code, relating to compensation to Federal employees for work-related injuries, volunteers under this subtitle shall be deemed employees of the United States.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1416. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

TITLE XV—EFFECTIVE DATE

SEC. 1501. Except as otherwise provided herein, the provisions of this Act shall become effective October 1, 1981.

SECTION-BY-SECTION ANALYSIS OF AGRICULTURE AND FOOD ACT OF 1981

TITLE I—DAIRY

Section 101. Dairy base plans.

Section 101 establishes permanent authority for seasonal base plans under milk marketing orders and allows the authority for class I base plans to expire at the end of 1981. However, any class I base plan currently in existence may remain effective through December 31, 1984. A temporary provision which mandates hearings on proposed amendments to milk marketing orders if one-third of the producers request such hearings and a temporary provision which requires the Secretary of Agriculture to consider the level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs as a criteria for setting the price of milk would also be allowed to expire at the end of 1981.

Section 102. Legal status of producer handlers.

Section 102 makes it clear that the legal status of producer handlers under the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, is not changed by the elimination of the authority for class I base plans under section 101 of the Agriculture and Food Act of 1981.

Section 103. Milk price support.

The bill allows the Secretary of Agriculture to support the price of milk at a level between 75 and 90 percent of parity. Section 103 provides discretionary authority for the Secretary of Agriculture to make adjustments in the support price of milk at the beginning of each semiannual period after the beginning of the marketing year to reflect any substantial change in the parity index during the immediately preceding semiannual period. Any such adjustment shall be announced not less than thirty days prior to the beginning of the period to which it is applicable.

Section 104. Transfer of dairy products to veterans hospitals and the Military.

Section 104 extends for calendar years 1982 through 1985 current authority for making dairy products owned by the Commodity Credit Corporation available for transfer to veterans hospitals and the military.

Section 105. Dairy indemnity program.

Section 105 extends for fiscal years 1982 through 1985 current authority for making indemnity payments to (1) dairy farmers and manufacturers who sustain losses as a result of pesticide residues in cows, milk, or dairy products and (2) dairy farmers who sustain losses as a result of their cows or milk having been contaminated by nuclear radiation or residues of chemicals or toxic substances which were not used contrary to applicable regulations or labeling instructions.

TITLE II—WOOL AND MOHAIR

Section 201. Extension of price support program.

Section 201 extends for calendar years 1982 through 1985 current authority for establishing support prices of wool and mohair.

TITLE III—WHEAT

Section 301. Loan rates and land diversion payments for the 1982 through 1985 crops.

Section 301 requires the Secretary of Agriculture to make available to producers loans and purchases on the 1982 through 1985 crops of wheat at a level equal to or greater than 85 percent of the average market price of wheat in the United States during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The level of loans and purchases for any of the 1982–1985 crops of wheat, however, shall not be less than $3.20 per bushel. This section also extends current authority for the Secretary to make land diversion payments to producers of wheat.

This section, in effect, eliminates authority for target prices, deficiency payments, set-asides, and disaster payments for the 1982–1985 crops of wheat.

Section 302. Suspension of marketing quotas and producer certificate provisions.

Section 302 provides that authority, which has been suspended for the 1977–1981 crops of wheat, for wheat marketing quotas and producer certificates shall not be applicable to the 1982–1985 crops of wheat.

Section 303. Nonapplicability of processor and exporter certificate requirements.

Section 303 provides that marketing certificate requirements for processors and exporters of wheat shall not be applicable through May 31, 1986. Such requirements have not been applicable since July 1, 1973.

Section 304. Finality of determinations.

Section 304 extends through the 1985 crops current law which establishes that determinations made by the Secretary of Agriculture or the Commodity Credit Corporation with respect to facts constituting the basis for any commodity program payment, loan, or price support operation, shall be final and shall not be reviewable by any other officer or agency of the Government.

Section 305. Suspension of quota provisions.

Section 305 suspends authority regarding wheat marketing quotas and penalties for crops of wheat planted for harvest in the calendar years 1982 through 1985. Such authority has not been applicable to the 1977–1981 crops of wheat.

Section 306. Application of terms in the Agricultural Act of 1949.

Section 306 extends for the 1982 through 1985 crops of wheat and feed grains the applicability of the terms "support price", "level of support", "level of price support", "price support", "price support operations" and "price support program" (contained in the Agricultural Act of 1949) to the loan and purchase operations of the wheat and feed grains programs authorized in the Agricultural Act of 1949. Such terms have been applicable to the 1977–1981 crops.

Section 307. Commodity Credit Corporation sales price restrictions for wheat and feed grains.

Section 307 extends for the marketing years for the 1982 through 1985 crops of wheat and feed grains current law which prohibits the Commodity Credit Corporation from selling its stocks of wheat and feed grains at less than 115% of the current national average loan rate for the commodity concerned.

Section 308. Nonapplicability of section 107 of the Agricultural Act of 1949 to the 1982 through 1985 crops of wheat.

Section 308 provides that the provisions of the wheat price support program contained in section 107 of the Agricultural Act of 1949 shall continue to be inapplicable to the 1982 through 1985 crops of wheat.

TITLE IV—FEED GRAINS

Section 401. Loan rates and land diversion payments for the 1982 through 1985 crops.

Section 401 requires the Secretary of Agriculture to make available to producers loans and purchases on the 1982 crop of corn

at 75% of the average market price of corn in the United States during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The Secretary shall establish the levels of loans and purchases for the 1983 through 1985 crops of corn at not less than 65% nor more than 85% of the average market price of corn, such average market price to be determined as described in the preceding sentence. The levels for any of the 1982 through 1985 crops of corn, however, shall not be less than $2.40 per bushel. Loans for other feed grains shall be set at levels that the Secretary determines is fair and reasonable in relation to the loan level for corn, except that loans for oats would be required to be set at not less than 75% (80% if oat production is estimated to be less than the 1980 production) of the loan level for corn. This section also extends current authority for the Secretary to make land diversion payments to producers.

This section, in effect, eliminates authority for target prices, deficiency payments, set-asides, and disaster payments for the 1982 through 1985 crops of feed grains.

Section 402. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1982 through 1985 crops of feed grains.

Section 402 provides that the provisions of the feed grains price support program contained in section 105 of the Agricultural Act of 1949 will continue to be inapplicable to the 1982 through 1985 crops of feed grains.

TITLE V—UPLAND COTTON

Section 501. Base acreage allotments; suspension of marketing quotas and related provisions.

Section 501 extends for the 1982 through 1985 crops of upland cotton current provisions of law which suspend the application of cotton marketing quotas and acreage allotments.

Section 502. Cotton production incentives; loan rates and land diversion payments for the 1982 through 1985 crops.

Section 502 extends for the 1982 through 1985 crops of upland cotton the current provisions of law for establishing the loan level for upland cotton, except that the minimum loan level is set at 55 cents per pound and provision is made for mandatory recourse loans on seed cotton. This section retains current authority for the extended loan and the special limited global import quota for upland cotton, with an additional provision that specifies that upland cotton imported into the U.S. while a special quota is in effect shall not be subject to import duties.

This section, in effect, eliminates authority for target prices, deficiency payments, set-asides, and disaster payments for the 1982–1985 crops of upland cotton.

Section 503. Commodity Credit Corporation sales price restrictions.

Section 503 extends for the marketing years for the 1982 through 1985 crops of upland cotton current law which prohibits the Commodity Credit Corporation from selling its stocks of upland cotton at less than 115 percent of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton.

Section 504. Miscellaneous cotton provisions.

Section 504 extends for the 1982 through 1985 crops of cotton the applicability of the terms "support price", "level of support", "level of price support", "price support", "price support operation', and "price support program" (contained in the Agricultural Act of 1949) to the loan and purchase operations of the upland cotton program authorized in the Agricultural Act of 1949. Such terms have been applicable to the 1977–1981 crops. This section provides that the provisions of the upland cotton price support program contained in section 103(a) of the Agricultural Act of 1949 shall continue to be inapplicable to the 1982 through 1985 crops of upland cotton. Finally, this section provides that the requirement to support the price of cottonseed and soybeans at levels whereby the two commodities will compete on equal terms on the market shall continue to be inapplicable to the 1982 through 1985 crops.

Section 505. Skiprow practices.

Section 505 provides that rules governing skiprow patterns which were in effect for the 1971 through 1981 crops of cotton shall also apply to the 1982 through 1985 crops of cotton.

Section 506. Preliminary allotments for 1986 crop of upland cotton.

Section 506 establishes that the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938, shall again become effective as preliminary allotments for the 1986 crop of upland cotton.

TITLE VI—RICE

Section 601. Loan rates and land diversion payments for the 1982 through 1985 crops.

Section 601 requires the Secretary of Agriculture to make available to producers loans and purchases on the 1982 crop of rice at 75 percent of the average market price of rice in the United States during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period. The Secretary shall establish the levels of loans and purchases for the 1983 through 1985 crops of rice at no less than 65 percent nor more than 85 percent of the average market price of rice, such average market price to be determined as described in the preceding sentence. The level for any of the 1982 through 1985 crops of rice, however, shall not be less than $8.01 per hundredweight. This section also extends current authority for the Secretary to make land diversion payments to producers.

This section, in effect, eliminates authority for target prices, deficiency payments, set-asides, and disaster payments for the 1982 through 1985 crops of rice.

Section 602. Suspension of marketing quotas and other provisions.

Section 602 suspends for the 1982 through 1985 corps of rice the provisions of law relating to allotments, marketing quotas, marketing quota penalties, and apportionments of the national acreage allotment.

Section 603. Conforming amendment.

Section 603 extends for the 1982 through 1985 crops of rice the applicability of the terms "support price", "level of support", "level of price support", "price support", "price support operation", and "price support program" (contained in the Agricultural Act of 1949) to the loan and purchase operations of the rice program authorized by the Agricultural Act of 1949.

TITLE VII—PEANUTS

Section 701. Annual marketing quota and state acreage allotment.

Section 701 provides that provisions of law pertaining to the proclamation of an annual marketing quota for peanuts and the apportionment of the State acreage allotment among counties shall not apply to the 1982 through 1985 crops of peanuts. This section also continues for the 1982 through 1985 crops of peanuts current provisions of law that the peanut acreage allotment for New Mexico shall not be reduced below the 1977 acreage allotment as adjusted.

Section 702. National acreage allotment; national poundage quota; farm poundage quota; and definitions.

Section 702 extends for the 1982 through 1985 crops of peanuts current law pertaining to the national acreage allotment, the national poundage quota, and the farm poundage quota with the following three modifications. First, the minimum national poundage quota for the marketing year for any crops of peanuts shall be 1,440,000 tons increased by such additional quantity as the Secretary of Agriculture estimates will be necessary to meet the requirements for domestic edible and seed uses during the next marketing year. Second, a producer's cumulative undermarketings for one or more previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) may be added to the farm poundage quota, provided, that (1) the producer planted an acreage on the farm to peanuts in the preceding year equal to or greater than 50% of the acreage allotment for the farm for peanuts for such preceding year; (2) the total marketings of the producer does not exceed the actual production from the farm acreage allotment; and (3) if the total of all increases because of undermarketing carry forward in individual farm poundage quotas exceeds 10% of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all increases does not exceed 10% of the national poundage quota. Third, seed peanuts for the production of "green" peanuts of unique strains which are not commercially available may be exempt from marketing penalties.

Section 703. Sale, lease, and transfer of acreage allotment.

Section 703 extends for the 1982 through 1985 crops of peanuts current law regarding the sale, lease, and transfer of acreage allotments, except that acreage allotments and marketing quotas may be transferred without regard to county boundaries in States which have less than a total of 11,000 acres in farm peanut acreage allotments.

Section 704. Marketing penalties; disposition of additional peanuts.

Section 704 extends for the 1982 through 1985 crops of peanuts current provisions of law regarding marketing penalties and the disposition of additional peanuts with the following modifications. First, the Secretary of Agriculture is required to authorize ASCS State and county committees to reduce or waive penalties for unintentional violations of the prescribed peanut marketing procedures.

Errors in weight which do not exceed one-tenth of 1 percent in the case of any marketing document shall not be considered marketing violations except in cases of fraud or conspiracy. Second, the deadline before which contracting for additional peanuts must be completed is moved from June 15 to April 15 of the year in which the crop is produced.

Additional peanuts not contracted for before April 15 are eligible for sale to handlers only if the producer consents to such sale. Third, producers are permitted to redeem additional peanuts from loan at prices equal to or more than 105 percent of the loan level of quota peanuts. Fourth, the area marketing associations shall have complete authority for selling additional peanuts under loan in instances where such peanuts are sold at prices equal to or greater than the Commodity Credit Corporation's minimum sales price.

Section 705. Reports and record.

Section 705 extends for the 1982 through 1985 crops of peanuts current requirements that all farmers engaged in the production of peanuts keep records subject to examination by USDA and submit such information when asked to do so.

Section 706. Preservation of unused allotments.

Section 706 extends for the 1982 through 1985 crops of peanuts current law which provides that the current farm acreage allotment shall not be preserved as history acreage unless for the current year or either of the two preceding years an acreage sufficient to produce 75 percent of the farm poundage quota was actually devoted to peanuts.

Section 707. Price support program.

Section 707 extends for the 1982 through 1985 crops of peanuts the current law providing a two-tiered price support program for peanuts with the following modifications. The loan levels for 1982 through 1985 crops of quota peanuts shall be established at the discretion of the Secretary of Agriculture, but not at a level less than $650 per ton. The Secretary is provided with authority to adjust the loan level for any crop year after taking into consideration such things as increases in the index of prices paid by farmers, interest, taxes, etc. The support price for "additional" peanuts shall be set at a rate estimated to result in no program losses to the Commodity Credit Corporation. Warehouse storage loans and field supervisory functions must be carried out by grower associations operated primarily for such purposes. Cooperatives engaged in handling, shelling, or dealing in peanuts in any manner, other than handling peanut price support activities for the Commodity Credit Corporation (CCC), are barred from conducting loan activities through a loan agreement with CCC. Finally, the Secretary shall require area marketing associations to establish accounting polls for purposes of providing certain protections to CCC against program losses.

TITLE VIII—SOYBEANS

Section 801. Loan rates for the 1982 through 1985 crops.

Section 801 requires the Secretary of Agriculture to make available to producers loans and purchases on the 1982 crop of soybeans at 75% of the average market price of soybeans in the United States during three years of the five-year period ending at the end of the marketing year immediately preceding the marketing year for which the level of loans and purchases is applicable, excluding the year in which the average market price was the highest and the year in which the average market price was the lowest in such period.

The Secretary shall establish the levels of loans and purchases for the 1983 through 1985 crops of soybeans at no less than 65% nor more than 85% of the average market price of soybeans, such average market price to be determined as described in the preceding sentence. The level for any of the 1982 through 1985 crops of soybeans, however, shall not be less than $5.02 per bushel. The section also specifies that soybeans shall not be considered an eligible commodity for the producer storage reserve program and that the Secretary shall not make payments to producers to cover the cost of storing soybeans.

It should be noted that this section moves the provisions establishing the soybean price support program from title II to title I of the Agricultural Act of 1949, thus making soybeans a "basic agricultural commodity" as opposed to a "designated nonbasic agricultural commodity".

Section 802. Conforming amendment.

Section 802 amends current law to add soybeans to the list of "basic agricultural commodities".

TITLE IX—GRAIN RESERVES; STORAGE FACILITY LOANS

Section 901. Producer storage reserve program for wheat and feed grains.

Section 901 continues the producer storage reserve program with the following modifications. The Secretary of Agriculture is required to set up a producer storage reserve program for both wheat and feed grains. The Secretary is given discretionary authority to provide original, extended, or supplemental loans at such level of support as he determines is necessary to encourage producers to participate in the program.

The repayment period of such loans shall not be less than three years and the interest rate shall be based upon the rate of interest charged the Commodity Credit Corporation by the U.S. Treasury.

The Secretary is given discretionary authority to waive or adjust the interest rates. The release price for the commodity involved is set at the average adjusted cost of production, including land value, for the preceding three-year period. Storage payments shall be made to producers until the maturity date of the loan or until the market price for the commodity involved equals or exceeds 115% of the release price.

Once such level is reached, storage payments shall end. Authority for a call price is eliminated, as well as all references to minimum or maximum quantities of grain to be stored under the program.

The Secretary of Agriculture, however, could call reserve loans if he determines that an emergency exists which requires that the commodity be made available to meet urgent domestic or international needs and he reports his determination to the House and Senate Agriculture Committees 14 days before the call.

Finally, this section prohibits the Commodity Credit Corporation from selling any of its stocks of wheat or feed grains at less than 130 percent of the release price whenever the producer storage reserve program is in effect.

Section 902. Conforming amendment.

Section 902 provides that, if a producer storage reserve program is in effect for the commodity, wheat or feed grains held in a gasohol feedstock reserve established under section 208 of the Agricultural Trade Suspension Adjustment Act of 1980 shall not be disposed of by the Secretary of Agriculture at a price less than 130 percent of the release price, except that the commodity may be sold at not less than the release price if such commodity is to be used in the production of alcohol for motor fuel.

Section 903. Farm storage facility loans.

Section 903 extends the current authority for farm storage facility loans through the end of fiscal year 1985.

TITLE X—MISCELLANEOUS

Section 1001. Special grazing and hay program.

Section 1001 extends current authority for the special grazing and hay program through crop year 1985.

Section 1002. Enforcement under the Wheat and Wheat Foods Research and Nutrition Education Act.

Section 1002 provides for administrative penalties and sanctions (with judicial review thereof) in the administration and enforcement of the provisions of the Wheat and Wheat Foods Research and Nutrition Education Act.

Section 1003. Department of Agriculture advisory committees.

Section 1003 repeals title XVII of the Food and Agriculture Act of 1977 which established requirements relating to the creation, operations, and activities of USDA advisory committees. The provisions of current law dealing with the creation, operations, and activities of all federal advisory committees continue to apply.

Section 1004. Farm income protection insurance program study.

Section 1004 directs the Secretary of Agriculture to appoint a special task force for purposes of studying the concept of farm income protection insurance and reporting to Congress its findings regarding the suitability of such a concept as the basis for an alternative to the current price support, income maintenance, and disaster assistance programs offered by USDA.

Section 1005. State agency authority for grain inspections at export locations.

Section 1005 permits the Administrator of the Federal Grain Inspection Service to delegate authority, under certain circumstances, to a State agency to perform official inspection at export port locations within the State if such State agency performed official inspections under the U.S. Grain Standards Act at an export port location at any time before July 1, 1976, and such State agency is presently designated to perform official inspections at locations other than export port locations.

TITLE XI—AGRICULTURAL EXPORTS

Section 1101. Agricultural Export Credit Revolving Fund.

Section 1101 establishes in the U.S. Treasury an Agricultural Export Credit Revolving Fund to be used for purposes of making short term commercial loans to foreign purchasers of U.S. agricultural commodities and intermediate term commercial loans for the construction or acquisition of facilities in foreign countries that create a new demand for U.S. agricultural commodities. The seed money for the fund is provided through appropriations of $300 million, $500 million, and $700 million in fiscal years 1982, 1983, and 1984, respectively. Repayments of loans made under USDA's direct export credit programs shall be included in the Fund. The Secretary of Agriculture is required to make annual reports to Congress detailing the operations of the Fund. Authority for the Fund expires at the end of fiscal year 1985.

Section 1102. Congressional veto of bilateral commodity supply agreements.

Section 1102 provides for a two-House Congressional veto of any bilateral international agreement, other than a treaty, which involves a commitment on the part of the U.S. to assure access by foreign countries or instrumentalities thereof to U.S. agricultural commodities on a commercial basis.

Section 1103. Special standby export subsidy program.

Section 1103 directs the Secretary of Agriculture to formulate a special standby export subsidy program for purposes of neutralizing the export subsidy programs employed by foreign countries to stimulate sales of their agricultural commodities in third-country markets. The Secretary is required to implement such an export subsidy program only after the President (1) makes a determination that sales of U.S. agricultural commodities are being substantially adversely affected by the acts of foreign countries; (2) makes a determination that such acts include the use of export subsidies; (3) fails to reach a mutually acceptable resolution through consultations with the foreign country concerned; and (4) is authorized under the dispute settlement procedures specified in international agreements (if applicable) to undertake an export subsidy program to counter the export subsidies employed by the foreign country concerned.

Section 1104. Agricultural embargo relief.

Section 1104 obligates the Secretary of Agriculture to mitigate the adverse effects on prices generated by the imposition of foreign policy or national security export controls on agricultural commodities.

If such agricultural export controls are imposed other than in connection with a prohibition of all U.S. exports to the country concerned and if the Secretary determines that prices for the agricultural commodities are adversely affected thereby, the Secretary shall initiate one or more of the following measures: creation of a gasohol feedstock reserve (as already provided for under current law), creation of a food security reserve (as already provided for under current law).

or payments to producers which make up the difference between pre-embargo and post-embargo prices. The pre-embargo price shall be the average market price of the commodity involved during the thirty days immediately prior to the date of imposition of the export controls.

The post-embargo price shall be the average market price of the commodity involved during the duration of the export controls or the twelve-month period immediately following the date of imposition of the export controls, whichever is shorter. Such payments will be made on the quantity of commodity sold by the producer for the period of time from the imposition of the export controls until the export controls are lifted or for a period of twelve months after the date of imposition of the export controls, whichever is shorter.

Section 1105. P.L. 480 extension.

Section 1105 extends the current authority for P.L. 480 programs through December 31, 1985.

TITLE XII—FOOD STAMPS

Section 1201. Partial restoration of the purchase requirement; increase in the benefit reduction rate.

The purchase requirement, eliminated by the Food Stamp Act of 1977, required recipient households to spend a portion of their incomes on food by requiring them, as a condition of participation, to purchase the food stamps which had a greater value—"bonus"—than the purchase requirement. This section restores the purchase requirement mechanism to the food stamp program as in the previous program, but exempts the elderly, blind, and disabled. Additionally, the section changes the present assumption that 30% of household income is spent for food by increasing this to 33% in order to more accurately reflect the percentages of income which low-income households usually spend. This figure—the benefit reduction rate—is the percentage by which food stamp benefits are reduced for each additional dollar earned by the household and would generally be the amount paid for food stamps under the reinstituted purchase requirement.

Section 1202. Splitting of households; boarders and related members.

Section 1202 excludes all boarders from participation in the food stamp program. Similarly, this section requires household members related to one another to apply as one household with the exception that elderly parents (60 years of age or older) may apply separately.

Section 1203. Eliminates dine-out.

This section eliminates the current provision of law which allows certain categories of food stamp recipients to use food coupons to pay for meals in authorized restaurants.

Section 1204. Actual, rather than projected, inflation.

This section repeals the liberalized indexing formula adopted in 1980 for determining annual adjustments in the Thrifty Food Plan. The 1980 Amendments would calculate that adjustment based on nine months of actual increases in the cost of the Thrifty Food Plan plus three months of projected, or anticipated, increases. This section will adjust the cost of the Plan on January 1 based on cost increases for the twelve months ending the preceding September 30.

Section 1205. Individualized allotments.

This section allows the Secretary of Agriculture to make adjustments in the value of the Thrifty Food Plan to reflect more accurately the food needs of individuals of different ages and sex.

Section 1206. Inclusion of low income energy assistance as income.

This section allows low income energy assistance cash payments to be counted as income for purposes of determining food stamp benefits.

Section 1207. National workfare program.

This section requires that each State establish a workfare program whereby able-bodied recipients must be available for community service work as a condition for participation in the food stamp program.

Section 1208. Adjustments of deductions.

This section freezes the standard deduction at the current level of $85 per month and excess shelter and dependent care deductions at $115 per month, eliminating the annual inflation adjustment. The value of the Thrifty Food Plan and the poverty guideline will continue to be adjusted annually for inflation, however. The deductions for Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands will be frozen at present levels of $145, $120, $170, $50, $75 for standard deductions, respectively, and $200, $165, $140, $40, and $85 for excess shelter, respectively.

Section 1209. Third party payments.

This section clarifies current law that households are not allowed to receive deductions from gross income for expenses that are paid on behalf of the household by a third party.

Section 1210. Disqualification from participation.

This section increases from 3 to 12 months the period of disqualification from participation following determination of fraud by a State agency. The section also sets the period of disqualification at a minimum of twelve months in the case of an individual found guilty by a court of fraud involving food stamp coupons. It also requires repayment of double the amount of coupons fraudulently received before a person is eligible to participate again in the program.

Section 1211. Work registration.

This section changes the work registration provisions to lower the age of a dependent child (from twelve to six) which exempts the mother of that child from the requirement to register for work under the requirements set forth under the Food Stamp Act.

Section 1212. Strikers.

This section prohibits a household from becoming eligible for food stamps—if not already so eligible—as a result of a member going on strike, or from receiving increased benefits as a result of that member going on strike.

Section 1213. Gross income limitation at poverty line.

This section limits participation of non-working recipients (except elderly, blind, and disabled) to those with incomes not in excess of 100 percent of the poverty level. Households with earned income (again excluding elderly, blind, and disabled) would be permitted to earn 115 percent of the poverty level without being disqualified from participation in the program.

Section 1214. School lunch overlap.

This section eliminates the duplication between the free school lunch and food stamp programs by reducing the value of the allotment a household is entitled to receive based upon the number of children receiving school lunches and the per person, per meal value of the Thrifty Food Plan for a family of eight. Additionally, the section increases the benefit reduction rate from 30 to 33 percent for those not affected by the reinstatement of the purchase requirement (the elderly, blind, and disabled).

Section 1215. Pro-rating of first month's benefits.

This section requires that the first month's food stamp benefits be pro-rated to reflect the portion of the month for which assistance is received.

Section 1216. Elimination on exclusion of food stamps as income.

This section repeals the present law provision which prevents food stamps from being counted as income for purposes of determining eligibility in public assistance or welfare programs.

Section 1217. Outreach.

This section eliminates all Federal funding under the Food Stamp Act for food stamp outreach.

Section 1218. Restoration of wrongfully denied benefits.

This provision would limit the period for recovering benefits wrongfully denied or terminated to 45 days from the date a request for restoration of benefits is received by the State agency.

Section 1219. Reauthorization.

This section increases the authorization level for FY 81 to $10,439,276,000 and sets future authorization levels at $11,341,152,000 for FY 82; $11,738,154,000 for FY 83; $11,674,366,000 for FY 84 and; $11,898,594,000 for FY 85.

Section 1220. Commodity distribution programs: extension of authorities, penalties for fraud, and miscellaneous provisions.

This section extends through fiscal year 1985 the Secretary's authority to purchase and distribute commodities to institutions, supplemental feeding programs, disaster areas, summer camps for children, needy families on Indian reservations and the U.S. Trust Territory of the Pacific Islands.

The section also provides for penalties for fraudulent misuse of commodities, and extends through fiscal year 1985 the authorization of the Secretary to pay administrative costs of State and local agencies under the commodity supplemental food program.

Section 1221. Liberalized deductions.

This section repeals the increases in dependent care deductions for working adults and medical deductions for the elderly and disabled which are due to take effect on October 1, 1981.

Section 1222. Effective date.

This section provides that the amendments made by this title shall become effective on January 1, 1982, except that the requirement that the Secretary promulgate regulations under the workfare provision, the changes in authorizations for appropriations, and the repeal of the expansion of certain deductions shall be effective upon enactment.

TITLE XIII—AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY

Section 1301. Reaffirmation of Federal-State partnership.

Section 1301 reaffirms the unique partnership arrangement existing between the Federal Government and the States in agricultural research, extension, and teaching. The section broadens the purposes of the Act to state that the productivity and efficiency of the food and agricultural sciences may be enhanced by the strengthening of the Federal-State partnership in agricultural research, extension, and teaching; reducing unnecessary regulations; and improving cooperation in the food and agricultural sciences.

Section 1302. Definitions.

Section 1302 sets forth clearer definitions of the terms: agricultural research, food and agricultural sciences, cooperating forestry schools, teaching, and state cooperative institutions and state cooperative agents.

Section 1303. Joint Council on Food and Agricultural Sciences.

Section 1303 extends the term of the Joint Council on Food and Agricultural Sciences from five to ten years. It fixes the number of members of the Joint Council at 25 members. The section emphasizes that regional differences will be considered in selecting members of the Joint Council. At least one-half of the members appointed by the Secretary shall be from land-grant colleges and universities and State agricultural experiment stations. Section 1303 redirects the primary purposes of the Joint Council from that of coordinating programs to that of bringing about more effective agricultural research, extension, and teaching. It also requires that existing state cooperative insti-

tutions provide regional planning and coordination.

The section requires the Joint Council to submit its reports to the Secretary on June 30 instead of December 31 and changes the nature of the report to more clearly recommend priorities, suggested areas of responsibilities and financial levels for such research, extension and teaching programs.

Finally, this section exempts the Joint Council from the provisions of the Federal Advisory Committee Act.

Section 1304. National Agricultural Research and Extension Users Advisory Board.

Section 1304 extends the term of the National Agricultural Research and Extension Users Advisory Board from five to ten years. It also increases the membership of the Board from twenty-one to twenty-five, allowing an additional four producer members from various geographic areas to be appointed to the Board; and it provides that the terms of Board members shall be staggered.

Finally, the section changes the timing of the Board's recommendation to the Secretary from October 31 to July 1, and its report to Congress from March 1 to February 20.

Section 1305. Federal-State partnership.

Section 1305 enumerates the primary statutes that effect the Federal-State partnership arrangement; removes contracts, grants, and cooperative agreements made by the Secretary to further the Federal-State partnership from section 3648 of the Revised Statutes (31 U.S.C. 529) and section 3709 of the Revised Statutes (41 U.S.C. 5); and allows the Secretary to convey title to property purchased with funds under such contracts, grants and cooperative agreements if that will further the objectives of the Department of Agriculture.

Section 1306. Secretary's report.

Section 1306 requires the Secretary to submit his report on the Nation's agricultural research, extension, and teaching activities to the President and Congress on January 1 instead of February 1.

Section 1307. Support for the Joint Council and Advisory Board.

Section 1307 requires the executive director of the Joint Council and the Users Board to be full time and provides for an executive secretary for both the Council and the Board.

Section 1308. Additional Assistant Secretary of Agriculture.

Section 1308 creates an additional Assistant Secretary of Agriculture to be appointed by the President, with the advice and consent of the Senate, who would carry out such duties as may be prescribed by the Secretary of Agriculture.

Section 1309. Program of competitive, special, and facilities grants for agricultural research.

Section 1309 amends section 2 of the Act of August 4, 1965 (79 Stat. 431; 7 U.S.C. 450i) to more clearly specify the meaning of high priority research within subsection (b) of that Act; to extend the authorization of appropriations for competitive research grants through fiscal year 1987; to make research foundations established by land-grant colleges eligible for special grants under subsection (c) of that Act; and to change the emphasis of facilities grants from purchasing equipment, supplies and land to renovating, refurbishing or retrofitting existing buildings and spaces, and to include cooperative forestry schools and 1890 colleges as institutions eligible to receive these facilities grants.

Section 1310. Amendments to the Research Facilities Act of 1963.

Section 1310 extends the authorization of appropriations under the Research Facilities Act of 1963 for another five years (from FY 1983 to FY 1987).

Section 1311. Federal support of higher education in the food and agricultural sciences.

Section 1311 requires the Secretary of Agriculture to promote and develop a higher education program in the food and agricultural sciences and obligates the Secretary of Education to relinquish the remainder of his responsibilities under the Bankhead-Jones Act not transferred to the Secretary of Agriculture by the Food and Agriculture Act of 1977.

This section further authorizes the Secretary to make grants to land grant colleges and universities and other colleges and universities having a demonstrable capacity to carry out food and agriculture teaching to strengthen institutional capacity, attract and educate students in food and agricultural sciences, design innovative programs, and facilitate cooperative agreements.

The Secretary would also be authorized to make competitive grants to colleges and universities to develop and conduct unique and specialized programs. Section 1311 also extends the authorization of appropriations for higher education grants for another five years (from FY 1983 to FY 1987).

Section 1312. Transfer of functions.

Section 1312 transfers the Morrill-Nelson Act agricultural teaching funds and the accompanying functions from the Secretary of Education to the Secretary of Agriculture.

Section 1313. Alcohol and industrial hydrocarbon.

Section 1313 extends the authorization of appropriations for research grants in the production and marketing of alcohol and industrial hydrocarbons from agricultural products for another five years and increases the amount of funds an eligible institution may receive over the full ten-year period of the authorization from $3 million to $5 million.

Section 1314. Nutrition education program.

Section 1314 establishes a formula by which funds shall be distributed for the nutrition education program. The formula stipulates that one percent of the funds will be for administration, ten percent to be distributed equally among all States and the remainder to be allocated in relation to the amount of population in the State living at or below 125 percent of the poverty level. In addition, if future funding is reduced from current levels, such a reduction will be a proportioned reduction in appropriations.

Section 1315. Animal health and disease research definitions.

Section 1315 defines the term eligible institution under the animal and health and disease research program to mean State agricultural experiment stations and accredited colleges of veterinary medicine.

Section 1316. Animal Health Science Research Advisory Board.

Section 1316 extends the term of the Animal Health Science Research Advisory Board from 5 to 10 years.

Section 1317. Appropriations for research on national or regional problems.

Section 1317 requires the Secretary to establish priority lists of animal health and disease problems of national or regional significance and to make grants to support research on specific national or regional animal health or disease problems on the basis of such priorities, to the extent feasible.

Section 1318. Extension at 1890 land-grant colleges including Tuskegee Institute.

Section 1318 makes technical changes in the provisions authorizing appropriations for extension activities at 1890 land-grant colleges, including Tuskegee Institute.

Section 1319. International agricultural research and extension.

Section 1319 requires the Secretary of Agriculture to utilize the land-grant colleges and universities, and other colleges and universities, to develop linkages among these institutions, the Federal government, and international research centers in order to serve developed and underdeveloped countries to improve food and agricultural progress worldwide. The section also authorizes the Secretary to provide, on a reimbursable basis, technical assistance to such American institutions carrying out these activities.

Section 1320. Authorization for appropriations for existing and certain new agricultural research programs.

Section 1320 extends the authorization for appropriations for agricultural research and agricultural experiment station programs for an additional five years (from FY 1983 to FY 1987).

Section 1321. Authorization for appropriations for extension programs.

Section 1321 extends the authorizations for appropriations for cooperative extension programs for an additional five years (from FY 1983 to FY 1987).

Section 1322. Restriction on treatment of indirect costs.

Section 1322 provides that funds made available by the Secretary of Agriculture under the Hatch Act, the McIntire-Stennis Act, grants for research on animal health and disease (sections 1433 and 1434 of Title XIV of the Food and Agriculture Act of 1977), and subsections (e)(2) and subsection (d) section 2 of the Act of August 4, 1965 (7 U.S.C. 450i) shall not be subject to reduction for indirect costs incurred by the recipient. This section also provides that indirect cost shall not be charged against funds made available by the Secretary under cooperative agreements with state institutions if the project is of mutual interest to all the parties and they all contribute to the cooperative agreement involved.

Section 1323. Cooperative State forestry.

Section 1323 amends the McIntire-Stennis Act of 1962 to make minor changes, to provide for appointment by the Secretary of Agriculture of a 16-member forestry council to advise the Secretary in administering the cooperative State forestry program, and to expand the factors to be considered in making apportionment of funds under that Act.

Section 1324. Additional agricultural research support.

Section 1324 amends section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c), to make funds available under that Act from customs duties on agricultural products, also available to support agricultural research, extension, and teaching programs.

Section 1325. Excess Federal equipment.

Section 1325 amends the Federal Property and Administrative Services Act of 1949 to exempt from the general prohibition on Federal agencies obtaining excess personal property for purposes of furnishing such property to their grantees property furnished by the Secretary of Agriculture to State and county extension services, State agricultural experiment stations and land-grant colleges and universities.

TITLE XIV—RESOURCE CONSERVATION

Subtitle A—Special areas conservation program

Section 1401. Findings.

Section 1401 sets forth the reasons for establishing a special areas conservation program.

Section 1402. Formulation and implementation of special areas conservation program.

Section 1402 requires the Secretary of Agriculture to establish a program for the conservation of soil, water, and related resources in special, designated areas which have severe soil and water management problems. A conservation plan containing a strategy for dealing with the particular problem is developed with the approval of the Secretary and the local soil and water conservation district. This plan becomes the basis for long-term contracts which may be entered

into by the Secretary and land owners in the designated area. The land owner agrees to abide by the conservation plan in exchange for financial assistance from USDA.

Section 1403. Program to be directed at specific problems.

Section 1403 provides that the program shall be applicable to areas having severe erosion and water management related problems, as designated by the Secretary of Agriculture. The basis for area designation and funding is an assessment report prepared by the Secretary of the problems, objectives and priorities for treatment in such area. Such report shall be developed by existing USDA employees and local people and shall consider the extent to which existing programs contribute to the overall program objectives.

Section 1404. Contract limitations.

Section 1404 provides that special areas may be designated during a period of 10 years after enactment of this subtitle and that the maximum length of a contract is 10 years.

Section 1405. Notification of committees of Congress.

Section 1405 requires the Secretary of Agriculture to submit a copy of the report described in section 1403 which is the basis for area designation to the Senate and House agriculture committees.

Section 1406. Utilization of services and facilities.

Section 1406 authorizes the Secretary of Agriculture to use existing delivery systems in carrying out the provisions of this subtitle, including ASCS committees, soil and water conservation districts, State or local agencies, and the Commodity Credit Corporation.

Section 1407. Improvement of technology.

Section 1407 authorizes funding for needed research as a part of the conservation treatment package for the designated area.

Section 1408. Rules and regulations.

Section 1408 authorizes the Secretary of Agriculture to prescribe regulations as may be necessary to carry out the provisions of this subtitle.

Section 1409. Authorization for appropriations.

Section 1409 authorizes appropriations as may be necessary to carry out the special areas conservation program. Program funding will be based on Congress's annual appropriation.

Section 1410. Report to Congress.

Section 1410 requires the Secretary to evaluate the special areas program and to report such evaluation to Congress by January 1, 1986, and at each five-year interval thereafter.

Section 1411. Protection of participants.

Section 1411 prevents a participant in the program under this subtitle from being disqualified for other programs administered by the Secretary or having their benefits reduced under those programs.

Subtitle B—Amendments to the small watershed and resource conservation and development programs

Section 1412. Amendments to small watershed program.

Section 1412(1) makes all Indian tribes eligible to become sponsors of small watershed projects; (2) permits the Federal government to share the costs of mitigating fish and wildlife habitat losses resulting from small watershed projects when Federal regulations require such mitigation; (3) speeds up the review process for small watershed projects by raising the approval authority of the Secretary of Agriculture from $1,000,000 to $3,000,000; and (4) allows an energy generating component of a small watershed project to be considered in the cost-benefit ratio of the project.

Section 1413. Amendment to resource conservation and development program.

Section 1413 allows an energy generating component of a resource conservation and development project to be considered in the cost-benefit ratio of the project.

Subtitle C—Volunteers for conservation

Section 1414. Authorization for use of volunteers.

Section 1414 authorizes the use of volunteers for conservation work without regard to civil service requirements. Volunteers shall not be paid, but the Secretary of Agriculture may provide incidental expenses such as transporting volunteers to the work site, and providing lodging and subsistence at the work site.

Section 1415. Status as Federal employees.

Section 1415 provides that volunteers shall not be deemed to be Federal employees and thus shall not be subject to Federal employee regulations. However, the volunteers shall be deemed to be Federal employees for purposes of receiving compensation for work-related injuries and for purposes of the Federal Tort Claims Act.

Section 1416. Authorization for appropriations.

Section 1416 authorizes appropriations as may be necessary to carry out the provisions of this subtitle.

TITLE XV—EFFECTIVE DATE

Section 1501. Effective date.

Section 1501 provides that the Act shall become effective October 1, 1981, except as otherwise provided in the Act.

By Mr. HEINZ:

S. 885. A bill to amend sections 593, 7701, and 856 of the Internal Revenue Code with respect to tax treatment of loans secured by stock in cooperative housing corporations; to the Committee on Finance.

TAX TREATMENT OF LOANS FOR COOPERATIVE HOUSING CORPORATIONS

● Mr. HEINZ. Mr. President, I am introducing a bill today that would allow loans secured by stock in cooperative housing corporations to be bought and sold on the secondary mortgage market in the same way as other home loans. The 96th Congress authorized the Federal Home Loan Mortgage Corporation to include cooperative membership loans in its secondary market. Due to several technical provisions of the Internal Revenue Code, the Mortgage Corporation has not been able to begin its cooperative membership loan program. The proposed legislation eliminates these barriers.

Congress has long recognized the need for the financing of cooperative membership shares. In 1974, Congress authorized HUD to insure membership loans in cooperatives whose blanket mortgages are insured by the Department. In 1978, the Federal Home Loan Bank Board's charter was amended, allowing federally chartered savings and loans to make cooperative membership loans on terms similar to other types of home loans. Subsequently, in 1979 and 1980 respectively, the Mortgage Corporation and the Federal National Mortgage Association were authorized to include cooperative membership loans in their secondary markets.

Unfortunately, very few cooperative membership loans have been made. It is understandable in today's mortgage market that few lending institutions are willing to tie up scarce funds in long-term loans. Hence the secondary mortgage market is a necessary complement to any successful home loan program. As Congress determined when it passed the original authorizing legislation 2 years ago, the Mortgage Corporation's cooperative membership loan purchase program is an essential component in making competitive loans available to cooperative homeowners.

The Mortgage Corporation acts as a secondary market for conventional mortgage loans by purchasing these loans and selling securities representing ownership interests in pools of loans. The Corporation's major mortgage sales instrument is its participation certificate. For participation certificates to continue to be uniformly acceptable to purchasers, it is necessary for all loans backing the certificates to qualify under section 593 and section 7701 as well as section 856 of the Internal Revenue Code as real property. These sections of the code offer savings associations and real estate investment trusts tax incentives to invest in real estate.

Technically, in a cooperative housing corporation, real property is held by the corporation, not by members of the cooperative. The proposed legislation, first, amends Internal Revenue Code section 593 to allow cooperative membership to qualify as real property for the purpose of determining reserves of bad debts of savings associations, second, amends Internal Revenue Code section 7701 to allow cooperative membership loans to be included in the assets test for savings associations to qualify as "domestic building and loan associations" and third, amends Internal Revenue Code section 856 to put cooperative loans on the same footing with other home loans with regard to investment by real estate investment trusts.

The proposed legislation will have no revenue impact. Savings associations and real estate investment trusts have no difficulty meeting requirements to invest in real property. The proposed legislation will not increase the tax incentive offered. Rather, it will increase the likelihood that cooperative memberships are financed by savings and loans.

The popularity of cooperative housing, especially as a moderate-cost alternative, is on the increase. Cooperative housing provides a feasible and financially sound way for families of all income ranges to become homeowners. Tenant-sponsored cooperative conversions offer apartment dwellers a way of remaining in their apartments and neighborhoods, while gaining the greater sense of security and permanence which comes from homeownership.

Mr. President, Congress enacted the Mortgage Corporation's cooperative membership loan purchase program 2 years ago. I urge my colleagues to give this bill their favorable consideration, and to act promptly so that financing can be readily available for the purchase of cooperative membership shares. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—TAX TREATMENT OF LOANS SECURED BY SHARES OF STOCK IN COOPERATIVE HOUSING CORPORATIONS

SEC. 101. Section 593(d)(1) of the Internal Revenue Code of 1954 is amended by inserting after "proceeds of the loan" the following: "or secured by stock in a cooperative housing corporation (as defined in Section 216)".

SEC. 102. Section 7701(a)(19)(C)(v) of the Internal Revenue Code of 1954 is amended by inserting after "nonprofit basis for residents," the following: "stock in cooperative housing corporations (as defined in Section 216),".

TITLE II—TAX TREATMENT OF INVESTMENT BY REAL ESTATE INVESTMENT TRUSTS IN LOANS SECURED BY STOCK IN COOPERATIVE HOUSING CORPORATIONS

SEC. 201. Section 856(c)(6)(B) of the Internal Revenue Code of 1954 is amended by inserting after "(including interests in real property and interests in mortgages on real property)" the following: ", stock in a cooperative housing corporation (as defined in Section 216)".

SEC. 202. Section 856(c)(6)(C) of the Internal Revenue Code of 1954 is amended by inserting after "options to acquire land or stock in a cooperative housing corporation improvements thereon," the following: "in a cooperative housing corporation (as defined in Section 216),".●

By Mr. DURENBERGER (for himself, Mr. PACKWOOD, Mr. HATFIELD, Mrs. KASSEBAUM, Mr. LEVIN, Mr. HEINZ, Mr. MOYNIHAN, Mr. MELCHER, Mr. MATSUNAGA, and Mr. TSONGAS):

S. 888. A bill to provide effective programs to assure equality of economic opportunities for women and men, and for other purposes; to the Committee on Finance.

ECONOMIC EQUITY ACT

Mr. DURENBERGER. Mr. President, this morning I am introducing, on my own behalf and on behalf of Senators PACKWOOD, HATFIELD, KASSEBAUM, LEVIN, HEINZ, MOYNIHAN, MELCHER, and MATSUNAGA a bill to provide equal economic opportunities for women.

From the day that Isabella sold her jewels to finance the Columbus voyage, women have made unique contributions to the quality of American life. Unfortunately, we have been slow to give women a fair opportunity to share the benefits of the society they have worked to create.

It took more than a century for women in many parts of the country to gain the basic right to enter contracts and own property.

It took 143 years for women to win the right to vote.

Even in 1980, more than two centuries after the Declaration of Independence, women are still restrained by a system of laws and regulations that deny them equal access to economic opportunities.

Statistics tell some of the story. Women earn only 59 percent of what men earn—and that percentage has actually decreased over the past 15 years. Of the 441 occupations listed by the U.S. Census Bureau, women are concentrated primarily in the 20 lowest paid job classifications. One out of every three families which depends on a woman for its sole source of support lives in poverty. In fact, although women comprise only 42 percent of the labor force, they comprise 66 percent of those living in poverty.

This is the kind of disparity that should shock the conscience of any nation founded on the principle of equal opportunity. But the real tragedy is that Federal laws and regulations are a primary, if not the primary barrier to economic opportunity for millions of women. While we pride ourselves on being a nation of laws rather than of men, we are still, to a large extent, a nation of laws made by men. No woman has ever served on the Supreme Court. Only 22 have ever served on the Federal bench in its 200-year history.

There have been 1,716 Senators since the beginning of the Republic; only 12 have been women. The result has been a pattern of Federal policies that seem neutral on their face, but when applied to real world situations create deep disparities between the opportunities available to men and those available to women. Statistics tell only part of the story. The real impact of this legal discrimination is measured in the way it affects the lives of average people. As persuasive as broad statistics may be, the real impact of these provisions on the personal lives of women makes the most telling case for the legislation we introduce this morning.

Because she enters the work force at an earlier age, the average woman must work several years longer than the average man to gain vested right to pension benefits.

Present law permits a working husband to unilaterally terminate his wife's survivorship benefits. The wife has no appeal, and she is not entitled to notice.

Discrimination in Federal regulations is so pervasive that the interim report of the Justice Department task force on sex discrimination required 346 pages just to summarize its findings.

We talk of marriage as an equal partnership. But for retirement and inheritance tax purposes, a working husband's income is considered his income, and the noneconomic contribution of the traditional housewife counts for nothing. This is true under laws authorizing individual retirement accounts, which allow the working husband to claim the benefits of that account but deny the same right to the nonworking wife.

It is equally true under Federal estate tax laws, which require farm widows to pay staggering inheritance taxes to preserve property these women worked side by side with their husbands to develop. The widow's tax ignores the reality of the "family farm." The word "family" is as essential as the word "farm," and labors to yield a stable family are as important as labors to increase the yield of the land. There is no real way to measure the degree to which the burden of the widow's tax has contributed to the 50-percent decline in the number of family farms that took place during the 1970's. But anyone who has lived in rural America can bear witness to the impact of the tax on the residents of their community.

A married couple with two children receives preference over a widow with a family of the same size in qualification for Federal farm assistance.

Despite a decade of divorce law reform, wives still have no claim whatsoever to pension survivorship benefits they accrued throughout 10, 15, or 20 years of marriage. Those benefits stay with the husband and often end up flowing to a second wife. Courts are powerless to apportion those benefits even where all parties request that it be done.

As incredible as it may seem, military inheritance laws continue to give a preference to brothers over sisters, fathers over mothers, sons over daughters. Although substantial progress has been made in this respect, statutes governing promotion opportunities continue to differentiate between men and women. And most women enlistees continue to be focused in the lowest grades and lowest skilled MOS.

Despite extreme publicity surrounding child support and alimony awards, the economic benefits granted women in divorce proceedings go uncollected in a staggering 50 percent of the cases.

Finally, society has done very little to grant displaced homemakers the kind of assistance given other disadvantaged segments of the population. Nor has it recognized the economic benefits that would flow from fostering the kind of day-care system that would allow millions of women who desire to work to enter the mainstream of the American economy.

Just about every woman in this country will face one or more of these barriers at some time in her life. For most, they form a succession of roadblocks that progressively steal the quality of economic opportunity that most of us take for granted. Consider the life history of an all too typical American woman:

Enters the labor force at 18: Discovers she must work 7 years to qualify for the same pension rights that most men acquire after 4 to 5 years of work.

Marries and bears children: Her ability to pursue a career—if she wants to do so—is restricted by the cost and availability of day care. By remaining in the home, she forfeits her right to qualify for individual retirement benefits.

She divorces at age 40: Husband unilaterally terminates her survivorship benefits. She faces no more than a 50-percent chance of collecting maintenance or child support granted in the divorce decree. She enters the labor force with few skills and little job experience. She cannot qualify for programs such as the targeted job tax credit that are designed to assist disadvantaged groups overcome barriers to labor force entry.

As an unmarried household head, she is entitled to a standard deduction of $2,300—compared to the $3,400 that applies to married couples and surviving spouses.

Or she is an agricultural wife who suffers the death of her husband after 20 years of marriage. If the husband's death was accidental, she may lose her survivorship benefits if he elected to claim those benefits within 2 years of his death. She must pay estate taxes on the farm she contributed equally to develop. She cannot qualify for any of the remedial provisions in the estate tax law because she was a nonworking wife, and made no economic contribution to the farm. If she chooses to try and keep the farm, she finds herself at the bottom of the preference list for Federal farm credit assistance.

These are only a few examples, but they are a representative sample of the economic obstacles that confront American women throughout their lives. It is a situation that cannot endure in a nation of conscience, and a situation we intend to change.

The bill I introduce this morning—the Economic Equity Act of 1981—is the most comprehensive economic rights package ever introduced in the U.S. Senate. It will not resolve every source of economic discrimination that exists in this country, but it will insure that Government plays a constructive role in removing roadblocks to economic opportunity, rather than a destructive role in creating or maintaining those roadblocks.

The 75-page bill alters Federal law in 7 critical areas—tax and retirement rights, child and dependent care, military service, farm credit and agricultural taxation, accessibility of insurance, maintenance and child support, and the Federal regulatory process. Its provisions—which I will detail more fully in a moment—were developed by myself, Senator PACKWOOD and Senator HATFIELD over a 12-month period. In that development process we are indebted to dozens of women's groups from Minnesota, Oregon and throughout the Nation, who gave their time freely to develop innovative solutions to the economic problems that have plagued our society throughout our lifetimes. I want to offer special gratitude to the groups that endorsed the bill prior to its introduction.

Those groups include the National Women's Political Caucus, the Women's Equity Action League, the National Education Association, Working Women, the National Council of Jewish Women, the Older Women's League, the Organization of Chinese American Women, the American Association of University Women, the National Council of Negro Women, Inc., the National Federation of Business and Professional Women's Clubs, Displaced Homemakers Network, Inc., the National Hookup of Black Women, Inc., and the League of Women Voters. I ask unanimous consent that letters of endorsement from these groups be printed in full in the RECORD at the conclusion of this statement.

The Economic Equity Act is intended to embody the best available thinking on how to address the economic inequalities confronting American women. There are areas, like social security, which the bill does not address. But in bypassing these areas for the moment, we are not deprecating their importance. We are only suggesting that workable solutions to these problems have not yet been refined to the point where we can begin legislative action. We hope to use the EFA to stimulate discussion in these areas, and develop new approaches that can be embodied in the bill in future months.

The Economic Equity Act is a challenge both to the Congress and to the conscience of the American people. We are truly at a turning point in American history, a point where the Nation is finally taking the bitterly difficult actions necessary to restore the strength of an economy that has been the standard of the world for a century and a half. But "America's New Beginning" must be a beginning for all Americans. Every person in this Nation suffers a personal loss when the economic contribution of half our population is restrained by archaic laws and regulations. The time has truly come for us to begin anew, and to insure that in America's second 200 years, we will indeed be one Nation, with equal opportunity for all.

I ask unanimous consent that the bill and a summary be printed in full in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 888

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Economic Equity Act".

TITLE I—TAX AND RETIREMENT MATTERS

DEDUCTION FOR CONTRIBUTIONS TO INDIVIDUAL RETIREMENT PLANS

SEC. 101. (a) GENERAL RULE.—Paragraph (2) of section 219(c) of the Internal Revenue Code of 1954 (relating to married individuals) is amended to read as follows:

"(2) MARRIED INDIVIDUALS.—

"(A) COMPUTATION OF MAXIMUM DEDUCTION.—The maximum deduction under subsection (b)(1) shall be computed separately for each individual who is married (within the meaning of section 143(a)).

"(B) COMMUNITY PROPERTY LAWS.—This section shall be applied without regard to any community property laws.

"(C) HIGHER COMPENSATION USED.—In the case of a married individual who has no compensation or whose compensation is less than that of the individual's spouse, the maximum deduction under subsection (b)(1) shall be determined as if such individual's compensation were the same as that of such individual's spouse.".

(b) TREATMENT OF ALIMONY AS COMPENSATION.—Paragraph (1) of section 219(c) of such Code (defining compensation) is amended by inserting before the period at the end thereof the following: "and periodic payments includible in gross income under section 71".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1980.

JOINT AND SURVIVOR ANNUITY REQUIREMENTS

SEC. 102. (a) AMENDMENTS TO ERISA.—

(1) Section 205 of the Employee Retirement Income Security Act of 1974 (relating to joint and survivor annuity requirement) is amended by striking out subsections (b) and (c) and inserting in lieu thereof the following:

"(b) A plan which provides that the normal form of benefit is an annuity shall, with respect to any participant who under the plan is credited with at least 10 years of service for vesting purposes under section 203 and who dies before the annuity starting date, provide a survivor's annuity for the participant's spouse—

"(1) which begins on the annuity starting date (determined as if the participant had lived until the earliest retirement age under the plan, or the participant's actual date of death if later, and had retired on such date prior to death), if the spouse is living on such date, and

"(2) the payments under which are not less than the payments which would have been made under the survivor's annuity to which such spouse would have been entitled if the participant had terminated employment on his date of death, had survived and retired on such annuity starting date, and had died on the day following such date.".

(2) Subsection (e) of section 205 of such Act is amended to read as follows:

"(e) A plan shall not be treated as satisfying the requirements of this section unless, under the plan—

"(1) each participant has a reasonable period (as prescribed by the Secretary of the Treasury by regulations) before the annuity starting date during which he may elect in writing (after having received a written explanation of the terms and conditions of the joint and survivor annuity and the effect of an election under this subsection) not to take such joint and survivor annuity,

"(2) such an election will not be effective unless the spouse of the individual (as of the time such election is made) consents in writing to such an election and such consent is witnessed by a plant representative or a notary public.".

(3) Subsection (f) of section 205 of such Act is hereby repealed.

(b) AMENDMENTS OF THE INTERNAL REVENUE CODE OF 1954.—

(1) Paragraph (11) of section 401(a) of the Internal Revenue Code of 1954 (relating to qualified pension, profit-sharing, and stock-bonus plans) is amended by striking out subparagraphs (B) and (C) and inserting in lieu thereof the following:

"(B) A plan which provides that the normal form of benefit is an annuity shall, with respect to any participant who under the plan is credited with at least 10 years of service for vesting purposes under section 411(a) and who dies before the annuity starting date, provide a survivor's annuity for the participant's spouse—

"(i) which begins on the annuity starting date (determined as if the participant had lived until the earliest retirement age under the plan, or the participant's actual date of death if later, and had retired on such date prior to death), if the spouse is living on such date, and

"(ii) the payments under which are not less than the payments which would have been made under the survivor's annuity to which such spouse would have been entitled if the participant had terminated employment on his date of death, had survived and retired on such annuity starting date, and had died on the day following such date.".

(2) Subparagraph (E) of section 401(a)(11) of such Code is amended to read as follows:

"(E) A plan shall not be treated as satisfying the requirements of this section unless, under the plan—

"(i) each participant has a reasonable period (as prescribed by the Secretary by regulations) before the annuity starting date during which he may elect in writing

(after having received a written explanation of the terms and conditions of the joint and survivor annuity and the effect of an election under this paragraph) not to take such joint and survivor annuity,

"(ii) such an election will not be effective unless the spouse of the individual (as of the time such election is made) consents in writing to such an election and such consent is witnessed by a plan representative or a notary public.".

(3) Subparagraph (F) of section 401(a)(11) of such Code is hereby repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to plan years beginning more than one year after the date of the enactment of this Act.

PROHIBITION AGAINST ASSIGNMENT NOT TO APPLY IN DIVORCE, ETC., PROCEEDINGS

SEC. 103. (a) AMENDMENT OF ERISA.—Subsection (d) of section 206 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(3) Paragraph (1) shall not apply in the case of a judgment, decree, or order (including an approval of a property settlement agreement) relating to child support, alimony payments, or marital property rights, pursuant to a State domestic relations law (whether of the common law or community property type), which—

"(A) creates or recognizes the existence of an individual's right to receive all or a portion of the benefits to which a participant's designated beneficiary would otherwise be entitled under a pension plan,

"(B) clearly identifies such participant, the amount or percentage of such benefits to be paid to such individual, the number of payments to which such judgment, decree, or order applies, and the name and mailing address of such individuals, and

"(C) does not require such plan to alter the effective date, timing, form, duration, or amount of any benefit payments under the plan or to honor any election which is not provided for under the plan or which is made by a person other than a participant or beneficiary.".

(b) AMENDMENT OF THE INTERNAL REVENUE CODE OF 1954.—Paragraph (13) of section 401(a) of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new sentence: "This paragraph shall not apply in the case of any judgment, decree, or order pursuant to a State domestic relations law if such judgment, decree, or order is described in section 206(d)(3) of the Employee Retirement Income Security of 1974.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

LOWERING OF AGE LIMITATION FOR MINIMUM PARTICIPATION STANDARDS

SEC. 104. (a) AMENDMENT OF ERISA.—Subparagraphs (A)(i) and (B)(ii) of section 202(a)(1) of the Employee Retirement Income Security Act of 1974 are each amended by striking out "25" and inserting in lieu thereof "21".

(b) AMENDMENT OF THE INTERNAL REVENUE CODE OF 1954.—Subparagraphs (A)(i) and (B)(ii) of section 410(a)(1) of the Internal Revenue Code of 1954 are each amended by striking out "25" and inserting in lieu thereof "21".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning more than 90 days after the date of the enactment of this Act.

ACCRUALS CONTINUE WHILE INDIVIDUAL ON APPROVED MATERNITY OR PATERNITY LEAVE

SEC. 105. (a) AMENDMENT OF ERISA.—Subsection (b) of section 202 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(5)(A) For purposes of this section and sections 203 and 204, for each week of an approved maternity or paternity leave, the individual shall be deemed to have performed 20 hours of service for the employer.

"(B) For purposes of subparagraph (A), the term 'approved maternity or paternity leave' means any period (not to exceed 52 weeks) during which the individual is absent from work if—

"(i) such absence is by reason of the birth of a child of the individual or for purposes of caring for a child of the individual, and

"(ii) such absence is approved by the employer.

"(C) Subparagraph (A) shall not apply unless the individual continues to perform service for the employer after the end of the approved maternity or paternity leave or offers to do so but is not reemployed by the employer.".

(b) AMENDMENT OF THE INTERNAL REVENUE CODE OF 1954.—Subsection (a) of section 410 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new paragraph:

"(6) APPROVED MATERNITY OR PATERNITY LEAVE.—

"(A) IN GENERAL.—For purposes of this section and section 411, for each week of an approved maternity or paternity leave, the individual shall be deemed to have performed 20 hours of service for the employer.

"(B) APPROVED MATERNITY OR PATERNITY LEAVE DEFINED.—For purposes of subparagraph (A), the term 'approved maternity or paternity leave' means any period (not to exceed 52 weeks) during which the individual is absent from work if—

"(i) such absence is by reason of the birth of a child of the individual or for purposes of caring for a child of the individual, and

"(ii) such absence is approved by the employer.

"(C) INDIVIDUAL MUST CONTINUE TO PERFORM SERVICES AFTER THE LEAVE.—Subparagraph (A) shall not apply unless the individual continues to perform service for the employer after the end of the approved maternity or paternity leave or offers to do so but is not reemployed by the employer.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning more than 1 year after the date of the enactment of this Act.

ZERO BRACKET AMOUNT FOR HEADS OF HOUSEHOLDS

SEC. 106. (a) IN GENERAL.—Subsection (d) of section 63 of the Internal Revenue Code of 1954 (relating to zero bracket amount) is amended to read as follows:

"(d) ZERO BRACKET AMOUNT.—For purposes of this subtitle the term 'zero bracket amount' means—

"(1) $3,400 in the case of—

"(A) a joint return under section 6013,

"(B) a surviving spouse (as defined in section 2(a)), or

"(C) the head of a household (as defined in section 2(b)),

"(2) $2,300 in the case of an individual who is not married, who is not a surviving spouse (as so defined), and who is not the head of a household (as so defined),

"(3) $1,700 in the case of a married individual filing a separate return, and

"(4) zero in any other case.".

(b) CONFORMING AMENDMENTS.—

(1) TAX RATE TABLE.—Subsection (b) of section 1 of such Code (relating to tax imposed on heads of households) is amended by striking out the table therein and inserting in lieu thereof the following new table:

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	14% of excess over $3,400.
Over $5,500 but not over $7,600	$294, plus 16% of excess over $5,500.
Over $7,600 but not over $9,800	$630, plus 18% of excess over $7,600.
Over $9,800 but not over $12,900	$1,026, plus 22% of excess over $9,800.
Over $12,900 but not over $16,100	$1,708, plus 24% of excess over $12,900.
Over $16,100 but not over $19,300	$2,476, plus 26% of excess over $16,100.
Over $19,300 but not over $24,600	$3,308, plus 31% of excess over $19,300.
Over $24,600 but not over $29,900	$4,951, plus 36% of excess over $24,600.
Over $29,900 but not over $35,200	$6,859 plus 42% of excess over $29,900.
Over $35,200 but not over $45,800	$9,085 plus 46% of excess over $35,200.
Over $45,800 but not over $61,700	$13,961, plus 54% of excess over $45,800.
Over $61,700 but not over $82,900	$22,547, plus 59% of excess over $61,700.
Over $82,900 but not over $109,400	$35,055, plus 63% of excess over $82,900.
Over $109,400 but not over $162,400	$51,750, plus 68% of excess over $109,400.
Over $162,400	$87,790, plus 70% of excess over $162,400.".

(2) WITHHOLDING.—Paragraph (1) of section 3402(f) of such Code (relating to withholding exemptions) is amended—

(A) by striking out "and" at the end of subparagraph (F),

(B) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a semicolon and the word "and",

(C) by adding at the end thereof the following new subparagraph:

"(H) in the case of an employee who is the head of a household (as defined in section 2(b)) and who elects the application of this subparagraph, an additional zero bracket allowance.", and

(D) by inserting "or (H)" after "(G)" in the last sentence thereof.

(3) FILING.—Paragraph (1) of section 6012(a) of such Code (relating to persons required to make returns of income) is amended—

(A) by inserting ", is not the head of a household (as defined in section 2(b))," immediately before "and" in subparagraph (A)(i),

(B) by striking out "or" at the end of subparagraph (A)(ii),

(C) by striking out the period at the end of clause (iii) and inserting in lieu thereof a comma and "or", and

(D) by inserting immediately after clause (iii) of subparagraph (A) the following new clause:

"(iv) who is the head of a household (as defined in section 2(b)) and for the taxable year has gross income of less than $5,400.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years beginning after December 31, 1980.

MILITARY RETIREMENT

SEC. 107. (a)(1) Chapter 73 of title 10, United States Code, relating to annuities based on retired or retainer pay, is amended by adding after subchapter II the following new subchapter:

"SUBCHAPTER III—FORMER SPOUSE SHARE OF RETIRED OR RETAINER PAY

"Sec.
"1461. Definitions.
"1462. Former spouse share of retired or retainer pay.
"1463. Reduction in retired or retainer pay.
"1464. Spousal agreements and court orders.
"1465. Nonpreemption of State law.

"§ 1461. Definitions

"In this subchapter and in subchapter II of this chapter:

"(1) 'Former spouse' means a former wife or husband of a member or former member who was married to that member or former member for not less than ten years during which that member or former member performed creditable service.

"(2) 'court' means a court of a State or of the District of Columbia.

"(3) 'Court order' means a court decree of divorce or annulment, or a court order or court approved property settlement agreement incident to a final court decree of divorce or annulment. which orders that a portion of the retired or retainer pay of a member or former member, or a survivor annuity based on the service of such member or former member, be paid to a former spouse by the member or former member, by the Secretary concerned, or by the Governmnt.

"(4) 'Pro rata share', in the case of a former member entitled to retired or retainer pay, means the percentage that is equal to the perecentage that (A) the number of years during which the former spouse was married to the member or former member during the creditable service of that member or former member is of (B) the total number of years of such creditable service.

"(5) 'Spousal agreement' means any written agreement between a member or former member and that member or former member's spouse or former spouse which is in writing and acknowledged before a notary public.

"(6) 'Creditable service' means service credited to a member or former member for the purpose of determining the eligibility of that member or former member for retired or retainer pay.

"§ 1462. Former spouse share of retired or retainer pay

"(a) Unless otherwise expressly provided by any spousal agreement or court order described in section 1464 of this title, a former spouse of a member or former member who is entitled to retired or retainer pay is entitled to an annuity—

"(1) if married to the member or former member throughout the creditable service of the member or former member, equal to 50 percent of the retired or retainer pay of the member or former member; or

"(2) if not married to the member or former member throughout the creditable service of the member or former member, equal to the former spouse's pro rata share of 50 percent of the retired or retainer pay of the member or former member.

"(b) The amount of retired or retainer pay used for the computation of an annuity under this section shall be determined after any reduction in such retired or retainer pay required under section 1452 of this title.

"(c) A former spouse is not qualified for an annuity under this section if before the commencement of the annuity the former spouse remarries before becoming 60 years of age.

"(d)(1) An annuity of a former spouse under this section commences on the later of the day after the member or former member upon whose service the annuity is based becomes entitled to retired or retainer pay or the first day of the month in which the divorce or annulment involved becomes final.

"(2) Such annuity and the right to such annuity terminate—

"(A) on the last day of the month before the former spouse dies or remarries before becoming 60 years of age; or

"(B) on the date the retired or retainer pay of the member or former member upon whose service the annuity is based dies.

"(e) A former spouse is not entitled to an annuity under this subchapter based upon the service of a member or former member unless the former spouse elects to receive it instead of any other annuity to which the former spouse may be entitled under this chapter or any retirement system for Government employees on the basis of a marriage to someone other than the member or former member.

"§ 1463. Reduction in retired or retainer pay

"The retired or retainer pay of a member or former member shall be reduced by the amount of an annuity under this subchapter paid to a former spouse of that member or former member based on the service of that member or former member. Such reduction shall be disregarded in calculating any annuity under subchapter II of this chapter and in calculating any reduction in retired or retainer pay under section 1452 of this title.

"§ 1464. Spousal agreements and court orders

"(a)(1)(A) In the case of any member or former member who has a former spouse who is covered by a court order or who is a party to a spousal agreement—

"(i) any right of the former spouse to an annuity under section 1462 of this title in connection with the retired or retainer pay of the member or former member, and the amount of any such annuity; and

"(ii) any right of the former spouse to a survivor annuity under subchapter II of this chapter, and the amount of any such annuity,

shall be determined in accordance with that spousal agreement or court order, if and to the extent expressly provided for in the terms of that spousal agreement or court order.

"(B) This paragraph shall not apply in the case of any spousal agreement or court order which, as determined by the Secretary concerned is inconsistent with the requirements of this chapter.

"(2) Except with respect to obligations between members or former members and former spouses, payments under this chapter which would otherwise be made to a member or former member based upon that member or former member's service shall be paid (in whole or in part) by the Secretary concerned to another natural person to the extent expressly provided for in the terms of any order or any court decree of legal separation, or the terms of any court order or court-approved property settlement agreement incident to any court decree of legal separation.

"(3) Paragraphs (1) and (2) shall apply only to payments made under this chapter for periods beginning after the date of receipt by the Secretary concerned of written notice of such decree, order, or agreement, and such additional information and such documentation as the Secretary concerned may require.

"(b) Any payment under this subsection to any person bars recovery by any other person.

"(c) No spousal agreement or court order involving a member or former member may provide for an annuity or any combination of annuities under this subchapter which exceeds the amount of the retired or retainer pay of the member or former member, nor may any such court order relating to an annuity under this subchapter be given effect if it is issued more than 12 months after the date the divorce or annulment involved becomes final.

"(d) After the death of a member or former member, a court-order may not adjust the amount of the annuity of a former spouse under this subchapter or subchapter II of this chapter.

"§ 1465. Nonpreemption of State law.

"The 10-year requirement of section 1461 (1) of this title, or any other provision of this chapter, shall not be construed to affect the rights of any spouse or person formerly married to a member or former member may have, under any law or rule of law of any State or the District of Columbia, with respect to the retired or retainer pay of the member or former member.".

(2) The table of subchapters at the beginning of chapter 73 of title 10, United States Code, is amended by adding at the end thereof the following new item:

"III. Former Spouse Share of Retired or Retainer Pay ..... 1461".

(b) Section 1447 of title 10, United States Code, relating to definitions applicable to the Survivor Benefit plan, is amended—

(1) by striking out "by the person providing the annuity" in paragraph (2) and inserting in lieu thereof "in accordance with section 1448(a)(3) of this title"; and

(2) by adding at the end thereof the following new paragraph:

"(6) 'Former spouse', 'pro rata share', 'spousal agreement', 'court order', and 'creditable service' have the meanings given such terms in section 1461 of this title.".

(c)(1) Subsection (a) of section 1448 of title 10, United States Code, relating to the application of the Survivor Benefit Plan, is amended—

(A) in paragraph (2)—

(i) by inserting "except to the extent otherwise provided under paragraph (3)," in

(ii) by striking out "is married" both places it appears and inserting in lieu thereof "is married, has a former spouse,"; and

(iii) by striking out ", unless he elects" in clause (A) and all that follows through "that pay";

(B) by inserting "except to the extent otherwise provided under paragraph (4)," in clause (B) after "(III)"; and

(C) by striking out paragraphs (3) and (4) and inserting in lieu thereof the following:

"(3)(A) Before becoming eligible for retired or retainer pay, a married person eligible under paragraph (1)(A) to participate in the Plan and such person's spouse may jointly elect not to participate in the Plan, to participate in the Plan at a reduced level, or to provide an annuity for a dependent child but not for the spouse. Any such election shall be in writing and shall be acknowledged before a notary public. In the event the marriage is dissolved following an election to participate at such a reduced level and the spouse qualifies as a former spouse, the base amount used in calculating an annuity as a former spouse under section 1450 of this title may not exceed the base amount designated under this subparagraph. An election under this subparagraph not to participate in the Plan is irrevocable if not revoked before the date on which the person first becomes entitled to retired or retainer pay.

"(B) A person eligible under paragraph (1)(B) to participate in the Plan who is married may not make an election under subclause (iii) of such paragraph to participate in the Plan at a reduced level or to provide an annnuity for a dependent child but not for the spouse without the agreement of the spouse. Any such agreement shall be in writing and shall be acknowledged before a notary public. In the event the marriage is dissolved following an election for participation in the Plan at a reduced level and the spouse qualifies as a former spouse, the base amount used in calculating any annuity of the former spouse under section 1450 of this title may not exceed the base amount designated under this subparagraph. An election under this subparagraph is irrevocable if not revoked before the end of the 90-day period referred to in such subparagraph.

"(C) If a person who is eligible to participate in the Plan has a former spouse, the person and such former spouse may jointly

elect by spousal agreement under section 1464 of this title not to participate in the Plan with respect to an annuity under section 1450 of this title for that former spouse if the election is made (i) before the end of the 12-month period after the divorce or annulment involving that former spouse becomes final, or (ii) at the time the person becomes eligible to participate in the Plan, whichever occurs first. Such an election is irrevocable after the expiration of the time described in the preceding sentence for the making of such election.

"(4) Regulations prescribed under section 1455 of this title may authorize a person eligible to participate in the Plan to make an election under paragraph (3) without the person's spouse or former spouse if the person establishes to the satisfaction of the Secretary concerned that the person does not know, and has taken all reasonable steps to determine, the whereabouts of the spouse or former spouse.".

(2) Subsection (b) of such section is amended by striking out "who is not married" and inserting in lieu thereof "who is not married, does not have a former spouse,".

(3) Subsection (d) of such section is amended by striking out "to which the otherwise eligible spouse" an all that follows and inserting in lieu thereof "which the member would have received if he had been eligible for that pay on the day before he died, based upon his years of active service. If such member has a former spouse at the time of death, the Secretary concerned shall pay to the former spouse an annuity equal to 55 percent of the amount of the annuity which would have been payable to the former spouse under section 1462 if the member had been eligible for retired or retainer pay on the day before he died, and the annuity of the surviving spouse under the preceding sentence shall be reduced by the amount of the annuity paid to the former spouse.".

(4) Such section is further amended by adding at the end thereof the following new subsection:

"(f)(1) In the case of any person providing an annuity under the Plan for a former spouse—

"(A) such person may elect, or

"(B) a spousal agreement or court order may provide for

an additional annuity under the Plan for any other former spouse or spouse surviving the person, if the person satisfactorily passes a physical examination as prescribed by the Secretary concerned.

"(2) Neither the total amount of annuity or annuities under this subsection with respect to any person participating in the Plan, nor the annuity or annuities for any one surviving spouse or former spouse of such person under the Plan, may exceed 55 percent of the full amount of the person's retired or retainer pay.

"(3)(A) In accordance with regulations prescribed under section 1455 of this title, the person involved may provide for an annuity under this subsection—

"(i) by a reduction in the retired or retainer pay or an allotment from the basic pay of the person,

"(ii) by a lump sum payment or installment payments, or

"(iii) by any combination thereof.

"(B) The present value of the total amount to accure to the United States under subparagraph (A) to provide an annuity under this subsection shall be actuarially equivalent in value to such annuity, as calculated upon such tables of mortality as may from time to time be prescribed for such purpose under section 1455 of this title.

"(C) If a former spouse predeceases the person involved or remarries before attaining age 60 (or, in the case of a spouse, the spouse does not qualify as a former spouse upon dissolution of the marriage)—

"(i) if a reduction in retired or retainer pay or allotment of basic pay under subparagraph (A) is in effect for that spouse or former spouse, the retired or retainer shall be recomputed and paid as if it had not been reduced or the basic pay allotment terminated, as the case may be, and

"(ii) any amount accruing to the United States under subparagraph (A) shall be refunded, but only to the extent that such amount may have exceeded the actuarial cost of providing benefits under this subsection for the period such benefits were provided, as determined under regulations prescribed under section 1455 of this title.

"(D) Under regulations prescribed under section 1455 of this title, retired or retainer pay shall be recomputed (or an allotment of basic pay terminated or adjusted), and a refund provided (if appropriate), in a manner comparable to that provided under subparagraph (C), in order to reflect a termination or reduction of future benefits under this subsection for a spouse in the event a former spouse of the person involved dies or remarries before attaining age 60 and an increased annuity is provided for that spouse in accordance with this chapter.

"(4) An annuity payable under this subsection to a spouse or former spouse shall commence on the day after the person dies and shall terminate on the last day of the month before the spouse or former spouse's death or remarriage before attaining age 60

"(5) Section 1451(c) of this title shall not apply to any annuity under this subsection, unless authorized under regulations prescribed under section 1455 of this title.".

(d) Section 1450 of title 10, United States Code, relating to beneficiaries under the Survivor Benefit Plan, is amended—

(1) in subsection (a)—

(A) in clause (1), by inserting after "or widower" the following: "and any eligible former spouse"; and

(B) in clause (2), by striking out "if the eligible widow or widower is dead, dies, or otherwise becomes ineligible" and inserting in lieu thereof "if the eligible widow or widower and any eligible former spouse are dead, die, or otherwise become ineligible";

(2) in subsection (b), by inserting "or former spouse" after "widow or widower" each place it appears; and

(3) by striking out the first two sentences of subsection (e) and inserting in lieu thereof "If no annuity under this section is payable to a widow or widower because of subsection (c), any amount deducted from the retired or retainer pay of the deceased under section 1452 of this title shall be refunded to the widow or widower. If, because of subsection (c), the annuity payable to the widow or widower is less than the amount established under section 1451 of this title, the annuity shall be recalculated under that section.".

(e)(1) Paragraph (1) of subsection (a) of section 1451 of title 10, United States Code, relating to the amount of annuities under the Survivor Benefit Plan, is amended to read as follows:

"(1)(A)(i) Subject to paragraphs (2) and (3), the monthly annuity payable to a widow or widower who is entitled under section 1450(a)(1) of this title to an annuity shall be—

"(I) 55 percent of the base amount, as adjusted from time to time under section 1401a of this title, if the annuity is provided by virtue of eligibility under section 1448(a)(1)(A) of this title; or

"(II) a lesser percentage (determined by the Secretary of Defense in accordance with subsection (d) of the base amount, as adjusted from time to time under section 1401a of this title, on or after the date the person becomes entitled to retired pay under chapter 67 of this title, if the annuity is provided by virtue of eligibility under section 1448(a)(1)(B) of this title.

"(ii) Notwithstanding clause (i), the amount of an annuity calculated under clause (i) for a widow or widower in a case in which there is also a surviving former spouse who qualifies for an annuity under section 1450(a)(1) of this title may not exceed 55 percent (or the applicable percentage determined in accordance with subsection (d)) of the portion (if any) of the base amount that remains available under subsection (e)(2).

"(B) Subject to paragraphs (2) and (3), the monthly annuity payable to a former spouse who is entitled under section 1450(a)(1) of this title to an annuity shall be a pro rata share of the amount of an annuity of a widow or widower computed under the first sentence of subparagraph (A)(i).

"(C) The monthly annuity payable to a dependent child who is entitled under section 1450(a) of this title to an annuity shall be—

"(i) 55 percent of the base amount, as adjusted from time to time under section 1401a of this title, if the annuity is provided by virtue of eligibility under section 1448(a)(1)(A) of this title; or

"(ii) a lesser percentage (determined by the Secretary of Defense in accordance with subsection (d)) of the base amount, as adjusted from time to time under section 1401a of this title, on or after the date the person becomes entitled to retired pay under chapter 57 of this title, if the annuity is provided by virtue of eligibility under section 1448(a)(1)(B) of this title.".

(2) Paragraph (2) of such subsection is amended by inserting "female former spouse" after "widow" both places it appears.

(3) Paragraph (3) of such subsection is amended by striking out "widow or widower" each place it appears and inserting in lieu thereof "widow, widower, or former spouse".

(4) Subsection (c) of such section is amended by striking out "section, or section 1448(d) of this title," and inserting in lieu thereof "subchapter".

(5) Such section is further amended by adding at the end thereof the following new subsection:

"(e)(1) Except for an annuity provided by virtue of section 1448(f) on this title, the maximum annuity or combination of annuities under this section (or under section 1448(d) of this title) with respect to any member or former member may not exceed 55 percent of the full amount of the member or former member's retired or retainer pay.

"(2) Once an annuity has been provided for under the Plan for any former spouse, an annuity may thereafter be provided for under the Plan with respect to a member or former member only for that portion (if any) of the maximum base amount of the member or former member which is not committed for survivor benefits for any former spouse whose prospective right to such annuity has not terminated by reason of death or remarriage.".

(f) Section 1452 of title 10, United States Code, relating to reductions in retired or retainer pay, is amended—

(1) in subsection (a)—

(A) by striking out "a spouse and a dependent child" in the first sentence and inserting in lieu thereof "a former spouse" and by inserting "and former spouse (if any)" after "in favor of his spouse";

(B) by inserting "or an eligible former spouse and a dependent child" in the second sentence after "an eligible spouse and a dependent child"; and

(C) by inserting "or former spouse" in the third sentence after "eligible spouse";

(2) in subsection (b), by inserting "or former spouse" after "spouse" each place it appears;

(3) in subsection (e), by inserting "or former spouse" after "spouse"; and

(4) by adding after subsection (h) the following new subsection:

"(1)(1) For each full month after a former spouse of a member or former member dies or remarries before attaining age 60, the retired or retainer pay of the member or former member, if reduced to provide an annuity for the former spouse under the Plan, shall be recomputed and paid as if the annuity had not been so reduced, unless an election is in effect under paragraph (2).

"(2) Subject to section 1451(e) of this title, the member or former member may elect in writing within one year after receipt of notice of the death or remarriage of the former spouse to continue the reduction in order to provide a higher annuity under the Plan for a spouse of the member or former member.".

(g) Section 1455 of title 10, United States Code, relating to regulations to carry out the Survivor Benefit Plan, is amended—

(1) by inserting "and subchapter III of this chapter" after "this subchapter";

(2) by striking out paragraph (1) of such section and inserting in lieu thereof the following:

"(1) provide that the member and the spouse and former spouse (if any) of the member shall, before the date the member becomes entitled to retired or retainer pay, be informed of the elections available under section 1448(a) of this title and the effects of such elections; and".

(h)(1) Any member of the uniformed services who on the effective date of this Act has a former spouse shall receive retired pay at a reduced rate and provide a survivor annuity for such former spouse under subchapter II of chapter 73 of title 10, United States Code, as amended by this Act, if—

(A) the member so elects by means of a spousal agreement, or

(B) a court order so provides.

(2)(A) If the member has not become entitled to retired pay on or before the effective date of this Act, an election under subsection (h)(1)(A) may be made, or a court order under subsection (h)(1)(B) may be issued, at any time before the member becomes so entitled.

(B) If the member is entitled to retired pay on or before the effective date of this Act, an election under subsection (h)(1)(A) may be made, or a court order under subsection (h)(1)(B) may be issued, within such period after such effective date as the Secretary concerned may prescribe.

(C) In any case in which a member is married and has been married for more than one year, an election under subsection (h)(1)(A) may only be made with the written concurrence of the spouse of the member.

(D) For purposes of applying chapter 73 of title 10, any such election or court order shall be treated the same as if it were a spousal agreement or court order under section 1464 of such title.

(3)(A) An election under subsection (h)(1)(A) may provide for a survivor benefit based on all or any portion of that part of the retired pay of the member which is not designated or committed as a base amount (as such term is defined in section 1447(2) of such title) for survivor benefits for a spouse or any other former spouse of the member. The member and the spouse of the member may make an election under paragraph (3) of section 1448(a) of such title before the member becomes eligible to participate in the Survivor Benefit Plan under such section for the purpose of allowing survivor benefits to be provided under this subsection.

(B) A court order under subsection (h)(1)(B) may provide for an annuity for a former spouse which does not exceed that former spouse's pro rata share of 55 percent of the full amount of the retired pay of the member.

(4) The amount of the reduction in the retired pay of the member under this subsection shall be determined in accordance with section 1452 of such title and shall be effective as of—

(A) the commencing date of the retired pay in the case of an election under subsection (h)(2)(A); or

(B) the effective date of this Act, in the case of an election under subsection (h)(2)(B).

(5) In the case of a member who died before the effective date of this Act after becoming entitled to retired pay and who—

(A) at the time the member became entitled to retired pay was married and did not elect to participate in the Survivor Benefit Plan;

(B) subsequently was divorced from the spouse who was the member's beneficiary under the Survivor Benefit Plan at such time; and

(C) died without a beneficiary under the Survivor Benefit Plan,

the individual to whom the member was married at the time the member became entitled to retired pay shall be entitled to an annuity under the Survivor Benefit Plan as if married to the member at the time of death if the individual is qualified as a former spouse.

(6) For the purposes of this subsection:

(A) The terms "former spouse", "spousal agreement", "court order", and "State court" have the meanings given such terms in section 1461 of title 10, United States Code.

(B) The terms "uniformed services" and "Secretary concerned" have the meanings given such terms in section 101 of title 37, United States Code.

(C) The term "member" includes a former member entitled to retired pay.

(D) The term "'retired pay" includes retainer pay.

(i)(1) This section and the amendments made by this section shall take effect at the end of the 120-day period beginning on the date of the enactment of this Act.

(2)(A) Subchapter III of chapter 73 of title 10, United States Code, as added by this section, shall apply in the case of any individual who after the effective date of this section becomes a former spouse (as defined in section 1461(1) of such title) of an individual who becomes entitled to retired or retainer pay after the effective date of this section.

(B) Except to the extent provided in subsection (h), the provisions of the Survivor Benefit Plan (subchapter II of such chapter) regarding the rights of former spouses to receive survivor annuities shall apply in the case of any individual who after the effective date of this section becomes a former spouse (as defined in section 1461(1) of title 10, United States Code) of a member or former member of the uniformed services.

CIVIL SERVICE SPOUSE RETIREMENT PROVISIONS

SEC. 108. (a)(1) Section 8331 of title 5, United States Code, relating to definitions for purposes of civil service retirement, is amended by adding at the end thereof the following new paragraphs:

"(23) 'court' means any court of any State or of the District of Columbia;

"(24) 'court order' means any court decree of divorce or annulment, or any court order or court approved property settlement agreement incident to any court decree of divorce or annulment which orders that a portion of the annuity of an employee or Member, or survivor benefit based on the service of such employee or Member, be paid to that spouse by such employee or Member, the Director of the Office of Personnel Management, or the Government;

"(25) 'former spouse' means a former wife or husband of an individual who was married to such individual for not less than 10 years during periods of service by that individual which are creditable under section 8332 of this title;

"(26) 'pro rata share', in the case of any former spouse of any individual, means a percentage which is equal to the percentage that (A) the number of years during which the former spouse was married to the individual during the creditable service of that individual is of (B) the total number of years of such creditable service; and

"(27) 'spousal agreement' means any agreement between an individual and that individual's spouse or former spouse which is in writing and acknowledged before a notary public.".

(2) Such section 8331 of title 5, United States Code, is further amended—

(A) by striking out "and" at the end of paragraph (21), and

(B) by striking out the period at the end of paragraph (22) and inserting in lieu thereof a semicolon.

(b)(1) Subchapter III of chapter 83 of title 5, United States Code, relating to civil service retirement, is amended by inserting after section 8341 the following new section:

"§ 8341A. Former spouse annuities

"(a)(1) Unless otherwise expressly provided by any spousal agreement or court order under section 8345(k) of this title, a former spouse of an employee or Member retired under this subchapter is entitled to an annuity—

"(A) if married to the employee or Member throughout that employee's or Member's period of creditable service, equal to 50 percent of the annuity (determined without regard to the reduction under paragraph (5) of this subsection) to which such employee or Member is entitled, or

"(B) if not married to the employee or Member throughout the period of creditable service, equal to that former spouse's pro rata share of 50 percent of such annuity.

"(2) A former spouse shall not be qualified for an annuity under this subsection if before the commencement of that annuity the former spouse remarries before becoming 60 years of age.

"(3) The annuity of a former spouse under this subsection commences on the later of the day the employee or Member upon whose service the annuity is based becomes entitled to an annuity under this subchapter or the first day of the month in which the divorce or annulment involved becomes final. The annuity of such former spouse and the right thereto terminate on—

"(A) the last day of the month before the former spouse dies or remarries before 60 years of age; or

"(B) the date the annuity of the employee or Member terminates (except in the case of an annuity subject to paragraph (5)(B)).

"(4) No spousal agreement or court order under section 8345(k) of this title involving any employee or Member may provide for an annuity or any combination of annuities under this subsection which exceeds the annuity of the employee or Member, nor may any such court order relating to an annuity under this subsection be given effect if it is issued more than 12 months after the date the divorce or annulment involved becomes final.

"(5)(A) The annuity payable to any employee or Member shall be reduced by the amount of an annuity under this subsection paid to any former spouse based upon the service of that employee or Member. Such reduction shall be disregarded in calculating the survivor annuity for any spouse, former spouse, or other survivor under this subchapter, and in calculating any reduction in the annuity of the employee or Member to provide survivor benefits under subsection (b) or section 8341(b)(1) of this title.

"(B) If any disability annuitant whose annuity is reduced under subparagraph (A) becomes reinstated or reappointed in the civil service, the pay of that annuitant shall

be reduced by the same amount as the annuity would have been reduced if it had continued. Amounts equal to the reductions under this subparagraph shall be deposited in the Treasury of the United States to the credit of the Fund.

"(6) Notwithstanding paragraph (3), in the case of any former spouse of a disability annuitant—

"(A) the annuity of that former spouse shall commence on the date the employee or Member would qualify on the basis of the employee's or Member's creditable service for an annuity under this subchapter (other than a disability annuity) or the date the disability annuity begins, whichever is later, and

"(B) the amount of the annuity of the former spouse shall be calculated on the basis of the annuity for which the employee or Member would ottherwise so qualify.

"(b)(1) Subject to any election under section 8339(j) of this title and unless otherwise expressly provided by any spousel agreement or court order under section 8245(k) of this title, if a former employee or Member who is entitled to receive an annuity is survived by a former spouse, the former spouse shall be entitled to a survivor annuity—

"(A) if married to the employee or Member throughout the creditable service of the employee or Member, equal to 55 percent of the full amount of the employee's or Member's annuity, as computed under section 8339 of this title, or

"(B) if not married to the employee or Member throughout such creditable service, equal to that former spouse's pro rata share of 55 percent of the full amount of such annuity.

"(2) A former spouse shall not be qualified for an annuity under this subsection if before the commencement of that annuity the former spouse remarries before becoming 60 years of age.

"(3) An annuity payable from the Fund to a surviving former spouse under this subsection shall commence on the day after the annuitant dies and shall terminate on the last day of the month before the former spouse's death or remarriage before attaining age 60. If such a survivor annuity is terminated because of remarriage, it shall be restored at the same rate commencing on the date such remarriage is terminated if any lump sum paid upon termination of the annuity is returned to the Fund.

"(4)(A) The maximum survivor annuity or combination of survivor annuities under this section (and section 8341(b)) with respect to any employee or Member may not exceed 55 percent of the full amount of the employee's or Member's annuity, as calculated under section 8339 of this title.

"(B) Once a survivor annuity has been provided for under this subsection for any former spouse, a survivor annuity may thereafter be provided for under this subsection (or section 8341(b)), with respect to an employee or Member only for that portion (if any) of the maximum available which is not committed for survivor benefits for any former spouse whose prospective right to such annuity has not terminated by reason of death or remarriage.

"(C) After the death of an employee or Member, a court order under section 8345(k) of this title may not adjust the amount of the annuity of any former spouse under this subsection.

"(5)(A) For each full month after a former spouse of an employee or Member dies or remarries before attaining age 60, the annuity of the employee or Member, if reduced to provide a survivor annuity for that former spouse, shall be recomputed and paid as if the annuity had not been so reduced, unless an election is in effect under subparagraph (B).

"(B) Subject to paragraph (4)(B), the employee or Member may elect in writing within one year after receipt of notice of the death or remarriage of the former spouse to continue the reduction in order to provide a higher survivor annuity under section 8341(b) of this title for any spouse of the employee or Member.

"(c)(1) In the case of any employee or Member providing a survivor annuity benefit under subsection (b) for a former spouse—

"(A) such employee or Member may elect, or

"(B) a spousal agreement or court order under section 8345(k) of this title may provide for,

an additional survivor annuity under this subsection for any other former spouse or spouse surviving the employee or Member, if the employee or Member satisfactorily passes a physical examination as prescribed by the Office of Personnel Management.

"(2) Neither the total amount of survivor annuity or annuities under this subsection with respect to any employee or Member, nor the survivor annuity or annuities for any one surviving spouse or former spouse of such employee or Member under this section and section 8341 of this title, shall exceed 55 percent of the full amount of the employee's or Member's annuity, as computed under section 8339 of this title.

"(3)(A) In accordance with regulations which the Office shall prescribe, the employee or Member involved may provide for any annuity under this subsection—

"(i) by a reduction in the annuity or an allotment from the pay of the employee or Member,

"(ii) by a lump sum payment or installment payments to the Fund, or

"(iii) by any combination thereof.

"(B) The present value of the total amount to accrue to the Fund under subparagraph (A) to provide any annuity under this subsection shall be actuarially equivalent in value to such annuity, as calculated upon such tables of mortality as may from time to time be prescribed for this purpose by the Office.

"(C) If a former spouse predeceases the employee or Member or remarries before attaining age 60 (or, in the case of a spouse, the spouse does not qualify as a former spouse upon dissolution of the marriage)—

"(i) if an annuity reduction or salary allotment under subparagraph (A) is in effect for that spouse or former spouse, the annuity shall be recomputed and paid as if it had not been reduced or the salary allotment terminated, as the case may be, and

"(ii) any amount accruing to the Fund under subparagraph (A) shall be refunded, but only to the extent that such amount may have exceeded the actuarial cost of providing benefits under this subsection for the period such benefits were provided, as determined under regulations prescribed by the Office.

"(D) Under regulations prescribed by the Office, an annuity shall be recomputed (or salary allotment terminated or adjusted), and a refund provided (if appropriate), in a manner comparable to that provided under subparagraph (C), in order to reflect a termination or reduction of future benefits under this subsection for a spouse in the event a former spouse of the employee or Member dies or remarries before attaining age 60 and an increased annuity is provided for that spouse in accordance with this subchapter.

"(4) An annuity payable under this subsection to a spouse or former spouse shall commence on the day after the employee or Member dies and shall terminate on the last day of the month before the former spouse's death or remarriage before attaining age 60.

"(5) Section 8340 of this title shall not apply to any annuity under this subsection, unless authorized under regulations prescribed by the Office.

"(d)(1) Section 8345(f) of this title shall not apply—

"(A) to any annuity payable under subsection (a) or (b) to any former spouse if the amount of that annuity varies by reason of a spousal agreement or court order under section 8345(k), or an election under section 8339(j), from the amount which would be calculated under subsection (a)(1) or (b)(1), as the case may be, in the absence of such spousal agreement, court order, or election; and

"(B) to any annuity payable under subsection (c).

"(2) A former spouse is not entitled to an annuity under this subchapter based upon the service of an employee or Member unless the former spouse elects to receive it instead of any other annuity to which the former spouse may be entitled under this subchapter or any retirement system for Government employees on the basis of a marriage to someone other than the employee or Member.".

(2) Section 8332 of title 5, United States Code, relating to creditable service, is amended by adding at the end thereof the following new subsection:

"(m)(1) Service of an employee or Member shall be considered creditable service for purposes of applying provisions of this subchapter relating to former spouses if such service would be creditable—

"(A) under subsection (k)(1) or (2) but for the fact an election was not made under subsection (k)(1) or a special contribution was not made under subsection (k)(2), and

"(B) under section 8334(d) but for the fact that a refund of contributions has not been repaid unless the former spouse received under this subchapter a portion of the lump sum (or a spousal agreement or court order provided otherwise).

"(2) A former spouse shall not be considered as married to an employee or Member for periods assumed to be creditable service under section 8341(d)(2) of this title.".

(3)(A) Section 8341(b) of title 5, United States Code, relating to survivor spouse annuities, is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding the preceding paragraphs in this subsection and subsection (d), the amount of the annuity calculated under this subsection for a surviving spouse in any case in which there is also a surviving former spouse who qualifies for an annuity under section 8341A(b) with respect to the same employee or Member may not exceed 55 percent of the portion (if any) of the base for survivor benefits which remains available under section 8341A(b)(4)(B).".

(B) Section 8341(d) of title 5, United States Code, relating to survivor spouse annuities in the case of death in service, is amended by adding at the end thereof the following new sentence: "Any surviving former spouse shall be entitled to an annuity under section 8341A(b) as if the employee or Member died after being entitled to an annuity under this subchapter.".

(4)(A) Section 8342(a) of title 5, United States Code, relating to lump-sum benefits, is amended by striking out "is entitled" and inserting in lieu thereof "(and any former spouse of such employee or Member, in accordance with subsection (j)) are entitled".

(B) Section 8342 of title 5, United States Code, is amended by adding at the end thereof the following:

"(j) Unless otherwise expressly provided by any spousal agreement or court order under section 8345(k) of this title, the amount of an employee's or Member's lump-sum credit payable to a former spouse shall be—

"(1) if the former spouse was married to the employee or Member throughout the period of creditable service, 50 percent of the lump-sum credit to which such employee or Member would be entitled in the absence of this subsection, or

"(2) if such former spouse was not married to the employee or Member throughout the period of his creditable service, an amount equal to such former spouse's pro rata share of 50 percent of such lump-sum credit.

The lump-sum credit of the employee or Member shall be reduced by the amount of the lump-sum credit payable to the former spouse.".

(5) Section 8344 of title 5, United States Code, relating to annuities and pay on reemployment, is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) The Office shall prescribe regulations to provide for the application of this section in any case in which an annuitant has a former spouse entitled to an annuity under section 8341A of this title.".

(6) The table of sections for subchapter III of chapter 83 of title 5, United States Code, is amended by inserting after section 8338 the following new item:

"8341A. Former spouse annuities.".

(c)(1) Section 8339(j) of title 5, United States Code, relating to election of survivor annuities, is amended to read as follows:

"(j)(1)(A) Except to the extent provided otherwise under a written election under subparagraph (B) or (C), if at the time of retirement an employee or Member is married (or has a former spouse who has not remarried before attaining age 60), the employee or Member shall receive a reduced annuity and provide a survivor annuity under section 8341(b) for the employee's or Member's spouse or a survivor annuity under section 8341(b) for the former spouse, or a combination of such annuities, as the case may be.

"(B) At the time of retirement, a married employee or Member and the employee's or Member's spouse may jointly elect to waive a survivor annuity for that spouse under section 8341(b) (or under section 8341A(b) if the spouse later qualifies as a former spouse under section 8332(25)), or to reduce such a survivor annuity by designating a portion of the annuity of the employee or Member as the base for the survivor benefit. Any such election shall be in writing and shall be acknowledged before a notary public. In the event the marriage is dissolved following an election for such a reduced annuity and the spouse qualifies as a former spouse, the base used in calculating any annuity of the former spouse under section 8341A(b) may not exceed the portion of the employee's or Member's annuity designated under this subparagraph.

"(C) If an employee or Member has a former spouse, the employee or Member and such former spouse may jointly elect by spousal agreement under section 8345(k) to waive a survivor annuity under section 8341A (b) for that former spouse if the election is made (i) before the end of the 12-month period after the divorce or annulment involving that former spouse becomes final or (ii) at the time of retirement, whichever occurs first.

"(D) The Office of Personnel Management may prescribe regulations under which an employee or Member may make an election under subparagraph (B) or (C) without the employee's or Member's spouse or former spouse if the employee or Member establishes to the satisfaction of the Office that the employee or Member does not know, and has taken all reasonable steps to determine, the whereabouts of the spouse or former spouse.

"(2) The annuity of an employee or Member providing a survivor benefit under section 8341(b) (or section 8341A(b)), excluding any portion of the annuity not designated or committed as a base for any survivor annuity, shall be reduced by 2½ percent of the first $3,600 plus 10 percent of any amount over $3,600. The reduction under this paragraph shall be calculated before any reduction under section 8341A(a)(5).

"(3) An annuity which is reduced under this subsection or any similar prior provision of law to provide a survivor benefit for a spouse shall, if the marriage of the employee or Member is dissolved, be recomputed and paid for each month during which the employee or Member is not married (or is remarried if there is no election in effect under the following sentence) as if the annuity had not been reduced, subject to any reduction required to provide a survivor benefit under section 8341 (b) or (c). Upon remarriage the retired employee or Member may irrevocably elect, by means of a signed writing received by the Office within one year after such remarriage, to receive during such marriage a reduction in annuity for the purpose of allowing an annuity for the new spouse of the annuitant in the event such spouse survives the annuitant. Such reduction shall be equal to the reduction in effect immediately before the dissolution of the previous marriage (unless such reduction is adjusted under section 8341A(b)(5)), and shall be effective the first day of the first month beginning one year after the date of remarriage.

"(4) The Office shall, on an annual basis—

"(A) inform each employee and Member of the rights of election under this subsection; and

"(B) to the maximum extent practicable, inform spouses or former spouses of employees and Members of their rights under this subchaper.".

(2) Section 8339(k)(1) of title 5, United States Code, relating to annuities for individuals having insurable interests, is amended by inserting after "an unmarried employee or Member" the following: "who does not have a former spouse for whose benefit a reduction is made in the employee's or Member's annuity".

(3) Section 8341(b)(1) of title 5, United States Code, is amended by striking out "unless the employee or Member has notified the Office" and all that follows and inserting in lieu thereof the following: "unless an election has been made under section 8339(j)(1) or, in the case of remarriage, an election has not been made under section 8339(j)(3).".

(4) Section 8344(a) of title 5, United States Code, relating to annuities and pay on reemployment, is amended by striking out "unless, at the time of claiming the increase payable under subparagraph (A), the annuitant notifies the Office of Personnel Management in writing that he does not desire the survivor annuity to be increased" and inserting in lieu thereof "unless the annuitant and the annuitant's spouse jointly elect to the contrary at the time in a written election acknowledged before a notary public".

(d) Section 8345(j) of title 5, United States Code, relating to court orders concerning the dissolution of marriage, is amended to read as follows:

"(j)(1)(A) In the case of any employee or Member who has a former spouse who is covered by a court order or who is a party to a spousal agreement—

"(i) any right of the former spouse to any annuity under section 8341A(a) in connection with any retirement or disability annuity of the employee or Member, and the amount of any such annuity;

"(ii) any right of the former spouse to a survivor annuity under section 8341A (b) or (c), and the amount of any such annuity; and

"(iii) any right of the former spouse to any payment of a lum-sum credit under section 8342;

shall be determined in accordance with that spousal agreement or court order, if and to the extent expressly provided for in the terms of that spousal agreement or court order.

"(B) This paragraph shall not apply in the case of any spousal agreement or court order which, as determined by the Office of Personnel Management, is inconsistent with the requirements of this subchapter.

"(2) Except with respect to obligations between employees or Members and former spouses, payments under this subchapter which would otherwise be made to an employee or Member based upon the employee's or Member's service shall be paid (in whole or in part) by the Office to another individual to the extent expressly provided for in the terms of any order or any court decree of legal separation, or the terms of any court order or court-approved property settlement agreement incident to any court decree of legal separation.

"(3) Paragraphs (1) and (2) shall apply only to payments made under this subchapter for periods beginning after the date of receipt by the Office of written notice of such decree, order, or agreement, and such additional information and such documentation as the Office may require.

"(4) Any payment under this subsection to an individual bars recovery by any other individual.

"(5) The 10-year requirement of section 8331(25), or any other provision of this subchapter, shall not be construed to affect the rights any spouse or individual formerly married to an employee or Member may have, under any law or rule of law of any State or the District of Columbia, with respect to an annuity of an employee or Member under this subchapter.".

(e)(1) Any current or former employee or Member in the Civil Service Retirement and Disability System who on the effective date, has a former spouse shall receive a reduced annuity and provide a survivor annuity for such former spouse under section 8341A(b) of title 5, United States Code, if—

(A) the employee or Member so elects by means of a spousal agreement, or

(B) a court order so provides.

(2)(A) If the employee or Member has not retired under such system on or before the effective date, an election under subsection (e)(1)(A) may be made, or a court order under subsection (e)(1)(B) may be issued, at any time before retirement.

(B) If the employee or Member has retired under such system on or before the effective date of this Act, an election under subsection(e)(1)(A) may be made, or a court order under subsection (e)(1)(B) may be issued, within such period after the effective date as the Office of Personnel Management may prescribe.

(C) In any case in which an employee or Member is married and has been married for more than one year, an election under subsection (e)(1)(A) may only be made with the written concurrence of the spouse of the employee or Member.

(D) For purposes of applying subchapter III of chapter 83 of title 5, United States Code, any such election or court order shall be treated the same as if it were a spousal agreement or court order under section 8345(k) of title 5, United States Code.

(3)(A) An election under subsection (e)(1)(A) may provide for a survivor benefit based on all or any portion of that part of the annuity of the employee or Member which is not designated or committed as a base for survivor benefits for a spouse or any other former spouse of the employee or Member. The employee or Member and the employee's or Member's spouse may make an election under section 8339(j)(1)(B) of title 5, United States Code, prior to the time of retirement for the purpose of allowing survivor benefits to be provided under this subsection.

(B) A court order under subsection (e)

(1)(B) may provide for an annuity for a former spouse which does not exceed that former spouse's pro rata share of 55 percent of the full amount of the annuity of employee or Member.

(4) The amount of the reduction in the employee's or Member's annuity shall be determined in accordance with section 8339(b)(2) of title 5, United States Code. Such reduction shall be effective as of—

(A) the commencing date of the employee's or Member's annuity, in the case of an election under paragraph (2)(A), or

(B) the effective date of this Act, in the case of an election under paragraph (2)(B).

(5) In the case of an employee or Member who died before the effective date of this Act after becoming entitled to an annuity and who—

(A) at the time the employee or Member became entitled to an annuity was married and did not elect not to provide for a survivor annuity for any surviving spouse under section 8339(j)(1) of title 5, United States Code;

(B) subsequently was divorced from the spouse to whom the employee or Member was married at the time of retirement;

(C) died and was not married at the time of death, the individual to whom the employee or Member was married at the time the employee or Member retired shall be entitled to an annuity under section 8341 of title 5, United States Code, as if married to the member at the time of death if the individual is qualified as a former spouse.

(6) For purposes of this section, the terms "former spouse", "employee", "Member", "court order", and "spousal agreement" have the same meanings as when used in subchapter III of chapter 83 of title 5, United States Code.

(f)(1) The provisions of this Act shall take effect beginning on the 120th day after the date of the enactment of this Act.

(2) The preceding subsections of this section regarding the rights of former spouses to any annuity under section 8341A(a) of title 5, United States Code, shall apply in the case of any individual who after the effective date of this Act becomes a former spouse of an individual who separates from the service after such date.

(3) Except to the extent provided in paragraph (5), the provisions of this section regarding the rights of former spouses to receive survivor annuities under subchapter III of chapter 83 of such title 5 shall apply in the case of any individual who after the effective date of this Act becomes a former spouse of a current or former employee or member in the Civil Service Retirement and Disability System.

DISPLACED HOMEMAKERS TAX CREDIT

SEC. 109. (a) Paragraph (1) of section 51(d) of the Internal Revenue Code of 1954 (relating to members of targeted groups) is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a comma and "or,"; and

(3) by adding at the end thereof the following new paragraph:

"(H) a displaced homemaker (as defined by paragraph (7) of section 3 of the Comprehensive Employment Training Act Amendments of 1978 (29 U.S.C. 802)).".

(b) Paragraph (4) of section 51(c) of such Code (defining wages) is amended by striking out "1981" and inserting in lieu thereof "1986".

(c) The amendments made by subsection (a) shall apply with respect to amounts paid or incurred after December 31, 1980, in taxable years after such date.

TITLE II—DAY CARE PROGRAM

CREDIT FOR CERTAIN HOUSEHOLD AND DEPENDENT CARE EXPENSES

SEC. 201. (a) ALLOWANCE OF CREDIT.—Subsection (a) of section 44A of the Internal Revenue Code of 1954 (relating to expenses for household and dependent care services necessary for gainful employment) is amended to read as follows:

"(a) ALLOWANCE OF CREDIT.—In the case of an individual who maintains a household which includes as a member one or more qualifying individuals (as defined in subsection (b)(1), there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) the employment-related expenses paid by such individual during the taxable year, multiplied by

"(2) the greater of—

"(A) the percentage equal to—

"(i) 60 percent, reduced by

"(ii) 1 percent for each $500 of such individual's adjusted gross income for such taxable year, or fraction thereof, which is in excess of $10,000, or

"(B) 20 percent.".

(b) CREDIT MAY EXCEED TAX LIABILITY.—Section 44A of such Code is amended—

(1) by striking out subsection (b), and

(2) by redesignating subsections (c) through (g) as subsections (b) through (f), respectively.

(c) DOLLAR LIMITATION.—Subsection (c) of section 44A of such Code (as redesignated by subsection (b)) is amended to read as follows:

"(c) DOLLAR LIMITATION.—

"(1) IN GENERAL.—The amount of the employment-related expenses incurred during any taxable year which may be taken into account under subsection (a) shall not exceed—

"(A) $2,500 if there is one qualifying individual with respect to the taxpayer for such taxable year, or

"(B) $5,000 if there are two or more qualifying individuals with respect to the taxpayer for such taxable year.

"(2) CHILD UNDER 2 YEARS OF AGE.—If a qualified individual with respect to the taxpayer is under 2 years of age for any part of the taxable year, paragraph (1) shall be applied by substituting '$3,700' for '$2,500' and '$7,500' for '$5,000'.".

(d) EARNED INCOME LIMITATION.—Paragraph (2) of subsection (d) of section 44A of such Code (as redesignated by subsection (b)) is amended to read as follows:

"(2) SPECIAL RULE FOR SPOUSE WHO IS A STUDENT OR INCAPABLE OF CARING FOR HIMSELF.—

"(A) IN GENERAL.—In the case of a spouse who is a student or a qualifying individual described in subsection (b)(1)(C), for purposes of paragraph (1), such spouse shall be deemed for each month during which such spouse is a full-time student at an educational institution, or is such a qualifying individual, to be gainfully employed and to have earned income of not less than—

"(i) $210 if subsection (c)(1)(A) applies for the taxable year, or

"(ii) $420 if subsection (c)(1)(B) applies for the taxable year.

In the case of any husband and wife, this paragraph shall apply with respect to only one spouse for any one month.

"(B) SPECIAL RULE FOR CHILD UNDER 2.—If subsection (c)(2) applies to a taxpayer, subparagraph (A) shall be applied by substituting '$315' for '$210' and '$630' for '$420'.".

(e) COORDINATION OF ADVANCED PAYMENT OF CREDIT; TABLES.—Section 44A of such Code is amended by adding at the end thereof the following new subsections:

"(g) TABLES.—The amount of the credit allowed by this section shall be determined under tables prescribed by the Secretary.

"(h) COORDINATION OF ADVANCE PAYMENTS OF CREDIT.—

"(1) RECAPTURE OF EXCESS ADVANCE PAYMENTS.—If any payment is made to the individual by an employer under section 3508 during any calendar year, then the tax imposed by this chapter for the individual's last taxable year beginning in such calendar year shall be increased by the aggregate amount of such payments.

"(2) RECONCILIATION OF PAYMENTS ADVANCED AND CREDIT ALLOWED.—Any increase in tax under paragraph (1) shall not be treated as tax imposed by this chapter for purposes of determining the amount of any credit (other than the credit allowed by subsection (a)) allowable under this subpart.".

(f) ADVANCE PAYMENT OF CREDIT.—Chapter 25 of such Code (relating to the general provisions of employment taxes) is amended by adding at the end thereof the following new section:

"SEC. 3508. ADVANCE PAYMENT OF CREDIT FOR HOUSEHOLD AND DEPENDENT CARE EXPENSES.

"(a) GENERAL RULE.—Except as otherwise provided in this section, every qualified employer making payment of wages to an employee with respect to whom a dependent care eligibility certificate is in effect shall, at the time of paying such wages, make an additional payment to such employee equal to such employee's dependent care advance amount.

"(b) DEPENDENT CARE ELIGIBILITY CERTIFICATE.—For purposes of this section, a dependent care eligibility certificate is a statement furnished by an employee to an employer which—

"(1) certifies that the employee will be eligible to receive the credit provided by section 44A for the taxable year,

"(2) certifies that the employee does not have a dependent care eligibility certificate in effect for the calendar year with respect to the payment of wages by another employer,

"(3) states whether or not the employee's spouse has a dependent care eligibility certificate in effect, and

"(4) contains such other information as the Secretary may prescribe by regulations.

A certificate shall be treated as being in effect with respect to a spouse if such a certificate will be in effect on the first status determination date following the date on which the employee furnishes the statement in question.

"(c) DEPENDENT CARE ADVANCE AMOUNT.—For purposes of this title, the term 'dependent care advance amount' means, with respect to any payroll period, the amount determined—

"(1) on the basis of—

"(A) the employee's wages from the employer for such period, and

"(B) the employment-related expenses paid by the employee during such period, and

"(2) in accordance with tables prescribed by the Secretary which indicate that portion of the credit allowed the employee under section 44A which is attributable to such period.

"(d) QUALIFIED EMPLOYER.—For purposes of this section, the term 'qualified employer' means an employer who employs more than 50 individuals at any time during the calendar year in which the wages are paid.

"(e) SPECIAL RULES. Under regulations prescribed by the Secretary—

"(1) payments made by an employer under subsection (a) shall be treated in the same manner as provided in section 3507(d), and

"(2) the provisions of section 3507(e) shall apply to dependent care eligibility certificates.".

(g) REFUNDABILITY OF THE CREDIT.—Subsection (b) of section 6401 of such Code (relating to amounts treated as overpayments) is amended to read as follows:

"(b) EXCESSIVE CREDITS.—If the amount allowable as credits under section 31 (relating to tax withheld on wages), section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil), section 43 (relating to earned income credit), and section 44A (relating to expenses for household and dependent care services necessary for gainful employment) exceeds the tax imposed by subtitle A (reduced by the credits allowable under subpart A of part IV of subchapter A of chapter 1, other than the credits allowable under sections 31, 39, 43, and 44A), the amount of such excess shall be considered an overpayment. For purposes of the preceding sentence, any credit allowed under paragraph (1) of section 32 (relating to withholding of tax on nonresident aliens and on foreign corporations) to a nonresident alien individual for a taxable year with respect to which an election under section 6013 (c) or (h) is in effect shall be treated as an amount allowable as a credit under section 31.".

(h) CONFORMING AMENDMENTS.—

(1) Paragraph (5) of section 44A(e) of such code (as redesignated by subsection (b) of this Act) is amended by striking out "subsection (c)(1)" and inserting in lieu thereof "subsection (b)(1)".

(2) Section 44C(b)(5), 44D(b)(5), 44E (e)(1), 55(b)(2), and 56(c) of such Code are amended by striking out "and 43" and inserting in lieu thereof "43, and 44A".

(3) Paragraph (4) of section 6201(a) of such Code (relating to assessment authority) is amended to read as follows:

"(4) ERRONEOUS CREDIT.—If on any return or claim for refund of income taxes under subtitle A there is an overstatement of the credit allowable by section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil), section 43 (relating to earned income), or section 44A (relating to expenses for household and dependent care services necessary for gainful employment), the amount so overstated which is allowed against the tax shown on the return or which is allowed as a credit or refund may be assessed by the Secretary in the same manner as in the case of a mathematical or clerical error appearing upon the return, except that the provisions of section 6213(b)(2) (relating to abatement of mathematical or clerical error assessments) shall not apply with regard to any assessment under this paragraph.".

(4) Paragraph (8) of section 6012(a) of such Code (relating to persons required to make returns of income) and paragraph (7) of section 6051(a) of such Code (relating to receipts for employees) are each amended by inserting "or section 3508 (relating to advance payment of household and dependent care credit)" after "credit)".

(5) Subsection (d) of section 6302 of such Code (relating to mode or time of collection) is amended by adding at the end thereof the following new paragraph:

"(3) For treatment of dependent care advance amounts as payment of withholding and FICA taxes see section 3508(d).".

(6) Subsection (a) of section 53 of such Code (relating to limitation of credit allowed by section 44B based on amount of tax) is amended—

(A) by inserting "and" at the end of paragraph (5),

(B) by striking out ", and" at the end of paragraph (6) and inserting in lieu thereof a period, and

(C) by striking out paragraph (7).

(7) Subsection (b) of section 6096 of such Code (relating to designation of income tax payments) is amended by striking out "44A,".

(i) The amendments made by this section shall apply to taxable years beginning after December 31, 1980.

EXCLUSION OF DEPENDENT CARE ASSISTANCE FROM THE INCOME OF EMPLOYEES

SEC. 202. (a) EXCLUSION FROM INCOME.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from income) is amended by redesignating section 128 as section 129 and inserting after section 127 the following new section:

"SEC. 128. DEPENDENT CARE ASSISTANCE PROGRAMS.

"(a) IN GENERAL.—Gross income of an employee does not include amounts paid or expenses incurred by the employer for dependent care assistance to such employee if the assistance is furnished pursuant to a program which is described in subsection (d).

"(b) EARNED INCOME LIMITATION.—

"(1) IN GENERAL.—The amount excluded from the income of an employee under subsection (a) for any taxable year shall not exceed—

"(A) in the case of an employee who is not married at the close of such taxable year, the earned income of such employee for such taxable year, or

"(B) in the case of an employee who is married at the close of such taxable year, the lesser of—

"(i) the earned income of such employee for such taxable year, or

"(ii) the earned income of the spouse of such employee for such taxable year.

"(2) SPECIAL RULE FOR CERTAIN SPOUSES.—For purposes of paragraph (1), the provisions of section 44A(e)(2) shall apply in determining the earned income of a spouse who is a student or incapable of caring for himself.

"(c) PAYMENTS TO RELATED INDIVIDUALS.—No amount paid or expenses incurred during the taxable year of an employee by an employer in providing dependent care assistance to such employee shall be excluded under subsection (a) if such amount was paid directly to an individual—

"(1) with respect to whom, for such taxable year, a deduction is allowable under section 151(e) (relating to personal exemptions for dependents) to such employee or the spouse of such employee, or

"(2) who is a child of such employee (within the meaning of section 151(e)(3)) under the age of 19 at the close of such taxable year.

"(d) DEPENDENT CARE ASSISTANCE PROGRAM.—

"(1) IN GENERAL.—For purposes of this section a dependent care assistance program is a separate written plan of an employer for the exclusive benefit of his employees to provide such employees with dependent care assistance. The program must meet the requirements of paragraphs (2) through (6) of this subsection.

"(2) ELIGIBILITY.—The program shall benefit employees who qualify under a classification set up by the employer and found by the Secretary not to be discriminatory in favor of employees who are officers, owners, or highly compensated, or their dependents. For purposes of this paragraph, there shall be excluded from consideration employees not included in the program who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective-bargaining agreement between employee representatives and one or more employers, if there is evidence that dependent care benefits were the subject of good-faith bargaining between such employee representatives and such employer or employers.

"(3) PRINCIPAL SHAREHOLDERS OR OWNERS.—Not more than 25 percent of the amounts paid or incurred by the employer for dependent care assistance during the year may be provided for the class of individuals who are shareholders or owners (or their spouses or dependents), each of whom (on any day of the year) owns more than 5 percent of the stock or of the capital or profits interest in the employer.

"(4) NO FUNDING REQUIRED.—A program referred to in paragraph (1) is not required to be funded.

"(5) NOTIFICATION OF ELIGIBLE EMPLOYEES.—Reasonable notification of the availability and terms of the program must be provided to eligible employees.

"(6) STATEMENT OF EXPENSES.—The plan shall furnish to an employee, on or before January 31, a written statement showing the amounts paid or expenses incurred by the employer in providing dependent care assistance to such employee during the previous calendar year.

"(e) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) DEPENDENT CARE ASSISTANCE.—The term 'dependent care assistance' means the payment of, or provision of, those services which if paid for by the employee would be considered employment-related expenses under section 44A(c)(2) (relating to expenses for household and dependent care services necessary for gainful employment).

"(2) EARNED INCOME.—The term 'earned income' shall have the meaning given such term in section 43(c)(2), but such term shall not include any amounts paid or expenses incurred by an employer for dependent care assistance to an employee.

"(3) EMPLOYEE.—The term 'employee' includes, for any year, an individual who is an employee within the meaning of section 401 (c)(1) (relating to self-employed individuals).

"(4) EMPLOYER.—An individual who owns the entire interest in an unincorporated trade or business shall be treated as his own employer. A partnership shall be treated as the employer of each partner who is an employee within the meaning of paragraph (3).

"(5) ATTRIBUTION RULES.—

"(A) OWNERSHIP OF STOCK.—Ownership of stock in a corporation shall be determined in accordance with the rules provided under subsections (d) and (e) of section 1563 (without regard to section 1563(e)(3)(C)).

"(B) INTEREST IN UNINCORPORATED TRADE OR BUSINESS.—The interest of an employee in a trade or business which is not incorporated shall be determined in accordance with regulations prescribed by the Secretary, which shall be based on principles similar to the principles which apply in the case of subparagraph (A).

"(6) UTILIZATION TEST NOT APPLICABLE.—A dependent care assistance program shall not be held or considered to fail to meet any requirements of subsection (d) merely because of utilization rates for the different types of assistance made available under the program.

"(7) DISALLOWANCE OF EXCLUDED AMOUNTS AS CREDIT OR DEDUCTION.—No deduction or credit shall be allowed under any other section of this chapter for any amount excluded from income by reason of this section.".

(b) EXCLUSION FROM WAGES.—

(1) EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX.—Subtitle C of such Code is amended by striking out "section 127" in section 3121(a)(18) (relating to the Federal Insurance Contributions Act), section 3306 (b)(13) (relating to the Federal Unemployment Tax Act), and section 3401(a)(19) (relating to collection of income at source on wages) and inserting in lieu thereof "section 127 or 128".

(2) SOCIAL SECURITY ACT.—Subsection (q) of section 209 of the Social Security Act (defining wages) is amended by striking out "section 127" and inserting in lieu thereof "section 127 or 128".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1980.

TITLE III—ARMED FORCES

AMENDMENTS TO TITLE 10, UNITED STATES CODE

SEC. 301. (a)(1) Section 4712(d) of title 10, United States Code, is amended by striking out clauses (1) through (9) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(E) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

(2) Paragraph (2) of section 4713(a) of such title is amended by striking out clauses (A) through (I) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(E) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

(b)(1) Section 5896(a) of such title is amended—

(A) by striking out "male" each place it appears in clauses (1) and (2);

(B) by striking out "male officers of the Naval Reserve and eligible women officers appointed under section 5581 of this title before the effective date of the Defense Officer Personnel Management Act" in clause (3) and inserting in lieu thereof "officers";

(C) by striking out "male officers of the Naval Reserve and Women Officers appointed under section 5581 of this title before the effective date of the Defense Officer Personnel Management Act" in clause (4) and inserting in lieu thereof "officers";

(D) by striking out "or the Medical Service Corps" in clauses (3) and (4) and inserting in lieu thereof "the Medical Service Corps, or the Nurse Corps";

(E) by inserting "and" at the end of clause (3);

(F) by striking out the semicolon at the end of clause (4) and inserting in lieu thereof a period; and

(G) by striking out clauses (5), (6), (7), and (8).

(2) Section 5896 of such title is further amended by striking out subsection (b) and redesignating subsections (c) through (f) as subsections (b) through (e), respectively.

(c)(1) Section 5897 of such title is amended—

(A) by striking out "Male officers" at the beginning of clauses (1) through (4) of subsection (b) and inserting in lieu thereof "Officers";

(B) by striking out clauses (5), (6), and (7) of subsection (b);

(C) by redesignating clause (8) of subsection (b) as clause (5); and

(D) by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) A board convened under this chapter that recomends officers of the Naval Reserve in the grade of lieutenant or lieutenant (junior grade) in the Medical Corps, the Judge Advocate General's Corps, the Chaplain Corps, the Dental Corps, the Medical Service Corps, or the Nurse Corps for promotion shall certify in its report that, in the opinion of a majority of the members of the board, the officers recommended are selected as fitted to assume the duties of the next higher grade.".

(2) Section 5898 of such title is amended—

(A) by striking out "(a)" at the beginning of subsection (a) and by striking out ", except as provided in subsection (b) of this section," in the second sentence of such subsection; and

(B) by striking out subsection (b).

(d) Section 5899 of such title is amended—

(1) by striking out "male officer of the Naval Reserve, or a woman officer appointed under section 5581 of this title before the effective date of the Defense Officer Personnel Management Act," and inserting in lieu thereof "officer of the Naval Reserve" in subsection (a);

(2) by striking out "male" each place it appears in subsection (b); and

(3) by striking out subsections (c) and (d) and redesignating subsections (e) through (h) as subsections (c) through (f), respectively.

(e)(1) Section 6403 of such title is repealed.

(2) The table of sections at the beginning of chapter 573 of such title is amended by striking out the item relating to section 6403.

(f)(1) Section 9712(d) of such title is amended by striking out clauses (1) through (9) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(F) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

(2) Paragraph 2 of section 9713(a) of such title is amended by striking out clauses (A) through (I) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(E) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

(g) The amendments made by this section shall become effective on October 1, 1981.

REPORT OF THE SECRETARY OF DEFENSE

SEC. 302. The Secretary of Defense shall transmit to the Congress each year, not later than January 31, a report analyzing the status of women in the armed forces of the United States during the preceding calendar year. The Secretary shall include in such report—

(1) detailed information, by armed force, on (A) the number of women serving on active duty and in the reserve forces, (B) the distribution of women by grade, (C) the number of promotions by grade received by women, (D) the distribution of women by military specialty held by women, and (F) the types of duty assignments held by women and the number in each; and

(2) detailed information on any discrimination which exists in the armed forces based solely on sex and recommendation for any action necessary to eliminate such discrimination.

TITLE IV—ESTATE TAX ON AGRICULTURAL PROPERTY AND FARM LOANS

INCREASE IN UNIFIED CREDIT

SEC. 401. (a) CREDIT AGAINST ESTATE TAX.—

(1) IN GENERAL.—Subsection (a) of section 2010 (relating to unified credit against estate tax) is amended by striking out "$47,000" and inserting in lieu thereof "$192,800".

(2) CONFORMING AMENDMENTS.—

(A) Subsection (b) of section 2010 is repealed.

(B) Subsection (a) of section 6018 (relating to estate tax returns by executors) is amended—

(i) by striking out "$175,000" in paragraph (1) and inserting in lieu thereof "$600,000",

(ii) by striking out paragraph (3), and

(iii) by redesignating paragraph (4) as paragraph (3).

(b) CREDIT AGAINST GIFT TAX.—

(1) IN GENERAL.—Paragraph (1) of section 2505(a) (relating to unified credit against gift tax) is amended by striking out "$47,000" and inserting in lieu thereof "$192,800".

(2) CONFORMING AMENDMENT.—Subsection (b) of section 2505 is amended to read as follows:

"(b) PHASE-IN OF CREDIT.—

"In the case of gifts made in:	Subsection (a)(1) shall be applied by substituting for '$192,800' the following amount:
1981	$47,000
1982	70,800
1983	96,300
1984	121,800.".

(c) EFFECTIVE DATES.—The amendments made—

(1) by subsection (a) shall apply to the estates of decedents dying after December 31, 1980, and

(2) by subsection (b) shall apply to gifts made after such date.

VALUATION OF CERTAIN FARM AND OTHER BUSINESS REAL PROPERTY

SEC. 402. (a) DEFINITION OF QUALIFIED REAL PROPERTY.—Subsection (b) of section 2032A of the Internal Revenue Code of 1954 (defining qualified real property) is amended by adding at the end thereof the following new paragraphs:

"(4) RETIRED AND DISABLED DECEDENTS.—

"(A) IN GENERAL.—If, on the date of death of the decedent, the decedent did not otherwise meet the requirements of paragraph (1)(C) with respect to any property, and the decedent—

"(i) was eligible to receive old-age benefits under title II of the Social Security Act, or

"(ii) was disabled for a continuous period ending on such date,

then paragraph (1)(C) shall be applied by substituting 'the date on which the decedent became eligible to receive old-age benefits under title II of the Social Security Act or became disabled' for 'the date of the decedent's death'.

"(B) DISABLED DEFINED.—For purposes of subparagraph (A), an individual shall be disabled if such individual has a mental or physical impairment which renders him unable to materially participate in the operation of the farm or other business.

"(5) SPECIAL RULE FOR SPOUSES WHO ARE QUALIFIED HEIRS.—In the case of any qualified real property which was acquired by a qualified heir who is the spouse of the decedent and which does not otherwise meet the requirements of paragraph (1)(C) upon the death of such spouse, such real property shall be treated as meeting the requirements of paragraph (1)(C) if such spouse was engaged in the active management of the operation of the business at all times during—

"(A) the 10-year period ending on the date of death of the spouse, or

"(B) the period beginning on the date of death of the decedent and ending on the date of death of the spouse.".

(b) CESSATION OF QUALIFIED USE.—

(1) IN GENERAL.—Paragraph (7) of section 2032(o) of the Internal Revenue Code of 1954 (defining cessation of qualified use), is amended to read as follows:

"(7) CESSATION OF QUALIFIED USE.—For purposes of paragraph (1)(B)—

"(A) IN GENERAL.—Real property shall cease to be used for the qualified use if—

"(i) such property ceases to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the property qualified under subsection (b), or

"(ii) except as provided in subparagraph (B), during any period of 8 years ending after the date of the decedent's death and before the date of the death of the qualified heir, there has been periods aggregating 3 years or more during which—

"(I) in the case of periods during which the property was held by the decedent (other than periods during which the decedent was an individual described in subsection (b)(4)(A)(i) or (ii)), there was no material participation by the decedent or any member of the family in the operation of the farm or other business, and

"(II) in the case of periods during which the property was held by any qualified heir, there was no material participation by such qualified heir or any member of his family in the operation of the farm or other business.

"(B) 15-YEAR ACTIVE MANAGEMENT.—If an eligible qualified heir elects, at such time and in such manner as the Secretary may prescribe, to have provisions of this subparagraph apply to any real property—

"(i) the provisions of clause (ii) of subparagraph (A) shall not apply to such property, and

"(ii) such property shall cease to be used for the qualified use if the fiduciary or the eligible qualified heir or any member of his family did not take part in the active management of the farm or other business at all times during the period beginning on the date of death of the decedent and ending on the earlier of—

"(I) the date of death of the qualified heir, or

"(II) the date which is 15 years from the date of death of the decedent.

"(C) ELIGIBLE QUALIFIED HEIR.—For purposes of this paragraph, the term 'eligible qualified heir' means—

"(i) any qualified heir with respect to real property the qualified use for which is a farming purpose described in subparagraph (c) of subsection (e)(5), and

"(ii) in any other case, a qualified heir who, on the date of death of the decedent—

"(I) is the spouse of the decedent,

"(II) has not attained the age of 21,

"(III) is a student described in subparagraph (A) or (B) of section 1519(e)(4), or

"(IV) was disabled (within the meaning of subsection (b)(4)(B)) for a continuous period ending on such date.".

(2) CONFORMING AMENDMENT.—Subsection (e) of section 2032A of such Code (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(12) ACTIVE MANAGEMENT.—The term 'active management' means the making of the management decisions of a business (other than the daily operating decisions).".

(c) REPEAL OF $500,000 LIMITATION.—Subsection (a) of section 2032A of the Internal Revenue Code of 1954 (relating to value based on use under which property qualifies) is amended to read as follows:

"(a) VALUE BASED ON USE UNDER WHICH PROPERTY QUALIFIES.—If—

"(1) the decedent was (at the time of his death) a citizen or resident of the United States; and

"(2) the executor elects the application of this section and files the agreement referred to in subsection (d)(2),

then, for purposes of this chapter, the value of qualified real property shall be its value for the use under which it qualified, under subsection (b), as qualifies real property.".

(d) CLARIFICATION OF RENTAL TO FAMILY MEMBERS.—Subsection (b) of section 2032A of the Internal Revenue Code of 1954 (defining qualified real property) is amended by inserting "by the decedent or member of the decedent's family" after "qualified use" each place it appears in paragraph (1).

INTEREST RATE ON EXTENDED PAYMENTS OF ESTATE TAXES

SEC. 403. Section 6601 of the Internal Revenue Code of 1954 (relating to interest on underpayment, nonpayment, or extension of time for payment of tax) is amended by—

(1) redesignating subsection (k) (relating to no interest on certain adjustments) as subsection (l), and

(2) adding immediately after subsection (j) a new subsection (k) to read as follows:

"(k) INTEREST RATE ON PORTION OF ESTATE TAX EXTENDED UNDER SECTION 6166.—

"(1) IN GENERAL.—If the time for payment of an amount of tax imposed by chapter 11 is extended as provided in section 6166, interest on the portion of such amount which does not qualify for the 4-percent rate under subsection (j), shall (in lieu of the annual rate provided by subsection (a)) be paid at a rate determined under paragraph (2). For purposes of this subsection, the amount of any deficiency which is prorated to installments payable under section 6166 shall be treated as an amount of tax payable in installments under such section.

"(2) INTEREST RATE.—The rate of interest under this subsection shall be the lesser of—

"(A) 6 percent, or

"(B) a rate determined in the same manner as under section 6621 except that subsection (c) thereof shall be applied by substituting '75 percent' for '90 percent'.

The rate determined under subparagraph (B) shall not be less than 4 percent.

"(3) TREATMENT OF PAYMENTS.—In any case where this subsection and subsection (j) apply with respect to the amount of tax imposed by chapter 11 which is extended as provided in section 6166, any payment of a portion of such amount shall be allocated to the 4-percent portion in accordance with paragraph (3) of subsection (j) and any remaining amount shall be treated, for purposes of computing interest for periods after such payment, as reducing the amount to which this subsection applies.", and

(3) striking out "For purposes of this subsection," in paragraph (2) of subsection (j) and inserting in lieu thereof "For purposes of this subsection and subsection (k),".

FARM LOANS

SEC. 404. The second sentence of section 303(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1923(a)) is amended by striking out "are married or".

TITLE V—NONDISCRIMINATION IN INSURANCE

SHORT TITLE

SEC. 501. This title may be cited as the "Nondiscrimination in Insurance Act".

FINDINGS AND POLICY

SEC. 502. (a) The Congress finds that discrimination based on race, color, religion, sex, or national origin, by any insurer which is engaged in commerce or whose activities affect commerce, in connection wih any application for, or the terms, conditions, rates, benefits, or requirements of insurance policies and contracts (including annuity or pension contract) (1) burdens the commerce of the Nation, (2) impairs the economic welfare of large numbers of people who rely on the protection of such policies and contracts, (3) constitutes an unfair trade practice which adversely affects commerce, and (4) makes it difficult for emloyers to comply with Federal laws prohibiting such discrimination against their employees.

(b) The Congress therefore declares that it is the policy of the United States that no insurer shall, on the basis of the race, color, religion, sex, or national origin of any individual or group of persons, (1) refuse to make insurance available to any applicant for insurance, (2) with respect to insurance contracts to which this title applies, treat any such applicant or insured differently than any other applicant or insured with respect to the terms, conditions, rates, benefits, or requirements of any such insurance contract, or (3) commit any other discriminatory action prohibited by this title. It is further the policy of the Congress that this title shall not affect the responsibility and authority of States to regulate the business of insurance, or any regulation or order of any State agency concerning or applicable to the business of insurance, if such regulation or order is consistent with and does not prevent compliance with this title.

DEFINITION

SEC. 503. For purposes of this title—

(1) The term "commence" means trade, traffic, commerce, transportation, transmission, or communication between a place in a State and any place outside thereof; or within the District of Columbia or a territory or possession of the United States; or between points in the same State but through a point outside thereof.

(2) The term "discriminatory action" means action by an insurer which is unlawful under this title and contrary to the policy stated in section 502.

(3) The term "insurance" means any arrangement (whether by contract, policy, binder, reinsurance, or otherwise) whereby an insurer (including any governmental agency) will provide benefits (whether by reimbursement, periodic or lump-sum payments, or otherwise) in case specified events occur in connection with death, disability, medical conditions, attainment of specified age, retirement from employment, economic loss, theft, or other events customarily dealt with in insurance policies and contracts (including annuity or pension contracts) relating to life, accident and casualty, theft, retirement, liability, health, disability, or economic loss.

(4) The term "insured" means any person who is insured under, or is or may be an applicant for insurance under, a contract of insurance issued or to be issued by the insurer.

(5) The term "insurer" means any person (A) who provides insurance to others or otherwise engages in the business of insurance and (B) whose activities (i) affect commerce, (ii) utilize facilities of the United States Postal Service, (iii) utilize any facilities used in commerce by any person, or (iv) result in a discriminatory action carried on under color of any law, statute, ordinance, or regulation, or required, permitted, or sanctioned, or supported with funds provided, by the United States, any State or political subdivision, or any agency or officer thereof; and includes such person's agent.

(6) The term "activities affect commerce" means any activity which directly or indirectly relates to, impinges upon, or involves any activity in commerce, and includes any governmental activity.

(7) The term "person" includes one or more individuals, governments, and agencies of the United States or of any State or political subdivision thereof, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint ventures, joint stock companies, societies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers, and fiduciaries.

(8) The term "sex" means the gender of the insured and includes pregnancy, childbirth, or related medical conditions of a female insured, except that nothing in this title shall be deemed to amend section 701(k) of the Civil Rights Act of 1964.

(9) The term "State" includes a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

UNLAWFUL DISCRIMINATORY ACTIONS

SEC. 504. (a) It shall be unlawful discriminatory action for any insurer, because of the race, color, religion, sex, or national origin of any person or any group of persons, to do any of the following with respect to any person who after the effective date of this title applies or may apply for a contract of insurance or is an insured under a contract

of insurance made after the effective date of this title—

(1) to refuse to make, or to refuse to negotiate, or otherwise make unavailable or deny, or delay receiving and processing an application for, or contract of insurance of the type ordinarily made by such insurer; and

(2) to treat such applicant or insured differently than the insurer treats or would treat any other applicant or insured with respect to the terms, conditions, rates, benefits, or requirements of such insurance contract.

(b) It shall be an unlawful discriminatory action for any insurer—

(1) to utilize any statistical table (whether of mortality, life expectancy, morbidity, disability, disability termination, or losses) or any other statistical compilation as a basis for any action which is contrary to this section;

(2) to discriminate in any manner against any person because such person has opposed any practice made unlawful by this title or because such person has made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, hearing, or litigation under this title; or

(3) to make, print, or publish, or cause to be made, printed, or published, any notice, statement, or advertisement, relating to insurance coverage that such insurer provides or will provide, indicating any preference, limitation, specification, or discrimination based on the race, color, religion, sex, or national origin of any person or group of persons, or an intention to make any such preference, limitation, specification, or discrimination.

(c) With respect to all contracts of insurance existing on the date this title becomes effective—

(1) it shall be an unlawful discriminatory action for any insurer after the effective date of this title—

(A) to charge or collect premium payments or contributions which become due after the effective date of this title; or

(B) to determine the amount of or to pay to any insured or other beneficiary under an insurance, annuity, or pension contract any periodic or lump-sum payment after the effective date of this title;

if such charge, collection, determination, or payment, is based, directly or indirectly, either on race, color, religion, sex, or national origin of any person or group of persons, or on any statistical table whose use would, if applied to contracts made after the effective date of this title, violate any provision of this section; and

(2) the insurer may modify the premium and contribution rates and may increase but not decrease the periodic and lump-sum payments under such existing contracts insofar as they are due after the effective date of this title, if clearly necessary to comply with the nondiscrimination requirements of this title (and if the State agency having jurisdiction to regulate the business of insurance concurs that the modification requested by the insurer is clearly necessary to comply with such requirements and authorizes such modification), but such insurer need not refund any portion of the premiums and contributions which were payable to the insurer prior to the effective date of this title nor pay any additional amounts for the benefits which were payable by the insurer prior to the effective date of this title.

(d) Nothing in this title shall be deemed to prevent an insurer who regularly provides insurance coverage solely to persons of a single religious affiliation from continuing to provide insurance solely to persons of that religious affiliation.

STATE OR LOCAL ENFORCEMENT PRIOR TO JUDICIAL ENFORCEMENT UNDER THIS TITLE

SEC. 505. (a) If an alleged discriminatory action occurs in a State, or political subdivision thereof, which has a State or local law prohibiting such discriminatory action and establishing or authorizing a State or local authority to grant or seek relief from such discriminatory action or to institute criminal proceedings with respect thereto upon receiving written notice thereof within 180 days after the alleged discriminatory action occurs, the provisions of this section shall apply.

(b) It is the purpose of this title to accord to State and local authorities the primary opportunity to enforce the State or local laws prohibiting such discriminatory action before an aggrieved person may invoke the judicial remedy provided under section 506 of this title. Therefore, no suit shall be filed under section 506 before the expiration of 60 days after the State or local authority has receiving the notice specified in subsection (a), unless any proceeding begun by the State or local authority after such notice has been earlier terminated (except that such 60-day periods shall be 120 days during the first year after the effective date of such State or local law). The notice of the alleged discriminatory action to commence such State or local proceedings shall be filed within the time prescribed by such State or local law, provided such prescribed time is not less than 180 days after the alleged discriminatory action occurred. If any State or local authority imposes any requirement for the commencement of such proceedings other than a requirement that a written and signed statement of the facts upon which the charge of the alleged discriminatory action is based be filed within 180 days after the alleged discriminatory action occurred, the proceeding shall be deemed to have been commenced for the purposes of this section at the time such statement is filed with the appropriate State or local authority. Depositing such statement in the United States mail by certified or registered mail addressed to the State or local agency shall be equivalent to such filing. Where the alleged discriminatory action is continuing in character, the 180 days shall be computed from the last day on which such continuing discriminatory action occurred.

CIVIL ACTION BY OR ON BEHALF OF AGGRIEVED PERSON

SEC. 506. If the State or political subdivision thereof in which the alleged discriminatory action occurred does not have a State or local law which complies with subsection 505(a), or if the State or local authority has failed within 60 days after receiving the notice prescribed in section 505 to either (1) institute and diligently prosecute a proceeding pursuant to section 505, or (2) enter into a conciliation agreement to which the aggrieved person is a party, a civil action against the insurer may be brought by or on behalf of such person. Such civil action may be instituted in any State court having jurisdiction under State law or in a United States district court having jurisdiction under section 508 of this title. No suit under this section may be filed after the expiration of 180 days following the alleged discriminatory action, except that in a case where the aggrieved person has instituted proceedings with a State or local authority pursuant to section 505 and such authority either has notified the aggrieved person that the proceedings under the State or local law have been terminated, or has failed to comply with clauses (1) or (2) of this section within 60 days after receiving the notice prescribed in section 505, the suit under this section may be filed not later than 90 days thereafter, or 180 days after the occurrence of the alleged discriminatory action, whichever is later. Where the alleged discriminatory action is continuing in character, the 180 days shall be computed from the last day on which such discriminatory action occurred. Upon the complainant's application and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the action without the payment of fees, costs, or security. Upon request of the State or local authority or any party to the suit, the court may stay further proceedings for not more than 60 days pending the termination of State or local proceedings described in section 505.

CIVIL ACTION BY THE ATTORNEY GENERAL INVOLVING ISSUES OF GENERAL PUBLIC IMPORTANCE

SEC. 507. Whenever the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title, or that any group of persons has been denied any of the rights granted by this title, and such denial raises an issue of general public importance, the Attorney General may bring a civil action in any United States district court having jurisdiction under section 508 of this title, by filing with it a complaint setting forth the facts and requesting such relief, including an application for a permanent or temporary injunction, restraining order, or other order against the person or persons responsible for such pattern or practice or denial of rights, as the Attorney General deems necessary to insure the full enjoyment of the rights granted by this title.

JURISDICTION

SEC. 508. Any civil action under this title instituted in a United States district court shall be brought, without regard to the amount in controversy in the United States district court of any judicial district in the State in which (1) the alleged discriminatory action occurred, (2) the insurer's principal office is located, (3) the insurer maintains and administers records relevant to the alleged discriminatory action, (4) the insurer resides or is located, (5) the insurer is incorporated or has a designated agent for service of process, or (6) the insurer transacts business. The case shall be heard at the earliest practicable time and expedited in every way. If no judge is promptly available to hear and decide the case, the chief judge or acting chief judge of the district shall so certify to the chief judge of the circuit who shall promptly designate a district or circuit judge of the circuit to hear and determine the case.

JUDICIAL RELIEF

SEC. 509. (a) If the court determines that the insurer, whether public or private, has committed a discriminatory action, the court may—

(1) enjoin the respondent from committing any discriminatory action in the future;

(2) order the respondent to amend the insurance contract to conform with the requirements of this title;

(3) require the respondent to reimburse the aggrieved person for all actual damages sustained by such person, either in an individual capacity or as a member of a class, including reimbursement for excess rates paid or inadequate benefits received as a result of a discriminatory action;

(4) require the respondent to pay punitive damages, in addition to the actual damages under paragraph (3), of not more than $25,000 for each individual plaintiff and not more than $800,000 in the case of a class action;

(5) allow the person aggrieved such reasonable attorney fees as part of the costs assessed against the respondent, as the court in its discretion deems proper;

(6) order such other equitable relief, including temporary or preliminary relief pending final disposition of the case, as the court may deem appropriate; and

(7) utilize the sanction of contempt to enforce its orders under this section.

(b) In determining the amount of punitive damages under subsection (a)(4), the court shall consider, among other relevant factors, the amount of actual damages awarded, the frequency and persistence of the respondent's failure to comply with requirements of this title, the respondent's resources, the number of persons affected, the extent to which the respondent was enriched through its discriminatory action, and the extent to which the respondent's failure to comply was intentional.

INAPPLICABILITY

SEC. 510. Nothing in this title shall be deemed to—

(1) modify any provision in the Social Security Act;

(2) modify any provision in any law or Executive order prohibiting discrimination in employment on the basis of an individual's race, color, religion, sex, or national origin; or in any rule, regulation, order, or agreement under such law or Executive order; or

(3) exempt or relieve any person from any liability, duty, penalty, or punishment under any present or future law of any State or political subdivision thereof, other than any such law which purports to require or permit the doing of any act which would be a discrimi'natory action under this title.

EFFECTIVE DATE

SEC. 511. This title shall become effective on the ninetieth day after the date of the enactment of this Act.

TITLE VI—REGULATORY REFORM AND SEX NEUTRALITY

REVIEW OF REGULATIONS

SEC. 601. (a) The head of each Federal administrative agency shall conduct a review of the regulations of that agency designed to assure that such regulations are sex neutral.

(b) All rules, regulations, documents, and other writings of Federal administrative agencies shall, to the extent practicable, use words that are neutral as to gender unless the subject matter specifically applies only to one sex or the words used do not result in sex-based discrimination.

AMENDMENT TO TITLE 1, UNITED STATES CODE

SEC. 602. (a) Section 1 of title 1 of the United States Code is amended by striking out "words importing the masculine gender include the feminine gender as well;".

(b) Title 1 of the United States Code is amended by inserting a new section 1a immediately after section 1 thereof, as follows:

"SEC. 1a. Unless the Congress specifically provides that this section shall be inapplicable to a particular Act or provision, all words of the Act or provision importing one gender include and apply to the other gender as well.".

TITLE VII—STUDY OF ENFORCEMENT OF ALIMONY AND CHILD SUPPORT PAYMENTS

STUDY AUTHORIZED

SEC. 701. (a) The Attorney General shall undertake thorough study of the appropriate role of the Federal Government in the enforcement of delinquent payments of alimony, child support, and property settlement orders against an absent spouse or parent, with particular consideration of—

(1) the problems created by varying State and local jurisdictions in the enforcement of such orders; and

(2) the appropriate actions which the Federal Government can take to assure the timely payments of alimony, child support, and property settlements.

(b) The Attorney General shall prepare and submit to the President and to the Congress not later than one year after the date of enactment of this Act a report of the study required by this section together with such recommendations, including recommendations for legislation, as the Attorney General deems appropriate.

(c) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.

DURENBERGER-PACKWOOD-HATFIELD ECONOMIC EQUITY ACT OF 1981

TITLE I—TAX AND RETIREMENT MATTERS

Individual Retirement Accounts

Background

Homemakers are ineligible for retirement benefits in their own right. They are not covered by any employment-related retirement plans such as Social Security. Nor are they allowed to establish individual retirement accounts.

Under present law, an employed person who is not covered by any other pension plan—public or private—may establish an Individual Retirement Account (IRA). The individual may make a tax deductible contribution in an amount equal to 15 percent of gross income up to a maximum of $1,500 per year. If the eligible individual has a non-working spouse, the maximum contribution rises to $1,750 per year. But an individual (i.e. homemaker) with no income *cannot* establish an individual retirement account in her own right.

Current statistics show that an increasing number of women are entering the labor market. It will naturally follow that more women will be covered by pension plans as this trend continues. However, there is no individual protection for women who choose to remain at home, typically to raise a family. Under current law, a homemaker has no choice but to depend on the wage-earning spouse for retirement security.

Proposal

This provision would permit a non-working spouse to establish an individual retirement account in her (or his) own right. The income of the working spouse would be the basis for determining the allowable contribution.

The following table illustrates the proposed changes:

Income (add to determine total couple income)	Present IRA allowable for individual	Present IRA allowable for individual and spouse	Proposed IRA allowable for individual and spouse
$5,000 plus 0	$750	$750	$1,500
$10,000 plus 0	1,500	1,500	3,000
$10,000 plus $1,000	1,500+150	(1)	3,000
$11,000 plus 0	1,500	1,650	3,000
$12,000 plus 0	1,500	1,750	3,000

[1] Ineligible.

This "IRA for homemakers" would allow a non-working spouse the opportunity to set aside a *reasonable* fund for retirement years.

This provision, in effect, recognizes the status of the non-working spouse as an individual, rather than the "extension" of the working spouse.

In addition, we would provide that alimony income be counted as compensation income for the purpose of determining the maximum contribution to an IRA. This amendment would allow divorced persons receiving alimony to be able to set aside and deduct a portion of their alimony payments as a contribution to an IRA.

Heads of households

Background

Heads of households are unmarried persons who provide a home for a child or elderly parent and a majority of support for that dependent. They are usually divorced or widowed women caring for minor children. Heads of households thus have the burden of maintaining a home and caring for dependents without the advantage of two wage-earning adults.

Prior to 1975, heads of households could use the standard deduction (now zero bracket amount) used by married couples.

Beginning with the Tax Reduction Act of 1975, however, heads of households have been given a smaller zero bracket amount than married couples. Under current law, heads of households are entitled to a $2,300 zero bracket amount. Married couples filing jointly are entitled to a $3,400 ZBA.

Proposal

To amend the Internal Revenue Code to provide that the zero bracket amount for heads of households be equal to that of married couples filing jointly: $3,400.

We should not place tax penalties on heads of households. They have even greater financial pressures than married couples. Eighty-four percent of heads of households are women; 22.2 percent are non-white. Practically no heads of households units have two earners, yet more than 50 percent of married couples have two earners.

We discriminate against heads of households in the Tax Code. We allow a smaller zero bracket amount for a group of taxpayers who have the same kinds of expenses, with typically lower incomes, than married couples. In 1978, the average income for a head of household was $10,308; for married couples it was $20,544. Married couples have incomes that average almost twice that of heads of households, yet heads of households have the same financial obligations of supporting a dependent and maintaining a home. This provision of our legislation would end the gross discrimination in the Tax Code against heads of households.

Displaced homemakers

Background

Displaced homemakers are persons who have spent many years in the home caring for family members, and subsequently lost their source of support through separation, divorce, death or disability of the spouse. There are an estimated 3.3 million displaced homemakers nationwide.

The displaced homemaker finds the adjustment process to their new lives overwhelming. Most of them have few marketable skills, and if they have worked, it was usually in the early years of their marriages. They need financial stability, training, and jobs in order to make the adjustment.

The transition from homemaker to wage earner is difficult to make, but imperative to the survival of most women who find themselves suddenly divorced, separated or widowed. Employers have been unwilling to credit displaced homemakers with previous work experience or transfer volunteer skills into employment qualifications.

Displaced homemakers who can find jobs frequently settle for low-skilled, low paying jobs which require little or no training and provide little or no opportunities for advancement.

There is an urgent need to bring these women into the work force.

Proposal

To amend the Internal Revenue Code to extend the targeted jobs tax credit for five years and to add displaced homemakers to the list of eligible hirees.

Under current IRS law, employers may elect to take a tax credit when they hire an individual from a targeted group of hard-to-employ persons. (Economically disadvantaged youths, SSI recipients, vocational rehabilitation referrals, economically disadvantaged Vietnam-era veterans).

This tax credit mechanism provides an incentive for employers to seek out individuals from these qualifying groups for employ-

ment. Frequently, this incentive results in the employment of trainable persons who lack the credentials and/or job experience to land the job without the tax incentive.

This incentive for private industry encourages employment of hard to place individuals in the private sector, where they are offered opportunities for training and upward mobility.

Adding displaced homemakers to the list of eligible hirees provides an incentive for employers to give extra consideration to this targeted group.

Private pension reform

Background

Older women are the fastest growing poverty group in America. And our present retirement income system does little to alleviate that situation.

Under private pension systems, women are penalized if they leave the labor force to rear children, and/or if they divorce. It is no wonder that 81% of women over 65 not living with relatives live below the poverty line.

The 1974 Employees Retirement Income Security Act (ERISA), was passed to insure that workers who participate in pension programs receive the benefits for which they are eligible. While that law contains significant improvements for pension recipients by providing minimum standards for participation, vesting, funding, and administration of pension plans, ERISA fails to address the differing needs of women.

Because employed women tend to be young, work part-time or part year, are concentrated in sales and service jobs, and interrupt their service for family obligations, most working women receive no pension coverage. The majority of employed women are not covered because they are concentrated in occupations that offer no pension plans at all. In fact, only 21% of women workers are covered by pension plans, compared to 49% of men. And just 13% of all working women actually receive their pension benefits.

The Economic Equity Act attempts to remedy some of these problems.

Proposal

1. Women As Workers:

Women in the 20 to 24 age bracket have the highest labor force participation rate among women—68.3% in 1978, projected to increase to 76.8% by 1985. Yet existing pension law fails to take into account the fact that women enter the labor force at an earlier age than men. This section of the bill would more closely equate the impact on the male and female segments of the labor force by lowering the age of participation in pension plans from 25 to 21. This would have a dramatic impact on women.

Any employer who wishes to get the tax benefits which go with having a company pension plan must meet the requirements of the Employee Retirement Income Security Act of 1974, as amended, and the relevant portions of the Internal Revenue Code. Existing law requires employers with qualified plans to allow an employee to participate in the pension plan on the latter of two dates: the day the employee reaches age 25 or the day the employee completes one year of service. An employee who begins work at age 18, for example, must work a minimum of seven years with the same employer before acquiring the right of pension participation. Conversely, one who enters the labor force at 24 must work only one year for the same right.

2. Women As Mothers:

Many women take extended "breaks-in-service" from a particular job in order to tend to family responsibilities. Even if they return to the same job, they lose pension credits which they had accumulated before leaving. This portion of the bill would allow companies who agreed to a one-year maternity or paternity leave, to count that period as a year of service for vesting, benefit and participation accrual.

3. Women As Wives and Widows:

Because of inequities that employed women face in the pension system or in careers as homemakers, most women are largely dependent on their spouse's pension to ensure adequate retirement income. But survivors' annuities pay only if a set of conditions are met, taking into account marital status, retirement age, and age of death. Because all of the specific conditions must be met, only 5 to 10% of surviving spouses actually receive the benefits, according to the National Women's Political Caucus.

ERISA requires private pension plans to offer optional joint and survivor annuities. There is no requirement, however, that the spouse be consulted or even informed of the wage earner's decision to terminate the survivor benefit. Because benefits under the joint plan are lower in order to compensate for the survivor annuity, many workers opt for the single life annuity and thus fail to provide for the spouse.

The Economic Equity Act states that the joint and survivor option will be automatic unless both spouses agree in writing not to elect the joint and survivor option.

Another provision of the bill requires that a survivor's benefit shall be paid to the participant's spouse, if the participant is vested and dies before retirement. This annuity shall not be less than the amount the survivor would have received if the vested participant had died after retirement. Currently, if a participant dies before he retires, the survivor benefit can be withdrawn. Many women suffer tremendously because of this law.

A similar provision relates to survivor benefits in a non-accidental death. The law presently states that if a participant in a pension plan dies from a non-accidental death within two years of his joint and survivor election, those survivor benefits can be denied.

It is not unusual for individuals stricken with terminal diseases, like cancer, to perish less than 24 months from the date on which the disease was diagnosed. With heart disease, the problem is even more pronounced. Most heart attacks are sudden, and unexpected. Yet a legitimate joint and survivor election, occurring less than two years before the fatal attack, can be disregarded. The provision eliminates language which is inconsistent with the universal provision of survivorship.

4. Women As Former Spouses:

This provision under private pensions recognizes marriage as an economic partnership, and establishes pensions as a legitimate property right. A similar protection was granted to spouses and former spouses under the 1965 amendment to the Social Security Act. (See Public Pension Reform section for complete description.)

Public pension reform

Background

The plight of the so-called displaced homemaker is becoming well-recognized in a society where nearly one of every two marriages ends in divorce. These divorced or widowed women who have devoted many years to maintaining the home and family often suffer serious consequences when they attempt to gain outside employment, or receive their rightful pension or retirement benefits.

Contrary to the popular myth of the merry divorcee, only a few are wealthy. Alimony is received by just 4 percent of divorced women. Furthermore, statistics indicate that while 89 percent of single-parent families are headed by mothers, three-quarters of these women received no child support from fathers. For even this minority of women, alimony and child support are no substitute for a vested pension interest. Both cease with the death of the employed or retired spouse.

Congress began to address this issue by amending the Social Security Act in 1977, providing pension benefits to divorced wives married 10 years or more. However, even these basic protections are not afforded a significant number of women married to civil service or military employees or employees enrolled in many private pension plans. For military and civil service employees, their spouses do not automatically receive Social Security. Thus, they discover once they are divorced, the wives lose all claim to retirement pay and survivor's benefits, as well as any right to health insurance benefits.

A recent victim of this policy as it pertains to the U.S. government's Foreign Service was Jane Dubs, who served beside Adolph Dubs for 30 years until their divorce in 1976. When Mr. Dubs was killed while serving as Ambassador to Afghanistan in 1979, she was refused any part of his survivor's benefits. Instead, the money went to the second Mrs. Dubs, his wife of only three years. This, despite the fact that the first Mrs. Dubs, like most Foreign Service homemakers was a vital resource, enriching the overseas communities with thousands of hours of donated services as a foreign emissary's wife.

Cultural, legal and linguistic barriers, as well as the constant international mobility of her husband's job prevent the Foreign Service wife from seeking employment outside the home. Yet divorced Foreign Service wives, after long years of unpaid government service abroad, have no employment record, no modern skills, no social security, no shared annuity, no survivor benefits, and often exhorbitantly expensive medical insurance.

Fortunately, this situation was remedied with the passage of an amendment to the Foreign Service Act in September 1980, which was introduced by Congresswoman Schroeder and myself.

Proposal

Included in the Economic Equity package is legislation similar to that in the Foreign Service Act, which will help address the inequities faced by divorced and widowed spouses of Civil Service and military employees.

The provision would:

Entitle women who were married to civil service or military employees for at least 10 years the right to a pro rata share of the benefits earned during marriage. This provision is subject to court review and modification, depending on the divorce settlement. However, the legislation demands that courts must view pensions as a valid property right. Many have not done so in the past. As a result, many of these women find that the retiree walks away from the divorce with a full retirement plan and health insurance, while the spouse walks away with nothing. Furthermore, even in cases where the courts have awarded partial retirement benefits, no court has considered the survivor's benefit as property to which the former spouse is entitled.

Mandate survivor's benefits unless the spouse and former spouse choose to waive receipt of such. Currently, an employee may opt out of survivor's benefits already agreed to, without notification of the spouse or former spouse. This legislation would require that employee and spouse or former spouse (if any) agree in writing to forego the survivor's benefit plan.

These proposals will not cost the taxpayer additional funds. Rather, they will allow a fair redistribution of retirement and survivor's benefits between the partners in marriage.

It is ironic that these outdated laws have been hardest on the woman who devotes herself entirely to the role of mother and homemaker. It is unconscionable that they should be "rewarded" in this manner. Certainly, it is time we viewed marriage as an economic partnership.

TITLE II—DAY CARE PROGRAM

Background

The role of women in the labor market, and its subsequent effects on the pattern of family life in America, has changed dramatically over the past twenty years.

At present, more than half the children under 18 years of age in the United States have mothers in the labor force. Our country's most prevalent family type is now the two-parent, two-wage earner family. If we add to this group the many single-parent families in which the sole parent (most likely a woman) works, then the "typical" American family in the 1980's is the one with working parents.

These statistics suggest the ever-growing demand for quality day care for our nation's children. As more mothers of young children enter the work force, more children are in need of quality care. We need more, and better, quality day care facilities. We need child care centers at places of employment, where parents can be close to their pre-school children. And we need to create incentives for employers to provide child care and cover child care costs for employees.

Proposal 1

To amend the Internal Revenue Code to allow employers to provide child care assistance as a tax-free fringe benefit to employees. Under current law, employers may offer a variety of tax-free fringe benefits to employees—health insurance, legal insurance, educational expenses, life insurance.

This child care assistance fringe benefit would be provided in the form of a direct payment, by an employer, for child care expenses incurred by an employee. Or it could take the form of child care services provided by an employer to the employee.

This section of the Economic Equity Act seeks to encourage a non-governmental solution to a major family economic concern.

The premise embodied in this proposal is that private employers should be encouraged to provide child care benefits for employees.

Employer-provided day care can be very effective in answering the needs of working parents. It provides a secure environment for children, close to their parents. And it encourages the establishment of new, quality facilities tailored to the needs of the particular work force.

Proposal 2

Current law allows a tax credit of 20 percent of expenses for care of dependent children under age 15 and spouses or other dependents who are incapable of self-care, provided the expense is incurred to enable the taxpayer to be gainfully employed or in active search of gainful employment.

The maximum amount creditable annually is $2,000 for one dependent (that is, a credit of $400) and $4,000 for the care of two or more dependents (a credit of $800). The credit is not refundable.

The Economic Equity Act creates a sliding scale refundable tax credit between 20 percent and 60 percent. People whose adjusted gross income is $10,000 could claim the full 60 percent tax credit. A $30,000 adjusted gross income would receive a 20 percent child care credit.

In addition to the sliding scale, taxpayers with an adjusted gross income of $10,000 would be eligible to receive their refundable credit on a monthly or quarterly basis.

Finally, this provision would increase the maximum amount creditable annually to $2,500 for one dependent and $5,000 for two or more dependents.

TITLE III—ARMED FORCES

Background

The number of women choosing military service as a career option has increased dramatically in recent years. The percentage of women in military service increased one hundred percent—from 1.08% to 7.5%—between 1968 and 1980. In absolute numbers, women in the military increased from 38,000 in 1968 to 150,000 in 1980. By 1985, that number will swell by an additional 80,000 to 11.9% of the military forces.

Guaranteeing equality of economic opportunity is as important in the public sector as in the private sector, and the military is an important segment of public sector employment. Women who volunteer their time in the country's service deserve the same benefits and promotional opportunities as their counterparts. Unfortunately, Federal statutes governing military benefits and promotion have been one of the prime examples of sex discrimination in the U.S. Code.

Reforms signed into law in 1980 isolated and eliminated 80 separate statutory sections of the U.S. Code which denied economic equality to women in military service.

Unfortunately, the bill failed to resolve four important instances of economic discrimination in military service. The Economic Equity Act Addresses these remaining provisions.

Proposal

1. Four sections of the Code specify promotions procedures for Naval and Marine Corps Reserve officers, distinguishing between situations in which "male officers" shall be recommended for promotion and those in which "female officers" shall be recommended. The Economic Equity Act eliminates these distinctions.

2. Current law grants the Secretary of the Navy special authority to eliminate women officers from active duty status in the Naval and Marine Corps Reserve. Separate provisions governing the elimination of women officers has no place in the Code. Women Reserve officers should be eliminated from active status under the same relative conditions that would require the retirement or discharge of a male officer on the active list. The Economic Equity Act eliminates this distinction.

3. Current law establishes special rules for distributing the assets of deceased members of the Air Force and Army. As remarkable as it may seem, present law gives preference, as distributees, to sons over daughters, to fathers over mothers, and to brothers over sisters. The Economic Equity Act removes these preferences by creating a distribution formula based on three classes—children, parents, siblings.

4. The fourth proposal of the Economic Equity Act requires the Secretary of Defense to make an annual report to Congress concerning the status of women in the Armed Forces. This report must include statistics on

a. the number of women serving on active duty and Reserve;

b. the distribution of women by grade;

c. the number of promotions by grade for women;

d. the military specialities held by women;

e. the types of duty assignments given to women.

The report must also include recommendations on actions necessary to eliminate discrimination based on sex in promotion and economic benefits.

TITLE IV—ESTATE TAX ON AGRICULTURAL PROPERTY AND FARM LOANS

Background

The average life span of a woman in America exceeds the life span of a man by nearly eight years. The failure of the Federal Estate Tax to adequately consider this social and biological fact has brought untold hardship to rural women throughout the United States.

A family farm is a special economic unit. It merges the concepts of home and business, and success in each of these aspects is essential to the success of the farm. Unfortunately, the Federal Estate Tax fails to reflect this reality.

The surviving spouse—normally a woman—has to find a way to pay an estate tax levied against the highest commercial use of the land, rather than its actual use. There are exceptions, but to qualify, a spouse must establish that she "materially participated" in the management of the farm. No one who lived on a farm would question the material participation of a farm wife. But under present law, she is often deemed to have no contribution unless she actually managed the farm, or made a financial contribution to it.

This ignores the reality of the "family farm" style. The word "family" is as essential as the word "farm", and labors to yield a stable family are as important as labors to increase the yield of the land.

It is essential to revise the laws and regulations controlling assessment of the Estate Tax to remove the implied bias against a woman's contribution to the farm.

Proposal

1. Present tax law requires that farm property be assessed for taxation at its highest possible use. In other words, farm property is taxed as if it were the location of an office building, a shopping center, housing development, or some similar commercial use. In the Tax Reform Act of 1976, Congress granted limited relief by permitting up to $500,000 in farm property to be taxed at special valuation (i.e., its value as farm land rather than commercial property) if certain stringent conditions were met. But with the rapid increase in land values over the past five years, the benefit of this $500,000 exemption has been rapidly eroding. The Economic Equity Act adopts the principle that land used as farm land should be taxed as farm land. It removes the $500,000 "cap" and taxes all farm land qualifying for special valuation on its actual value as farm land.

2. The "special use valuation" rule has been of previous little help to farm widows because criteria used to determine eligibility grants no credence to the noneconomic contribution of a farm wife. To qualify for special valuation, either the heir and/or the decedent must have "materially participated" in the conduct of the farm for five years prior to the date of the decedent's and continually subsequent the decedent's death, save a three-year grace period. The IRS has defined material participation as, in effect, economic participation. The result? Material participation discriminates entirely against women and senior citizen farmers.

The Economic Equity Act makes several significant changes in the material participation requirement.

First, the bill provides that the material participation requirement need only be met until the date upon which the decedent retires or becomes disabled. Because the present statute refers to material participation during an eight-year period ending on the date of death, the lower estate tax is unavailable for the estate of a decedent who may have materially participated in the farm, but who retired or became disabled more than three years before his or her death. Clearly, present law discriminates against the elderly and disabled farmer. This bill, therefore, looks to the date of retirement or disability, rather than the date of death, for purposes of the material participation test.

Second, the bill provides an "active management" test, rather than a material participation test, with respect to farm or other business real property included in the gross estate if the property had been inherited from a spouse and had qualified for special valuation in that spouse's estate. "Active management" is defined to mean the making of management decisions of a business, other than the daily operating decisions. Often a surviving spouse who did not "materially participate" during the lifetime of the de-

cedent will become involved in the operation of the farm or business after the decedent's death, but may not actually "materially participate" in the business. Currently, the lower estate tax is unavailable for the estate of a surviving spouse who does not materially participate for a period of three years after the decedent's death.

Third, the bill provides that an agent of the qualified heir may engage in the active management of the farm or where the qualified heir was a surviving spouse of the decedent, a minor, a student or is disabled in the case of other property where an agent is employed. This is designed to aleviate perceived problems of surviving spouses and minor or disabled relatives (and relatives of the decedent who are students). Such persons might desire to maintain ownership of the business or farm and continue active management through an agent, but not "materially participate" in the operation of the business.

3. The Economic Equity Act raises the existing $175,000 exemption from estate taxation to $600,000. This would lift the gross of estate taxation from 94 percent of all estates—at a cost of about one-half of one percent of federal revenues.

4. In early 1980, the interest rate on deferred estate tax payments jumped from 6 percent to 12 percent. The impact of this change on families struggling to meet tax payments has been extremely severe, and the net gain to the federal government minimal. The EEA would return the interest rate on deferred payments to the lower of 6 percent or 75 percent of prime. This is consistent with a tax policy designed to encourage continued family farm ownership, rather than discourage it.

TITLE V—NON-DISCRIMINATION IN INSURANCE

Despite progress in combatting sex discrimination in American society over the past decade, significant gaps remain. Perhaps none is so large and pervasive as that discrimination which occurs in the insurance marketplace.

This provision recognizes a national policy which has been appropriately reaffirmed over the past 20 years: That discrimination on the basis of race, color, religion, sex or national origin is unfair and unlawful. In the proposed Non-Discrimination in Insurance Act, which is a part of the Economic Equity Act, that policy is stated. As it should be; for it is fundamentally unfair to stereotype individuals on these bases. Different and unequal treatment of like individuals cannot be tolerated in the employment sector. Neither can it be tolerated in the insurance marketplace.

In the abstract, continuation of discriminatory policies in insurance is discouraging. But in its practical ramifications, it is even more distressing. For in an era in which over 40 percent of the workforce is women—and some 60% of those women work out of economic need—denial of access to insurance at fair rates can have severe economic consequences.

For example, today there are reported to be 7.7 million single-parent families headed by women. These families are wholly dependent on females for financial support. Yet, the availability and scope of insurance for them are minimized and the rates often maximized because of their sex. This policy can effectively prohibit women from achieving the basic insulation from financial loss which is the benefit of insurance.

This is only one example of the effects of a sex-based classification in insurance. Cited here are a few others as they occur in various types of insurance:

In disability, many types of insurance benefits available to men are not available to women. While coverage has improved over the past few years, in some states, disability coverage is not available to women on any terms, at any price. In other states where it is available, its cost is significantly greater.

In health, waiting periods are usually much longer for women, and benefit periods shorter. According to a report on sex discrimination in insurance prepared by the Women's Equity Action League, it is not uncommon to find that, despite higher premiums paid by women, the benefits they receive are much lower. Pregnancy coverage, despite its centrality to women's insurance needs, is often unavailable.

In life insurance, coverage for women is often limited in scope and availability. Certain options, commonly available to men, have been restricted to women.

The same justification for differential rates can be made for discrimination against blacks because white persons as a group have a longer life expectancy than black persons as a group. However, such discrimination is now, and should be, totally rejected.

It must be understood that there is no objection to basing a life insurance policy on longevity. However, if sex is the only criterion used to determine longevity, it is clearly unfair and relatively unreliable. Instead of merging sex with all the other criteria effecting life expectancy, the industry has chosen to concentrate exclusively on it. The industry has virtually ignored other, more accurate classification criteria, such as smoking habits, family health history, physical condition, recreational and occupational activities.

Recent investigations have demonstrated that some employer-sponsored life insurance charged women more for pension coverage on the assumption they would live longer, but charged them as much as men for life insurance. They thus ignored sex differences when they would have helped women. According to a study completed by Dr. Charles Laycock, a University of Chicago law professor, some companies make a smaller allowance for sex differences in life insurance, where the difference helps women, than in annuities, where the difference helps men.

Two years ago the Supreme Court, in the so-called Manhart decision, ruled it unlawful to treat "individuals as simply components of a racial, religious, sexual or national class". While this ruling applies only to employer-operated insurance plans, the proposed bill expands the prohibition to private and individual plans, as well.

The insurance industry has claimed that some 19 states have already adopted a model regulation of the National Association of Insurance Commissioners which supposedly accomplishes the same objective as this legislation. Thus, the need for Federal legislation is eliminated, according to the industry.

However, this model regulation does not touch on the aspects of disparate rates and benefits—merely availability and scope. And even this incomplete regulation was watered-down further by several of the 19 states which eventually adopted it. If it is discovered that the states are indeed doing their jobs with respect to offering fair and just insurance policies and rates, and enforcing such, I would have no hesitancy to withdraw my support for this legislation. The bill is designed to encourage the states to adopt nondiscriminatory policies.

It is important to stress here that the Nondiscrimination in Insurance Act will in no way remove authority from the states to regulate the insurance industry. No federal mechanism for administration or enforcement is established, and not one bureaucrat would spring into being as a result of this bill.

Classification by sex is clearly not a business necessity, as some parts of the insurance industry would have us believe. It was adopted by the industry only 30 years ago as a *convenient*, though incomplete, method of classifying risks. While it may require minor cost adjustments in some policies and practices, such an argument cannot be used as a defense for discrimination.

Again, researchers have helped dispel a myth commonly touted by the insurance industry; that if sex differences are ignored, one sex will subsidize the other, the subsidizing sex will quit buying insurance, throwing off the necessary balance in insurance pools. If that were true, according to Professor Laycock, we would have encountered the same problems with respect to all the other groups for which the insurance industry does not compute separate actuarial tables.

We have discussed previously the differential in longevity statistics between blacks and whites. But whites have not quit buying life insurance. Rich people live longer than poor people, but rich people have not quit buying life insurance. The difference in life expectancy between highly and poorly educated women is greater than the difference between the sexes, but educated women have not quit buying life insurance. The difference in life expectancy between married and single men is greater than the difference between the sexes, but married men have not quit buying life insurance.

These and other examples demonstrate that differences in group averaged of this magnitude do not cause many members of the lower risk group to go uninsured, and no unmanageable problems result. Where unisex automobile insurance is used, as it has been in three states, it has worked; no unmanageable problems result, and rate changes between the sexes have been insignificant.

I am hopeful that it will not require the pressure of the Courts, of civil rights and women's groups, and of public opinion to convince the insurance industry to treat its policyholders without discrimination on the basis of sex. Support of a significant number and type of groups representing the public, including the American Association of University Women, the AFL–CIO, the National Federation of Business and Professional Women, as well as the Leadership Conference on Civil Rights, are supportive of this legislation. I will use that support to help assure that a policy adopted by Congress some 16 years ago will also be applied in the insurance marketplace.

TITLE VI—REGULATORY REFORM

Proposal

To require the head of each federal administrative agency to conduct a review of agency regulations, to rewrite those which make sex-based distinctions so that they are sex neutral, and to refrain from promulgating future regulations which contain distinctions reflecting unequal treatment of men and women.

This section would codify a Presidential directive of August 26, 1977, requiring all executive departments and agencies to identify "regulations, guidelines, programs, and policies which result in unequal treatment based on sex and to develop proposals to change any laws, regulations and policies which discriminate on the basis of sex." Compliance with the directive has been uneven, but many agencies have made impressive gains.

The Justice Department Task Force on Sex Discrimination has made a comprehensive review of the Federal Code, and isolated several hundred regulations containing meaningful gender-based distinctions.

The Economic Equity Act gives the Presidential directive the force of law. It provides a permanent mandate to agencies, and requires administrators to use the regulatory process to reform discriminatory regulations within their purview. It will significantly strengthen the hand of the Justice Department in carrying out its oversight function.

TITLE VII—STUDY OF ENFORCEMENT OF ALIMONY AND CHILD SUPPORT PAYMENTS

Background

There are no reliable statistics on the number of women unable to collect the child support or alimony rights they received in dissolution of marriage. But pilot studies from 1979 suggest that child support payments remain uncollected in a staggering 22 percent of all divorces.

For tens of thousands of divorced women, particularly those with young children, the alternative to alimony and child support is welfare.

Varying state laws, and the problems involved in pursuing a defaulting spouse across state and jurisdictional lines are at the heart of the problem.

Proposal

To direct the Department of Justice to undertake a study of the problems created by varying state laws in the enforcement of child support, alimony and property settlement decrees.

The Department is directed to define the scope of the problem, analyze the issues it presents, and make policy recommendations.

Mrs. KASSEBAUM. Mr. President, I am extremely pleased to add my name to the Women's Economic Equity Act of 1981. This measure is designed to correct a number of features of current law which work to the detriment of women. Over the years, Congress has made substantial progress toward eliminating provisions of the law which overtly discriminate against women, and this measure contributes to this ongoing effort. More importantly, this bill addresses provisions of the law which have the practical effect of treating women inequitably. We are only now beginning to realize that many laws which are gender neutral on their face have, in fact, a disproportionate impact on women.

In most cases, these laws are based on assumptions which—in a growing number of instances—do not hold true today. Unfortunately, legislative modifications to reflect changing circumstances are often slow in the making. The Women's Economic Equity Act constitutes an important step toward updating outmoded provisions of the law as they pertain to women.

For example, our perceptions about the role of women in our economic life have undergone significant change. In large part, this change is due to increasing female participation in the paid labor force. However, we are beginning to acknowledge that unpaid work in the home and community also has substantial economic value.

In addition, we are finding that the rapid increase in the divorce rate over the recent past has a decidedly negative economic impact on women. This trend has significant public policy implications not only with respect to the plight of older divorced women who have spent their adult years as homemakers, but also with respect to younger women who generally receive custody over minor children. As a rule, child support payments are quite small and even nonexistent in a substantial percentage of cases. A parallel trend, explained in part by the increase in the incidence of divorce, is the growth in the number of female-headed households. Between 1970 and 1977, the number of such households increased by 35 percent. In 1977, households headed by women constituted approximately 47 percent of all poor families.

We are also beginning to recognize that the financial problems associated with aging are very much the problems of women. The U.S. population as a whole is growing older, with the most rapid growth occurring among women in the 65 or older age group. We must begin now to prepare for the challenges which will be presented by demographic changes projected at the turn of the century. Already we face a situation where older women as a group are among the very poorest in our society.

Taking all these factors into consideration, the economic focus of this legislation is both appropriate and timely. This measure represents an important step toward making our laws more sensitive and responsive to the needs and concerns of women. Senator DURENBERGER has already discussed the major provisions of this legislation, and I do not want to be repetitive. However, I would like to highlight a couple of the thrusts of the measure in which I have a particular interest.

First, this bill contains several provisions designed to improve retirement income and pension coverage of women. Both working women and homemakers experience a number of problems in making adequate provision for retirement. Obviously, there are a number of reasons these difficulties exist, not all of which can be addressed by a single piece of legislation. However, by expanding instances in which women may build pension and retirement credits and by offering additional protection to surviving and divorced spouses, this measure begins the process of change. In my view, it is essential that we start now to reform our retirement income systems in a way which will assure that younger women will not be faced in their later years with the economic hardships now experienced by many older women.

Another general concern addressed by this legislation is the impact of Federal estate tax policies on older women. Last month, I chaired a hearing of the Senate Special Committee on Aging which examined this issue. The theme which recurred throughout all of the testimony presented was the fact that the farm woman faces a nearly impossible task in "proving" that her work has been of any value at all to the operation. As a result, many farm women are forced to sell all or a portion of their farm property simply to pay estate taxes. Women who inherit small family businesses experience similar difficulties. Clearly, our current estate tax policies are not good for women, and they are not good for America's family farm and small business enterprises.

I have introduced separate legislation to address this and other concerns I have with respect to estate taxes. There is obviously a great deal of interest in correcting current inequities in this area, and I am optimistic that we can develop a workable solution as further attention is given to the various approaches which have been suggested.

In closing, I want to commend Senator DURENBERGER for his efforts in designing this legislation. I am extremely supportive of the goals of this measure and look forward to participating in the process of refining and expanding the options presented. In addition to providing the impetus for positive and practical changes in current laws, this legislation will also serve to generate thinking about other ways in which its goals might be furthered.

● Mr. HATFIELD. Mr. President, clearly, in economically difficult times, it is often the woman—as homemaker or employee, widow or divorcee—who suffers most.

Even now, in the most developed country in the world: American women, 53 percent of the population, still are not the equals of men before the law.

Women earn only 59 percent of what men earn. Of the 441 occupations listed by the U.S. Census Bureau, women are concentrated primarily in the 20 lowest-paid job classifications.

The economic plight of today's American woman is even greater than it was a few decades ago. In the last 50 years, the number of families headed by women has tripled. Almost 1 family in 3 is headed by a woman, compared to about 1 in 18 headed by a man.

One out of three of these families which depend on women for their sole source of support, live below the poverty line. This figure compares to 1 out of 19 husband-wife families, and 1 out of 9 maintained solely by men. In fact, according to a study by the National Advisory Council on Economic Opportunity:

All other things being equal, if the proportion of the poor who are in female-headed families were to increase at the same rate as it did from 1967 to 1977, they would comprise 100 percent of the poverty population by about the year 2000.

Today, women are 42 percent of the labor force, yet they comprise over 66 percent of the people living in poverty.

Older women, the fastest growing poverty group in America, suffer under inequitable social security and pension laws.

Despite their tremendous contribution to home and family, homemakers have no legal or economic status, and little or no protection upon retirement or disability. In many States, and in the Federal Government, laws on support, poverty, pensions, divorce, and/or inheritance discriminate against the homemaker.

In order to help remedy these inequities, I have introduced, along with Senators DURENBERGER and PACKWOOD, a package of legislation entitled The Economic Equity Act of 1981.

According to recent testimony before the Senate Labor and Human Resources Committee by Wider Opportunities for Women:

The economic status of women after marital dissolution, the continuing patterns of sex discrimination which keep women in poorly paid dead-end occupations, the pattern of discriminatory hiring practices, the lack of commitment by education and training systems to eliminate sex discrimination in the preparation of women for work, and the "dual career" needs women must try to meet are the barriers which make and keep women poor.

It is not surprising then, that despite the fact that the percentage of those living in poverty has declined since 1960, from 35 percent to 25 percent, women and minorities were virtually unaffected by gains in jobs and earnings, according to U.S. Department of Labor statistics.

The Economic Equity Act of 1981 proposes reforms in pension and tax policy, in insurance and Government regulations, which will help eliminate unequal treatment in the economic arena. This is legislation which does not impose greater Government control, nor increase significantly the cost to taxpayers, but rather helps to remedy discriminatory laws which perpetuate economic disadvantage to women in our society.

I would like to commend my colleague from Minnesota for his initiative with respect to the Economic Equity Act. Bringing together numerous legislative proposals within a single bill underscores the economic plight of women in a way that will help assure it gains the attention it deserves.

There are two particular areas within the act where I believe reforms in existing law are critical: Public and private pensions, and insurance.

It is no secret to the older woman that she is now a member of the fastest growing poverty group in America. In fact, some 81 percent of women over 65 not residing with relatives live below the poverty line. Inequities in pension laws are part of the reason for that dismal statistic.

Federal law now denies women divorced from civil service and military employees a share of their former husband's pension or survivor's benefits. These divorced women are often left penniless after devoting years to the role of wife and homemaker.

This provision permits a divorced spouse, married 10 years or more, to receive a portion of the retirement and survivor's benefit earned during the marriage, subject to court review.

Congresswoman SCHROEDER and I guided into law a similar provision as it applies to former spouses of the Foreign Service. I am confident that this provision, too, will be enacted, which recognizes marriage as an economic partnership.

With respect to private pensions, Mr. President, several reforms are included in the act. Among them is the right of widows whose spouses die before retirement to receive benefits that had been vested. Under existing law, if an employee dies before retirement, all funds paid into the pension system are lost, leaving the widow with nothing.

Another provision of the Economic Equity Act would outlaw discrimination in insurance on the basis of sex. This provision extends to all other forms of insurance a recent Supreme Court decision prohibiting gender as a legitimate factor in employment-related policies.

Studies have found that in disability coverage, for example, many types of benefits available to men are not available to women. In health insurance, waiting periods are usually much longer for women, and benefit periods shorter. For many women as single heads of households, insurance is no longer a luxury but a necessity.

My able colleague, Senator PACKWOOD, as chairman of the Commerce Committee, will play a critical role in this legislation. I look forward to working together with him on this issue.

It is indeed discouraging that the economic plight of women in 1981 is even more serious than it was a few decades ago. It is time we ended this needless suffering under the weight of inequitable laws. I believe passage of the Economic Equity Act is the first step in that direction.

Mr. President, I ask that the description of the pension and insurance portions of this legislation be included here.●

● Mr. PACKWOOD. Mr. President, I am pleased to be introducing today, with Senators DURENBERGER and HATFIELD, the Economic Equity Act of 1981.

This bill was assembled with the advice and assistance of a variety of interest groups: League of Women Voters, National Federation of Business and Professional Women, Women's Equity Action League, American Association of University Women, National Women's Political Caucus, Older Women's League, Displaced Homemakers Network, National Council of Jewish Women, National Council of Negro Women, National Education Association, National Hook Up of Black Women, Inc., Working Women, and several others.

The Economic Equity Act of 1981 addresses 11 areas of importance to women in this country today.

The list is not inclusive. This is not a wish list of all the changes we would like to make. The issues we have chosen to include in the Economic Equity Act are, however, inequities which should be corrected today.

There are more than 44 million American women active in the labor force. One out of seven families in America today is headed by a woman. More than half the children under 18 years of age have mothers in the labor force.

Yet these women, working to provide support and stability for their families, working to provide income vital for the survival of their families, face severe economic discrimination.

The median income women who work full time is about 59 percent that of men in similar categories.

Women continue to be concentrated in traditional female occupations. More than half of all working women are clustered in only two occupational groups: Clerical workers and service workers.

Women do not receive equal treatment under our current pension laws. We propose to change that.

Women heads of households are treated inequitably under our current tax laws. We propose to change that.

Displaced homemakers—more than 3 million nationwide—can find no jobs, are left without income, without marketable skills. The Economic Equity Act proposes a tax credit to encourage employment of these individuals.

Working women with young children cry out for more, and better, day-care facilities. They need financial help to offset the enormous costs of day care relative to their salaries. The Economic Equity Act proposes to include day care as an employer-provided fringe benefit, like other benefits such as health insurance, life insurance, and legal insurance.

Women who choose to remain at home, with no outside income, have no mechanism under current law to provide for their own retirement. Many women are left homeless and pensionless at retirement age. We propose to allow those women to establish their own individual retirement accounts.

Mr. President, the issues we address in the Durenberger-Packwood-Hatfield Economic Equity Act are the tip of the iceberg. All we ask for in this legislation is that women be allowed the same opportunities under the law that men now enjoy.●

● Mr. MOYNIHAN. Mr. President, perhaps no social change of the past generation has been more dramatic or will have more profound consequences than the increased participation of women in economic life. The data are impressive indeed. Today, over 44 million women are part of the work force, nearly double the number of working women only 20 years ago. Almost 9 million women provide the sole means of financial support for their families. Three out of every five married couples are now two-earner households. And 35 percent of these two-earner families would have incomes below $15,000 if the wife quit her job.

Federal law, however, has not kept apace of this important change. Instead, they are pervaded by biases that reflect the social mores and assumptions of a time when women were less than equal participants in the work force. Simply put, these laws are inequitable and untenable. It is thus, with a great deal of pride, that I rise to cosponsor the Economic Equity Act of 1981, legislation that does much to restore fairness and equality to our laws.

The Economic Equity Act makes a number of specific changes that eliminate statutory discrimination against women. It changes pension laws so that women can plan their retirement as soon as they begin to work. It changes estate tax law so that the unique position of farm widows is recognized, and it raises the exemption from estate taxes from the current $175,000 to $600,000. The act makes day care more affordable by increasing the refundable child care tax credit from 20 percent to 60 percent. By extending the targeted jobs credit to displaced homemakers, this act improves the employment possibilities for women who have been out of the work force for some time. And the act takes steps to end the unfair gender-based distinctions that continue to afflict Federal regulations.

This is an important but modest bill. It does not, for example, address the structural problems in the job market that result in continued concentration of women in low-paying pink-collar jobs. It works no massive changes in law or society. Instead, the Economic Equity Act makes small changes that are long past due, and it will take us far down the road to insuring equal treatment for women. It should be passed quickly.●

● Mr. HEINZ. Mr. President, I am pleased to join today my distinguished colleagues Mr. DURENBERGER, Mr. PACKWOOD, Mr.

HATFIELD, and others in introducing the Economic Equity Act of 1981. This bill addresses a broad spectrum of economic and social issues, recognizing that congressional action is necessary to correct current statutory and regulatory deficiencies in the treatment of women and men. I wish to stress that the Economic Equity Act is important to all Americans. The language of the bill, while targeted to remove obstacles which impede progress toward economic equality for many women, is gender neutral to allow men who suffer from untenable classifications based on sex to benefit from its provisions as well.

Mr. President, many current laws and regulations contain features that discriminate against women—employed women, women who stay out of the work force to raise families, single heads of households, and older women. The Economic Equity Act embodies the fundamental principle of equality for all under the law. The bill also recognizes that progress should and can be made in areas uniquely within the jurisdiction of this body, and I urge my colleagues to seriously examine this legislation.

Mr. President, because of the scope of the Economic Equity Act, I would like to take a moment to single out some of the provisions of particular importance.

As chairman of the Senate Special Committee on Aging, I am especially aware of inequities in the law which undermine the retirement security of women. More than 60 percent of Americans over 65 are women. Of these, 66 percent are living alone. Furthermore, by the year 2020 the swelling senior population will be even more heavily weighted toward women—especially widowed women. This legislation encompasses retirement protection for homemakers, working women and wives, and survivors of working spouses. Focusing on the special needs of women seeking to provide a dependable and adequate retirement income for themselves, this bill would modify current law to overcome barriers to pension savings during working years. These important retirement issues require a more detailed exposition.

ERISA

The Employee Retirement Income Security Act (ERISA) sets requirements for employers who offer pension plans to their employees. However, ERISA provisions do not recognize several major women in the work force.

EARLIER PENSION PARTICIPATION

Women enter the work force at an earlier age than men; the highest labor force participation rate for women occurs in the age bracket 20–24—68.3 percent in 1978, expected to rise to 76.8 percent in 1985. Current ERISA provisions do not guarantee women the right to participate in pension coverage at the ages when they are most active economically. More importantly, even those women with long term employment in large corporations build up less pension credit than male colleagues because women tend to work in lower paying jobs. Both of these facts underscore the need to amend ERISA to permit earlier pension plan participation. This bill would lower the mandated participation age to 21, or, for those over 20, after 1 year of service.

PREGNANCY BREAKS IN SERVICE

Working women often leave employment to raise a family or fulfill traditional family responsibilities. Such breaks in service limit the total pension credit that a woman earns, and may even cause her to lose all previously earned vesting credit. This legislation would create a "pregnancy break in employment" rule similar to that available to employees who must leave their jobs to enter the armed services. When women return to the same employer, they would retain all previous credit earned for the 10 year time period needed to acquire the legal, nonforfeitable right to receive a pension.

SURVIVOR PROTECTION

ERISA does not require that employers offer survivors' benefits to employees until after the employee retires. Surviving spouses are therefore deprived of benefits through simple oversight when their husbands do not include survivor provisions after their retirement. This legislation would simply mandate that employers provide survivors' protection before retirement. In the same vein, pension benefits are currently terminable at the option of the pensioner alone. This bill would permit termination only with the consent of the spouse.

PENSIONS AS MARITAL PROPERTY

In the event of divorce, the husband's pension entitlement remains his alone unless the pension is apportioned by judicial decree. Pensions are not considered to be a part of the marital estate. Since ERISA pension benefits are paid from deferred earnings, and earnings are a part of the joint property of the couple, this bill would require that courts recognize the principle that pension benefits are presumptively a part of the marital estate.

ARMED AND CIVIL SERVICES

Given that a sizable minority of women would not be covered under the preceding provisions relating to ERISA pensions because their spouses are employed in the military or civil services, this legislation would apply relevant provisions proposed for ERISA to military and civil service retirees and their spouses.

INDIVIDUAL RETIREMENT ACCOUNTS

Individual retirement accounts (IRA's) are available to persons not covered by emplover pension plans. Because most nonunionized workers are not covered by employer pension plans, and most women workers are not members of unions, the Economic Equity Act proposes to provide more adequate retirement income for these individuals.

HIGHER CONTRIBUTIONS

The current IRA schedules which allow a percentage of IRA contributions to be deducted from the individual's income tax are inadequate basis for encouraging the funding of an adequate pension. In addition, current law penalizes married couples where only one spouse has compensation income. This bill would raise the current dollar amounts for the deduction, while permitting single-earner couples to count their individual contributions to their IRA on the basis of the single earner's salary.

ALIMONY

Another problem has been that alimony does not fall within the definition of compensation income for purposes of the individual reitrement account deduction. Divorced women are thus denied an apportunity to provide for their own retirement security when their income consists chiefly of alimony payments. The Economic Equity Act would include alimony as compensation income so that divorced women may take advantage of the IRA deduction to set aside savings for their old age.

Mr. President, I would like to turn now from retirement issues to other equally important areas addressed by the Economic Equity Act. In the following section, I will outline the predicaments of several specific groups of women, and the solutions proposed by this legislation to those groups' particular dilemmas.

WORKING MOTHERS

Congress has been cognizant of the growing numbers of lower-income mothers who, because of difficult economic circumstances feel compelled to enter the work force. However, legislation enacted in the past by this body to provide a tax credit for dependent care is simply ineffective.

The dependent care tax credit was instituted to serve two purposes: First, helping lower income working parents afford the child care expenses they incur while trying to maintain a minimal standard of living for their families; and second, recognizing child care as a business expense necessary for earning income. To date, however, the tax benefits have greatly favored those families using the credit as a business credit over those using it as a means of affording child care.

Several simple statistics illustrate the fact that this situation must be remedied. In 1978, 83 percent of the tax benefits went to families earning over $12,000, the threshold for the Bureau of Labor Statistics' lower family budget. However, 63 percent of the 8.5 million female heads of husehold have children under 18; and, 30.1 million children under 18 have mothers who work.

The current tax credit has two major flaws. First, the alloted percentage of costs credited is not adequate to meet child care costs for many low-income families. Second, poorer heads of households lack ready cash, and cannot await the end of the year to receive the available credit to pay for their dependent care costs.

The Economic Equity Act would institute a sliding scale approach to the amount of credit available to each family. A greater percentage of costs would be credited to lower income families than to higher income families, and lowest income families would have the credit payable immediately from their Federal withholding tax. The sliding scale approach would extend the benefits of the tax credit to more families. In addition, more private sector day care providers should become available to meet the numerous options sought by families in need of child care.

DISPLACED HOMEMAKERS

A disadvantaged group of particular concern are displaced homemakers—

those women who, after productive years as homemakers, enter the labor market without particular skills or prior employment history. This legislation would include the over 3 million displaced homemakers within the targeted groups covered by the targeted jobs tax credit, so that employers would be compensated for hiring and training this group of women.

RURAL WOMEN

Rural women, whose struggles to maintain the integrity of their family farms following the death of their spouse are frequently defeated by excess taxation or biased credit preferences, would also be assisted by this bill. Briefly, this legislation would amend the Federal estate and gift tax to recognize the special contributions of farm wives to the management of the agricultural property. It would also amend current law to eliminate credit preferences based on marital status while retaining a system based on the number of dependents.

Mr. President, I would like to congratulate Senator DURENBERGER, Senator PACKWOOD, Senator HATFIELD, and their staffs for their insightful and comprehensive work on this bill. I commend them for adopting this approach—one which seeks to eliminate inequities through careful and critical changes in current provisions of the United States Code and Federal Agency Regulations. I am proud to join today in the introduction of the Economic Equity Act of 1981, which marks one more important step toward our goal of equality for all. I am confident that my distinguished colleagues will give all due and serious consideration to this vitally important legislation.

Thank you.●

By Mr. LONG (for himself, Mr. ROTH, Mr. BENTSEN, and Mr. WALLOP):

S. 889. A bill to amend the Internal Revenue Code of 1954 to reduce the capital gains tax on the sale of certain interests in qualified small corporations; to the Committee on Finance.

AMERICAN INNOVATION AND EMPLOYEE STOCK OWNERSHIP ACT OF 1981

Mr. LONG. Mr. President, it gives me great pleasure today to join my distinguished colleagues from Delaware, Texas and Wyoming in introducing a proposal to change our tax laws—a change that will, we believe, encourage increased investment, innovation, and productivity. What we are proposing is that the current capital gains tax for individuals and corporations be reduced by 50 percent in the case of investments in small businesses that are partly owned by their employees and that fulfill a basic research and development expenditure requirement.

The basic long-term capital gains tax deduction recognizes the importance of encouraging investment. The increase of the deduction to 60 percent in the Revenue Act of 1978 has proven successful in increasing the availability of investment capital. But the current deduction has not, we believe, proven sufficient to encourage the amount of investment that we believe necessary to promote new, innovative companies.

Under our proposal, the deduction for individuals would be increased to 80 percent, leaving 20 percent to be taxed as ordinary income. For corporations, the alternative tax would be reduced from 28 percent to 14 percent. To qualify for this special capital gains treatment, the investment would be required to be in a small company that has shared a portion of its stock ownership with its employees. In addition, the corporation must have expended an average of 2.5 percent of its gross revenues on research and development expenditures for the 3 prior taxable years, or for the taxable year during which it has been operating if the corporation is less than 3 years old.

It would be to everyone's advantage for our tax laws to encourage investment in small, innovative companies. These companies have been shown to be the most innovative and job-creating sector of the economy. For example, a much-cited National Science Foundation study found that small firms are 24 times more innovative per research dollar than firms employing 10,000 or more employees. In a related finding, the Commerce Department reports that innovation accounted for 45 percent of economic growth in the United States from 1929 to 1969. In addition, a 1979 study from the Massachusetts Institute of Technology found that firms with under 500 employees generated 86.7 percent of all new jobs in the United States.

The creation of new businesses is vital to the economy. New firms not only provide most of the growth in the Nation's employment level, they also provide new blood to the business world—new ideas that may ultimately grow into new industries. The encouragement of new ideas and new companies is important if we are to provide a sound base for general economic expansion and job creation.

However, new companies are presently starved for investment capital. Entrepreneurs find the acquisition of capital the principal hurdle they must overcome in starting a business. A recent survey by the National Federation of Independent Business found that a lack of capital is the principal problem now faced by new companies. Traditional lending institutions are generally wary of such companies. Loans to such firms are risky. The size of such loans, compared with the cost of processing and administration, makes them relatively unattractive. Entrepreneurs generally must turn to other sources for startup financing.

We feel that our proposal would address this problem while also helping to accomplish several closely related objectives. By providing a tax incentive to the investor, this bill would make it easier for individuals who have innovative ideas to obtain venture capital for new enterprises.

It is important to the encouragement of new businesses that the incentive be directed to investors rather than to the company itself. This is due to the simple fact that small, new companies are not very responsive to tax incentives. If a business has a small, or zero, tax liability—as is often the case for new enterprises—otherwise seemingly attractive allowances and credits have little effect. But if an investor in a new company can qualify for a lesser rate of tax on his or her capital gain, then it becomes more attractive for such an individual to put money into such companies, despite the higher risks generally associated with them.

Thus, this bill provides a mechanism whereby a new firm or an ongoing relatively small firm, can attract investment capital to enable it to reach a position where it can attract more cautious, institutional sources of financing. In effect, these incentives should help to get new businesses "off the ground."

In addition, this bill would stimulate badly needed research and development. It would also increase interest in employee stock ownership by requiring a substantial degree of employee stock ownership as a condition for the investor's gain to qualify for favorable capital gains treatment. Thus, a company will be better able to attract and retain qualified, motivated employees—another essential ingredient in the launching of a new enterprise. Providing employees "a piece of the action" should help stimulate employee interest and productivity at a key point in a new company's existence while also providing employees with an opportunity to acquire stock at the outset of their employer's existence.

To qualify as a small business, a company must meet at least two of the following three requirements: Total gross revenues of not more than $30 million; net worth of not more than $15 million; no more than 1,000 full-time employees.

To qualify under the employee ownership criterion, 25 percent or more of the nonmanagement employees of the business must own an amount of shares equal to at least 15 percent of the total outstanding shares of the company. Nonmanagement personnel are all employees other than officers and members of the board of directors of the company. This provision insures that lower-level managerial and support staff as well as hourly employees will share in ownership of the company. A corporation is considered to have met the employee ownership criteria if the requirements are met within 18 months following the investor's acquisition of the securities.

Under our proposal, employee ownership can be achieved in any of a number of ways. An employee stock ownership plan (ESOP) is one obvious method; but stock could, for example, be distributed by giving shares as bonuses or selling stock to employees at discounted prices.

Mr. President, this bill has three important characteristics that we would like to briefly explain. First, because of the sequence of the revenue flow of a new company, the bill will result in a net positive flow of funds to the Treasury. When an investor or a group of investors first invest in a company, they generally do so with the expectation that they will not be able to sell a portion of their shares in the company for several years. During this period, of course, the company has hired personnel, invested in plant and equipment and research and development, and undertaken other activities that generate tax revenues.

This economic activity must, of course, take place before any of the original in-

vestors can sell their shares at a profit, realize capital gain, and take advantage of this special tax treatment. In the interim, a chain of new economic activity has occurred which will contribute to the generation of additional tax revenues. Thus, this bill should result in a net revenue gain to the Treasury.

Second, the provision we are proposing addresses the problems of productivity and employee stock ownership in a new way. For a new company, its most critical phase is its first several years. It is during this crucial time that a company needs all the skills, creativity, ingenuity, and energy that its employees and management can muster. Productivity and innovation are the result of a team effort, with employees and management working together to make the company successful. Employee stock ownership can be a crucial key to creating such dedication and motivation at this early stage in a company's existence.

In terms of motivation, the merit of employee stock ownership can be easily summarized: ownership counts. It can summon up a common determination to succeed. It creates a climate wherein a unity of interest and incentive can emerge. If a company succeeds, its success is widely shared, and its eventual success or failure is placed in the hands of those upon whom its success or failure will largely depend.

This bill should help fill a void. It creates a strong, new incentive for a company to share ownership among its empoyees at a point when employee motivation is most critical to the company's success. And by enabling employees to acquire stock at the outset of the company's existence, employees will be well positioned to realize the maximum appreciation in the value of the stock in the company.

Third, the bill approaches the goal of employee stock ownership in a new way. Previous efforts to encourage employee stock ownership have focused primarily on ESOPs. ESOPs are a technique of corporate finance intended to encourage companies to finance their growth—or transfers in ownership—so as to share ownership with the employee group. This proposal, however, provides an incentive for investors and management to share stock ownership in any number of ways including ESOPs.

By creating favorable capital gains treatment for the sale of stock in companies in which ownership has been shared with the employees, investors have a strong incentive to dilute their ownership interest by setting aside a block of shares for employees.

It may be useful to give an example of the effect of our proposal in practice. In the typical situation, an innovator with no record of business experience cannot secure conventional lending and, thus, must turn to a group of investors. If the group invests, they may do so in exchange for as much as 75 to 85 percent of the shares in the company. Typically, the innovator will retain 15 to 25 percent ownership. The favorable tax treatment provided by this bill will encourage the investor group to set aside another 15 percent or more for employees. When the company has hired employees, these shares could be offered to the employees—for example, at concessional prices—or such shares could be acquired on the employees' behalf via an ESOP.

Having now obtained investment capital, the innovator proceeds to hire employees, invest in plant machinery, and market the product or service. By the third or fourth year of business, the company generally has begun to make a profit and pay taxes. At this point, several of the initial investors typically will choose to sell some of their shares—for example, in order to reinvest in other start-up ventures. It is anticipated that these investors may sell these shares—or a portion thereof—to the employees—for example, through an ESOP. In fact, an ESOP may provide a ready in-house market for the stock, thereby enabling an investor to withdraw his funds for use elsewhere while also enabling the employees to acquire an even greater stake in the enterprise they helped to build.

Under our proposal, at that time the investors would be eligible for an 80-percent capital gains deduction. Thus, only 20 percent of their capital gains would be taxed. To be eligible for this treatment, they need only show that at the time of their investment, the company was a qualified small business, that it has distributed its pool of employee shares—within the permissible 18-month period—so that at least 25 percent of the employees own at least 15 percent of the shares and that the R. & D. expenditures requirement has been met.

Mr. President, this is a bill to stimulate American innovation, small business, and employee stock ownership. It says to those creative men and women with new ideas that we want them to try out their ideas in the marketplace. In addition, our proposal says to this crucially important innovative group that the Federal Government will provide you with more favorable tax treatment if you will share your success with those who help you succeed—that is, your employees.

Mr. President, the creation of innovative, new technologies and businesses based on them is at the heart of America's industrial renewal and growth. A principal problem for such new businesses is finding risk capital—investors who are willing to commit their funds to back the realization of new ideas.

This bill goes to the root of these problems, Mr. President, and we commend it to the attention and cosponsorship of our colleagues.

● Mr. ROTH. Mr. President, I am pleased to join my distinguished colleague RUSSELL LONG today to introduce the American Innovation and Employee Stock Ownership Act of 1981.

This measure would reduce in half the caiptal gains tax rate for individuals and corporations for investments in small businesses which are at least partly owned by their employees.

Under present law, 60 percent of a long-term capital gain is exempt from taxation, and the maximum capital gains tax is 28 percent. Under this bill, the exemption for capital gains will be increased to 80 percent, reducing the maximum capital gains tax rate to 14 percent.

Mr. President, the new businessman faces two major problems in creating an organization to make and market his product. The first and most critical problem is capital: where and how to find the capital to invest in his new enterprise. The second is manpower: how to attract able managers an skilled technicians to work for him.

The bill I am cosponsoring today helps solve both these problems. By reducing taxes for investors in firms which are partially employee owned, it permits new firms to attract investment capital, and by encouraging the distribution of share ownership among production employees, it would help new companies attract skilled manpower.

In order to qualify for the bill's special capital gains treatment, the investment must be made in a small business which meets at least two of the following requirements: total gross revenues of not more than $30 million; net worth of not more than $15 million; and no more than 1,000 employees.

In addition, in order to qualify under the employee stock ownership requirements, 25 percent or more of a company's employees must own at least 15 percent of the outstanding shares of the company.

Mr. President, America is in the grip of a productivity crisis. During the 1950's and until 1965, U.S. productivity was growing at about 3 percent a year. But since the beginning of last year, output per hour of work has been falling almost 2 percent a year.

There are many causes. One of them, I believe, is that excessive taxation and regulation make it difficult for new companies to enter the market with new products.

The development and commercialization of new technology in the United States has followed a unique pattern. Studies indicate that while major companies or colleges have been responsible for most of the significant new technological developments, their actual commercialization has been pioneered by new or small independent firms, not by the large inventing firm.

Yet there are many obstacles in the way of the inventor—whether independent or part of a larger firm—as he attempts to strike out on his own.

First, new companies needing only small amounts of capital are often not of interest to venture capitalists who would rather concentrate their resources on a few larger ventures.

Second, partly because of the scarcity of venture capital, such investors typically seeks very high shares of the ownership of new firms as a price for their investment, and typically also seek to liquidate their investment with a profit within a relatively short period—roughly 4 or 5 years.

Third, investors are lured by investments which can offer substantial tax advantages, or which can offer very large or fast return in terms of appreciation or income. Real estate, oil and gas, and other forms of investment particularly in an inflationary environment divert investors from more productive forms of investment, such as financing new businesses.

Fourth, truly massive sources of capi-

tal, the pension funds, do not find new ventures attractive. Because ERISA regulation make trustees personally responsible for bad investments, and because of the "prudent man" rule, pension fund investment is biased toward established enterprises, which are already favored by tax laws. For example, entrepreneurs most frequently rely on personal savings and family equity as the basis for their new venture. But existing enterprises can write off such venture expenses from their taxable sales income.

Finally, the venture capital market is a relatively underdeveloped one. The concept of venture capital in itself is rather new. Because of the punitive tax treatment of capital gains during the mid-seventies, venture capital sources almost dried up. The 1978 reduction in this tax has greatly increased the availability of venture capital. This has led some to conclude that there is now an adequate supply. But this is not the case. Anyone who talks to entrepreneurs seeking to organize companies to market new products will soon learn that there are not enough sources of capital willing to take risks on new ventures.

Mr. President, I believe that we can and must contribute to the reindustrialization of America by creating a new climate for saving, investing, and risk taking. This cannot be done by increasing Government's role. It can only be done by reducing the cost of Government by eliminating unnecessary regulation, and by reducing taxes in order to stimulate creative economic activity.

The legislation I am sponsoring today will encourage the investments needed to stimulate the innovation and productivity this country needs to revitalize America.

However, although I am introducing this measure today, I do not intend to pursue it until the President's tax proposals are acted upon by the Congress. Our first job, our first order of business, must be to expedite passage of the President's across-the-board 10-percent tax cut proposal for the working men and women of this country. This proposal is focused exclusively on moving the economy ahead in the long run.

And so I have agreed with my distinguished colleague, Senator LONG, not to offer the measure we are introducing today as an amendment to the President's tax package. Rather, we shall wait until the President introduces his second tax bill later this year as he has pledged to do.●

Mr. BENTSEN. Mr. President, it gives me great pleasure to join my distinguished colleagues in introducing legislation that would stimulate the formation of innovative new business ventures and employee ownership.

It has been amply demonstrated that most major innovations have stemmed from small companies—that new, smaller companies formed to exploit an innovative new product or process are a key to our Nation's economic vitality.

A report on research and innovation prepared as part of the Joint Economic Committee's special study on economic change found that—

> Small firms (with less than 1,000 employees) were responsible for almost one-half of the most significant new industrial products and processes during the period 1952–73.

The study, concluded under my chairmanship of the committee, found that—

> Businesses with less than 100 employees contributed almost one-quarter of the innovations and that small firms produced four times as many innovations for each dollar invested in R. & D. as did medium-sized firms and 24 times as many innovations per R. & D. dollar as large firms employing more than 10,000 employees.

The importance of the smaller companies is underscored by the 1977 report of the Office of Management and Budget which concludes that "while companies with fewer than 1,000 employees received only 8 percent of the Federal R. & D. dollar, those companies were responsible for about 50 percent of the major technical innovations over a 20-year period."

Thus I suggest that the question that is posed for Federal policy is how to stimulate the formation of these innovative smaller firms—those with the greatest innovation and R. & D. "productivity?" What tax law changes should be made to create a climate in which innovators and entrepreneurs can more easily actualize their inventions and ideas in the marketplace?

New companies, particularly companies based on technological innovations, and particularly such companies centered in the new high-tech growth areas such as Silicon Valley in California, and in my own State of Texas, have two essential requirements at the point of startup. First, they must attract investment capital, second they must attract skilled management and production employees.

The bill I and my colleagues are introducing today would help a new company achieve both objectives. The long-term availability of risk capital for investment in innovative new enterprises would be increased through a cut in the capital gains tax for qualifying firms, and employee participation in ownership would be stimulated by requiring a substantial degree of employee stock ownership as a condition for obtaining the favored capital gains tax treatment.

Under the bill, the deduction for individuals would be increased to 80 percent leaving 20 percent taxable as ordinary income. For corporations, the alternative tax would be reduced from 28 percent to 14 percent. To qualify for this treatment the investment would have to be in a small company that had diversified share ownership among its employees, and which can demonstrate a certain level of investment in research and development.

To be considered small a company must have at least two of the following characteristics:

Total gross revenues of not more than $30 million;

Net worth of not more than $15 million; and

Not more than 1,000 employees.

To qualify under the employee ownership criterion, 25 percent or more of the nonmanagement employees of the business must own at least 15 percent of the total shares of the company. We define nonmanagement personnel as all employees other than officers and members of the board of directors of the company.

To qualify under the R. & D. criterion, the company would have to spend an amount equal to 2.5 percent of its gross revenues for the prior 3 years, or if a corporation has not been operating for 3 years, for the years during which it has been operating.

As my colleagues have pointed out, we believe the bill will not have an adverse effect on tax revenues. That is because initially new, technologically innovative companies usually expect an investment duration of 4 to 5 years before being able to sell their shares and realize capital gain. During this period the company in which they invested would have spent a good deal on plant and equipment. R. & D. and wages—all creating new taxable revenue flows.

Mr. President, the new tax legislation taking shape gives up a valuable opportunity to lay the foundation for the innovative growth of our economy during the 1980's and 1990's. We must pursue a course that looks forward to the new technologies, not one that looks back to the preservation of the old. Mr. Peter Sprague, chairman of the National Semiconductor Corp., said when testifying on April 2 to the Ways and Means Committee on behalf of the Alliance for American Innovation, that—

> We are propelled, inevitably, by the application of technological innovations whose importance to the future cannot be exaggerated. Just as the steel industry has supplied the bones and the energy industry the muscle of the 19th and 20th century industrial revolution, so microelectronics and its off-shoots will supply the nervous system and logic of the 21st century revolution.

American ingenuity is not dead. To the contrary, too much government and short-term thinking have taken away many of the incentives to do enough research, to develop new techniques, and to modernize plant and equipment. As much as 40 percent of America's economic growth in the past three decades has been attributed to industrial innovation. We have too much at stake now to ignore the opportunity to stimulate the establishment of creative, new, highly innovative and entreprenerial firms.

By Mr. SCHMITT (for himself, Mr. GRASSLEY, Mr. LAXALT, Mr. SPECTER, Mr. DECONCINI, Mr. HATCH, Mr. SIMPSON, Mr. EAST, Mr. DENTON, Mr. NUNN, Mr. ZORINSKY, Mr. BURDICK, Mr. LUGAR, Mr. STEVENS, Mr. PRESSLER, Mr. KASTEN, Mr. THURMOND, Mr. HARRY F. BYRD, JR., Mr. GARN, Mr. MCCLURE, Mr. TOWER, Mr. GOLDWATER, Mr. HELMS, Mr. ARMSTRONG, Mr. SYMMS, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. WARNER, Mr. JEPSEN, Mr. MATTINGLY, Mr. ABDNOR, Mr. ANDREWS, Mr. NICKLES, Mr. D'AMATO, and Mr. QUAYLE):

S. 890. A bill to amend title 5, United States Code, to improve procedures for the issuance of agency rules; to the Committee on the Judiciary.

REGULATORY REDUCTION AND CONGRESSIONAL CONTROL ACT OF 1981

Mr. SCHMITT. Mr. President, I am pleased to join today with 34 of my col-

leagues in introducing the Regulatory Reduction and Congressional Control Act. I am particularly pleased to have as cosponsors the chairman of the Subcommittee on Agency Administration, Senator GRASSLEY; the chairman of the Subcommittee on Regulatory Reform, Senator LAXALT; and the distinguished chairman of the Judiciary Committee, Senator THURMOND.

The legislation, which I have previously introduced in the 95th and 96th Congress, would establish a 60-day period in which there would be an opportunity for congressional disapproval of proposed agency rules. The bill, however, carefully avoids imposing the excessive burden of mandating the review of all rules. It simply opens up the rulemaking process to appropriate but limited participation by the elected representatives of the people. Regulatory lawmaking, as exercised by the executive branch and independent agencies, must become more responsive to the Congress, particularly when its costs have grown to be so great.

Inflation has finally become recognized as our Nation's No. 1 problem, and the significant contribution that Federal regulation has made to inflation has become well known. The landmark study of Prof. Murray Weidenbaum, formerly of the Center for the Study of American Business at Washington University in St. Louis, and now Chairman of the Council of Economic Advisers, demonstrates that regulatory costs imposed by the Federal Government on the private sector alone amounted to approximately $103 billion for fiscal year 1979. This figure is approximately equal to one-fifth of the Federal budget but is not subject to any systematic procedure of congressional scrutiny. The legislative veto will insure that the Congress has an opportunity to examine costly new rules and to determine whether the expenses they impose, on the public are warranted.

MAJOR PROVISIONS

First, at the time of final publication, proposed rules would be transmitted to each House of Congress for referral to the appropriate standing committee. Whether the committee evaluates the rule or conducts a hearing is entirely discretionary. It is important to note the bill does not require any congressional action whatsoever.

The bill simply provides that proposed regulations will be transmitted to the Congress before going into effect. All regulations will go into effect automatically after 60 calendar days of continuous session unless one House of Congress has adopted a resolution of disapproval.

Second, any Member may introduce a resolution of disapproval with regard to a proposed rule, such a resolution would be referred to the appropriate committee. On those occasions when a committee determines that a proposed rule is inconsistent with law or congressional intent or that a proposed rule represents an excessively costly approach to the problem being addressed, a resolution of disapproval may be reported.

Third, should a committee fail to take any action on a resolution of disapproval after 45 calendar days of continuous session from the date of its introduction, a motion may be made to discharge the committee from further consideration of a resolution if supported by one-fifth of the Members of the House in which it was introduced. Debate on a motion to the House in which it was introduced. Debate on a motion to discharge a committee would be limited to 1 hour, while debate on a resolution of disapproval would be limited to 2 hours.

Fourth, if a resolution of disapproval is passed by one House, it will be sent to the other House of Congress where, if no further action is taken within 30 days, the proposed rule will be disapproved. However, the other House retains the right to reject the resolution of disapproval, in which case the rule will go into effect. This procedure, unlike the strict one-House veto, allows both Houses of Congress to be involved in any action on a proposed rule.

Fifth, rules which may have been in effect for months or years would also be subject to review by the Congress. Passage of a resolution of reconsideration would require an agency to reconsider an existing rule and, within 180 days after passage of such a resolution, repromulgate the rule. This procedure will permit the Congress to target for repromulgation specific rules already on the books. These rules would then be subject to congressional review and possible veto, according to the procedures summarized above.

NEED FOR LEGISLATION

This legislation will provide Congress with a valuable tool for assuring that executive branch and independent agency rules are a true expression of congressional intent.

Let me review for a few moments the reason that this legislation is required. Recent years have witnessed an unprecedented eruption of regulations and regulatory bureaucracies which impact on almost every facet of the lives of the citizenry.

The American citizen, the small businessman, and Government itself are staggering under an increasingly heavy load of regulations. People have a general perception that the regulatory bureaucracy is out of control. There is a mandate to the Congress to do something about reestablishing control of the regulatory process and to reform existing regulations.

The size of this massive burden can be appreciated by recognizing that at the Federal level there are 44 independent regulatory agencies plus 1,240 boards, commissions, et cetera. These organizations employ over 100,000 individuals responsible for controlling the lives of our citizens. The cost to the taxpayers to finance these Federal bureaucracies is equally large, growing from just over $2 billion in 1974 to an estimated $3,500,000,000 in 1977. The total cost to the economy has been estimated to be as much as $200 billion annually when costs to both the public and private sectors are considered.

There is little question that in recent decades Congress has increasingly given up much control over the "making of law" to the regulatory agencies. This loss of constitutional congressional authority has occurred through the passage of legislation that calls for the "promulgation" of rules and regulations that supposedly will cure some social ill. Subsequent congressional oversight over the rules and regulations so "promulgated" has been inconsistent. While there have been a few examples of good congressional oversight, most has been lost in the press of other duties. Thus, the constitutional concept of the separation of powers between the legislative and executive branches of Government has been seriously blurred and compromised.

Mr. President, the concept of returning to the elected representatives of the people the control over governmental decisionmaking has become a familiar one in recent years. Several years ago the Congress passed the Congressional Budget and Impoundment Control Act to reassert its control over the Federal budget process. The legislation which I am introducing today would likewise employ a set of procedures to reestablish congressional control in the area of regulatory rulemaking by executive branch agencies.

It has been contended that with an administration in power that is committed to less regulation, the Congress has little need for increased control over the regulatory apparatus. This is a relatively shortsighted view that overlooks the fundamental conflict between the bureaucracy and the legislative branch concerning the exercise of regulatory authority. The crucial question facing the Congress is which branch of Government will retain ultimate control over the use of authority granted to the Congress by the Constitution; and subsequently, delegated by the Congress to an assortment of Federal agencies and departments. The regulatory policies of this administration or any other have little bearing on this underlying and fundamental question. The legislation I am introducing, however, answers this question emphatically that it is the Congress that will be responsible for the exercise of delegated lawmaking authority.

While the public may be spared 4 or more years of activist regulatory policies under the current administration, there is no guarantee that a future administration will not once again seize on its regulatory authority as a means of imposing nonlegislated policies on the American public. The existence of a congressional veto procedure would insure that this usurpation of congressional authority cannot ever again occur.

Mr. President, there has been a substantial amount of controversy over the question of the constitutionality of the legislative veto. During recent testimony before the House Committee on the Judiciary, I discussed in some detail my views on this issue, and I would ask that this testimony be inserted in the RECORD at the end of my statement.

In my view, the constitutional issue is one that can only be decided by the courts. But until such time as the courts do reach a final determination, I think the Congress can move ahead confidently on this legislation in light of the favorable views expressed by the courts in past legislative veto decisions.

I urge my colleagues to join in supporting this effort to restore congressional accountability for the lawmaking functions that have been delegated away to nonelected officials over the past

several decades. This is what our constituents are asking for when they plead for relief from excessive regulation. Let us hope the 97th Congress will respond to that call with the passage of this legislation.

I ask unanimous consent that the text of the bill and my testimony be printed in the RECORD at this point.

There being no objection, the testimony and the bill were ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR HARRISON SCHMITT BEFORE THE HOUSE COMMITTEE ON THE JUDICIARY, MARCH 24, 1981

Mr. Chairman: Thank you for offering me the opportunity to testify before this Committee on the issue of regulatory reform. As you may know, I am the sponsor of a bill, S. 382, The Regulatory Reduction and Congressional Control Act of 1981, that would provide for the use of a Congressional veto of rules promulgated by both independent agencies and the departments under the Administrative Procedures Act.

I believe that an objective consideration of the rationale underlying the proposals contained in the bill will demonstrate that legal objections heretofore raised against other congressional review mechanisms are inapplicable. The Constitutional purpose of S. 382, to bring the administrative rulemaking process under control, is complementary to the President's similar objective as reflected in Executive Order 12291.

Section 3 of S. 382 would amend the Administrative Procedure Act, 5 U.S.C. 551 et seq., by adding a new chapter entitled "Congressional Review of Agency Rulemaking" which would establish what has come to be called a one-and-a-half House veto over administrative rules. That is, proposed final agency rules would have to be submitted to Congress and would become effective if within 60 days one House passes a resolution of disapproval and within 30 days thereafter the other House does not pass a resolution disapproving the resolution of disapproval. The amendment also establishes a mechanism to trigger reconsideration of already effective rules.

Thus, S. 382 deals exclusively with the administrative rulemaking process. It does not involve or intrude in any way upon the executive decisionmaking process. Rather, it is a proper extension of Congressional control over the constitutional lawmaking process which has received judicial approval in both this and closely related contexts. It is no more than another aspect of the historic practice of cooperative interaction of the Legislative and Executive branches from the time our nation began the business of governing in 1789.

WHO WRITES THE LAWS?

What appears to be lost in the current debate over how to control the nation's bureaucracy, and the manner of that control, is a perception of the true nature of the rulemaking authority of administrative agencies. Rulemaking power is of course the dominant feature of the modern administrative agency. Though the promulgation of rules has been a normal feature of American government from its very inception, it is only during the present century that rulemaking authority has brought about a shift in the center of gravity of lawmaking. The advent of the modern administrative state has brought with it a magnitude of legislation unforeseen by the Founding Fathers. As a consequence, Congress has not been able to directly perform its now greatly expanded tasks of regulation and guardianship of the public weal. It has been required to delegate the task of legislation to its administrative creations. Today, administrative legislation dwarfs the primary legislation functions of Congress.

Moreover, as a consequence of this development, modern statutes delegating rulemaking authority, as a result of the complexity and breadth of the subject of regulation, have blurred the line between principle and detail. Because of the vastness of the current delegations, the legislative mandate is a mere skeleton; what is left to the delegate are not minor details, but the formulation of many of the essential principles in the law as well. Rulemaking today extends to the essence of the legislative scheme. In many instances, the rules and regulations may be of greater practical importance to those subject to an agency than are the broad provisions laid down by the Congress.

Further, properly promulgated rules and regulations have the same legal effect as statutes. Their provisions have the force of law and they are backed by the same sanctions as statutes, including in many instances the criminal sanctions designed to coerce obedience to the law. Thus while administrative legislation may be only quasi legislation (See, *Humphreys Executor* v. *United States*, 295 U.S. 602 (1935)), since its provisions are subordinate to administrative actions relative to those enacted by the legislature, this does not alter the fact that its impact is comparable to that of statute law itself.

The source of this enormous administrative power must at all times be kept in mind, however. Legislative power exists as a result of an act of delegation. This is true even of the Congress which has been vested with limited legislative power by the Constitution. An administrative agency possesses rulemaking authority because a statute has delegated such authority. Without a statutory delegation, an agency does not have power to promulgate substantive rules and regulations. For an agency to be vested with authority to affect substantive rights and obligations through rules and regulations, rulemaking power must be delegated to it expressly. See, e.g., *Brannan* v. *Stark*, 342 U.S. 451 (1952).

The validity of the modern practice of broad delegations of Congressional lawmaking authority is not in doubt. *Yakus* v. *United States*, 321 U.S. 414 (1944); *Lichter* v. *United States*, 334 U.S. 742 (1948); *Amalgamated Meat Cutters* v. *Connally*, 337 F. Supp. 737 (D.D.C. 1971) (3-judge court). What appears to have been obscured, however, is the fact that judicial validation of such extensive delegations has not changed the essential nature of what is being delegated and the process of which is a part: rulemaking remains lawmaking even when it is performed by an administrative agency; and lawmaking remains a task committed by the Constitution to the Congress. Ultimate constitutional accountability for legislation rests with the legislature. Although many of the needs of modern government have required that Congressional responsibility for lawmaking be shared with Executive branch agencies, the ultimate constitutional responsibility, and therefore control, remains with the Congress.

The essential legislative nature of substantive administrative rulemaking is well established in law. The issue has arisen in cases in which courts have been faced with the question of the applicability of procedural due process requirements to rulemaking proceedings of administrative agencies. The uniform answer of the courts has been to treat the administrative exercise of legislative powers similarly to the direct exercise of power by the legislature. The agency was found to be no more bound by constitutional procedural requirements than the legislature itself when it enacts a statute. Since procedural due process does not limit the legislature, the same principle has been consistently applied where rulemaking powers were exercised under legislative delegation. As one court has put it: "in legislation, or rulemaking, there is no constitutional right to any hearing whatsoever." *Willapoint Oysters* v. *Ewing*, 174 F.2d 676, 694 (9th Cir. 1949).

The leading case in this regard is the Supreme Court's decision in *Bi-Metallic Co.* v. *Colorado*, 239 U.S. 441 (1915). There the Court sustained an order of the State Board of Equalization increasing the value of all taxable property in Denver by 40 percent, without an opportunity being afforded affected taxpayers to be heard before the order was made. The agency order plainly deprived the taxpayers of property but the Court rejected their claim that due process required an opportunity to be heard. Justice Holmes speaking for the Court analogized the agency's action to direct action by the legislature: "If the result in this case had been reached as it might have been by the State's doubling of the rate of taxation, no one would suggest that the Fourteenth Amendment was violated unless every person affected had been allowed an opportunity to raise his voice against it" *Id.* at 445. Since the Constitution does not require legislative acts to be done in a town meeting or assembly of the whole, it similarly does not require due process procedural requirements when such legislative authority is validly exercised by a delegate administrative agency.

The Court has since confirmed that when a proceeding is classified as rulemaking, due process ordinarily does not demand procedures more rigorous than those prescribed by Congress. See *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 524, N.1, 542, n.16, (1978). It has reaffirmed that Congress is under no requirement to hold an evidentiary hearing prior to its adoption of legislation, and that "Congress need not make that requirement when it delegates the task to an administrative agency." *Bowles* v. *Willingham*, 321 U.S. 503, 519 (1944), citing Bi-Metallic approvingly.

The clear import of these cases is that the nature of lawmaking does not change once there has been a valid delegation of authority to an agency. If Congress had not enacted the Administrative Procedure Act, agencies would be free to administratively legislate in the same manner that Congress makes laws. Conversely, Congress can, and has, legislated general, minimum procedural requirements for rulemaking, in the Administrative Procedure Act, and more specific, detailed requirements with regard to certain regulatory programs. See, e.g., the hybrid rulemaking procedures applied to Federal Trade Commission trade regulation rulemaking proceedings, 15 U.S.C. 57a (1976). This is in obvious recognition that the vast legislative authority conferred on non-elected, essentially unaccountable administrators needs to be confined and controlled.

More importantly, the source of this authority to impose limiting procedures stems from Congress' exclusive control of the legislative process for which it is ultimately responsible under the Constitution. The constitutional obligation to control the legislative process does not end until that process is complete. Sharing the process with the Executive does not transform its nature and invest it with an executive hue. Execution of the law, and therefore exclusive executive responsibility, begins when there is a law to execute. A substantive agency rule becomes a law when only the procedures prescribed by the Congress for its promulgation are fulfilled.

This analysis is plainly confirmed by the only judicial decisions to date to reach the merits of statutory provisions providing for Congressional review mechanisms. A close reading of those cases supports the principle of plenary Congressional control of agency lawmaking.

COURT DECISIONS ON THE LEGISLATIVE VETO

Despite almost fifty years of experience with the legislature veto, the courts have

only recently begun to examine its constitutional standing on a case-by-case basis. The Supreme Court has never formally ruled on the matter. In a pair of recent cases, the Court of Claims and the Court of Appeals for the Ninth Circuit split on the constitutional merits of single house negative veto provisions in different contexts. In *Atkins* v. *United States*, 556 F.2d 1028 (Ct. Cl. 1977), *cert. denied*, 434 U.S. 1009 (1978), the Court of Claims upheld the constitutionality of the one-house veto in the Federal Salary Act, U.S.C. §§ 351, et seq. In *Chadha* v. *Immigration and Naturalization Service*, 634 F.2d 406 (9th Cir. 1980), a three judge court of appeals panel struck down section 254 (c)(2) of the Immigration and Nationality Act, 8 U.S.C. § 1254(c)(2), which allowed either House to overturn a decision by the Attorney General to suspend an order deporting an alien for reasons of hardship. The significant, principled difference between the two decisions is that the Court of Claims viewed the veto under the Federal Salary Act as operating in a traditional legislative sphere whereas the veto applicable to suspensions of deportation was held to constitute an unwarranted Congressional intrusion into execution of the laws and judicial review. This distinguishing feature between the two cases makes it apparent that there would be judicial support for the review procedure contained in section 3 of S. 382.

The legislative veto in general raises a number of serious questions under various specific and significant constitutional provisions or principles including (1) the provisions of article I, section 7, clauses 2 and 3, (the Presentation Clause) which makes the President a participant in the lawmaking process and accords him power to veto not only every bill, but also every "order, resolution, or vote to which the concurrence of the House and Senate may be necessary"; (2) the allocation to the President in the "take care" clause of article II, section 3—as augmented by article II, section 1, clause 1, vesting in him the "executive power"—of the power of execution of statutes as enacted; and (3) the disability and incompatibility clause in article I, section 6 which separates members of Congress from administrative functions. In addition, if the congressional veto device takes the mode of the one-house veto, or the committee veto, rather than the mode of the concurrent resolution, the bicameralism requirement for statute making and statute modification set forth in article I, section 7, is arguably violated. These problem areas are generally referred to as the Presentation Clause argument, the Separation of Powers argument, and the Bicameralism argument, respectively.

As indicated, although the Supreme Court has yet to pass on the constitutionality of the legislative veto, two lower cases, a recent opinion of former Attorney General Griffin Bell, and the Executive practice under the Impoundment Control Act of 1974, provide a framework for analyzing these arguments.

ATKINS V. UNITED STATES

In *Atkins* v. *United States*, 556 F.2d 1028 (1977), *cert. denied*, 434 U.S. 1009 (1978), 140 federal judges challenged the constitutionality of the veto provision contained in the Federal Salary Act, 2 U.S.C. §§ 351, et seq. Under that Act, all or part of the presidential recommendations regarding executive, legislative, and judicial rates of pay become effective automatically within a specified time unless: (1) Congress by law establishes pay rates different from those recommended; (2) either House of Congress disapproves all or part of recommended rates; (3) or both.

The Senate disapproved the President's recommendation and the judges sued arguing that the Senate's action was invalid as violating the Presentation Clause, the Separation of Powers doctrine, and the principle of bicameralism. The court, by a 4–3 vote, rejected these arguments and sustained the constitutionality of the one-house veto under the Federal Salary Act.

The court held that the principle of bicameralism is not violated because rejecting presidential recommendations to increase salaries is a form of legislative activity which does not require the affirmative concurrence of both Houses since the effect of such action is not to make law but rather to preserve the status quo. Similarly, there was no nullification of the presidential veto since the Executive had his opportunity to veto the Federal Salary Act which established the veto device in the first place. Moreover, the concurrence of both Houses was not constitutionally required where only presidential recommendations are involved. Finally, the court held that the application of the one-house veto in these circumstances did not violate the Separation of Powers doctrine. To begin with, the court reasoned the doctrine was never intended and did not operate to create a strict compartmentalization of powers between branches. Rather, it was designed to prevent the concentration of too much power in one branch and the consequent weakening of the other branches. The setting of rates of pay, the court found, is basically a legislative function. Under the Federal Salary Act the function is conditionally delegated to the Executive. Since there was no irrevocable commitment of power, the President in recommending rates of pay was acting as an agent of the Congress. The legislative veto under the Federal Salary Act did not enforce any law or appoint any agents to enforce the law and thus did not intrude into the Executive's domain of administration of the law. Accordingly, the one-house veto in the circumstances of that case was a permissible device in aid of legislation in basically a legislative matter.

CHADHA V. IMMIGRATION AND NATURALIZATION SERVICE

In *Chadha* v. *Immigration and Naturalization Service*, 634 F.2d 408 (9th Cir. 1980), a three judge panel unanimously struck down section 254(C)(2) of the Immigration and Nationality Act, 8 U.S.C. § 1254(c)(2), providing for a one-house veto of agency suspensions of deportation. Here, the exercise of the veto by the House of Representatives operated to revoke the Attorney General's suspension order and to deport a person to a country which the Attorney General had found would impose real hardship on the deportee. The veto device in these circumstances, the court held, violated "the constitutional doctrine of separation [of powers] because it is a prohibited intrusion upon the Executive and Judicial branches." Id., at 420.

CHADHA IS NOT DISPOSITIVE

Recently some persons have suggested that the outcome in *Chadha* will decide this issue. In my view such a result is unlikely. That argument would have significance only if one legislative veto device necessarily invalidated all such provisions. This position is undercut by the fact that the Ninth Circuit confined *Chadha* to the facts of the case before the court. The *Chadha* panel stated:

"Although the practicality of alternative to legislative disapproval in other situations raises difficult questions, we are not here faced with a situation in which the unforeseeability of future circumstances or the broad scope and complexity of the subject matter of an agency's rulemaking authority preclude the articulation of specific criteria in the governing statute itself. Such factors might present considerations different than those we find here, both as to the question of separation of powers and the legitimacy of the unicameral device." (634 F.2d at 432–433.)

ATTORNEY GENERAL BELL AND THE EXECUTIVE REORGANIZATION ACT

Attorney General Griffin Bell's opinion examines the constitutionality of the legislative veto in the Executive Reorganization Act of 1977, 5 U.S.C. § 906. (See Opinion of the Attorney General, January 31, 1977). Under that Act, the President may formulate plans for reorganizing executive branch agencies which reorganizations go into effect unless disapproved by either House within 60 days of their submission to Congress. The veto in this context, he concluded, was constitutional.

For Attorney General Bell the critical question was not whether the scheme for implementing executive branch reorganizations adhered strictly to the legislative chronology outlined in the Presentation Clause. Deviations from the pattern laid out there were not ipso facto barred by the Constitution. In line with the rationale of the decisions in Atkins and Chadha, the Attorney General was of the view that such deviations, i.e., the one-house veto, were permissible if they did not impinge on the separation of powers and its corollary, the system of checks and balances. In other words, if the veto device did not alter the constitutional allocation of power between the legislative and executive branches, i.e., if the presidential veto is effectively preserved and the principle of bicameralism is respected, procedural variations in the process of lawmaking were not unconstitutional. The Attorney General indicated that the Presentation Clause is not violated by this procedure because the President has ultimate veto power in his formulation of the reorganization plan. Characterizing the principle of bicameralism as the "right of each House of Congress that there be no change in the law without its consent," the Attorney General concluded that this principle is respected because no reorganization plan can take effect if opposed by either House, that is, the status quo is preserved. The doctrine of separation of powers is not abridged because there is no assumption by Congress over administration of the law and, consequently, no invasion of the traditional role of the executive branch.

In line with the courts in Atkins and Chadha, the Attorney General stressed that his opinion was limited to the provision under review. He distinguished the President's option not to submit a reorganization plan with situations created by statutes that provide for subsequent resolutions disapproving presidential actions in the administration of ongoing programs. The pressures of an ongoing program with prior commitments force the President to act, he alleged. Legislative veto devices in these situations require the President to take actions that are acceptable to Congress in ways that subject presidential decisions to increased Congressional influence and effectively compromise control over his actions. According to Attorney General Bell, these statutes frustrate the constitutional check of the presidential veto in violation of Article I and contravene the doctrine of separation of powers. Of course, in the case of rulemaking, these arguments are balanced by the Congressional responsibility to oversee delegated legislative activity.

Finally, I would draw your attention to Executive branch practice and acquiescence to the requirements of section 1012 of the Impoundment Control Act of 1974, 31 U.S.C. 1402, which authorizes the President to reserve appropriated monies from obligation only if Congress within 45 days approves a "rescission bill" effectively rescinding previously granted budget authority. The reason for the rescission process ultimately adopted was explained by a key spokesman on the legislation as follows: "Inasmuch as a rescission represents the undoing of what Congress previously enacted, it is entirely appropriate that no rescission be authorized except by affirmative vote of both Houses." (Prepared remarks of Representative Bolling in offering the conference report, House Report No. 93–924, on June 18, 1974, reprinted in committee print entitled "Congressional Budget and

Impoundment Control Act of 1974, Public Law 93-244: Legislative History", Senate Committee on Government Operations, 93d Congress, 2d Session (December, 1974), page 1917.) The Executive appears to have had no difficulty, in principle, in complying with this requirement.

CONCLUSION

As you are aware, S. 382 would subject only agency rulemaking to Congressional review and possible veto. It does not affect in any way agency decisional processes in furtherance of the execution of laws enacted by Congress nor does it interfere with quasi-judicial agency decisionmaking. Thus, S. 382 comes within the rationales of the existing cases, former Attorney General Bell's opinion on reorganization initiatives and practices under the Impoundment Control Act I have just described. In particular, the circumstances and rationale of the *Atkins* case comes factually close to S. 382 while those considerations which led the court in *Chadha* to strike down the veto device involved there are far removed from agency action under the Administrative Procedures Act that is to be covered by the bill.

Further, since my proposal effectively implicates both Houses of Congress in the decision to veto an agency rulemaking, the Bicameralism argument against some forms of the legislative veto loses its force.

Also, there would be no nullification of the presidential veto since the passage of a resolution of disapproval merely preserves the status quo.

Finally, and most importantly, the thrust of my proposal impacts exclusively on the essence of the legislative function: the setting of policy for the nation. Indeed, there is no way to divorce Congressional policymaking and legislative origination (U.S. Constit. Art. I, sec. 1: "All legislative Powers . . . shall be vested . . . Congress. . . .") from the authority delegated to agencies to promulgate administrative legislation consistent with the Congressionally determined policy decision.

Let me conclude by reiterating my fundamental perception of the issue. Substantive rulemaking by administrative agencies is a delegated legislative function that remains part of the legislative process and is subject to such procedural requirements, limitations and conditions as Congress sees fit to impose in order to preserve the integrity of that process as well as to fulfill its constitutional responsibility as the ultimate Federal lawmaker. As there is no irrevocable commitment of rulemaking power. Agencies exercising delegated lawmaking authority are acting as agents of the Congress. In line with *Atkins* and contrary to the *Chada* situation, the veto provision in S. 382 does not enforce any law or appoint any agents to enforce any law and does not adversely affect judicial review. S. 382 does not intrude into the Executive's power to administer the law or the Judiciary's right to review and interpret it. Accordingly, legislative veto embodied in S. 382 is a permissible device in aid of legislation in a legislative context.

S. 890

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Regulatory Reduction and Congressional Control Act of 1981".

(b) It is the finding of the Congress that the steady usurpation of legislative powers by Federal agencies represents a clear and dangerous challenge to the constitutional provisions establishing the separation of powers between the legislative and executive branches of the Government. In making this finding, the Congress has determined that—

(1) there is an urgent requirement for a legislatively approved uniform procedure to oversee the rulemaking activities of the executive branch of the Federal Government, and such a uniform procedure will preserve and protect the constitutional doctrine relating to the separation of powers between the legislative and executive branches of the Government;

(2) there is an urgent need for the legislative branch to supervise the Federal agencies in the exercise of the limited legislative powers which have been delegated by the legislative branch to the executive branch;

(3) the often arbitrary exercise of the powers granted to the executive branch has seriously eroded the confidence of the citizens of the United States in the executive branch and thereby has weakened the confidence of the citizenry in our system of Federal Government;

(4) there is a need for greater participation by the public in the decisionmaking process which occurs during the exercise of the properly mandated regulatory powers of the executive branch, and such public participation can best be accomplished by making Federal agencies more responsive to the need of citizens for participation in and information about regulatory activities;

(5) the citizens of the United States are in need of protection from the often unnecessary, arbitrary, and capricious actions of Federal agencies, particularly when such actions result in significant economic burdens; and

(6) the legislative branch of the Federal Government, the branch of the Government which is closest and most responsive to the needs and will of citizens, must reassert on behalf of the people the constitutional right of the people to be secure from unreasonable and arbitrary actions of the executive branch which result from the usurpation by the executive branch of the powers granted by the people to the legislative branch of the Government.

IMPROVEMENTS IN REGULATORY PROCEDURES

SEC. 2. (a) Section 551 of title 5, United States Code, is amended—

(1) by amending paragraph (4) to read as follows:

"(4) 'rule' means the whole or part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy or to describe the organization, procedure, or practice requirements of an agency and includes—

"(A) the approval or prescription for the future of rates, wages, corporate or financial structures or reorganizations thereof, prices, facilities, appliances, services or allowances therefor, or of valuations, costs, or accounting, or practices bearing on any of the foregoing; and

"(B) any amendment or revision of such an agency statement;";

(2) by striking out the word "and" after the semicolon in paragraph (13);

(3) by striking out the period at the end of paragraph (14) and inserting a semicolon and "and"; and

(4) by adding after paragraph (14) the following new paragraph:

"(15) 'emergency rule' means a rule which is temporarily effective prior to the expiration of the otherwise specified periods of time for public notice and comment under this subchapter and which was duly promulgated by an agency pursuant to a finding that delay in the effective date thereof would—

"(A) seriously injure an important public interest,

"(B) substantially frustrate legislative policy and intent, or

"(C) seriously damage a person or class of persons without serving any important public interest.".

(b) The last sentence of section 553(b) of such title is amended to read as follows: "Except when notice or hearing is required by statute, this subsection does not apply—

"(A) to rules of agency organization, procedure, or practice;

"(B) to any interpretative rule or general statement of policy unless the interpretative rule or general statement of policy will have general applicability and a substantial impact on the substantive rights or obligations of persons outside an agency; or

"(C) when the agency for good cause finds that public notice and comment are unnecessary due to the routine nature or matter or insignificant impact of the rule, or that an emergency rule should be promulgated.

An agency which finds that clause (A), (B), or (C) of this subsection applies to a rule shall publish in the Federal Register with the final rule a statement of such finding and a brief description of reasons for such finding. The provisions of clauses (A), (B), and (C) of this subsection shall not preclude an agency from—

"(i) inviting persons representing different points of view to submit comments,

"(ii) creating an advisory committee to report, or

"(iii) using such other devices to obtain suggestions,

regarding the content of a proposed rule prior to general notice or rule making.".

(c) Section 553 of such title is amended by redesignating subsection (e) as subsection (f), by striking out subsections (c) and (d), and by inserting immediately after subsection (b) (as amended by subsection (b) of this section) the following new subsections:

"(c) Except as provided in subsection (e) with respect to an emergency rule, and after notice required by this section, the agency shall give interested persons not less than 60 days to participate in the rule making through submission of written data, views, or arguments with or without opportunity for oral presentation. The agency may extend the 60-day period if the agency determines that such period is insufficient to permit diligent interested persons to prepare comments or that other circumstances justify an extension of such period. After consideration of the relevant matter presented, the agency shall incorporate in the rules adopted a concise general statement of their basis and purpose. When rules are required by statute to be made on the record after opportunity for an agency hearing, sections 556 and 557 of this title apply instead of this subsection.

"(d) Unless a longer period of time is required by law or provided in the rule—

"(1) a rule may become effective immediately—

"(A) if the rule grants or recognize an exemption to, relieves a restriction from, or repeals a rule; or

"(B) if the agency finds, under clause (A), (B), or (C) of subsection (b) of this section, that such subsection does not apply to the rule; and

"(2) any other rule shall take effect only in accordance with section 802 of this title.

"(e) On the date on which an agency issues an emergency rule, the agency shall commence rule making proceedings in accordance with subsections (b) and (c) of this section, except that the period for public participation in the rule making shall be limited to 45 days, and within 15 days after the close of the period for public participation the agency shall issue a recommended final rule to take effect as provided under subsection (d). Unless earlier withdrawn by the agency or earlier set aside by court action, an emergency rule shall expire on the date on which the recommended final rule issued under the preceding sentence relating to such emergency rule either may become effective under section 822 of this title or is disapproved under such section.".

CONGRESSIONAL REVIEW

SEC. 3. (a) Title 5 of the United States Code is amended by inserting immediately after chapter 7 the following new chapter:

"Chapter 8—CONGRESSIONAL REVIEW OF AGENCY RULE MAKING

"Sec.
"801. Definitions.
"802. Congressional review of agency rules.
"803. Reconsideration of agency rules.
"804. Procedures for consideration of resolutions.

"§ 801. Definitions.

"For purposes of this chapter—

"(1) the term 'agency' has the same meaning as in section 551(1) of this title, and includes the functions excluded from the definition of such term under subparagraph (H) of such section;

"(2) the term 'rule' has the same meaning as in section 551(4) of this title;

"(3) the term 'emergency rule' has the same meaning as in section 551(15) of this title;

"(4) the term 'resolution of disapproval' means a resolution of either House of the Congress, the matter after the resolving clause of which is as follows: 'That the disapproves the recommended final rule issued by dealing with the matter of , which rule was transmitted to the Congress on .', the first blank being filled with the name of the resolving House, the second blank being filled with the name of the agency issuing the rule, the third blank being filled with the title of the rule and such further description as may be necessary to identify it, and the fourth blank being filled with the date of transmittal of the rule to the Congress; and

"(5) the term 'resolution for reconsideration' means a resolution of either House of Congress, the matter after the resolving clause of which is as follows: "That the directs to reconsider its rule dealing with the matter of which is found at .', the first blank being filled with the name of the resolving House, the second blank being filled with the name of the agency issuing the rule, the third blank being filled with the title of the rule and such further description which may be necessary to identify it, and the fourth blank being filled with the citation to the rule in the agency records.

"§ 802. Congressional review of agency rules

"(a) The provisions of this section do not apply to—

"(1) a rule granting or recognizing an exception or relieving a restriction or repealing a rule;

"(2) a rule of agency organization, practice, and procedure;

"(3) a rule relating to agency management or personnel; or

"(4) to any interpretative rule or general statement of policy unless the interpretative rule or general statement of policy will have general applicability and a substantial impact on the substantive rights or obligations of persons outside an agency; or

"(b)(1) Notwithstanding any other provision of law, any final rule subject to this section shall be considered a recommendation of the agency to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this section.

"(2)(A) A recommended final rule of an agency shall not become effective if within 60 days of continuous session of Congress after the transmittal of the recommended final rule to the Congress under paragraph (3) of this subsection, one House of Congress agrees to a resolution of disapproval of the rule and at the end of 30 additional days of continuous session of Congress after the transmittal of the resolution of disapproval to the other House, such other House has not adopted a resolution disapproving such resolution of disapproval.

"(B) A recommended final rule may become effective—

"(i) on the 61st day of continuous session after the transmittal of the recommended final rule to the Congress under paragraph (3) of this subsection if neither House of Congress has agreed to a resolution of disapproval of the rule within the preceding 60 days of continuous session of Congress; or

"(ii) if one House of the Congress has agreed to a resolution of disapproval of the rule, on the date on which the other House of Congress agrees to a resolution disapproving such resolution of disapproval if such resolution of the other House is adopted within 30 days of continuous session of Congress after the transmittal of such resolution of disapproval from the other House.

"(C) A recommended final rule shall be considered to have been disapproved on the 31st day of continuous session of Congress after the transmittal of a resolution of disapproval of the rule from one House of Congress to the other House if such other House has not, within the preceding 30 days of continuous session of Congress, adopted a resolution disapproving such resolution of disapproval.

"(3) On the day on which a recommended final rule is published in the Federal Register, an agency shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives—

"(A) a copy of the complete text of such recommended final rule;

"(B) a summary statement, written in clear language, of the problem requiring remedial Federal action for which such final rule is being recommended; and

(C) a summary of the economic impact of the recommended final rule which estimates, to the extent practicable, the costs imposed by the recommended final rule upon the various sectors of the economy affected by the rule.

"(c)(1) Each committee of the Senate and the House of Representatives having legislative jurisdiction over the subject matter with which a recommended final rule is concerned may review any recommended final rule and the materials transmitted to the Senate and the House of Representatives with such rule under subparagraphs (B) and (C) of subsection (b)(3) of this section for the purpose of determining whether the recommended final rule contains any provision which—

"(A) violates any provision of law;

"(B) is in conflict with judicial decisions;

"(C) goes beyond the mandate of the law which the rule is designed to implement;

"(D) is redundant, overlapping, or inconsistent with provisions of another rule;

"(E) would seriously injure an important public interest; or

"(F) is inconsistent with congressional intent.

"(2) If a committee of the Senate or the House of Representatives determines, with respect to a recommended final rule, that it contains a provision which meets the criteria described in paragraph (1) of this subsection, the committee may report a resolution of disapproval of such rule. A committee may report a resolution of disapproval of a recommended final rule based on such factors (other than the matters described in paragraph (1) of this subsection) as the committee finds appropriate.

"(3) This subsection does not affect the right of any Senator or Member of the House of Representatives to introduce a resolution of disapproval of a recommended final rule.

"(d) If a recommended final rule which was being promulgated subject to a statutory time limit for rule making is disapproved under this section, the agency promulgating the recommended final rule is not relieved of its responsibility for adopting a recommended final rule, but any statutory time limit shall apply to such renewed rule making only from the date on which the rule is disapproved under subsection (b)(2)(B) of this section.

"(e)(1) If a recommended final rule of an agency is disapproved under this section, the agency may issue a recommended final rule which relates to the same acts or practices as the disapproved rule. Such recommended final rule—

"(A) shall be based upon—

"(i) the rule making record of the recommended final rule disapproved by the Congress; or

"(ii) such rule making record and the record established in supplemental rule making proceedings conducted by the agency in accordance with section 553 of this title, in any case in which the agency determines that it is necessary to supplement the existing rule making record; and

"(B) may reflect such changes as the agency considers necessary or appropriate.

"(2) An agency, after issuing a recommended final rule under this subsection, shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives in accordance with subsection (b) of this subsection, and such rule shall only become effective in accordance with such subsection.

"(f) Congressional inaction on or rejection of a resolution of disapproval shall not be deemed an expression of approval of such rule.

"§ 803. Reconsideration of agency rules

"(a)(1) Each committee of the Senate and the House of Representatives having legislative jurisdiction over the subject matter over any rule of an agency which is in effect may periodically review the rule for the purpose of determining whether the rule contains any provision which meets the criteria described in section 802(c)(1) of this title.

"(2) If a committee of the Senate or the House of Representatives determines, with respect to any rule of an agency which is in effect, that such rule contains a provision which meets the criteria described in section 802(c)(1) of this title, the committee may report a resolution for reconsideration of such rule. A committee may report a resolution of reconsideration of a rule based on such factors (other than the matters specified in section 802(c)(1)) as the committee finds appropriate.

"(3) This subsection does not affect the right of any Senator or Member of the House of Representatives to introduce a resolution for reconsideration of a rule.

"(b) If either House of the Congress adopts a resolution for reconsideration of a rule which is in effect, the rule shall lapse within 180 days after the date on which the resolution is adopted unless recommended again by the agency. Unless excepted by section 553(a) of this title, the agency shall, not less than 60 days prior to again recommending such a rule, give notice of a proceeding to consider its recommendation. The notice and proceeding shall comply with subsections (b) and (c) of section 553 of this title, except that the provisions of section 553(b)(3) of this title shall not be available to the agency and the agency shall hold a hearing for oral presentations. Any rule recommended pursuant to this subsection within 180 days of the passage of the resolution or reconsideration shall take effect only as provided in section 802 of this title, and during the period for congressional review provided in that section the reconsidered rule may remain in effect.

"§ 804. Procedures for consideration of resolutions

"(a) The provisions of this section, paragraphs (4) and (5) of section 801, subsection (c) of section 802, and subsection (a) of secton 803 are enacted by Congress—

"(1) as an exercise of the rule making power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions of disapproval, resolutions disapproving a resolution of disap-

proval in the other House, and resolutions for reconsideration; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(b) Resolutions of disapproval, resolutions disapproving a resolution of disapproval in the other House, and resolutions for reconsideration, shall, upon introduction, be immediately referred by the presiding officer of the Senate or the House of Representatives to the committee of the Senate or the House of Representatives, as the case may be, having legislative jurisdiction over the subject matter of the rule to which the resolution relates.

"(c)(1)(A) If the committee to which a resolution of disapproval has been referred does not report such resolution within 45 days of continuous session of Congress after the date of transmittal of the recommended final rule to which such resolution relates, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(3) If the committee to which a resolution disapproving a resolution has been referred does not report such resolution within 20 days of continuous session of Congress after the date of transmittal of the resolution of disapproval from the other House, it shall be in order to move to discharge the committee from further consideration of the resolution disapproving the resolution of disapproval.

"(C) If the committee to which a resolution for reconsideration has been referred does not report such resolution within 45 days of continuous session of Congress after the date of introduction of such resolution, it shall be in order to move to discharge the committee from further consideration of the resolution.

"(2) Any motion to discharge under paragraph (1) of this subsection must be supported by one-fifth of the Members of the House of Congress involved, and is highly privileged in the House and privileged in the Senate (except that it may not be made after a resolution of disapproval, a resolution disapproving a resolution of disapproval in the other House, or a resolution for reconsideration, as the case may be, has been reported with respect to the same rule); and debate thereon shall be limited to not more than 1 hour, the time to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge and to be divided in the Senate equally between, and controlled, by the majority leader and the minority leader or their designees. An amendment to the motion is not in order.

"(d)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a resolution of disapproval, a resolution disapproving a resolution of disapproval in the other House, or a resolution for reconsideration shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a resolution with respect to a rule, it shall be in order at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a resolution with respect to a rule shall be limited to not more than two hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not in order. An amendment to, or motion to recommit the resolution is not in order.

"(e) For the purposes of this chapter—

"(1) continuity of session is broken only by an adjournment sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of calendar days of continuous session.".

(b) The table of chapters for part I of title 5, United States Code, is amended by inserting immediately after the item relating to chapter 7 the following:

"8. Congressional Review of Agency Rule Making."

(c) The provisions of chapter 8 of title 5, United States Code, shall supersede any other provision of law governing procedures for congressional review of agency rules to the extent such other provisions are inconsistent with such chapter.

EFFECTIVE DATE

SEC. 4. This Act and the amendments made by this Act shall take effect two years after the date of enactment of this Act.

Mr. GRASSLEY. Mr. President, I am pleased today to join Senator SCHMITT in the introduction of the Regulatory Reduction and Congressional Control Act of 1981.

This legislation addresses the serious problem of overregulation caused by abuses of authority by Federal agencies through the mechanism of amending the Administrative Procedures Act to allow Congress the opportunity of orderly review of proposed regulations before they take effect. In addition to this opportunity to review, Congress is given the ability to control the use of this delegated legislative authority through the exercise of a veto over those proposed regulations that it finds abusive.

Congressional veto is not a concept new to our Government. This body first enacted a veto provision in 1932. Since that time we have written 269 congressional veto or review provisions into law. This is a trend which is accelerating. In 1980 alone 38 new such provisions were approved.

It is not surprising that veto is growing in its usage. The acceptance of veto is growing in direct response to the growth of the power of the new fourth branch of our Federal Government, the unelected regulatory bureaucracy.

We all know the horror stories of the abuses of excessive Government regulation. No Member of Congress can return home without being sought out by a constituent for help in correcting some injustice or another being wrought upon him by a Federal agency.

As a Member of Congress for the past 7 years the most frustrating and unjustified of these cases brought to me are also perhaps the most common—those in which the agencies, in exercising the authority we delegate to them to draft substantive regulations, exceed that authority and delve into areas beyond the scope of congressional intent.

I say these cases are frustrating because it is very cumbersome and difficult to get control over an agency once it has embarked upon an illegal activity of this nature.

I would be the first to admit that Congress is not without blame in creating this problem.

Increasingly Congress has passed laws which are little more than frail skeletons of policy upon which the meat of substantive law is provided by administrative agencies.

These agencies no longer draft regulations as mere guidelines for enforcement of legislative mandates, but are rather de facto acts of substantive legislation themselves.

The question is, What method of oversight should be available to Congress to prevent agencies from running amuck with this power which is only lent to them by the Congress in the first instance?

At present, we are faced in most instances, with the inenviable choice of embarking upon the lengthy and cumbersome task of passing new legislation to tell the agency that we meant what we said the first time, or choosing to allow some injured third party to call the courts to the rescue for an ex post facto determination perhaps years down the road.

We must endeavor to develop a broad-based legislative approach to allow Congress an efficient and expeditious method of insuring that the regulatory authority it grants to administrative agencies is properly exercised.

I believe that the bill we are introducing today provides that effective approach.

I recognize that despite the extensive approval and use of veto mechanisms by this body in the past, there are some Members who have raised concern over the constitutionality of legislative veto.

While I recognize that we must uphold our oath of office by not knowingly supporting legislation which would violate the Constitution, it is time to admit that collectively we long ago determined that the question of consitutionality associated with congressional veto was not so serious as to prevent virtually every Member of Congress from participating in congressional veto activities by either voting for bills containing ad hoc veto provisions, or participating in votes on veto provisions already on the books. Who among us raises the question of constitutionality when we go to the floor to vote the approval of a foreign arms sale under the Arms Export Act, or to voice our will on rescissions or deferrals under the Budget Act? Indeed, no Member of the Senate refused to vote to veto the President's recommendations to increase our own salaries because of concerns over the constitutionality of such an action.

I am convinced that to meet the constitutional test we need only limit the scope of coverage of agency actions to which our veto applies. So long as we apply our veto coverage only to delegated legislative authority, and not to traditional executive branch activities of enforcement, we do not violate the Constitution.

Justice White noted in concurring remarks in a 1976 Supreme Court decision:

I would not view the power of either House to disapprove as the equivalent to legislation or to an order, resolution, or vote requiring the concurrence of both Houses . . . the provision for congressional disapproval of agency regulations does not appear to transgress the Constitutional design, at

least where the President has agreed to legislation establishing the disapproval procedure or the legislations passed over his veto, *Buckley* v. *Valeo*, 424 U.S. 1.

I say, that it is time to put the constitutional arguments behind us. If the longstanding practice of Congress in enacting veto provisions, and the policy of virtually every Presidential administration to follow the letter and spirit of those provisions despite rhetoric to the contrary, is in fact unconstitutional, then it is time that the Supreme Court has told us so. The Court will certainly have opportunity to do so in the near future as it has in the past. But in the meantime, let us move ahead with a meaningful, efficient, comprehensive veto provision to regain effective control over the lawmaking authority we delegate to others. Such a move will strengthen, not weaken, the separation of powers.

In conclusion, I invite the remaining Members of this body who have not already done so, to join Senator SCHMITT and me in the cosponsorship of the Regulatory Reduction and Congressional Control Act of 1981. Over one-third of the Senate has already done so, and nearly half of the House of Representatives has cosponsored a similar measure introduced by Congressman LEVITAS.

The Judiciary Committee's Subcommittee on Agency Administration, which I chair will hold hearings on this bill on April 22. Half of the members of both that subcommittee and the full committee have cosponsored this measure, and I am certain we will be reporting it out favorably very soon for positive action by the full Senate.

By Mr. ROTH (by request):

S. 891. A bill to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes; to the Committee on Governmental Affairs.

ANNUAL COST-OF-LIVING ADJUSTMENTS TO CIVIL SERVICE ANNUITIES

● Mr. ROTH. Mr. President, I am introducing today, by request, a proposal to amend chapter 38 of title 5 of the United States Code. This legislation is part of the administration's economic package and would provide for annual cost-of-living adjustments to civil service annuities. I am introducing the proposal so that there may be a specific bill to which interested Senators and the public may direct comments.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis and the letter from the Director of the Office of Personnel Management to the President of the Senate dated March 17, 1981.

There being no objection, the bill, analysis, and letter were ordered to be printed in the RECORD, as follows:

S. 891

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8340(b) of title 5, United States Code, is amended to read as follows:

"(b)(1) The Office shall in January of each year determine the percent change in the price index published for December of the preceding year over the price index published for December of the year prior to the preceding year.

"(2) If in any year the percent change determined under paragraph (1) indicates a rise in the price index, then effective March 1 of such year, except as provided in subsection (c) of this section, each annuity payable from the Fund having a commencing date not later than such March 1 shall be increased by the percent change computed under paragraph (1), adjusted to the nearest one-tenth of 1 percent.".

SEC. 2. Section 8340(c)(1) of title 5, United States Code, is amended to read as follows:

"(1) The first increase (if any) made under subsection (b) of this section to an annuity which is payable from the Fund to an employee or Member who retires, to the widow or widower of a deceased employee or Member, or to the widow or widower of a deceased annuitant whose annuity has not been increased under this subsection or subsection (b) of this section, shall be equal to the product (adjusted to the nearest one-tenth of 1 percent) of—

"(A) one-twelfth of the applicable percent change computed under subsection (b) of this section, multiplied by

"(B) the number of months (counting any portion of a month as a month) for which the annuity was payable from the Fund before the effective date of the increase, or in the case of a widow or widower of a deceased annuitant whose annuity has not been increased under this subsection or subsection (b) of this section, the number of months since the annuity was first payable to the annuitant.".

SEC. 3. The amendments made by this Act shall take effect on the date of enactment and shall apply to annuities which commence before, on, or after the date of enactment.

STATEMENT OF PURPOSE AND JUSTIFICATION

To accompany a draft bill to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes.

The draft bill would amend the Civil Service Retirement law to provide that retirement benefits would be adjusted once a year (on March 1) based on the percentage increase in the Consumer Price Index. Under current law, these adjustments are made twice a year, on March 1 and September 1.

The change to annual cost-of-living adjustments is part of the President's "Program for Economic Recovery," and is included in his revised budget for fiscal year 1982. Under present law, virtually every group that receives Federal benefits indexed to the CPI receives automatic inflation adjustments on an annual basis. Payments for Social Security, food stamps, veterans' pensions, and Federal employees' work injury compensation, for example, are adjusted annually. It is clearly unfair for retired civil servants to receive more frequent adjustments than these other groups, so the draft bill would replace the current semi-annual adjustments with a single, annual adjustment.

The change to annual adjustments would significantly reduce Federal expenditures in keeping with the President's program to reduce and control the Federal budget. Outlays for Civil Service Retirement would be reduced by $510 million in fiscal year 1982 and by over $2 billion during the next five years.

In addition, comparable savings would result under various other Federal retirement systems which would follow the pattern set by the Civil Service Retirement law. These include military retired pay, the Foreign Service Retirement System, and the CIA Retirement System.

SECTION-BY-SECTION ANALYSIS

To accompany a draft bill to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes.

The first section of the bill would amend section 8340(b) of title 5, United States Code, to provide annual instead of semi-annual cost-of-living adjustments for Civil Service annuities. The September adjustments would be eliminated, and the March adjustment would increase annuities by the percent change in the Consumer Price Index (CPI) for December of the preceding year over the CPI for the previous December.

Section 2 of the bill would make a conforming change in section 8340(c)(1) of title 5, United States Code, to provide that the pro rata increase in the first cost-of-living adjustment in each Civil Service annuity would be an amount equal to one-twelfth rather than one-sixth of the amount of the cost-of-living increase for each month that the annuity was payable before the effective date of the increase. Section 2 would also correct a technical oversight in the description of individuals whose annuities are to be prorated, to include a widow or widower of an annuitant who dies before receiving the first cost-of-living adjustment in his or her annuity. This change would make it clear, in keeping with the intent of the Omnibus Reconciliation Act of 1980, that all annuities which have commenced between increases are to be prorated.

Section 3 of the bill provides that the bill would be effective on the date of enactment, and would apply to all annuities, including those already payable.

U.S. OFFICE OF
PERSONNEL MANAGEMENT,
Washington, D.C., March 17, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: The Office of Personnel Management submits herewith a legislative proposal "To amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes." We request that you refer this proposal to the appropriate committee for early consideration and favorable action.

This proposal is part of the President's "Program for Economic Recovery," and is included in the President's budget for fiscal year 1982. Estimated savings of $510 million for the Civil Service Retirement System will result in fiscal year 1982 if the proposal is enacted. In addition to the anticipated savings, the proposal would make cost-of-living adjustments under the Civil Service Retirement System consistent with the annual adjustment granted under Social Security.

The Civil Service Retirement law currently provides for two cost-of-living adjustments each year, one in March and one in September, based on increases in the Consumer Price Index (CPI). This system of semi-annual adjustments is more liberal than virtually all non-Federal pension plans. These semi-annual adjustments are responsible in significant part for the unfunded liability of the Retirement Fund and for the public's perception that Federal retirement benefits are unjustifiably more liberal than retirement benefits in the non-Federal sector. To put the Fund on a sounder financial basis and to provide uniformity with other Government retirement programs, we propose that cost-of-living adjustments to Civil Service annuities be made once a year, in March.

At present, cost-of-living increases for Civil Service annuities are granted in September and in March based on the percent rise in the CPI over a designated six-month period. Under our proposal, the September 1981 increase would be foregone and the March 1982 increase would be determined by the percentage rise in the CPI from De-

cember 1980 to December 1981. The timing and the method of determining the increase would be the same as now employed, except it would take place once instead of twice a year.

Assuming that the draft legislation would be enacted before the September 1981 increase that would otherwise take place, estimated savings in the first five years for the Civil Service Retirement System are as follows:

[In millions]

Fiscal year:	Savings in outlays
1982	$510
1983	424
1984	389
1985	366
1986	367
Total	2,056

Under Public Law 96-342, enactment of this proposal for Civil Service Retirement would automatically have the effect of shifting the military retirement system to the same annual adjustment mechanism. The savings in military retired pay are estimated by the Department of Defense as follows:

[In millions]

Fiscal year:	Savings in outlays
1981	$68
1982	380
1983	284
1984	219
1985	174
1986	146
Total	1,271

The Office of Management and Budget advises that enactment of this legislative proposal would be in accord with the program of the President.

A similar letter is being sent to the Speaker of the House of Representatives.

Sincerely yours,

ARCH S. RAMSAY,
Acting Director.●

By Mr. ROTH (for himself and Mr. CHILES) (by request):

S. 892. A bill to amend the Federal Grant and Cooperative Agreement Act; to the Committee on Governmental Affairs.

AMENDMENT OF FEDERAL GRANT AND COOPERATIVE AGREEMENT ACT

● Mr. ROTH. Mr. President, I am introducing today for myself and Mr. CHILES, by request, a proposal to revise the Federal Grant and Cooperative Agreement Act (41 U.S.C. 501 et seq.). The act distinguishes between Federal procurement and assistance, and provides guidance to Federal agencies on the use of contracts, grants, and cooperative agreements. It was signed into law on February 3, 1977.

Since passage of the act, great progress has been made in the agencies to improve their use of the assistance and procurement instruments. As agencies learn when to use a grant and when a procurement relationship would be more appropriate, improved efficiency in Federal program operations will result. In addition, potential assistance recipients will know better how and why the Federal assistance system operates as it does, improving relationships among the levels of government and between the Federal Government and companies or nonprofit groups.

The act contains provisions authorizing the Director of the Office of Management and Budget to exempt individual assistance transactions from its requirements. The legislation I am introducing today would extend that authority which expired in March of this year. I am introducing the proposal so that there may be a specific bill to which interested Senators and the public may direct comments.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with an explanation of the bill and the letter of the Director of the Office of Management and Budget to the President of the Senate concerning the legislation.

There being no objection, the bill, explanation, and letter were ordered to be printed in the RECORD, as follows:

S. 892

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 10(d) of the Federal Grant and Cooperative Agreement Act of 1977 (Public Law 95-224; 41 U.S.C. 501 note) is amended by deleting the sentence: "This authority shall expire one year after receipt by the Congress of the study provided for insection 8 of this Act.".

EXPLANATION OF A BILL TO AMEND THE FEDERAL GRANT AND COOPERATIVE AGREEMENT ACT

(41 U.S.C. 501 note; section 10(d), Public Law 95-244)

The Act distinguishes two principal Federal purposes of procurement and assistance and instructs Federal agencies on when to use procurement contracts, grants, and cooperative agreements. While these general instructions are normally to be followed, authors of the Act recognized that situations might occur where lack of flexibility in the application of general instructions could lead to adverse consequences. For this reason, the Director of OMB was given authority to except individual transactions or programs from this provision of the Act. This exception authority is scheduled to expire in March 1981.

OMB has used this authority sparingly, and only three exceptions have been made:

1. Non-financial transfers were excluded from the provisions of Section 504, to avoid creation of unnecessary formal grant instruments.

2. General Revenue Sharing was excepted, to avoid creating more than 38,000 grant instruments, and to avoid legal interpretations that might apply normal governmentwide grant policies to GRS.

3. Counted Cyclical Fiscal Assistance was excepted, to avoid potentially creating several thousand grant instruments, and to avoid legal interpretations that might apply normal governmentwide grant policies to counter cyclical assistance.

Continuation of the OMB exception authority is being requested for three reasons:

1. There is some question as to the duration of the exceptions granted to date. If they were to expire with the basic authority, General Revenue Sharing might be required to use formal grant instruments and adhere to other restrictive grant policies and nonfinancial transfers could be encumbered by unnecessary paperwork and formality.

2. Executive branch flexibility is needed to permit the continued rational tailoring of this general statute to a complex universe of transactions.

3. The exception authority is useful in testing alternatives, on a controlled basis, on outstanding issues related to implementation of the classification scheme established in the Act.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., April 1, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I am transmitting herewith a draft of legislation to revise the Federal Grant and Cooperative Agreement Act (P.L. 95-224, 41 USC 501 et seq.). The Act distinguishes between Federal procurement and assistance, and provides guidance to Federal agencies on the use of contracts, grants, and cooperative agreements.

The Act authorizes the Director of OMB to except specific programs or transactions from the provisions of the Act. This exception authority, however, will expire in March 1981. The proposed amendment simply deletes the expiration sentence in the section authorizing the Director of OMB to except specific programs or transactions from the provisions of the Act, leaving a continuing authority to grant exceptions, if necessary. This would avoid the unnecessary confusion and inflexibility that could result if the authority lapses.

We urge prompt and favorable consideration of this legislation.

Sincerely,

DAVID A. STOCKMAN,
Director.●

By Mr. ROTH (by request):

S. 893. A bill to amend and extend the authority of the President to reorganize the executive branch of the Government under chapter 9, United States Code; to the Committee on Governmental Affairs.

REORGANIZATION ACT OF 1981

● Mr. ROTH. Mr. President, I am introducing today, by request, legislation to extend the reorganization authority of the President. The bill builds upon the previously enacted reorganization statute which expired earlier this month. I am introducing the proposal so that there may be a specific bill to which interested Senators and the public may direct comments.

The proposed legislation would extend for 4 years, from the date of enactment, the authority of the President under chapter 9 of title 5, United States Code, to submit reorganization plans to Congress proposing the reorganization of agencies in the executive branch. Reorganization authority has been granted to Presidents since it was first proposed by Franklin Delano Roosevelt in the late 1930's. The authority has lapsed on occasion but most Presidents have been able to use the reorganization process to shape the executive branch.

The Federal Government now consists of a multitude of diverse agencies employing over 2.8 million civilian employees with an annual payroll of some $50 billion. In the area of Government regulation alone, 90 Federal agencies have some regulatory responsibilities. The 11 Cabinet agencies and EPA issued more than 5,000 rules in 1980 and nearly $4 billion was spent in fiscal year 1980 on regulatory activities.

The complexity of the structure of the Federal Government, the wide variety of Federal programs and functions, and the rapidly changing nature of Federal program administration make it imperative that the President have the tools to restructure the executive branch. The public expects the President, working with

the Congress, to take action which really rationalizes the way the Government is organized.

Often in the past, the reorganization process has failed to work as effectively as it should. Effective reorganization is not simply a shifting of boxes on an organization chart or the shuffling of Government employees from one building to another. Real reform must involve sensitive decisions on how our tax dollars can return the most for each dollar invested.

I believe the reorganization authority can be used to make Government work better. Despite the importance of reauthorizing the Reorganization Act, I believe that perhaps the best and most effective means of providing strong citizen support for reform of Government would be through the creation of a citizens' commission similar to the Hoover Commission of the 1950's. The Governmental Affairs Committee has before it a bill Senator TOM EAGLETON and I introduced to create such a commission, and our committee will seriously review the legislation over the coming weeks.

Mr. President, I ask unanimous consent that the Reorganization Act of 1981 be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 893

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Reorganization Act of 1981".

EXTENSION OF AUTHORITY

SEC. 2. Section 905(b) of title 5, United States Code, is amended to read as follows:

"(b) A provision contained in a reorganization plan may take effect only if the plan is transmitted to the Congress within four years of the date of enactment of the Reorganization Act of 1981.".

PERIOD FOR CONSIDERATION OF PLAN

SEC. 3. Chapter 9 of title 5, United States Code, is further amended—

(1) by striking out "thirty calendar days" in section 903(c) and inserting in lieu thereof "60 calendar days";

(2) by striking out "sixty calendar days" in such section and inserting in lieu thereof "90 days";

(3) by striking out "sixty-day" in section 906(c) and inserting in lieu thereof "ninety-day";

(4) by striking out "45 calendar days" in section 910(b) and inserting in lieu thereof "75 calendar days"; and

(5) by striking out "45 calendar days" in section 911 and inserting in lieu thereof "75 calendar days".

INFORMATION TO ACCOMPANY PLANS

SEC. 4. Section 903(b) of title 5, United States Code, is amended by adding at the end thereof the following new sentences: "If the reorganization provided for in a plan requires the promulgation of an executive order, presidential directive, or other administrative action, a draft of each such order, directive or action shall accompany such message. The President shall also submit such further background or other information as the Congress may require for its consideration of the plan."

RESTRICTIONS ON CONTENTS OF PLANS

SEC. 5. (a) Section 905(a) of title 5, United States Code, is amended—

(1) by inserting "or renaming an existing executive department" immediately after "a new executive department" in paragraph (1);

(2) by redesignating paragraphs (5) and (6) as paragraphs (6) and (7), respectively, and by inserting immediately after paragraph (4) the following new paragraph:

"(5) creating a new agency which is not a component or part of an existing executive department or independent agency;".

(b) Section 904(1) of such title is amended by inserting ", subject to section 905," immediately after "may".

METHOD OF APPROVAL OF PLANS

SEC. 6. (a) Section 906(a) of title 5, United States Code, is amended to read as follows:

"(a) Except as otherwise provided under subsection (c) of this section, a reorganization plan is effective—

"(1) if each House of Congress, within 90 calendar days of continuous session of Congress after the date on which such plan is transmitted to it, adopts a resolution stating in substance that the House favors the reorganization plan; or

"(2) upon the expiration of such 90-day period unless, within such period, in a vote on final approval of such a resolution in either House, such resolution fails to be adopted."

(b) Section 906(c) of such title is amended by striking out "if both Houses of Congress have defeated a resolution of disapproval" and inserting in lieu thereof "if both Houses of Congress have approved a resolution of approval".

(c) Section 909 of such title is amended by striking out the matter within the quotation marks and inserting in lieu thereof the following: "That the favors the Reorganization Plan Numbered transmitted to the Congress by the President on , 19 ."

By Mr. CANNON (for himself, Mr. SCHMITT, Mr. LAXALT, and Mr. ANDREWS):

S. 894. A bill to exempt rural electrical cooperatives from fees under the Federal Land Policy and Management Act of 1976; to the Committee on Energy and Natural Resources.

EXEMPTION FROM RIGHT OF WAY REQUIREMENTS FOR ELECTRIC COOPERATIVES AND RURAL TELEPHONE COOPERATIVES

Mr. CANNON. Mr. President, I introduce for appropriate reference a bill to provide an exemption from the right-of-way payment requirements on the public lands for rural electric cooperatives and rural telephone cooperatives. I am joined in sponsoring this bill by Senators LAXALT, ANDREWS, SCHMITT, and DOMENICI.

Title V of the Federal Land Policy and Management Act of 1976 provides for payment for rights of way over the public lands. A fair market value payment is required by the section. The terms and conditions for such payments were completed last July and the Bureau of Land Management has begun to implement the regulations. The regulations include both an initial installation fee and an annual rental based on fair market value.

The requirement of fair market value for use of the public lands is a sound basic public policy position. However, as with any such policy, there are circumstances which may merit a somewhat different approach or an exemption. I believe a strong case can be made for an exemption in the case of rural electric and rural telephone cooperatives.

Rural electric and rural telephone cooperatives provide a most important service in the sparsely populated and remote corners of this Nation. Typically in the West, these cooperatives must cross the public lands to provide this service. Also typical is the fact that the cooperatives have long powerline requirements and small market areas. These lines are the major overhead cost to the cooperative. Anything which substantially increases these costs, particularly on an annual basis, imposes new paperwork burdens on the cooperatives and adds to the power and telephone costs for the customer of these cooperatives. Power customers already pay rates 12-percent higher, on a nationwide average, than customers of investor owned utilities.

A comparison of cooperative and investor-owned power utilities is instructive. Investor-owned utilities average about 35 to 36 customers per mile of power line while a coperative averages only about 4.5 customers per mile of line. Investor owned utilities generate revenues of about $36,600 per mile while cooperatives average less than $3,000 in revenues per mile. The rural power consumer is already at a disadvantage, without the addition of more overhead for the utilities bringing in the power.

A cooperative in Nevada may service an area 10,000 miles square, of which 90 percent may be federally owned.

The rationale of the Department of the Interior appears to be that since the cooperative, like other entities, raises revenues through service charges and is not tax or donation supported, it should be required to pay the right-of-way charge as other corporations would. I fear, however, that it is not good public policy to place the rural power and telephone customer at a severe rate disadvantage and the rural cooperative under a burden not shared by its investor owned counterparts. The rural customer already helps pay for the management of the Federal lands through the taxes he or she pays but will be required to pay again through higher power rates for the right-of-way charges to the cooperative, which must realistically be passed on to him. I believe this decision by the Department of the Interior deserves a closer look and I urge an early and careful review of this bill.

By Mr. MATHIAS (for himself, Mr. KENNEDY, Mr. BIDEN, Mr. CHAFEE, Mr. CRANSTON, Mr. METZENBAUM, Mr. MOYNIHAN, and Mr. WEICKER):

S. 895. A bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes; to the Committee on the Judiciary.

VOTING RIGHTS ACT AMENDMENTS OF 1981

● Mr. MATHIAS. Mr. President, today we are writing what I hope will be the last chapter in the very long and difficult saga that has occupied this Nation for well over a century: The struggle to guarantee the right to vote to all Americans. Today, for myself and Senators KENNEDY, BIDEN, CHAFEE, CRANSTON, METZENBAUM, MOYNIHAN, and WEICKER, I introduce a bill to extend the Voting Rights Act of 1965.

Basically, my bill would:

Extend until August 1992, the temporary provisions of the Voting Rights Act, including section 5, the preclearance provision;

Provide for 7-year extension of the language minority protections added in 1975, and;

Amend section 2 of the act to clarify the burden of proof in voting discrimination cases and thus remove the uncertainty caused by the failure of the Supreme Court to articulate a clear standard in City of Mobile against Bolden.

In 1870, the 15th amendment was added to the Constitution. Section 1 set out this simple, unequivocal command:

> The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

By providing a specific constitutional provision protecting the right to vote, the Reconstruction Congress established access to the ballot as a right just as fundamental and precious as those inscribed in the Bill of Rights by our Founding Fathers. Incorporating this principle into our organic law constituted a solemn promise that our society would not tolerate racial barriers in the way of Americans seeking access to the voting booth. But just to make sure there would be no two ways about it, section 2 of the 15th amendment specifies that:

> The Congress shall have power to enforce this article by appropriate legislation.

Unfortunately, despite the unambiguous language of the 15th amendment, its promise has never been fully redeemed. In fact, it has often been repudiated and ignored. Not until Dr. Martin Luther King, Jr. and his companions in the civil rights movement prevailed against the brutal, ugly forces arrayed against them in Selma, Ala. in 1965 did Congress take decisive legislative action as required by the amendment, to signal that systematic violations of the 15th amendment would no longer be tolerated. With the enactment of the 1965 Voting Rights Act, black Americans finally began to collect on what Dr. King called the "promissory note of the Constitution."

There is no question that much has been accomplished under the Voting Rights Act. In the past 16 years, we have witnessed dramatic increases in minority registration and voting. The number of blacks registered to vote in South Carolina, Alabama, Mississippi, Louisiana, Georgia, Virginia, and parts of North Carolina has doubled since 1965. And, in the period between the 1976 and 1980 Presidential elections, Hispanic registration increased by 30 percent nationwide and 44 percent in the Southwest. Real political participation has become a fact of life in areas where politics used to be a game of charades enjoyed by a select few.

Clearly a great deal has been achieved, but this is no time to rest on our laurels. More remains to be done. The increases in black and Hispanic voting figures do not tell the whole story.

Although minorities are registering in greater numbers, sophisticated dodges such as at-large elections, racial gerrymandering, annexations and even changes in polling places, have been devised to dilute the impact of their vote. As the U.S. Supreme Court recognized in the Allen case:

> The right to vote can be affected by a dilution of voting power, as well as by an absolute prohibition on casting a ballot.

Section 5 of the 1965 Voting Rights Act requires Federal review of proposed changes in State and local election laws. It has been our most effective tool to date in blunting the impact of these voter dilution procedures, and it takes on added importance in light of the reapportionments dictated by the 1980 census which reflect trends expected to be more pronounced in the 1990 census. Without section 5, there will be no effective means of insuring that the growth in minority voting power anticipated under both censuses will not be minimized by racial gerrymandering and similar procedures. In the absence of section 5, we would be caught in a time warp and returned to the bad old days when the only way to combat voting discrimination was to attack it on a case-by-case basis. As the Supreme Court noted in *South Carolina* v. *Katzenback*, 383 U.S. 301 (1966), taking this tedious, time-consuming approach meant that:

> Even when favorable decisions have finally been obtained, some of the States affected have merely switched to discriminatory devices not covered by the Federal decrees or have enacted difficult new tests designed to prolong the existing disparity between white and Negro registration.

But, unless we act by August 6, 1982, section 5 will no longer apply to several jurisdictions of special concern. Twice before, the act faced such a threat. And, on both occasions, Congress met the challenge.

In submitting the bill today, we are simply carrying out our clear constitutional duty to provide "appropriate legislation" to enforce the terms of the 15th amendment. If we fail to act on this legislation now, we will put in jeopardy not only 16 years of hard-won progress, but, we will also put in jeopardy the solemn oath to uphold the Constitution, which each of us took when elected to the Senate of the United States.

I ask unanimous consent that the full text of the Voting Rights Act Amendments of 1981 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 895

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voting Rights Act Amendments of 1981".

SEC. 2. Section 4(a) of the Voting Rights Act of 1965 is amended by—

(1) striking out "seventeen" each time it appears and inserting in lieu thereof "twenty-seven"; and

(2) striking out "ten" each time it appears and inserting in lieu thereof "seventeen".

SEC. 3. Section 2 of the Voting Rights Act of 1965 is amended by striking out "to deny or abridge" and inserting in lieu thereof "in a manner which results in a denial or abridgement of".

SEC. 4. Section 203(b) of the Voting Rights Act of 1965 is amended by striking out "August 6, 1985" and inserting in lieu thereof "August 6, 1992".●

● Mr. KENNEDY. Mr. President, I am very pleased to join with Senators MATHIAS, BIDEN, CHAFEE, CRANSTON, METZENBAUM, MOYNIHAN, and WEICKER today in introducing the Voting Rights Amendments of 1981. Our bill will extend the essential protections of the historic Voting Rights Act. It will insure that the hard won progress of the past is preserved, and that the effort to achieve full participation for all Americans in our democracy will continue in the future.

Two days ago, in Selma, Ala., thousands of Americans marched across the Edmund Pettus Bridge. They commemorated that historic turning point 16 years ago, when Dr. Martin Luther King, joined by Americans of all races and creeds, persuaded our people to confront their conscience and fulfill the guarantees of the constitution.

From that effort came the Voting Rights Act of 1965. President Lyndon Johnson hailed its enactment as a "triumph for freedom as huge as any ever won on any battlefield." His prediction has been fulfilled. The act has restrained the shameful blight of voting discrimination. Minorities now enter the polls, participate in elections and win office themselves in parts of the country where they had long been denied the most basic right in a democratic society—the right to vote.

As the result of the Voting Rights Act of 1965, hundreds of thousands of Americans can now vote and, equally important, have their vote count as fully as the votes of their fellow citizens. Hundreds of men and women from racial and ethnic minorities now hold public office in places where that was once impossible.

Twice before, in 1970 and 1975, the crucial provisions of the act have been extended. Each time the act has come under attack. But each time, the Congress on a bipartisan basis, has come to its rescue, with the support of Americans from every part of the country. And in 1975, the act's protection was also extended to Hispanic Americans and other language minorities who have been the victim of similar discrimination in the right to vote.

I personally count my role in the passage of the Voting Rights Act and its extensions as among the most important responsibilities I have undertaken in this body.

Now this landmark legislation is again imperiled. The most successful modern civil rights law is in danger of falling victim to its own success. Unless we act, its crucial safeguards will no longer protect those who have relied upon them the most.

The protections of the act will expire in August of next year. Therefore, today we are introducing legislation to extend the full force of this historic law for 10 years, so that the extensive reapportion-

ment following the 1990 decennial census will be conducted under its aegis. The crucial role which the act plays in assuring fair reapportionment was the reason for the last extension of the act through 1982, in order to encompass the 1980 census.

To appreciate the legacy of the Voting Rights Act and the need for its continued vigor, an understanding of its history is essential. Traditionally, black Americans were denied the franchise throughout the South. After statutory bars were lifted, the main device was denial of voter registration—by violence, by harassment, and by the use of literacy tests or other screening methods. Civil rights groups and the Justice Department challenged those barriers repeatedly in the courts. The Civil Rights Act of 1957 and 1960 authorized the Attorney General to seek injunctions, and the bills also established a complex process to enroll black voters.

But case-by-case litigation proved wholly inadequate. Justice Department attorneys were thinly spread among numerous lawsuits in many different jurisdictions. The Government's burden of proof required massive resources to document discrimination in each case. By the time a court enjoined one scheme, the election had often taken place, local officials had devised a new scheme, or both. The enforcement of the law could not keep up with the violations of the law.

Finally, after long frustration and tenacious resistance, Congress acted to affirm our fundamental principles by passing the Voting Rights Act in 1965.

The legislation operates in two ways. First, it contains special remedies applicable to States or counties covered by the so-called trigger formula of section 4. If, in either the 1964 or 1986 Presidential elections, the jurisdiction had a literacy test or similar device and if less than half of its electorate was registered or voted, then it is covered under section 4. The use of "tests or devices" is suspended and the Attorney General is authorized to send in Federal examiners to register voters or Federal observers to monitor the conduct of elections.

Under section 5, these covered jurisdictions must preclear any changes in voting or election laws with either the Attorney General or a Federal court in the District of Columbia. The Attorney General or the court, is required to withhold approval until the submitting jurisdiction shows that the change will not be discriminatory.

Second, the act applies a general nationwide prohibition of discriminatory practices. Section 2 permits private or government lawsuits to be filed anywhere in the country to challenge such practices. And the Attorney General may ask the court to impose the same remedies—examiners, observers, a ban on test or devices, and preclearance of new laws—which apply automatically to areas covered by the section 4 trigger.

Once covered, a State or county can remove itself from coverage immediately by showing a Federal court that it had not in fact used its test or device to discriminate. Alternatively, a covered jurisdiction can remove itself from special coverage after a specified number of years by showing the court that for such a period it had not used tests to discriminate.

The initial effort to implement the Voting Rights Act focused on black registration. More than a million black citizens were added to the voting rolls from 1965 to 1972. It is not surprising, therefore, that to many Americans, the act is synonymous with achieving minority registration. But registration is only the threshold hurdle to full, effective participation in the political process. As the Supreme Court said in its interpretation of the act:

> The right to vote can be affected by dilution of voting power, as well as by absolute prohibition on casting a ballot. (*Allen* v. *Brd. of Elections*. 393 U.S. 544, 565)

Opponents of the dramatic rise in registration have sought to cancel the impact of the new black vote. A broad array of dilution schemes have been tried. Elective posts were made appointive; election boundaries were gerrymandered: majority runoffs were instituted to prevent victories under a prior plurality system; at-large elections were substituted for single-member election districts, or combined with other sophisticated rules to prevent an effective minority vote. The ingenuity of such schemes seems endless. Their common purpose has been to neutralize the gains made at the ballot box under the act.

Congress anticipated this response. The preclearance provisions of section 5 were designed to halt such efforts. Upholding the constitutionality of section 5, the Supreme Court noted:

> Congress knew that some of the States covered by section 4(b) of the act had resorted to the extraordinary stratagem of contriving new rules of various kinds for the sole purpose of perpetuating voting discrimination in the face of adverse Federal court decrees. Congress had reason to suppose that these States might try similar maneuvers in the future in order to evade the remedies for discrimination contained in the act itself. (*South Carolina* v. *Katzenbach*, 383 U.S. 301, 335)

Once the Supreme Court made clear that the act required review of any new laws in covered areas which could directly or indirectly impair the right to vote, section 5 became both the centerpiece of the Voting Rights Act and the main target of efforts to undermine it.

Each time that Congress has extended the special coverage of the Voting Rights Act, it has had to balance a record of impressive progress against disturbing evidence of continuing discrimination. Many officials in covered areas have shown a desire not only to observe the letter of the law, but to act according to the spirit of the law. Others have continued to circumvent the act by failing to submit changes or by implementing changes which had been disapproved. Many changes to which the Attorney General has objected show a determined effort to find new ways to disregard the law and deny minorities a fair role in the electoral process.

In the coming debate, we will hear once more the arguments against the act that we have heard in the past.

We will be told that it is a drastic departure from the principles of our Federal system. But the Supreme Court has agreed that Congress was faced with a drastic situation and that the law contains reasonable remedies that are fast, efficient and effective.

We will be told that the special provisions are no longer justified, because so much progress has been made. But the gains in registration and the impressive elections of minority officials have often been the direct result of the protections of the act. We have come a long way since 1965. But our task is not finished. Continued progress toward equal opportunity in the electoral process will be halted if we abandon the act's crucial safeguards now.

I am concerned about the need for further progress. But I am even more concerned about the risk of losing what has already been won. Those who fought the battles know how fragile the victories are. Without the preclearance of new laws, many of the advances of the past decade could be wiped out overnight with new schemes and devices.

The impressive rise in registration could be threatened by the prospect of reregistration requirements—ostensibly to purge old records. The Attorney General has objected to such efforts where the timing and method were clearly discriminatory.

In recent years there has been a steady number of objections under section 5. In fact, while more than 800 proposed changes have been objected to since 1965, well over half of those objections have been entered since the last time the act was extended in 1975. Even that substantial number may seem small in comparison to the total volume of laws submitted for approval. But it was always assumed that most submissions would be routinely approved. Congress aimed at catching those which do seriously harm minority rights.

I am convinced that the hearings on this legislation will again show a disturbing pattern of submissions which have been disapproved. All too often, the background of those changes—the absence of an innocent explanation, or the departure from past practice as minority voting strength approaches a new level—demonstrates a continuing intent to dilute the minority vote, and a continuing need for the act.

Many of the practices are complex and subtle. Sophisticated rules regarding at-large elections may seem part of the everyday rough-and-tumble of American politics—tactics used traditionally by the "ins" against the "outs." However, we must view such schemes in the context of repeated efforts to perpetuate past voting discrimination, and to undermine the results of the Voting Rights Act.

We will also be told that the act should be applied across the Nation, and that it is wrong to use a double standard against one section of the country. That is simply incorrect. The general provisions of the act do operate in every State. Even the special coverage under the trigger formula of section 4 is not regional.

It now applies to all or parts of some 24 different States throughout the country. The preclearance provisions of section 5 apply literally to the four corners of the Nation: From counties in Hawaii and Alaska to parts of New York and several New England States; from Arizona to the Deep South. Of course the major impact has been in the South. But submissions under section 5 have been required from many other parts of the country. In 1974, the New York State redistricting plan for New York City was disapproved by the Attorney General and had to be revised.

Moreover, our bill would also continue the general provisions of section 2, which permits suits to be filed against voting discrimination anywhere in the country. A separate section of the bill would clarify that provision.

Until the Supreme Court decision in Mobile against Bolden last spring, a violation of section 2 could be established by a variety of direct or indirect evidence concerning the context, the nature, and the result of the practice in question. This position had been unanimously supported by the Supreme Court in White against Register in 1973. In Mobile, the Court's plurality opinion suggested that direct proof of explicit intent was a necessary element to establish a violation of the act. That, of course, is usually an impossible task. Because of the absence of a clear standard for section 2 violations after the Bolden decision, it is important for Congress to clarify this provision. We should expressly restate the earlier understanding of Congress and the courts that section 2 violations can be established by direct or indirect evidence showing the discriminatory circumstances of the challenged practice.

Our bill will also extend the provisions added to the act in 1975 to protect the voting rights of other minority groups. At that time, the special coverage of section 4 and the preclearance procedures of section 5 were expanded to cover the voting rights of Hispanics, native Americans, Asians-Americans, and Alaskan Natives. As a result of these changes, coverage was extended to Texas, Alaska, and parts of California, Colorado, Florida, and several other States.

The 1975 amendments also mandated bilingual elections in almost 200 counties throughout the country with a significant number of citizens who speak a minority language, but have only limited literacy in English. For them, elections conducted wholly in English are a formidable barrier to participation in the political process.

While these provisions will not in fact expire until 1985, opposition to them as well has been announced. Congress should carry out its commitment to provide a substantial period for these protections to have their full impact. Our bill will extend them also through 1992, so that they will apply to reapportionment and elections following the 1990 census.

These provisions are now an integral part of the Voting Rights Act. In 1975, we acknowledged our obligation to erase discrimination against Hispanic Americans and other minorities.

The Civil Rights Commission and representatives of those minority groups presented clear and convincing evidence of voting discrimination before we acted in 1975. Since that time, Hispanic voting participation has increased dramatically—by more than 38 percent in California, 41 percent in Colorado, and 64 percent in Texas, according to a detailed study of the 1976 and 1980 elections by the Southwest OTER Education project.

In the same 5 years, the Attorney General has objected to 125 proposed changes in State and local laws in Texas which would have had a discriminatory impact.

Clearly, these provisions, too, must be preserved.

Mr. President, I am sure that Congress will examine this issue thoroughly. But, in the end, the protection of the Voting Rights Act must be preserved. If we fail to renew its core provisions, we will strike a cruel blow against all those who seek a political system free from discrimination.

We must keep faith with the millions of Americans who look to this act for the protection of their basic political rights. We must not risk a return to the conditions we struggled so long to change. We must not turn back the clock.

It was 16 years ago that Lyndon Johnson came before us and challenged us to join with him in the historic pledge that "we shall overcome?" This is not the time to retreat or to surrender.●

By Mr. BAKER (for himself and Mr. SASSER):

S. 896. A bill to designate the control tower at Memphis International Airport the Omlie Tower; to the Committee on Commerce, Science, and Transportation.

MEMPHIS AIRPORT LEGISLATION

Mr. BAKER. Mr. President, my distinguished colleague from Tennessee (Senator SASSER) and I are today jointly offering a measure to recognize the enormous contributions to our State and region and to the development of commercial aviation across our country by two famous aviation pioneers, Phoebe and Vernon Omlie.

We offer this legislation, in conjunction with our Tennessee colleagues in the House, and at the request of the Memphis-Shelby County Airport Authority.

The purpose of the measure is to name the new air traffic control tower at the Memphis International Airport the "Omlie Tower," in honor of these pioneers.

For my colleagues' edification in this regard, allow me to note that it was the Omlies, who were among the great aviation barnstormers of our history, who, in 1922, first established flight operations in Memphis—an action which led to the creation and development of a commercial airfield in Memphis a few years later.

All of us are aware of the contributions of the barnstormers in fostering an understanding and appreciation of commercial aviation.

But the Omlies did even more. In the catastrophic flood of the Mississippi River in 1927, they airlifted food, medicine, and other supplies to hundreds left homeless. In addition, they were of invaluable assistance in helping locate those persons stranded by the flood and also in identifying levees in danger of collapse.

Furthermore, Mrs. Omlie spent two decades in Government service, beginning with her appointment by President Franklin Roosevelt in 1933 as the special assistant for air intelligence of the National Advisory Committee for Aeronautics.

I would simply conclude by noting that, as we all marvel later this week at the technological and human magnificence manifested in our Space Shuttle program, we would do well to remember that such would not be possible were it not for the aviation pioneers of a previous generation, such as Phoebe and Vernon Omlie.

The Memphis community and the aviation community is in full support of this measure and I am hopeful my colleagues will be also.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 896

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the air traffic control tower at the Memphis International Airport is designated and shall hereafter be known as "Omlie Tower". Any reference in a law, map, regulation, document, or other paper of the United States to such control tower shall be held and considered to refer to "Omlie Tower".

● Mr. SASSER. Mr. President, it is with great pleasure that I join my senior colleague from Tennessee in introducing S. 896 which would rename the control tower at Memphis International Airport in honor of Vernon and Phoebe Omlie.

Throughout their long careers, the Omlies worked unfailingly to further the growth of the airline industry in the United States for both private and commercial purposes. They recognized that the growth of the aviation industry was inevitable, and their vision became reality. The industry surely owes its thanks to the Omlies for their pioneering efforts on its behalf, as they were instrumental in helping to gain public acceptance of aviation.

Starting as a barnstormer and stuntman in a field that was usually reserved for male participants, Mrs. Omlie went on to establish an impressive list of firsts that are to her credit: The first woman to be issued a transport license; the first to fly in the national air tour, sponsored by Henry Ford, and the first to be granted a mechanics license from the Department of Commerce, among other impressive achievements.

Mrs. Omlie settled in Tennessee in 1922 with her husband, Capt. Vernon Omlie. They worked toward the establishment of the largest flying school in the South at one of the first airfields, Mid-South Airport in Memphis. The Omlies exhibited great courage and compassion during the great Mississippi flood of 1927 by flying emergency missions to the

stricken areas and dropping medicine and food to the homeless.

Mrs. Omlie also had many years of outstanding service to the U.S. Government. Under President Franklin Roosevelt, Mrs. Omlie served on the National Advisory Committee for Aeronautics. After the untimely death of Mr. Omlie in a 1936 airplane crash, Mrs. Omlie worked for the research and development of high air safety standards. Mrs. Omlie continued her work for the Government, in the Civil Aeronautics Administration until her retirement in 1952.

The Omlies were far ahead of their time. Their vision and determination to bring aviation to the people of this country are to be commended. As citizens of this country, we all owe them, and others like them, a heartfelt thanks for helping to make our lives a little easier because of the convenience of air travel. It is my hope that the Senate will join me in honoring Mr. and Mrs. Omlie—great, and pioneering Americans.●

By Mr. THURMOND:

S. 897. A bill to permit members and former members of the uniformed services who are entitled to retired or retainer pay and who have not elected to participate in the survivor benefit plan under subchapter 11 of chapter 73 of title 10, United States Code, for a limited period, to participate in such plan, and for other purposes; to the Committee on Armed Services.

LEGISLATION TO AMEND THE MILITARY SURVIVOR BENEFIT PLAN LAW

Mr. THURMOND. Mr. President, on September 21, 1972, the 92d Congress enacted landmark legislation to establish the military survivor benefit plan (SBP) with the passage of Public Law 92–425. This law provided the military retiree an opportunity to participate in a cost-sharing program whereby his widow, in the event of his death, would be provided a nominal annuity which the retiree helps to finance while he is alive.

Unfortunately, this law had so many inequities that the majority of retirees declined to participate. It was estimated by the Defense Department in February 1979 that approximately 557,364 eligible retirees declined to participate. This number is even greater today.

Mr. President, since the enactment of the survivor benefit plan law on September 21, 1972, the Congress has removed a great many of the inequities. With a more equitable program, many thousands of the retirees would now like to participate by contributing a part of their retirement pay each month for their widow's annuity. Since 1972, Congress has enacted several laws (Public Law 93–155, Public Law 94–496, Public Law 95–397, and Public Law 96–402) which have dramatically improved the original survivor benefit plan.

Consequently, I am today introducing a bill which will provide an open enrollment period of 270 days, effective 90 days after enactment of the law. During this period, eligible retirees will be given an opportunity to participate for the first time since the last open period in 1974. The Defense Department and others will have a 90-day period to publicize the open period before the effective date. Since retirees will be allowed to enroll at this late date a penalty will be included in my proposal. A new participant will have to pay into the plan for 1 year before coverage begins for his beneficiaries. If he dies during that year, the proposal provides for a refund of the money he has contributed to the plan.

Mr. President, it is important to summarize the improvements made by the 93d, 94th, 95th, and 96th Congresses in the survivor benefit plan. Although these improvements were made during the last 8 years, there was no open enrollment period for retirees to take advantage of these changes. Many of the most serious earlier objections to the plan have been removed.

The following are some of the improvements which removed many of the inequities since the program was established in 1972:

a. Public Law 94–496 eliminated the requirement that a participant would have to continue to pay into the plan even though his wife died first. This "pay forever" provision, which was one of the most significant inequities, was one of the primary reasons retirees declined to participate. Removal of this lifetime obligation should have been sufficent to justify an open enrollment period at the time.

b. Public Law 94–496 reduced from two years to one year the length of time a retiree must be remarried before the second wife is eligible for the survivor benefit plan benefits.

c. Public Law 95–397 eliminated the social security offset/integration for the working widow. This was an improvement; however, further changes are still required in this area. Whether a 62-year old widow is working or not, there should be no offset based on her own earnings.

d. Public Law 95–397 reinstated the Survivor Benefit Plan to widows receiving dependency Indemnity Compensation (DIC), whose DIC was terminated because of remarriage after age 60. However, the DIC offset to SBP is still an undesirable provision to these widows who are eligible for both benefits. This problem has been partly alleviated by Public Law 96–402, which allows a totally disabled retiree to suspend enrollment in the SBP.

e. Public Law 96–402 partially removed one of the major objections to the SBP. It reduced the social security offset to SBP by capping it at 40 percent of the SBP amount. A widow is now assured of receiving at least 60 percent of the SBP benefits regardless of the amount of social security received.

f. Public Law 96–402 also resolved another adverse aspect of SBP. It provided for computing the cost to the retiree in the same manner as it is computed for the civil service retiree for same coverage. Previously, the cost to the militray retiree each month was more than the cost to the civil service retiree for the same coverage.

Mr. President, these significant changes to remove the inequities in the SBP mandate an open enrollment period. The importance of open enrollment legislation is such that it warrants special and separate legislation. In the past, open enrollment has been a small part of bills recommending multiple changes to the SBP. It was often overshadowed by more vital provisions. It is time for the open enrollment period to be allowed to stand or fall on its own merits. The Congress has not seriously addressed this issue in the past 8 years, although SBP bills in the 94th, 95th, and 96th Congresses contained open enrollment provisions.

The basic objective of SBP is to prevent any widow of a military retiree from ever being without a source of income. The Defense Department previously deferred to the wishes of the Congress on the open enrollment period. In my judgment, the 97th Congress must give this issue more serious consideration. We must help prevent many military widows from the same poverty stricken existence now being experienced by about 40,000 military widows, known as the " forgotten widows," whose husbands died prior to the SBP program. Over half a million current retirees should be given an opportunity to participate in SBP to prevent this type of existence for their widows.

Mr. President, the following provisions are contained in my proposal:

First, a specific opening and closing date for enrollment for eligible retirees, not to exceed 270 days beginning 90 days after enactment of this bill into law.

Second, a retiree who desires to enroll would be required to be enrolled with deductions from his pay each month for 12 months before his/her beneficiaries would be eligible for the annuity. This is a penalty provision for delayed enrollment. If the retiree dies during this 12-month waiting period, the survivor's estate would be refunded only that amount of money which had been deducted from the retiree's retired pay or otherwise paid to the Government for the SBP.

Third, initial SBP cost would be calculated based on the participant's retired pay at the time the individual elects participation.

Fourth, a provision to allow those who are currently enrolled in SBP at less than the maximum coverage (55 percent of retired pay) to increase their level of participation with a corresponding increase in retired pay reduction. For those individuals increasing their level of participation, a 12-month waiting period would be imposed before the beneficiary would be eligible for the increased portion of the annuity. If the retiree dies during the waiting period, the beneficiary, or the estate, would receive benefits at the original rate and be refunded the amount deducted from the retiree's pay during the unfulfilled waiting period.

Fifth, a provision allowing those currently enrolled to decrease their level of participation with a corresponding decrease in retired pay reductions, if a lower option exists under the current law. There would be no refund of past money deducted from retired pay.

Sixth, a provision allowing total disenrollment from SBP 180 days after the retiree has notified his finance center. There would be no refund of past money deducted from retired pay. Additionally, the beneficiary must provide certification of concurrence with the withdrawal to the appropriate finance office presumably by a notarized affidavit, as may be prescribed by the Secretary of the

military department. After receipt by the finance office, there would be a 180-day waiting period before withdrawal is effective during which time a participant could change his or her mind.

I strongly urge my distinguished colleagues to support this vital measure. It is only fair to a half million retirees who should be allowed to participate in SBP after so many changes have been made in the SBP law by the Congress in the past 8 years. This bill will help prevent many military widows from existing in poverty in their old age.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 897

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) any member or former member of the uniformed services who is entitled to retired or retainer pay on the date of the enactment of this Act and who did not elect to participate in the survivor benefit plan provided for under subchapter II of chapter 73 of title 10, United States Code (hereinafter in this Act referred to as the "Plan"), may elect, within 270 days after the effective date of this Act and subject to the provisions of this Act, to participate in the Plan if otherwise eligible to participate.

(2) In any case in which such member or former member elects under authority of paragraph (1) to participate in the plan, the election shall not become effective until the monthly retired or retainer pay of such member has been reduced in accordance with the provisions of section 1552 of title 10, United States Code, for a period of at least twelve months after the date of the election. If the member or former member dies after electing to participate in the Plan but before the monthly retired or retainer pay of such member or former member has been reduced for twelve or more months, an amount equal to the amount of the reductions made in the retired or retainer pay of such member shall be paid to the estate of such member or former member.

(3) Any member or former member of the uniformed services described in paragraph (1) whose retired or retainer pay is being reduced under section 1436(a) of title 10, United States Code, or who is depositing amounts under section 1438 of such title, may elect within 270 days after the effective date of this Act—

(A) to participate in the Plan and continue his participation under chapter 73 of such title as in effect on September 20, 1972, except that the total of the annuities elected may not exceed 100 percent of his retired or retainer pay; or

(B) to participate in the Plan and, notwithstanding section 1436(b) of title 10, United States Code, terminate his participation under chapter 73 of such title as in effect on September 20, 1972.

A member or former member of the uniformed services who makes an election under clause (B) of this paragraph is not entitled to a refund of amounts previously deducted from his retired or retainer pay under chapter 73 of title 10, United States Code, as in effect on the day before the date of the enactment of this Act, or any payments made thereunder on his behalf.

(b)(1) Any member or former member of the uniformed services who is participating in the Plan but who elected to provide an annuity in an amount less than the amount of the maximum annuity authorized under the Plan may, within 270 days after the effective date of this Act and subject to the provision of this Act, elect to provide an annuity at the maximum amount or at an amount greater than the amount in effect on the day before the date of the enactment of this Act but less than the maximum amount permitted under the Plan.

(2) In any case in which such member or former member elects under authority of paragraph (1) to increase the amout of the annuity of any beneficiary named by such member or former member, the beneficiary shall not become eligible for the increased portion of the annuity unless the monthly retired or retainer pay of such member has been reduced in accordance with section 1552 of title 10, United States Code, by an additional amount on account of the election of the increased annuity for a period of not less than twelve months after the date of such election. If the member or former member dies after making an election under the authority of paragraph (1) to increase the amount of an annuity but before the monthly retired or retainer pay of such member or former member has been reduced by such additional amount for twelve or more months, an amount equal to the amount of the increased portion of the reductions made in the retired or retainer pay of such member shall be paid to the estate of such member or former member.

(c) Any member or former member of the uniformed services who is participating in the Plan may, within 270 days after the effective date of this Act and subject to the provision of this Act, elect to terminate participation in the Plan if the beneficiary who is the beneficiary under the Plan on the date of the enactment of this Act agrees in writing to the proposed termination.

(2) An election made under paragraph (1) to terminate participation in the Plan shall not become effective for a period of 180 days after notice of the election is received by the Secretary concerned together with the written approval of the beneficiary required under paragraph (1). The election shall become void if before the expiration of such 180-day period the member notifies the Secretary concerned in writing that such member wishes to revoke the election or the beneficiary notifies the Secretary concerned in writing that the beneficiary wishes to revoke approval of such election.

(3) The monthly retired or retainer pay of a member of the uniformed services who makes an election under paragraph (1) to terminate participation in the Plan shall continue to be reduced under section 1552 of title 10, United States Code, until the election becomes final.

SEC. 2. An election under this Act to reduce an annuity or to terminate participation in the Plan does not authorize the refunding of any reductions which were made in the retired or retainer pay of any member or former member of the uniformed services before the day on which such election becomes final.

SEC. 3. Any requirement under this Act regarding the reduction of the retired or retainer pay of a member or former member of the uniformed services for any period shall be deemed to have been met if such member is not entitled to that pay for any period and deposits in the Treasury the amount that would otherwise have been deducted from his pay for that period, unless he is called or ordered to active duty for a period of more than 30 days, in which event such requirement shall be waived for the period he is on active duty.

SEC. 4. As used in this Act, the terms "uniformed services" and "Secretary concerned" have the same meanings prescribed for such terms in paragraphs (3) and (5), respectively, of section 101 of title 37, United States Code.

SEC. 5. This Act shall become effective 90 days after the date of enactment.

By Mr. PACKWOOD (for himself, Mr. STEVENS, Mr. GOLDWATER, and Mr. SCHMITT):

S. 898. A bill to amend the Communications Act of 1934 to provide for improved domestic telecommunications, and for other purposes; to the Committee on Commerce, Science, and Transportation.

TELECOMMUNICATIONS COMPETITION AND DEREGULATION ACT OF 1981

● Mr. PACKWOOD. Mr. President, for 3 years the Committee on Commerce, Science, and Transportation has been working on legislation containing comprehensive amendments to the Communications Act of 1934. It has been our view that Congress, not the courts or the Federal Communications Commission, should establish national communications policy. In March of 1979, the ranking member of the Communications Subcommittee, Senator GOLDWATER, and Senators SCHMITT, PRESSLER, and STEVENS introduced S. 622, the Telecommunications Competition and Deregulation Act of 1979. At the same time, our colleagues, Senators CANNON and HOLLINGS introduced S. 611, Communications Act Amendments of 1979.

After extensive hearings, lengthy written submissions, and long discussions, S. 2827, the Communications Act Amendments of 1980, was introduced by myself, Senators CANNON, HOLLINGS, GOLDWATER, and SCHMITT. Although I was not completely satisfied with all the provisions in that bill, I was willing to proceed to a full committee markup. The committee did not schedule a markup and, shortly thereafter, I directed the committee staff to review all legislation, both House and Senate, and make recommendations on how to proceed during the 97th Congress.

We decided to proceed with separate bills addressing specific areas of the Communications Act that required amendment rather than placing them all in one bill. Therefore, on January 27, 1981, Senator SCHMITT introduced S. 270, the Radio Deregulation Act of 1981. That same day, Senator GOLDWATER introduced S. 271, the International Record Carrier Competition Act of 1981. On March 3, 1981, Senator GOLDWATER introduced S. 601, the Television Licensing and Renewal Act of 1981 and on March 27, 1981, I introduced S. 821, the the Federal Communications Commission Reauthorization Act of 1981.

Today, with Senators GOLDWATER, SCHMITT, and STEVENS, I introduced the Telecommunications Competition and Deregulation Act of 1981. This bill represents our best judgment on the appropriate role for competition and deregulation in the provision of national telecommunications. Undoubtedly, this bill will be amended as it proceeds through the legislative process. This subject is so complicated and important to our Nation that it takes the work of many people to reach the right conclusions.

Recently, the Justice Department failed to settle the antitrust suit against A.T. & T. Additionally, in district court of New Jersey the Justice Department

asked that the FCC's deregulation of A.T. & T. not be done until that company is restructured. In light of these events, we believe it is important to proceed with comprehensive domestic telecommunications legislation. We will schedule hearings as soon as the Senate schedule permits, and proceed to markup as soon as possible thereafter.

Mr. President, I ask unanimous consent that the bill, and a summary of it be printed in their entirety in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 898

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Telecommunications Competition and Deregulation Act of 1981".

"Sec. 235. Transitional provision of certain facilities and services.
"Sec. 236. Determination of basic telecommunications services.
"Sec. 237. Ownership of cable television systems."

TITLE III—MISCELLANEOUS PROVISIONS

Sec. 301.—311.

TITLE IV—CONFORMING AMENDMENTS

Sec. 401. Title 18.
Sec. 402. Clayton Act.
Sec. 403. Transition of Commission authority.
Sec. 404. Applicability of antitrust laws.
Sec. 405. Effective date.

FINDINGS

SEC. 2. The Congress hereby finds and declares that—

(1) rapid advances in telecommunications technologies are making possible competition among providers of telecommunications services; and

(2) competition is a more efficient regulator than government of the provision of diverse telecommunications services and, as competition continues to develop, deregulation of telecommunications carriers and services should occur.

TITLE I—GENERAL

REDESIGNATION AND REFERENCE

SEC. 101. Sections 1 through 5 of the Communications Act of 1934 (and all cross references thereto), hereinafter referred to as the "1934 Act" (47 U.S.C. 151) are redesignated as sections 101 through 105, respectively.

PURPOSES—FEDERAL COMMUNICATIONS COMMISSION

SEC. 102. Section 101 of the 1934 Act, as redesignated by section 101, is amended to read as follows:

"PURPOSES OF THE ACT; FEDERAL COMMUNICATIONS COMMISSION

"SEC. 101. For the purpose of making available, so far as possible, to all the people of the United States, rapid, efficient, nationwide, and worldwide telecommunications services with adequate facilities at reasonable charges or prices; for the purpose of the national defense and security and emergency preparedness; for the purpose of promoting safety of life and property through the use of telecommunications; for the purpose of encouraging competition in the provision of telecommunications; for the purpose of encouraging continuing improvement in the use of technologies and for the purpose of promoting interstate and foreign commerce in telecommunications services, there is hereby created a commission to be known as the Federal Communications Commission, which shall be constituted as hereinafter provided, and which shall execute and enforce the provisions of this Act.".

APPLICATION OF ACT

SEC. 103. Section 102 of the 1934 Act, as redesignated by section 101, is amended to read as follows:

"APPLICATION OF ACT

"SEC. 102. (a) The provisions of this Act shall apply to and the Commission shall exercise jurisdiction with respect to: All interexchange and foreign telecommunications and all transmission of electromagnetic energy by radio, which originates or is received within the United States; the licensing and regulating of all radio stations as hereinafter provided; and all persons engaged within the United States in such telecommunications or such transmission of energy by radio.

"(b) Except as otherwise provided in title II, and subject to the provisions of section 301 of this Act, nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to charges or prices, practices, services, facilities, or regulations for or in connection with exchange telecommunications services.".

DEFINITIONS

SEC. 104. Section 103 of the 1934 Act, as redesignated by section 101, is amended to read as follows:

"DEFINITIONS

"SEC. 103. For the purposes of this Act, unless the context otherwise requires, the term—

"(1) 'Affiliate' means any carrier or entity which owns or controls another carrier or entity, is under direct or indirect common ownership or control with another carrier or entity, or is owned or controlled by another carrier or entity.

"(2) 'Amateur station' means a radio station operated by a duly authorized person interested in radio technique solely with a personal aim and without pecuniary interest.

"(3) 'Basic telecommunications service' means the provision to the general public on a universal basis of the minimum transmission capability necessary for two-way telecommunications services including basic telephone service.

"(4) 'Basic telephone service' means a basic telecommunications service which allows natural persons to communicate with each other by voice over intraexchange, interexchange or foreign telecommunications facilities.

"(5) 'Broadcast station', 'broadcasting station', or 'radio broadcast station' means a radio station equipped to engage in broadcasting.

"(6) 'Broadcasting' means telecommunications by radio intended to be received by the general public, directly or by the intermediary of relay stations.

"(7) 'Chain broadcasting' means simultaneous broadcasting of an identical program by two or more connected stations.

"(8) 'Commission' means the Federal Communications Commission.

"(9) 'Construction permit' or 'permit for construction' means that instrument of authorization required by this Act or the rules and regulations of the Commission made pursuant to this Act for the construction of a station or the installation of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name the instrument may be designated by the Commission.

"(10) 'Corporation' includes any corporation, joint-stock company, or association.

"(11) 'Exchange telecommunications' means telecommunications which both originate and terminate within the same exchange telecommunications area.

"(12) 'Exchange telecommunications area', 'exchange area', or 'exchange' means a geographic area configured by a State commission for telecommunications purposes.

"(13) 'Foreign telecommunications' or 'foreign transmission' means telecommunications or transmission from or to any place in the United States to or from a foreign country, or between a station in the United States and mobile station located outside the United States.

"(14) 'Great Lakes Agreement' means the agreement for the promotion of safety on the Great Lakes by means of radio in force and the regulations referred to therein.

"(15) 'Harbor' or 'port' means any place to which ships may resort for shelter or to load or unload passengers or goods, or to obtain fuel, water, or supplies. This term shall apply to such places whether proclaimed public or not and whether natural or artificial.

"(16) 'Information' means knowledge or intelligence represented by any form of writing, signs, signals, pictures, sounds, or other symbols.

"(17) 'Information service' means the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information which may be conveyed via telecommunications, except that such service does not include any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service.

"(18) 'Interexchange telecommunications' means telecommunications between a point

or points located in one exchange telecommunications area and a point or points located in one or more other exchange areas, including the origination and termination of such telecommunications within each such separate exchange area.

"(19) 'Land station' means a station, other than a mobile station, used for radio communication with mobile stations.

"(20) 'Licensee' means the holder of a radio station license granted or continued in force under authority of this Act.

"(21) 'Mobile service' means the radiocommunication service carried on between mobile stations and land stations, and by mobile stations communicating among themselves.

"(22) 'Mobile station' means a radio-communication station capable of being moved and which ordinarily does move.

"(23)(A) 'Operator' on a ship of the United States means, for the purpose of parts II and III of title III of this Act, a person holding a radio operator's license of the proper class as prescribed and issued by the Commission.

"(B) 'Operator' on a foreign ship means, for the purpose of part II of title III of this Act, a person holding a certificate as such of the proper class complying with the provisions of the radio regulations annexed to the International Telecommunication Convention in force, or complying with an agreement or treaty between the United States and the country in which the ship is registered.

"(24) 'Person' includes an individual, partnership, association, joint-stock company, trust, corporation, or any Government agency.

"(25)(A) 'Radio officer' on a ship of the United States means, for the purpose of part II of title III of this Act, a person holding at least a first or second class radiotelegraph operator's license as prescribed and issued by the Commission. When such person is employed to operate a radiotelegraph station aboard a ship of the United States, such person is also required to be licensed as a 'radio officer' in accordance with the Act of May 12, 1948.

"(B) 'Radio officer' on a foreign ship means, for the purpose of part II of title III of this Act, a person holding at least a first or second class radiotelegraph operator's certificate complying with the provisions of the radio regulations annexed to the International Telecommunication Convention in force.

"(26) 'Radio station' or 'station' means a station equipped to engage in radio communication or radio transmission of energy.

"(27)(A) 'Radiotelegraph auto alarm' on a ship of the United States subject to the provisions of part II of title III of this Act means an automatic alarm receiving apparatus which responds to the radiotelegraph alarm signal and has been approved by the Commission.

"(B) 'Radiotelegraph auto alarm' on a foreign ship means an automatic alarm receiving apparatus which responds to the radiotelegraph alarm signal and has been approved by the government of the country in which the ship is registered: *Provided*, That the United States and the country in which the ship is registered are parties to the same treaty, convention, or agreement prescribing the requirements for such apparatus. Nothing in this Act or in any other provision of law shall be construed to require the recognition of a radiotelegraph auto alarm as complying with part II of title III of this Act, on a foreign ship subject to such part, where the country in which the ship is registered and the United States are not parties to the same treaty, convention, or agreement prescribing the requirements for such apparatus.

"(28) 'Regulated telecommunications service' or 'regulated service' includes regulated basic telephone service or any regulated basic telecommunications service designated by the Commission pursuant to section 236, or the provision of telecommunications facilities for which no alternative is reasonably available as determined by the Commission.

"(29) 'Resale' means the reoffering, with or without adding value, by any person for a profit of any telecommunications service which has been obtained from a carrier.

"(30) 'Safety convention' means the International Convention for the Safety of Life at Sea in force and the regulations referred to therein.

"(31) (A) 'Ship' or 'vessel' includes every description of watercraft or other artificial contrivance, except aircraft, used or capable of being used as a means of transportation on water, whether or not it is actually afloat.

"(B) A ship shall be considered a passenger ship if it carries or is licensed or certified to carry more than 12 passengers.

"(C) A cargo ship means any ship not a passenger ship.

"(D) A passenger is any person carried on board a ship or vessel except (i) the officers and crew actually employed to man and operate the ship, (ii) persons employed to carry on the business of the ship, and (iii) persons on board a ship when they are carried, either because of the obligation laid upon the master to carry shipwrecked, distressed, or other persons in like or similar situations or by reason of any circumstance over which neither the master, the owner, nor the charterer (if any) has control.

"(E) 'Nuclear ship' means a ship provided with a nuclear powerplant.

"(32) 'State' means the several States and includes the District of Columbia and the territories and possessions of the United States.

"(33) 'State commission' means the commission, board, or official (by whatever name designated) which under the laws of any State has regulatory jurisdiction with respect to exchange telecommunications services.

"(34) 'Station license', 'radio station license', or 'license' means that instrument of authorization required by this Act or the rules and regulations of the Commission made pursuant to this Act, for the use or operation of apparatus for transmission of energy, or telecommunications, or signals by radio, by whatever name the instrument may be designated by the Commission.

"(35) 'Tariff' means a schedule governing any generally applicable charge, characteristic, regulation, or practice associated with a regulated telecommunications service.

"(36) 'Telecommunications' means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information, by means of electromagnetic transmission, with or without benefit of any closed transmission medium, including all instrumentalities, facilities, apparatus, and services (including the collection, storage, forwarding, switching, and delivery of such information) essential to such transmission.

"(37) 'Telecommunications carrier' or 'carrier' means any person, including any government or quasi-government entity, which owns or controls telecommunications facilities used by any person to provide telecommunications services. A person engaged in any nontelecommunications activities, in providing any information service, or information software, in producing or marketing customer-premises equipment, which person is fully separated from any affiliated regulated carrier, or a person engaged in broadcasting, or in providing any cable television service, shall not, insofar as such person is so engaged, be deemed a carrier except that nothing in this paragraph relating to cable television service shall be construed to affect any authority of any State or local government, as such authority exists on the date of enactment of the Telecommunications Competition and Deregulation Act of 1981. The shared use of telecommunication equipment, facilities, or services among Government agencies, or the provision of telecommunications equipment, facilities or services by any Government agency to any other Government agency shall not be sufficient to deem such Government agencies to be a carrier.

"(38) 'Telecommunications facilities' means transmission facilities under common ownership or control with such facilities.

"(39) 'Telecommunications service' means the offering for hire of telecommunications facilities, or of telecommunications by means of such facilities. Such term does not include sharing.

"(40) 'Transmission of energy by radio', 'radio transmission of energy' or 'transmission of electromagnetic energy by radio' means the transmission of electromagnetic energy through space without benefit of a closed transmission medium and includes both such transmission and all instrumentalities, facilities, and services incidental to such transmission.

"(41) 'Transmission facilities' means equipment (including wire, cable, microwave, satellite, and fibre-optics) which transmit information by electromagnetic means or which directly support such transmission, but does not include customer-premises equipment.

"(42) 'United States' means the several States and territories, the District of Columbia and the possessions of the United States.".

TITLE II—DOMESTIC TELECOMMUNICATION

FINDINGS/TRANSITION PLAN

SEC. 201. (a) STATEMENT OF FINDINGS.—The Congress hereby finds and declares that—

(1) the basic goals of the 1934 Act continue to be valid, and it is in the public interest to continue efforts to attain these goals;

(2) basic telecommunications services must and can be provided and maintained at reasonable charges or prices in an environment of increased competition through appropriate financial and procedural safeguards incorporated into statutory and regulatory policies and industry relationships;

(3) although complete deregulation of all interexchange telecommunications carriers and services may eventually be achieved pursuant to the amendments made by this Act, regulation of carriers which own or control telecommunications facilities in any geographic area or market for which there is no reasonably available alternative as determined by the Commission or which provide basic telecommunications service should continue until an alternative facility is reasonably available or the universal provision of basic telecommunications service at reasonable prices can be assured through marketplace competition;

(4) current and projected public, business, and governmental needs for additional and enhanced telecommunications and information services and equipment are highly diverse;

(5) advances in technology can make possible new and diverse telecommunications services and equipment previously unavailable to the public and can satisfy specialized consumer needs;

(6) modern efficient interexchange telecommunications services are essential to interstate and foreign commerce; technological and other advances have largely removed any valid or meaningful distinction between interstate interexchange and intrastate interexchange telecommunications; and differing policy and regulatory treatment of

interexchange telecommunications based on State boundaries would create artificial and irrational barriers burdening interstate and foreign commerce and reducing important public benefits;

(7) the characteristics of the United States telecommunications industry which evolved during the development of essentially universal basic telephone service cannot adequately provide for the creativity, technological and service innovation, responsiveness to consumer needs, operating efficiencies, and related factors required to exploit fully technological opportunities beneficial to the consumer;

(8) decisions of the courts and the Commission have indicated a clear need for congressional guidance;

(9) increased competition in the supply of telecommunications and information services and equipment and selective deregulation have already produced significant benefits for the telecommunications and information consumer;

(10) further competition and deregulation can result in increased benefits to the consumer and additional opportunity to exploit new technologies and should be explicitly encouraged through appropriate statutory policies and guidelines; and

(11) an orderly transition is necessary to achieve the purposes of this Act.

(b)(1) TRANSITION PLAN.—The Commission shall establish a plan to carry out the provisions of this title to foster marketplace competition and to implement deregulation on the dates specified therein (or where no date is specified at the earliest practicable date), for interexchange telecommunications services, equipment and carriers.

(2) TRANSITION PLAN REQUIREMENTS.—The transition plan established pursuant to subsection (a) shall provide for—

(A) the classification of carriers (pursuant to section 203 of the 1934 Act) to carry out the policy of this title;

(B) the establishment and implementation of an accounting system (pursuant to section 220 of the 1934 Act);

(C) a procedure (pursuant to sections 227 and 228 of the 1934 Act) to implement the provisions of this title relating to the formation of fully separated affiliates and to monitor compliance with such provisions; and

(D) practices and procedures for exchange access charges (pursuant to section 222 of the 1934 Act).

TECHNICAL AMENDMENT

SEC. 202. The heading for title II of the 1934 Act is amended to read as follows:

"TITLE II—DOMESTIC TELECOMMUNICATIONS".

POLICY

SEC. 203. Section 201 of the 1934 Act is amended to read as follows:

"STATEMENT OF POLICY

"SEC. 201. It is the policy of the United States to rely wherever and whenever possible on marketplace competition on the private sector to provide all telecommunications services, and thereby to reduce and eliminate unnecessary regulation including the regulation of telecommunications services to the extent there is a reasonably available alternative for such service. Marketplace competition will result in technological innovation, operating efficiencies, and availability of a wide variety of telecommunications technologies that are now or may become available in the future, and will promote the equitable and efficient use of such technologies to provide services to all geographical areas of the United States. Where competition does not now exist, it is the policy of the United States to encourage the development of such competition, and pursuant to an appropriate transition in accordance with this Act, to deregulate telecommunications services while establishing appropriate safeguards to prevent anticompetitive practices, and adverse impact upon the national defense and security and emergency preparedness. Whenever the Commission finds it necessary to regulate the provision of basic telephone or basic telecommunications services in order to ensure their universal and reasonable availability, or to regulate facilities for which there is no reasonably available alternative, such regulation shall be minimal and strictly in accordance with this Act. Prior to the deregulation of basic telephone or basic telecommunications service in any particular geographic area or market, the Commission must find that such basic telephone or basic telecommunications service will continue to be universally and reasonably available. Unless the Commission in any particular case shall find otherwise, it shall be presumed that there are no basic technological, operational, or economic factors which would necessarily preclude the provision of any telecommunications service under conditions of competition.".

AUTHORITY OF COMMISSION

SEC. 204. Section 202 of the 1934 Act is amended to read as follows:

"AUTHORITY OF THE COMMISSION

"SEC. 202. (a) The Commission shall exercise only so much of the powers conferred upon it under this title as is essential to the purposes of this Act, and shall revise, reduce, or eliminate any rule or regulation prescribed pursuant to this title with respect to any telecommunications service or carrier operating in any market or geographic area as competition develops.

"(b) The Commission shall have continuing authority over the provision of regulated telecommunications services and carriers.

"(c) In addition to any other authority which the Commission may exercise under this Act, the Commission shall have authority to regulate any dominant-regulated carrier and its affiliates (other than any fully separated affiliate) for the purpose of—

"(1) dealing with anticompetitive practices between any fully separated affiliate and the dominant-regulated carrier or its affiliates; and

"(2) protecting users of telecommunications services in connection with dealings between any dominant-regulated carrier, and its affiliates and any fully separated affiliate.

"(d) Except as provided in sections 227 and 228, nothing in this Act is intended to preclude management personnel of a dominant-regulated carrier from directing the operations of any dominant-regulated carrier, any affiliate and any fully separated affiliate, except that costs of such direction shall be properly allocated to any dominant-regulated carrier, its affiliates or fully separated affiliate.

"(e) The Commission shall assure that the implementation of the amendments made by the Telecommunications Competition and Deregulation Act of 1981 shall not result in unreasonable charges for basic telephone service. The Commission shall have the authority to adopt, whenever necessary, a mechanism such as a surcharge on access charges established pursuant to section 222 in order to accomplish the purposes of this subsection.

"(f) Except as provided in sections 229(b)(1) and 237, the Commission shall not prevent or limit the use of any technology or improvement in the provision of telecommunications services.

"(g) The Commission shall not have any authority to include in any license issued under title III any term or condition which is inconsistent with any limitation imposed upon the regulatory authority of the Commission in this title.".

CLASSIFICATION OF CARRIERS

SEC. 205. Section 203 of the 1934 Act is amended to read as follows:

"CLASSIFICATION OF CARRIERS

"SEC. 203. (a) Not later than 30 days after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981, the Commission shall identify, and cause to be published in the Federal Register, a list of those carriers which serve more than 50,000 main and equivalent stations and which on the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 were deriving revenues from the procedures established by the telephone industry to allocate the costs and divide the revenues associated with the provision of basic telephone service, commonly known as separations and settlements and division of revenues. Carriers identified under this subsection shall be classified as regulated carriers.

"(b) The regulated carrier which is referred to in section 229 shall be further classified as a dominant-regulated carrier.

"(c)(1) The Commission, upon its own motion or upon petition, shall classify or reclassify as a regulated carrier any carrier subject to this Act which owns or controls telecommunications facilities for which there is no reasonably available alterative or which provides any other regulated service. In determining whether there is no reasonably available alternative, the Commission shall consider, among other things, the number of unaffiliated providers of facilities, the extent of facilities available in any market, and the ability of the providers to make facilities readily available in a reasonable time period.

"(2) The Commission shall, upon its own motion or upon petition, classify or reclassify as a dominant-regulated carrier any regulated carrier which is dominant in the provision of telecommunications services in a substantial percentage of the total number of markets or submarkets for telecommunications services.

"(3) The Commission may, upon its own motion or upon petition, reclassify any dominant-regulated carrier as a regulated carrier, and any regulated carrier as an unregulated carrier.

"(d) Any interexchange carrier not classified as a regulated carrier shall be deemed an unregulated carrier.".

RESALE

SEC. 206. Section 204 of the 1934 Act is amended to read as follows:

"RESALE OF TELECOMMUNICATIONS SERVICES

"SEC. 204. (a) (1) Except as otherwise provided in this Act, neither the Commission, nor any State commission shall regulate the resale of any telecommunications service.

"(2) No regulated carrier may establish or enforce any restrictions on the resale or other use of any service provided by such carrier.

"(3) If a quasi-governmental entity which has a statutory monopoly for the delivery of letters offers any telecommunications service by resale or otherwise, such entity shall meet the requirements of section 227 with regard to its provision of such telecommunications services. Nothing herein shall be construed to authorize such entity or affiliate to provide the electronic delivery of messages to nonaffiliates.

"(b) No dominant-regulated carrier may engage in any resale activity other than through a fully separated affiliate.".

CARRIER REQUIREMENTS

SEC. 207. Section 205 of the 1934 Act is amended to read as follows:

"PRESCRIPTION OF CARRIER REQUIREMENTS

"SEC. 205. (a) Consistent with the purposes of this Act and the policy of this title, the Commission may—

"(1) prescribe different requirements for different regulated carriers, or

"(2) exempt carriers in whole or in part, from the requirements of this title,

if it finds that such different requirement or exemption is consistent with the public interest.

"(b) The Commission shall not have the authority, with respect to unregulated carriers (including any fully separated affiliate of a dominant-regulated carrier), to impose any requirements which are not specifically provided in this title.".

TECHNICAL AND CONFORMING

SEC. 208. Section 206 of the 1934 Act is amended by—

(1) amending the heading to read as follows:

"LIABILITY OF CARRIERS FOR DAMAGES; RECOVERY OF DAMAGES";

(2) inserting "(a)" immediately before the first sentence thereof; and

(3) striking "common" wherever it appears therein and substituting "regulated".

TECHNICAL AND INTERCONNECTION

SEC. 209. (a) Section 207 of the 1934 Act is amended by—

(1) redesignating such section and all cross references thereto as subsection (b) of section 206;

(2) striking the heading thereof; and

(3) striking "common" wherever it appears therein and by substituting "regulated".

(b) Title II of the 1934 Act, as amended, is further amended by inserting immediately after section 206 thereof the following new section:

"INTERCONNECTION

"SEC. 207. Every telecommunications carrier, any entity or affiliate described in section 204(a)(3)—

"(1) shall, if a reasonable request is made, establish interconnection of its regulated service—

"(A) with any telecommunications carrier;

"(B) with any telecommunications facility or private telecommunications system; and

"(C) with any customer premise equipment which is owned or leased by a customer of such dominant-regulated carrier, regulated carrier, or exchange carrier and which meets such standards as the Commission may establish under section 234(c)(1); and

"(2) may not discriminate in an unreasonable or anticompetitive manner with respect to the charges, terms, and conditions for interconnection.".

PROVISION OF REGULATED SERVICES

SEC. 210. (a) Section 208 and all cross references thereto of the 1934 Act are redesignated as section 225(a).

(b) Section 225, as so redesignated by subsection (a), is amended by—

(1) amending the heading to read as follows:

"COMPLAINTS TO THE COMMISSION; INVESTIGATIONS; ORDERS FOR PAYMENT OF MONEY";

and

(2) striking "common" wherever it appears therein and substituting "regulated".

(c) Title II of the 1934 Act, as amended, is further amended by inserting immediately after section 207 thereof the following new section:

"PROVISION OF REGULATED SERVICES BY TELECOMMUNICATIONS CARRIERS

"SEC. 208. Every telecommunications carrier shall make available, upon reasonable request therefor, any regulated telecommunications service and shall establish just, reasonable, and nondiscriminatory tariffs for and in connection with such service, and any such tariff that is unjust or unreasonable, or that results in any unjust or unreasonable discrimination, preference, or advantage with respect to any person (including any fully separated affiliate), class of persons, or locality for or in connection with like telecommunications services is hereby declared to be unlawful.".

INFORMATION ON CHARGES, ETC.

SEC. 211. (a) Section 209 of the 1934 Act and all cross references thereto of the 1934 Act are redesignated as subsection (b) of section 225.

(b) Section 225(b) as so redesignated is amended by striking the heading thereof, and by inserting "regulated" immediately before "carrier".

(c) Title II of the 1934 Act, as amended, is further amended by adding immediately after section 208 thereof the following new section:

"INFORMATION ON TELECOMMUNICATIONS OPERATIONS AND CHARGES AND PRACTICES

"SEC. 209. (a)(1) It shall be the duty of every telecommunications carrier which provides regulated telecommunications services to provide to the Commission and to make available for public inspection such information relating to such services, and in such form and at such times as the Commission may prescribe, and as is necessary to the Commission in the exercise and performance of its powers and duties under this Act. The Commission may impose different filing, notification, and information requirements upon different carriers, and shall have due regard for and may impose a lesser degree of reporting requirements on telecommunications carriers which serve less than 50,000 main and equivalent stations.

"(2) Every carrier shall assure the continuing accuracy and completeness of information provided to the Commission under paragraph (1). Whenever such information is no longer substantially accurate and complete in all significant respects, the carrier shall as promptly as possible and in any event within such reasonable time as the Commission shall prescribe, amend such information or furnish such additional or corrected information as may be appropriate.

"(b) Within such reasonable time as the Commission shall prescribe, every regulated carrier shall file with the Commission, publish, and make available for public inspection tariffs for regulated telecommunications services between the different points on its own system, and between points on its own system and points on the systems of interconnecting carriers when a through route has been established, whether such charges are joint or separate, and showing the practices and regulations affecting such charges. Such tariffs shall contain such other information, and be kept open for public inspection in such places, as the Commission may by regulation require. Each such schedule shall give notice of its effective date, and each such telecommunications carrier shall furnish such tariffs to each of its interconnecting carriers.

"(c)(1) Unless otherwise provided by or under authority of this Act, no regulated carrier shall engage or participate in regulated telecommunications services unless tariffs have been filed and published in accordance with the provisions of this Act and with the regulations made thereunder.

"(2) No regulated carrier shall—

"(A) charge, demand, collect, or receive a greater, lesser, or different compensation for any telecommunications service or for any service in connection therewith, between the points in any such tariff than the charges specified in the tariff then in effect;

"(B) refund or remit by any means or device any portion of the charges so specified; or

"(C) extend to any person any privileges or facilities, or employ or enforce any regulations or practices affecting such charges, except as specified in such tariff.".

TARIFFS

SEC. 212. (a) Section 210 of the 1934 Act and all cross references thereto are redesignated as section 230.

(b) Section 230 as is redesignated by subsection (a) is amended by striking "common" wherever it appears therein.

(c) Title II of the 1934 Act, as amended, is further amended by inserting immediately after section 209 thereof the following new section:

"TARIFFS

"SEC. 210. (a)(1) Except as provided in subsection (b), no new or revised tariff proposed by any regulated carrier for regulated telecommunications services (including interconnection arrangements under section 207) shall take effect until it has been either accepted, accepted with conditions, or finally approved by the Commission.

"(2)(A) Not later than 90 days after the date of filing with the Commission of a proposed tariff, the Commission shall make an initial determination as more particularly set forth in subparagraph (B), or shall set forth specific requirements for additional information or justification. Whenever the Commission has set forth such requirements, it may extend such period for not more than an additional 90 days.

"(B) The Commission may—

"(i) accept a tariff as filed;

"(ii) condition the acceptance of a tariff upon compliance with such requirements as it determines necessary to carry out the policy of this title; or

"(iii) reject a tariff, if it determines that such tariff is prima facie unlawful.

"(3) During such period or extended period, the Commission may offer assistance to facilitate public negotiation between the carrier proposing such tariff and any other interested party or parties opposing such tariff in order to arrive at a mutually agreeable tariff. Any mutually agreeable tariff may be recommended to the Commission, which recommendation shall not be binding upon the Commission, but which the Commission shall duly consider in deciding whether to accept, accept with conditions, or reject the tariff initially proposed.

"(4) The Commission shall give public notice whenever making an initial determination under paragraph (2). Upon timely request therefor by the carrier initially proposing such tariff, or by any other interested party or parties for good cause shown (unless, where the Commission has rejected the proposed tariff, such carrier shall object), the Commission shall hold a hearing concerning the lawfulness of such initially proposed tariff. In any such hearing the burden of proof to show that the initially proposed tariff is just and reasonable shall be upon the carrier initially proposing such tariff, and the Commission shall decide the matter as expeditiously as possible.

(5) Pending any hearing under paragraph (4) of this subsection, any tariff accepted or accepted with conditions by the Commission shall have effect. Any tariff rejected by the Commission shall have no effect, and any lawful tariff previously in effect for the same or like telecommunications service shall remain in effect.

"(6) Upon completion of any hearing under paragraph (4) of this subsection, the Commission may accept, accept with conditions, or reject such tariff as initially proposed. Any tariff rejected by the Commission shall have no effect, and any lawful tariff previously in effect for the same or like telecommunications service shall remain in effect.

"(b)(1) Any regulated carrier may, subject to any reasonable accounting order or rule as prescribed by the Commission, elect to file any new or revised tariff pursuant to this subsection. Subject to the provisions of paragraph (2) of this subsection, such

tariff shall take effect on the effective date specified in such filing, unless the Commission for good cause shall specify by rule or in any particular case a longer period, not to exceed 30 days.

"(2) The Commission shall give public notice of the filing of such new or revised tariff within 15 days of such filing. Any party in interest may file with the Commission, within such reasonable time as the Commission shall specify, but in no event later than 30 days from the date of such notice, a petition for hearing concerning the lawfulness of such tariff, which petition shall set forth specific allegations of fact sufficient to show that the petitioner is a party in interest and that the tariff constitutes a prima facie violation of the provision of this title. The petitioner shall serve a copy of such petition upon such carrier, which carrier shall have the opportunity to reply within a reasonable period of time as specified by the Commission. Not later than 30 days from the time for filing such reply, the Commission, on the basis of the tariff and pleadings filed or on the basis of other information within the knowledge of the Commission, shall either grant or deny such petition. Whenever the Commission shall grant such a petition it shall hold a hearing concerning those issues raised in the petition which the Commission determines are substantial and material questions relating to such violation. Upon completion of such hearing, the Commission shall either accept, accept with conditions, or reject such tariff, and shall make findings of fact and conclusions of law with respect to the allegations set forth in the petition.

"(c) Neither the Commission nor any State commission shall consider revenues from unregulated activities.

"(d) The Commission may exempt any regulated carrier from the provisions of this section and section 209.".

COPIES OF CONTRACTS

SEC. 213. Section 211 of the 1934 Act is amended to read as follows:

"COPIES OF CONTRACTS TO BE FILED

"SEC. 211. (a) Every regulated carrier subject to this Act shall file with the Commission copies of all contracts, agreements, or arrangements with other carriers, or with carriers not subject to the provisions of this Act, in relation to any regulated telecommunications service.

"(b) The Commission shall have authority to require the filing of any other contracts, agreements, or arrangements of any regulated carrier and shall have authority to exempt any such carrier from submitting copies of such minor contracts, agreements, or arrangements as the Commission may determine.".

TECHNICAL

SEC. 214. Section 212 of the 1934 Act is amended by inserting "regulated" immediately before "carrier" and "carriers" wherever it appears therein.

VALUATION OF CARRIER PROPERTY

SEC. 215. (a) Section 213(a) of the 1934 Act is amended to read as follow:

"VALUATION OF CARRIER PROPERTY

"SEC. 213. (a) After opportunity for hearing, the Commission, where necessary for the proper administration of this Act, and in particular for the purposes of section 222 of this title, may make a valuation, as of such date as the Commission may designate, of all or of any part of the property owned or used by any regulated carrier, and by any regulated exchange carrier which originates, terminates, or transfers interexchange or foreign telecommunications.".

(b) The first sentence of subsection (c) of section 213 of the 1934 Act is amended to read as follows: "The Commission may at any time require any regulated carrier and any exchange carrier referred to in subsection (a) to file with the Commission a statement showing the original cost at the time of dedication to telecommunications use of all or of any part of the property owned or used by such carrier.".

(c) Section 213(e) of the 1934 Act is amended by striking "common" and substituting "regulated".

(d) Section 213(g) of the 1934 Act is repealed.

(e) Section 213(h) and all references thereto (if any), timely request therefor by the carrier initially proposing such tariff, or by any other interested party or parties for good cause shown (unless, where the Commission has rejected the proposed tariff, such carrier shall object), the Commission shall hold a hearing concerning the lawfulness of such initially proposed tariff. In any such hearing the burden of proof to show that the initially proposed tariff is just and reasonable shall be upon the carrier initially proposing such tariff, and the Commission shall decide the matter as expeditiously as possible.

"(5) Pending any hearing under paragraph (4) of this subsection, any tariff accepted or accepted with conditions by the Commission shall have effect. Any tariff rejected by the Commission shall have no effect, and any lawful tariff previously in effect for the same or like telecommunications service shall remain in effect.

"(6) Upon completion of any hearing under paragraph (4) of this subsection, the Commission may accept, accept with conditions, or reject such tariff as initially proposed. Any tariff rejected by the Commission shall have no effect, and any lawful tariff previously in effect for the same or like telecommunications service shall remain in effect.

"(b)(1) Any regulated carrier may, subject to any reasonable accounting order or rule as prescribed by the Commission, elect to file any new or revised tariff pursuant to this subsection. Subject to the provisions of paragraph (2) of this subsection, such tariff shall take effect on the effective date specified in such filing, unless the Commission for good cause shall specify, by rule or in any particular case a longer period, not to exceed 30 days.

"(2) The Commission shall give public notice of the filing of such new or revised tariff within 15 days of such filing. Any party in interest may file with the Commission, within such reasonable time as the Commission shall specify, are redesignated as section 213(c).

CONSTRUCTION, ACQUISITION OR OPERATION

SEC. 216. Section 214 of the 1934 Act is amended to read as follows:

"NOTICE AND APPROVAL OF FACILITIES CONSTRUCTION, ACQUISITION, OR OPERATION

"SEC. 214. (a) Upon notification to the Commission, any regulated carrier which is not also a dominant regulated carrier may—

"(1) undertake the construction of any new interexchange transmission facilities or of any extension thereof;

"(2) acquire or operate any such facility or extension thereof; or

"(3) engage in telecommunications over or by means of such new facility or extension.

"(b)(1) The Commission may by rule or order require a dominant-regulated carrier to obtain from the Commission a certificate that the present or future public convenience and necessity require or will require the construction, extension, acquisition, operation, or use of any new or extended interexchange facility, or will be served by the discontinuation, reduction, or impairment of regulated telecommunications services.

"(2) Nothing in this section shall be construed to require a certificate or other authorization from the Commission for any installation, replacement, or other changes in plant, operation, or equipment, other than new construction, which will not impair the adequacy or quality of service provided.

"(3) The Commission may, upon application, authorize in whole or in part a long-term facilities construction plan for a dominant-regulated carrier. Upon authorization of such plan such carrier shall not be required to obtain separate certification under paragraph (1) of this subsection for each element of such plan. This Commission may condition any authorization upon appropriate safeguards and submission to the Commission of periodic reports in such form and containing such information as the Commission may require in order to monitor the implementation and operation of such plan. The Commission shall take all appropriate steps to ensure that such plan is being carried out under such safeguards as the Commission shall have established.

"(c) The Commission shall have power to issue a certificate for the facilities or plan for which application was made; to refuse to issue a certificate; to issue a certificate for a portion or portions of a facility or plan, or extension thereof, or discontinuance, reduction, or impairment of service, described in the application. The Commission may attach to the issuance of the certificate such terms and conditions as in its judgment the public convenience and necessity may require. After issuance of such certificate a dominant-regulated carrier may, without securing approval other than such certificate, comply with the terms and conditions contained in or attached to the issuance of such certificate and proceed with the construction, extension, acquisition, operation, or discontinuance, reduction, or impairment of service authorized thereby. Any construction, extension, acquisition, operation, discontinuance, reduction, or impairment of service contrary to the provisions of this section may be enjoined by any court of competent jurisdiction upon suit of the United States, the Commission, any affected State commission, or State, or any party in interest.

"(d) Upon petition or upon its own initiative, the Commission may, after full opportunity for a hearing, authorize or require by order any dominant-regulated carrier which is party to such proceeding to provide itself with adequate facilities, and to extend its facilities, for the expeditious and efficient performance of its service as a carrier of regulated services. No such authorization or order shall be made unless the Commission finds, as to such provision of facilities, or as to such extension, that such provision or extension is reasonably required in the interest of public convenience and necessity or, as to such extension of facilities, that the expense involved therein will not impair the ability of such carrier to perform its duty to the public.

"(e) It shall be lawful for telecommunications carriers jointly to meet, plan and agree, under the auspices of the Commission, on matters affecting the design, maintenance, management, development, and coordination of telecommunications networks necessary to the joint provision of end-to-end through services. Nothing in this subsection shall be construed to require that routine nondiscriminatory contacts among carriers necessary to each or execute the joint decisions made under the auspices of the Commission also be conducted under such auspices, and nothing in this subsection shall be construed as exempting any carrier from the antitrust laws for any action taken by such carrier which is a violation of such laws when taken by a single carrier.

"(f) The Commission may, upon appropriate request, authorize temporary or emergency augmentation of facilities or services or discontinuance, reduction, or impairment

of facilities or services without regard to the provisions of this section.

"(g)(1)(A) Any dominant-regulated carrier and its affiliates providing regulated telecommunications services shall maintain and file with the Commission a description of the operational protocols and technical interface requirements for connection with or use of any regulated telecommunications services, and report regularly to the Commission—

"(i) any material change relating to such protocols, or interface requirements which has been adopted or implemented, or which is required by the specific design or development of any service, facility, or equipment including any information or technical requirements relating to the capacity of services, facilities, or equipment to function effectively and efficiently if connected to any telecommunication service or facility furnished by a dominant carrier;

"(ii) summaries of construction programs or activities intended to maintain, extend, or expand the regulated services or facilities of any dominant-regulated carrier (or any other regulated carrier if the Commission shall so order), if such information affects the interconnection of service offerings of competing carriers or persons seeking interconnection with the services or facilities of such dominant-regulated carrier or such other regulated carrier; and

"(iii) such additional information relating to any regulated services, the disclosure of which the Commission determines to be necessary on its own initiative or in response to a petition submitted by any interested person.

"(B) Information required to be filed under subparagraph (A) may not be disclosed to a fully separated affiliate until filed.

"(2) In any case in which a submission to the Commission is required under paragraph (1), any person may obtain the information which is the subject of such submission upon reasonable request and payment of reasonable copying and processing fees, unless the Commission determines that the furnishing of such information would be detrimental to the national defense and security or to the emergency preparedness of the Nation.

"(3) The Commission shall prescribe procedures to implement this subsection not later than 180 days after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981.".

TECHNICAL

SEC. 217. The first sentence of section 215 (a) of the 1934 Act is amended by striking "common carrier" and substituting "regulated carrier".

TECHNICAL

SEC. 218. Section 217 of the 1934 Act is amended by striking "common".

TECHNICAL

SEC. 219. The first sentence of section 218 of the 1934 Act is amended by inserting "regulated" before "carriers".

RECORDS AND ACCOUNTS

SEC. 220. (a) Section 220(a) of the 1934 Act is amended to read as follows:

"(a)(1) The Commission may, in its discretion, prescribe the forms of any and all accounts, records, and memoranda to be kept by regulated carriers subject to this Act, including the accounts, records, and memoranda of the movement of traffic, as well as of the receipts and expenditures of moneys.

"(2) Not later than the first anniversary of the date of enactment of the Telecommunications Competition and Deregulation Act of 1981, the Commission shall prescribe, and within the period prescribed by the Commission all regulated carriers shall comply with, guidelines of general applicability relating to accounts, records, and memoranda which shall be designed at a minimum to accomplish a complete allocation of all revenues and costs, including joint and common costs, between regulated goods and services and unregulated goods and services. The Commission may require any regulated carrier to establish and maintain such other separate accounts and supporting records and memoranda as the Commission determines necessary to carry out the purposes of this Act.".

(b) Section 220(b) is amended to read as follows:

"(b)(1) The Commission shall establish and prescribe—

"(A) the classes of property used by any regulated carrier for the provision of telecommunications services which are subject to the regulatory authority of the Commission under this title or to the regulatory authority of any State Commission; and

"(B) the methods by which investments in such classes of property may be recovered.

"(2) The methods specified in paragraph (1)(B) may include capital recovery schedules or percentage depreciation schedules. Such methods shall—

"(A) provide for the full recovery of any unrecovered amount of invested capital not later than the end of the remaining life of the property involved;

"(B) permit not more than the full amount of invested capital to be recovered;

"(C) for property used by a regulated carrier, include, as an allowable operating expense for ratemaking purposes, depreciation computed under any accelerated methods selected by such regulated carrier, except that (i) the initial selection shall apply only to property placed in service on or after the first day of the first calendar year which begins after the date of the enactment of the Telecommunications Competition and Deregulation Act of 1981; and (ii) any subsequent changes in such selection shall apply only to property placed in service on or after the date of such selection; and

"(D) for property already in service on the first day of the first calendar year which begins after the date of the enactment of the Telecommunications Competition and Deregulation Act of 1981, include as an allowable operating expense for ratemaking purposes such amounts as may be necessary to recover all embedded invested capital through the use of the remaining life method of capital recovery.

"(3) Any determination of the remaining life of property under paragraph (2) shall take into consideration competition, changes in technology, and remaining economic life.".

(c) Subsection (d) of section 220 of the 1934 Act is repealed.

(d) Subsections (e) through (j) of section 220 of the 1934 Act and all references thereto (if any), are redesignated as subsections (d) through (i), respectively.

(e) Subsection (g) of section 220 of the 1934 Act as is redesignated by subsection (d) is amended by adding at the end thereof the following new sentence: "The Commission shall have due regard to the different sizes of carriers in prescribing forms or guidelines under this section.".

TECHNICAL

SEC. 221. Section 221 of the 1934 Act is amended by—

(1) striking "telephone company" each place it appears, and substituting "carrier";

(2) striking "telephone companies" each place it appears, and substituting "carriers";

(3) striking "company" each place it appears and substituting "carrier";

(4) striking "companies" each place it appears and substituting "carriers"; and

(5) striking "TELEPHONE COMPANIES" in the heading and substituting "CARRIERS".

ACCESS CHARGES

SEC. 222. Title II of the 1934 Act is amended by inserting the following after section 221:

"EXCHANGE ACCESS CHARGES

"SEC. 222. (a) It is the purpose of this section to establish a system of exchange access fees for the use of the services and facilities of exchange carriers by telecommunications carriers and other customers, in order to—

"(1) achieve equality of treatment among all telecommunications carriers and other customers using the services of each exchange carrier through direct or indirect interconnection for the distribution of interexchange telecommunications and to prevent subsidies from exchange services to interchange services;

"(2) assure that payments and assignments of costs relating to access to exchange telecommunications services and facilities by telecommunications carriers and other customers are carried out in a manner which is open to public examination and which ensures accountability to the public;

"(3) achieve flexibility in accommodating changes in market conditions and technology;

"(4) establish incentives for efficient investment decisions and technological choices; and

"(5) ensure that exchange carriers are compensated equitably for the costs of distributing interexchange telecommunications through the use of exchange services and facilities in order to ensure the continued universal availability of basic telephone service provided by exchange carriers at reasonable charges.

"(b)(1) The Commission shall at the earliest practicable date establish a Joint Board pursuant to section 410(c) to assist, after consultation with the telecommunications carriers and other interested parties, in ascertaining and apportioning the costs of providing access to exchange facilities for the origination and termination of interexchange services.

"(2) The Joint Board shall appoint and fix the pay of such personnel as may be necessary to assist the Joint Board in carrying out its functions under this section.

"(c) Notwithstanding any other provision of this Act, decisions of the Joint Board pursuant to subsection (b) of this section shall be binding upon the commission unless the Commission determines it to be arbitrary or capricious or otherwise not consistent with the policy or purposes of this Act.

"(d) The Commission, in consultation with the Joint Board, shall establish practices to ascertain and apportion costs of providing access to exchange facilities for the origination and termination of interexchange services which shall be uniform for comparable types of interconnections. The Commission shall establish the form for records, accounts and memoranda to be kept by carriers providing such exchange access, including special forms and practices for small exchange carriers to facilitate the filing and processing of such carriers' tariffs, including the ability to file joint tariffs.

"(e) Each exchange carrier providing access shall file with the Commission a tariff governing the charges, practices and conditions or shall, subject to the provisions of subsection (f), establish charges, practices and conditions for the use of its exchange telecommunications facilities by any telecommunications carrier or carrier providing foreign telecommunications services, any affiliate or other part of such exchange carrier and any private telecommunications system engaged in interexchange telecommunications which are prescribed by the Commission or computed in accordance with procedures prescribed by the Commission.

"(f)(1) In the case of any exchange carrier which, together with affiliates, serves not more than 50,000 main and equivalent stations where a State certifies to the Commission that it has established a program in accordance with the uniform practices set forth by the Commission consistent with

this section to regulate exchange access arrangements, charges, regulations, or practices, the Commission shall delegate authority with respect to all exchange access arrangements, charges, regulations, or practices to the State commission of the State within which such exchange carrier charges. Upon petition of any affected person showing that regulation of exchange access by a State commission is not in compliance with uniform practices established by the Commission, the Commission may prescribe just and reasonable exchange access arrangements, charges, regulations, or practices.

"(2) In the calculation of access charges for the carriers specified in paragraph (1) and for other exchanges identified by the Commission, the Commission may permit the use of averaged cost schedule rather than data from individual cost studies where the Commission determines such method to be appropriate and consistent with this section.

"(3) In any case in which charges for the use of the facilities of exchange carriers are imposed on a usage basis, the provisions of this title shall not be construed to restrict the authority of State commissions to include in such charges any use of the exchange telecommunications facilities involved which, at the option of the subscriber involved, originates or terminates interexchange telecommunications service. Such charges shall not discriminate between the use of such facilities for interexchange telecommunications service and exchange telecommunications service.

"(g) The Commission shall promulgate the standards, procedures, and criteria for access charges established under this section not later than 2 years after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981.".

ADDITIONS TO 1934 ACT

SEC. 223. Title II of the 1934 Act, as amended, is further amended by adding at the end thereof the following new sections:

"EXCHANGE TELECOMMUNICATIONS AREA

"SEC. 226. (a) Subject to Commission review, it shall be the responsibility of each State commission to configure exchange telecommunications areas within the borders of each such State. Any such configuration existing as of January 1, 1981, shall be deemed to conform with the criteria set forth in subsection (b). Any reconfiguration by any State commission on or after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 shall be in accordance with the criteria set forth in subsection (b).

"(b) Any reconfiguration of an exchange area by a State commission shall be in accordance with the following criteria of this subsection:

"(1) any such area may encompass one or more contiguous local exchange networks serving common social, economic, and other purposes, even where such configuration transcends municipal boundaries or partially overlaps another exchange area;

"(2) every point within a State shall be included within an exchange area;

"(3) no such area which includes part or all of one standard metropolitan statistical area shall include a substantial part of any other standard metropolitan statistical area, unless the Commission shall otherwise allow; and

"(4) except with approval of the Commission no exchange area located in one State shall include any point located within another State.

"FULLY SEPARATED AFFILIATE

"SEC. 227. (a) A fully separated affiliate of a dominant-regulated carrier shall—

"(1) have no more than one member of its governing board who is a member of the governing board or officer or employee of such dominant-regulated carrier;

"(2) have no officers or employees in common with any such dominant-regulated carrier; and

"(3) maintain books, records, and accounts separate from any such dominant-regulated carrier which identify all transactions with such dominant-regulated carrier and prepare financial statements which are in compliance with Federal financial reporting requirements for publicly held corporations.

"(b) A fully separated affiliate may enter into any contract, agreement, arrangement, joint venture, partnership, or other manner of conducting business with its dominant-regulated carrier or any affiliate provided that any—

"(1) sale, exchange, or leasing of property between the parties;

"(2) lending of money or other extension of credit between the parties or between the fully separated affiliate and a third party directly or indirectly guaranteed by the dominant-regulated carrier;

"(3) furnishing of goods, services and facilities between the parties; or

"(4) transfer to, or use by, or for the benefit of the fully separated affiliate of any assets of the dominant-regulated carrier;

shall be on a fully auditable and compensatory basis, and shall in addition be subject to the requirements established in section 202(e), subsection (c) of this section, and subsections (c) (3), (4), (5) and (d) of section 228. Such conduct of business shall be pursuant to contract and shall be reported to the Commission under such rules as the Commission determines necessary. The Commission shall make such contracts, or portions of contracts, available for public inspection to the extent necessary to ensure proper enforcement of this section.

"(c) In addition to the requirements of section 207 and section 208, the conduct of business by any dominant-regulated carrier (other than any person who owns or controls a dominant-regulated carrier) or any affiliate with any fully separated affiliate shall be carried out in the same manner as such business is conducted between such carrier or affiliate and any nonaffiliate in that the conduct of business between a dominant-regulated carrier (other than any person who owns or controls a dominant-regulated carrier) or any affiliate and any fully separated affiliate shall not be based upon, or include, any preference or discrimination arising out of affiliation.

"(d) Notwithstanding the provisions of subsection (b), no dominant-regulated carrier and its fully separated affiliates shall—

"(1) directly or indirectly own real or personal property except international telecommunications facilities or property, either jointly or in common; or

"(2) engage in any joint sales or marketing of any service, facility, or equipment (except for advertising for which each party pays its pro rata share).

"(e)(1) No dominant-regulated carrier shall be deemed to have established a fully separated affiliate unless and until the commission, upon petition by the dominant-regulated carrier and after an expedited hearing in which any interested party may join, finds that the relationships of such dominant-regulated carrier with the fully separated affiliate or affiliates comply with the requirements of this section.

"(2) Not later than 45 days after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981, the Commission shall establish procedures for the expeditious consideration of petitions filed under this section. Such regulations shall provide that final action on any such petition shall be taken by the Commission not later than 180 days after filing.

"(f) A dominant-regulated carrier shall not disclose to any fully separated affiliate any commercial information acquired in its provision of regulated telecommunications services which would provide an unfair competitive advantage. The Commission may require that specific categories of information (such as directory listings and similar information) shall be made generally available at the same time and at reasonable, nondiscriminatory charges, terms, and conditions.

"(g) The Commission shall promulgate rules and regulations to carry out this section not later than 180 days after the date of enactment of this section.

"ARRANGEMENTS RELATING TO RESEARCH, DEVELOPMENT AND MANUFACTURING ACTIVITIES OF THE AMERICAN TELEPHONE AND TELEGRAPH COMPANY; TRANSITION TO FULL SEPARATION

"SEC. 228. (a) Until such time as the American Telephone and Telegraph Company and its affiliates (hereinafter referred to in this section as 'AT&T') establish fully separated affiliates pursuant to this section and section 227, the provisions of this section shall apply in any case in which AT&T engages in research and development and manufacturing and related functions or activities. Nothing in this section shall prohibit or otherwise restrict any dominant-regulated carrier, affiliate or fully separated affiliate from exercising its independent, prudent business judgment in connection with business conducted with nonaffiliates.

"(b)(1) Before AT&T may offer any telecommunications service or customer premises equipment on an unregulated basis, it must file with and obtain from the Commission approval of a plan demonstrating its proposed method of compliance with the requirements of this section, the requirements of subsection (a)(2) of section 220, and section 227.

"(2) Not later than 180 days of the filing of such plan, the Commission shall enter an order approving the plan or stating the specific parts of the plan which conflict with the provisions of this section or the rules prescribed hereunder. AT&T may file an amended plan, and the Commission shall enter an order approving or disapproving of the amended proposal within 30 days of its filing.

"(c)(1) Not later than the fourth anniversary of the date of enactment of the Telecommunications Competition and Deregulation Act of 1981, the final assembly including all aspects integral to final assembly of any equipment which is required to be offered exclusively by a fully separate affiliate shall be provided by a fully separate affiliate or acquired from unaffiliated persons.

"(2) Not later than the fourth anniversary of such date of enactment any activity relating to equipment design information used in such final assembly or relating to software programing which are required to be offered exclusively through a fully separate affiliate shall be performed by a fully separate affiliate or a nonaffiliate.

"(3) Not later than the sixth anniversary of such date of enactment any subassembly (including any subassembly specific research and development) within such final assembly of equipment required to be offered exclusively through a fully separate affiliate shall be performed through a fully separate affiliate or a nonaffiliate, except that nothing in this subsection shall, at any time thereafter, be construed to prohibit the fully separated affiliate from acquiring any subassembly from A.T. & T. if A.T. & T. also sells the same type of subassembly to nonaffiliates at the same charges and on the same terms and conditions.

"(4) Not later than the eighth anniversary of such date of enactment the manufacturing, including any related functions or activities of any basic component within such final assembly, of equipment required to be offered exclusively through a fully separate affiliate shall be performed through a fully

separated affiliate or a nonaffiliate, except that nothing in this subsection shall, at any time thereafter, be construed to prohibit the fully separated affiliate from acquiring any manufacturing of any basic component from A.T. & T. if A.T. & T. also sells the same types of basic component to nonaffiliates at the same charges and on the same terms and conditions. Thereafter, all applied research, development, manufacturing, or any related functions or activities in support of unregulated telecommunications equipment used in support of any unregulated service shall be conducted through a fully separated affiliate or a nonaffiliate.

"(5) There shall be established an assets evaluation board, composed of three members as follows: one representative each selected by the Commission and A.T. & T. and a third member selected by the first two. The Board shall determine the value of any assets transferred from A.T. & T. to any fully separated affiliate pursuant to this section and section 227. Evaluations of such Board shall be binding upon the Commission and upon State commissions. Any failure of the Board to take action shall not delay any such transfer.

"(6)(A) The Commission may grant waivers pursuant to subparagraph (B) of the time requirements of this subsection for a period not to exceed six months. The Commission may not grant more than two waivers for any one functional category.

"(B) The Commission may grant a waiver under this subsection where the Commission determines that, because of labor strikes, war, severe economic depression, or acts of God, A.T. & T. cannot timely meet the requirements of this subsection.

"(d)(1) During the applicable time periods established in subsection (c), the services or equipment (including any subassembly, basic component, and research and development) which are subject to any such time period—

"(A) shall be furnished to any fully separated affiliate for an amount which is fully compensatory and which is not less than the cost allocated to such service or equipment in connection with regulated activities carried out by A.T. & T., except that in no case shall such amount be less than the charges for which similar services and equipment would be or are transferred in the marketplace between nonaffiliates; and

"(B) any business which is conducted in connection with any such service or equipment shall be on the same terms and conditions under which similar services and equipment would be or are transferred in the marketplace between nonaffiliates.

"(2) In any case in which any conduct of business relating to any service or equipment specified in paragraph (1) is conducted at charges, terms, and conditions which are more favorable to the recipient than the charges, terms, and conditions under which similar services or equipment would be or are transferred in the marketplace between nonaffiliates, the requirements of paragraph (1) shall not apply if A.T. & T. demonstrates to the Commission that the charges, terms, and conditions involved in the conduct of business result from more efficient operation and lower direct costs, and do not result from the allocation of common overhead or other similar factors.

"(e) The Commission shall not have any authority to establish any requirements relating to—

"(1) the structure or organization of any affiliate or fully separated affiliate;

"(2) any activities of a dominant-regulated carrier or person who owns or controls a dominant-regulated carrier which this Act requires to be conducted by a fully separated affiliate; or

"(3) the conduct of business between any dominant-regulated carrier or affiliate and any fully separated affiliate;

which are not consistent with any provision of this section, or section 202, 227, or 229, which establish requirements relating to such structure or organization or to such conduct of business.

"(f) Not later than 180 days after the date of enactment of this subsection, the Commission shall prescribe such rules and regulations as may be necessary to carry out the provisions of this section.

"AMERICAN TELEPHONE AND TELEGRAPH COMPANY 1956 CONSENT DECREE

"SEC. 229. (a) The final judgment of January 24, 1956, of the United States District Court for the District of New Jersey involving the American Telephone and Telegraph Company and its affiliates (United States against Western Electric, No. 17-49), shall not act as a bar to the American Telephone and Telegraph Company and any affiliates from providing any telecommunications service, telecommunications equipment, customer-premises equipment or information service or from engaging in any other business incidental to such activities, except that any such activity not otherwise permitted by such decree which is not a regulated telecommunications service shall be conducted by fully separated affiliates as specified in this title.

"(b)(1)(A) Notwithstanding any other provision of this Act, and except as provided in subparagraph (B) and subsection (e), AT&T or any affiliate thereof (including any fully separated affiliate of AT&T) may not provide (within any area in which AT&T is providing exchange telecommunications service) cable service, mass media service, or mass media product through any facility which is owned or controlled by AT&T or any affiliate (including any fully separated affiliated).

"(B) The provisions of this subsection shall not be construed to prohibit AT&T or affiliates other than any affiliate offering services under subsection (e) (including any fully separate affiliate) or AT&T from—

"(i) leasing or otherwise providing facilities for the provision of any cable service, mass media service, or mass media product (in accordance with subsection (c)) to any nonaffiliate.

"(ii) providing any broadband telecommunications service which does not involve program origination or mass media service; or

"(iii) transmitting television or radio broadcasting signals as a carrier (which does not include the provision of cable service).

"(2) In any case in which AT&T or any affiliate (including any fully separated affiliate) provides facilities for the provision of any mass media service or mass media product, AT&T, any affiliate, or fully separated affiliate shall make such facilities available on a nondiscriminatory basis to any person who originates or otherwise provides any mass media service or mass media product and who makes a reasonable request for the use of such facilities.

"(c) Nothing in any amendment made to this Act by the Telecommunications Competition and Deregulation Act of 1981 (other than the provisions of subsection (b)(1)(A) of this section and section 237) shall be construed to affect—

"(1) the authority of the Commission to establish rules or requirements relating to the offering of cable service by exchange carriers (or any entity affiliated with any such carrier) directly to subscribers located in their service areas; or

"(2) any rules of the Commission, relating to the offering of such service, which are in effect on the date of the enactment of the Telecommunications Competition and Deregulation Act of 1981.

"(d)(1) Except as provided in paragraph (2) and in subsection (b), the provisions of this section shall not be construed to limit or restrict the manner in which, or the extent to which, AT&T or an affiliate which is subject to the consent judgment or decree specified in subsection (a) is permitted to engage in, or is engaging in, any activity in accordance with the terms of such judgment or decree on the date of the enactment of the Telecommunications Competition and Deregulation Act of 1981.

"(2) This subsection shall not be construed to authorize or permit AT&T or affiliate to offer any service, facility, or product—

"(A) except to the extent, and in the manner, such offering is authorized or permitted by any other provision of this section; and

"(B) except for any customer-premises equipment which is in use on the date of the enactment of the Telecommunications Competition and Deregulation Act of 1981, and which is regulated by the Commission or by any State commission.

"(e) Notwithstanding any other provision of this Act, AT&T may, through a fully separated affiliate other than any fully separate affiliate which provides any telecommunications service, telecommunications equipment, customer-premises equipment or information service or which engages in any other business incidental to such activities, provide the services described in subparagraphs (B), (C), and (D) of paragraph (2) of subsection (f).

"(f) For purposes of this section—

"(1) The term 'cable service' means the retransmission of any television or radio broadcasting signal, or program origination, for distribution by cable or any other closed transmission medium to multiple subscribers who pay to receive such service.

"(2) The term 'mass media' includes television and radio broadcasting, pay television, and printed or electronic publications (including newspapers, periodicals, and any service or product like or similar to a newspaper or periodical). Such term does not include—

"(A) telephone number or address listings and directory assistance (limited to telephone number, address, and business category);

"(B) weather, time, or sports information;

"(C) any information service which AT&T or any affiliate was engaged in on April 7, 1981; or

"(D) printed or electronic directory advertising.

The Commission shall have authority to determine in disputed cases whether any proposed service or product is a mass media service or product.

EMPLOYEE PROTECTION

SEC. 224. (a) For purposes of this section the term—

(1) "employee" means any employee of a dominant-regulated carrier, or of any affiliate;

(2) "regular employee" means any full-time or part-time employee whose employment is expected to be permanent; and

(3) "transferred employee" means any employee transferred to a fully separated affiliate by a dominant-regulated carrier or by any affiliate.

(b) If a dominant-regulated carrier or any affiliate transfers an employee to a fully separated affiliate, then such transferred employee shall not be deprived of his employment, salary or wages, or seniority rights during the 5-year period following the date of such transfer. The requirements of this paragraph shall continue to apply in any case in which the fully separated affiliate retransfers such transferred employee to the dominant carrier or to any affiliate, except that any such retransfer shall not have the effect of extending the 5-year period specified in the preceding sentence.

(c)(1) A transferred employee shall be entitled to receive payment (in addition to his regular salary or wages) from the fully separated affiliate to which he is transferred for

reasonable travel expenses and reasonable moving expenses incurred by him or any of his dependents if—

(A) such transferred employee changes his domicile as a result of such transfer; and

(B) the distance between the new work location of such transferred employee and the former domicile of such transferred employee exceeds the distance between the former workplace of such transferred employee and such former domicile by 35 miles or more.

(2) If a collective-bargaining agreement applicable to a transferred employee provides transfer benefits which differ from the benefits available to such transferred employee under paragraph (1), then such transferred employee may select the benefits which shall apply. Such selection shall be made through notice to a dominant-regulated carrier or any affiliate involved before the end of the 10-day period following the date on which such transferred employee receives notice of his transfer to a fully separated affiliate. If such transferred employee does not furnish such notice before the end of such 10-day period, then benefits under the collective-bargaining agreement shall apply.

(d) Any pension benefits, health or disability benefits, death benefits, or insurance benefits to which a transferred employee is entitled shall not be restricted, limited, or reduced as a result of his transfer to a fully separated affiliate, except that the requirements of this paragraph may be superseded by the terms of any collective-bargaining agreement between such fully separated affiliate and any labor entity representing the employees of such fully separated affiliate.

(e)(1) Except as provided in paragraph (2), any collective-bargaining agreement between a dominant-regulated carrier or any affiliate, and any labor entity representing the employees of such a dominant-regulated carrier or affiliate shall continue to apply to any transferred employee during the complete term of such agreement.

(2) A fully separated affiliate, or any person who owns or controls such fully separated affiliate, and any labor entity representing the employees of such fully separated affiliate may enter into a collective-bargaining agreement at any time after the establishment of such fully separated affiliate. Any such agreement—

(A) shall supersede the terms and application of any collective-bargaining agreement specified in paragraph (1); and

(B) shall supersede the requirements of this subsection to the extent such requirements otherwise would apply to such fully separated affiliate.

(f)(1) Except as provided in paragraph (2), if a regular employee is transferred to a fully separated affiliate by a dominant-regulated carrier or by any affiliate, and such regular employee is discharged for other than cause during the 7-year period following the date of such transfer, then such regular employee shall be entitled to receive compensation from such fully separated affiliate in an amount which is not less than the amount of compensation such regular employee would have been entitled to receive from such a dominant-regulated carrier or such affiliate if such dominant-regulated carrier or such affiliate discharged such regular employee for other than cause immediately before the date of such transfer.

(2) If a collective-bargaining agreement between a fully separated affiliate and any labor entity representing the employees of such fully separated affiliate is in effect at the time a regular employee is discharged in the manner specified in paragraph (1), and such collective-bargaining agreement applies to such regular employee and provides benefits which differ from the benefits available to such regular employee under paragraph (1), then such regular employee may select the benefits which shall apply. Such selection shall be made through notice to the fully separated entity before the end of the 10-day period following the date of such discharge. If such regular employee to the fully separated entity before the end of such 10-day period, the benefits under the collective-bargaining agreement shall apply.

(g) If any transferred employee is the subject of a layoff during the 7-year period following the date of the transfer of such transferred employee to a fully separated affiliate, then such transferred employee shall have the first right of rehire in his occupational specialty (or its equivalent) during the 2-year period following the date of the layoff of such transferred employee, except that such right shall not apply unless such transferred employee is physically able, and equipped by training and experience, to perform the duties of the work available. Such fully separated affiliate shall maintain lists of employees who have been separated from employment through layoffs. Such lists shall contain sufficiently detailed information to enable such fully separated affiliate to comply with the requirements of this subsection.

(h) A dominant-regulated carrier or any affiliate shall not reduce the salary or wages of a regular employee, or separate such regular employee from employment through layoff or termination, during the 6-month period immediately before the establishment of a fully separated affiliate by such dominant carrier or by such affiliate unless—

(1) such regular employee consents to such action; or

(2) such action is not related to the establishment of such fully separated affiliate.

(i) The provisions of this section shall not apply to any employee who is transferred to a fully separated affiliate after the 7-year period following the date of the establishment of such fully separated affiliate.

(j) Nothing in this section shall be construed to restrict, limit, or eliminate the authority of a dominant carrier, an affiliate, or a fully separated affiliate to discharge an employee, or take any disciplinary or other action against an employee, for cause.

(k) For purposes of the enforcement or protection of rights, privileges, and immunities granted or guaranteed in this section, employees shall be entitled to the same remedies as are provided by the National Labor Relations Act in the case of employees covered by such Act. The National Labor Relations Board and the courts of the United States (including the courts of the District of Columbia) shall have jurisdiction and power to enforce and protect such rights, privileges, and immunities in the same manner as in the case of enforcement of the provisions of the National Labor Relations Act.

ADDITION TO 1934 ACT

SEC. 225. The 1934 Act is amended by inserting the following:

"PROTECTION AND RESTORATION OF ESSENTIAL TELECOMMUNICATIONS

"SEC. 233. (a) The Commission, shall consult with appropriate Federal departments and agencies, in order to coordinate the development and establishment of arrangements among regulated interexchange and carriers providing foreign telecommunications for such mutual backup, restoration and interconnection of each other's services as may be necessary to avert public peril or disaster or to ensure the continuity of telecommunications essential to the national defense and security and the prompt restoration of any such telecommunications which may be interrupted by the failure or disruption of the facilities of any one or more such carriers.

"(b) The President shall have authority to require any carrier subject to the provisions of this Act to furnish telecommunications services or facilities to any Federal agency if the President determines that—

"(1) the provision of such services or facilities is necessary and appropriate to promote the national defense and security or the emergency preparedness of the Nation; and

"(2)(A) there is a threat of war with a foreign nation, the Nation is at war with a foreign nation, or there exists a state of public peril or disaster or other national emergency; or

"(B) in order to provide for the national defense and security or the emergency preparedness of the Nation, there is an immediate need for such services and facilities, and such need cannot be met through reliance upon any other source of supply.

"(c) The provisions of section 606(e) shall apply in the case of any determination made by the President under this section.

"(d) The President shall coordinate any Government program for enhancing the survivability of exchange, interexchange and facilities used to provide foreign communications and protection against unauthorized interception of telecommunications traffic, ensuring, where appropriate, the availability of such programs to all telecommunications carriers willing and able to participate in such programs.

"(e) The Chairman of the Commission shall designate one of the Commissioners to serve as the 'Emergency Preparedness Commissioner' who shall be responsible for the carrying out of the provisions of this section.

"(f) The Chairman of the Commission shall appoint an advisory council of not to exceed 15 members to examine the structure, policy and needs of Federal telecommunications management for national security and emergency preparedness under deregulation.

"CUSTOMER-PREMISES EQUIPMENT AND INFORMATION SERVICES

"SEC. 234. (a) Except as provided in this title, neither the Commission nor any State shall regulate the production, marketing, or other provision of customer-premises equipment or information services.

"(b)(1) Not later than 180 days after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981, the Commission shall prescribe regulations providing for separate pricing on a fair market value basis of customer-premises equipment or information services, or cable services as defined in section 229(e)(1) when offered in conjunction with a regulated service by a regulated carrier, including an exchange carrier; thereafter, such carriers shall provide such equipment or services only on an unbundled basis in accordance with such regulations.

"(2) Nothing in paragraph (1) shall be construed to prohibit any State commission from allowing an exchange carrier to offer to residential customers a basic lifeline service within an exchange.

"(c)(1) the Commission may establish and enforce such minimum uniform technical standards for customer-premises equipment as are necessary to prevent technical or operational harm to carrier facilities.

"(2) The Commission may establish requirements relating to labeling of customer-premises equipment to indicate the country of origin and to provide such other consumer information as the Commission determines will be of significant interest.

"(d) The use of any information processing capability in support of the provision of a telecommunications service and for the management or control or operation of a telecommunications system or management of a telecommunications service shall not be deemed the provision of an information service within the meaning of this Act.

"(e)(1) No later than the second anniversary of the date of enactment of the Telecommunications Competition and Deregulation

Act of 1981, no dominant-regulated carrier shall provide any customer-premises equipment or any information service, except through a fully separated affiliate.

"(2) Nothing in this section shall be construed to authorize any dominant-regulated carrier to engage in any activity described in paragraph (1) which it was not lawfully providing on the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 other than through a fully separated affiliate.

"TRANSITIONAL PROVISION OF CERTAIN FACILITIES AND SERVICES

"SEC. 235. (a) The Commission may require any unregulated carrier to continue to interconnect its telecommunications facilities with any person for a reasonable period of time upon petition showing that withdrawal of such interconnection would result in an unreasonable hardship on such person. The authority to require interconnection under this Act shall cease no later than the second anniversary of the date of enactment of the Telecommunications Competition and Deregulation Act of 1981.

"(b)(1) Each regulated carrier shall continue to provide under tariff, on an unbundled basis pursuant to section 234(b), any telecommunications service which such carrier is providing on the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 for a period of not less than 2 years from such date, unless the Commission in any particular case shall extend such time for a period of not to exceed 2 years.

"(2) Not later than 2 years after the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 or by such extended time, the Commission shall have determined—

"(A) which of the telecommunications services described in paragraph (1) shall continue under regulation as a regulated telecommunications service, and

"(B) which of such services shall be provided as an unregulated service.

"(c) Subject to the provisions of subsection (b)(1) of section 234 relating to unbundling, any customer-premises equipment which is being provided by any carrier under tariff on the date of enactment of the Telecommunications Competition and Deregulation Act of 1981 shall continue to be made available under tariff for a period of not less than 2 years from such date, unless the Commission in any particular case shall extend such time for a period of not to exceed 2 years.

"DETERMINATION OF BASIC TELECOMMUNICATIONS SERVICES

"SEC. 236. (a) The Commission, in accordance with the provisions of subsection (b), may determine what basic telecommunications services, in addition to, or in lieu of, basic telephone service should as a matter of the public interest be universally available at reasonable charges, prices, terms or conditions, whether competitively provided or not.

"(b)(1) Any person may petition the Commission for a hearing to classify any interexchange telecommunications service as among those services described in subsection (a). The Commission shall grant such petition upon a showing that the telecommunications service is generally recognized as necessary to promote the general welfare of the general population and to promote the safety of property (insofar as such service relates to the capability of a substantial majority of all the people of the United States to communicate with one another by telecommunications).

"(2) Upon granting any petition described in paragraph (1), the Commission shall hold a hearing to determine whether such service should be universally available at reasonable charges, prices, terms or conditions and whether regulated in whole or in part to ensure such availability. Absent a showing to the contrary, it shall be presumed that unregulated marketplace competition will universally provide such service. The burden shall be on any party advocating regulation to demonstrate clearly and convincingly that regulation is necessary to ensure universal availability at reasonable charges, prices, terms or conditions.

"(c) The Commission may review any determination that any basic telecommunications service shall be regulated to ensure universal availability at reasonable charges, prices, terms and conditions. Upon making a determination that regulation is no longer necessary to ensure such availability the Commission shall terminate regulation of such service.

"OWNERSHIP OR CONTROL OF CABLE TELEVISION SYSTEMS

"SEC. 237. (a) No regulated telecommunications carrier (including an exchange carrier regulated by a State) shall also engage in the provision of cable services (as defined in section 229(e)(1)) in the same operating area, unless the Commission, in any particular case, shall otherwise permit, but only upon a sufficient showing that such provision by a regulated carrier will provide significant additional media diversity and competition. In any particular case, the Commission shall require conditions which foster the purposes and policy of this Act.

"(b) Whenever permitting any regulated carrier and any exchange carrier to provide in the same operating area cable services in addition to regulated services or exchange services, the Commission shall require that a reasonable number of channels be made available for lease on a nondiscriminatory basis to nonaffiliates.

"(c) Notwithstanding the provisions of this section, telecommunications carriers serving rural areas with low population densities, as defined by the Commission, may provide cable television services subject to appropriate conditions which the Commission shall prescribe. The Commission shall prescribe regulations to carry out the provisions of this subsection not later than 180 days after the date of enactment of this section.".

TITLE III—MISCELLANEOUS PROVISIONS

SEC. 301. Section 406 of the 1934 Act is amended by—

(1) inserting "regulated" immediately before "carrier" where it first appears therein, and

(2) striking "interstate" where it first appears therein and substituting "interexchange".

SEC. 302. Section 407 of the 1934 Act is amended by inserting "regulated" immediately before "carrier" wherever it appears therein.

SEC. 303. Section 409(g) of the 1934 Act is amended by striking "common" wherever it appears therein and substituting "regulated".

SEC. 304. Section 410(c) of the 1934 Act is amended by—

(1) striking "common" wherever it appears therein and substituting "telecommunications", and

(2) striking "interstate and intrastate" and substituting "interexchange and intraexchange".

SEC. 305. Section 411(b) of the 1934 Act is amended by inserting "regulated" immediately before "carrier" wherever it appears therein.

SEC. 306. Section 412 of the 1934 Act is amended by striking "common".

SEC. 307. Section 413 of the 1934 Act is amended by inserting "regulated" immediately before "carrier" therein.

SEC. 308. Section 415 of the 1934 Act is amended by inserting "regulated" immediately before "carriers" or "carrier" wherever they appear therein.

SEC. 309. Section 416 of the 1934 Act is amended by inserting "regulated" immediately before "carrier" therein.

SEC. 310. (a) Section 503(a) of the 1934 Act is amended by—

(1) striking "interstate" wherever it appears and substituting "interexchange";

(2) striking "common" wherever it appears therein; and

(3) inserting "regulated" immediately before "carrier" wherever it appears therein.

(b) Subsection (b)(2)(A) of such section is amended by striking "common" and substituting "telecommunications".

SEC. 311. Section 605 of the 1934 Act is amended by striking "interstate" wherever it appears therein and substituting "interexcharge".

TITLE IV—CONFORMING AMENDMENTS

TITLE 18

SEC. 401. Section 2510(10) of title 18, United States Code, is amended by striking out "'common carrier' by section 153(h) of title 47 of the United States Code" and substituting "'telecommunications carrier' by section 103(38) of the Communications Act of 1934".

CLAYTON ACT

SEC. 402. Section 11(a) of the Clayton Act (15 U.S.C. 21(a)) is amended by striking "common carriers engaged in wire or radio communication or radio transmission of energy" and substituting "telecommunications carriers as defined in section 103(38) of the Communications Act of 1934".

TRANSITION OF COMMISSION AUTHORITY

SEC. 403. All orders, determinations, rules, regulations, permits, contracts, certificates, and privileges, which, pursuant to the provisions of title II and III of the 1934 Act, as amended—

(1) have been issued, made, granted, or allowed to become effective by the Federal Communications Commission; and

(2) were in effect prior to the enactment of this Act,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Commission, by any court of competent jurisdiction, or by operation of law.

APPLICABILITY OF ANTITRUST LAWS

SEC. 404. Nothing in this Act shall be construed to affect the applicability of the antitrust laws of the United States or any defenses or remedies (including structural remedies) available thereunder or as expressing in any manner any sense of the Congress with regard to any pending or future litigation or defenses and remedies relating to such litigation to which any person affected by this Act may be a party.

EFFECTIVE DATE

SEC. 405. Except as otherwise provided in this Act, the provisions of this Act shall take effect upon the date of enactment of this Act.

SUMMARY OF THE TELECOMMUNICATIONS COMPETITION AND DEREGULATION ACT OF 1981

1. Policy.—Establishes as national policy the promotion of marketplace competition, deregulation, and reliance on the private sector to provide telecommunications services.

2. Regulated Services.—Basic telephone service, which includes long distance and local telephone service, will continue to be regulated until the FCC can ensure the universal and reasonable availability without such regulation. All other telecommunications services, unless they involve facilities for which there is no reasonably available

alternative, will be deregulated pursuant to a transition period.

3. FCC Jurisdiction.—Federal jurisdiction is extended over all long distance services. State jurisdiction continues over local services. Under present law, the Federal Government regulates interstate long distance services. Individual states regulate local service and long distance service that originates and terminates within their borders.

4. Transition Plan.—The bill requires the FCC to establish a plan to carry out the provisions of the Act. The plan would: identify which carriers should be deemed "regulated" carriers; classify AT&T as a "dominant carrier"; establish a uniform accounting system for regulated and dominant carriers; establish procedures relating to the formation of separate subsidiaries; and establish procedures to develop a charge for use of local telephone exchange facilities by all companies in the long-distance business. Time periods are specified in the bill for the implementation of each requirement.

5. Degree of Regulation.—The FCC is ordered to reduce regulation as competition develops in particular geographic markets.

6. Classification.—Within 30 days after enactment, the 23 telephone companies which serve more than 50,000 telephones will be identified by the FCC as "regulated" carriers. Carriers which own or control facilities for which there is no reasonably available alternative will also be subject to regulation. Carriers not within these categories will be unregulated. AT&T will be provided an additional classification as a dominant-regulated carrier. The Commission will have continuing authority to classify and reclassify carriers, depending upon the services provided and the extent to which any regulated carrier is dominant in the provision of telecommunications services in a substantial percentage of the total number of markets or submarkets for telecommunications services.

7. Regulated Carriers Information Filing Requirements.—The FCC will have the authority to require "regulated" carriers to file information relating to regulated operations. These carriers will also be required to file tariffs (rates) for regulated services.

8. Tariffs.—In order to expedite tariff proceedings, carriers are given two options for implementing new or revised tariffs for regulated services. Under the first option the carrier files the proposed tariff with the Commission and the Commission must act on the tariff within 90 days but it is permissible to extend that period for an additional 90 days.

Under option two, the carrier may file a new or revised tariff with the Commission which shall take effect when the carrier wants it to so long as the carrier keeps track of how much is received from its customers under the tariff. The Commission acting on its own motion can delay the effective date for up to 30 days.

The Commission may exempt any regulated carrier from the requirements of this section and the information filing requirements.

9. Facilities Construction Approval.—Any regulated carrier, other than AT&T, may begin construction of new transmission facilities upon notification to the Commission. The FCC is given the discretion to require AT&T to obtain FCC approval before new construction can begin. However, AT&T may be allowed to submit long-term facilities plans as is the practice under present law. Termination or reduction of regulated services will be subject to FCC approval.

10. Network Planning.—Because of concern for technical maintenance of the telephone network and to discourage creation of duplicating networks, telephone companies and their competitors, both regulated and unregulated, are authorized to meet, plan, and coordinate the telephone network. There is no provision in the existing Act for such such planning and coordination because telephone service has been a monopoly service.

Technical information necessary for competitors to connect with the regulated network is required to be filed with the Commission and may not be disclosed to the fully separated affiliate until it has been filed. This will prevent AT&T from inhibiting its competition through nondisclosure or disclosure only to its subsidiary, of the technical information necessary to connect to the network.

These provisions assure that all persons desiring to use the telephone network to provide service or to sell products have equitable access to information about that network whether or not they are affiliated with AT&T. An example of the type of information required to be disclosed is the technical information describing the physical and electrical characteristics of the network. Another example would be the planned availability of network facilities, such as the number and type of new circuits planned for a market. Therefore, AT&T is prohibited from either favoring its subsidiary or discriminating against its competitors by manipulating information necessary to gain access to the network.

11. Records and Accounts.—One year after enactment, the FCC and regulated carriers shall implement an accounting system to allocate all revenues and costs between regulated and unregulated goods and services. This is to prevent a regulated monopoly from being able to subsidize its nonregulated (competitive) subsidiary. The FCC shall establish new depreciation schedules to permit regulated carriers to recover their capital costs over a shorter period.

12. Access Charge.—The FCC is directed to establish a system of charges for use of local telephone facilities that will (1) ensure that all long distance carriers and other customers are treated equally; and (2) ensure the continued universal availability of basic telephone service at reasonable rates. A Joint Board, comprised of four state regulatory commissioners and three FCC commissioners will work with the FCC to develop practices and procedures to accomplish these objectives. In addition, the FCC is authorized to adopt a mechanism such as surcharges on the access charge to assure that implementation of this bill does not result in unreasonable increases in basic telephone rates.

13. Fully Separated Affiliate (Subsidiary).—AT & T must provide competitive services, which do not include basic telephone service (long distance and local), through a fully separated affiliate. Organizational and behavioral requirements and prohibitions are prescribed to govern the relationship between AT&T and its fully separated affiliates in order to preclude the possibility of cross-subsidies. The FCC must find that the affiliates have met the requirements of the Act before the affiliates can offer unregulated services.

14. Western Electric/Bell Laboratories.—After a transition period of 8 years, Bell Laboratories research and Western Electric's manufacturing of competitive, deregulated telecommunications equipment is required to be fully separated from the research and manufacturing of equipment utilized in regulated services. During the transition, behavioral requirements and prohibitions are imposed on Western Electric and Bell Laboratories. Specific Western Electric and Bell Laboratories activities that support competitive activities are transferred to the fully separated affiliate at particular times during the transition. These requirements lead to a fully separated affiliate with its own sales, marketing, maintenance, operations, applied research, development, and manufacturing. Any transfer of assets from the regulated part to a deregulated subsidiary will be evaluated by an assets evaluation board consisting of three members, one selected by the FCC, one by AT&T and the third by the other two.

15. Consent Decree.—The 1956 Consent Decree is modified to allow AT&T to offer unregulated competitive telecommunications services and equipment through fully separated affiliates. However, AT&T is prohibited from offering cable service or mass media service (defined below) through any transmission facility which is owned or controlled by AT&T or its fully separated affiliate. AT&T would be permitted to provide printed or electronic advertising (yellow pages), weather and time information, and sports through a second separate affiliate that does not also offer transmission services, sell equipment or offer other unregulated services. Mass media services are defined as TV and radio, pay TV, and printed or electronic publications (including newspapers and periodicals or similar services).

16. Essential Telecommunications.—FCC shall coordinate with Federal departments and agencies, arrangements for services during emergencies and in the national defense. The President shall have the authority to require telecommunications carriers to furnish services or facilities. An advisory council shall be appointed to examine structure, policy and needs of Federal telecommunications management for national security and emergency preparedness under deregulation.

17. Customer-Premises Equipment (i.e., telephones, switch boards) and Information Services.—The FCC and the states are precluded from regulating these activities. AT&T can only offer these services or equipment through a fully-separated affiliate.

18. Transition.—Presently regulated services (i.e., WATS) will continue under regulation for a period of 2 years which may be extended an additional 2 years by the FCC.

19. Basic Telecommunications Services.—The FCC is given the authority to determine which services, in addition to basic telephone service, should be universally available and whether regulation is needed to ensure their universal availability. The bill anticipates continued regulation of basic telephone service (long distance and local) for the foreseeable future.

20. Antitrust Disclaimer.—The bill contains language specifically disavowing any intent to affect the applicability of the antitrust laws and any pending antitrust litigation.

21. Employee Protection.—Employment rights of employees affected by the separated affiliate requirement will be protected.

22. Co-Located Telephone Company Cross-Ownership.—Generally, telephone companies are prohibited from providing cable television service in the same area in which they provide telephone service, except upon a showing to the FCC in a particular case that significant additional media diversity will result. An exemption from this general restriction is contemplated for sparsely populated areas.●

By Mr. HOLLINGS:

S. 899. A bill to provide a noncontributory educational program for veterans and members of the Armed Forces of the United States in order to recognize satisfactory and honorable service, and for other purposes; to the Committee on Veterans' Affairs.

VETERANS' EDUCATIONAL ASSISTANCE FOR MILITARY SERVICE

● Mr. HOLLINGS. Mr. President, I am sending to the desk a bill entitled "Veterans' Educational Assistance for Military Service." It is a well-known fact that the military services of this Nation are experiencing severe difficul-

ties in recruiting high-quality, highly motivated young men and women and that our inability to adequately man our forces is cause for grave concern about our national security. I believe, and sincerely hope, that the new educational benefits provided by this bill will attract increased numbers of high school graduates into the services and will assist the services in retaining the career middle-grade noncommissioned officers needed to train and lead our fighting men.

Under the provisions of this bill, veterans could receive education assistance payments of up to $400 per month for up to a total of 36 months while attending an approved educational institution. Eligibility for benefits at this level would be attained through a number of active duty and Reserve service options. For example, a young man could enlist for 2 years of active duty and agree to serve 2 years of Active Reserve service and 2 years of individual Ready Reserve service and become eligible for the maximum benefits commencing at the time he is honorably discharged from active duty. A longer period of active duty would reduce the Reserve obligation. A person who is honorably discharged after 6 years would be eligible for the maximum benefits with no Reserve service obligation.

A unique feature of this bill is that it also provides education benefits for persons who serve in the Reserve Forces without having served on active duty. While the benefits for eligible reservists are one-half of what is provided to active service veterans, they are still substantial and should prove to be an attractive recruitment incentive. While manpower problems in the Active Forces are severe, the Reserves are experiencing even greater difficulties in filling their ranks. I believe that this bill can go a long way toward providing the needed incentives to draw young men and women into the Reserve Forces.

Active duty personnel are also eligible for benefits under this program and can receive monthly payments commensurate with the percentage of an academic course load that they pursue. If, for example, a soldier at Fort Jackson, S.C., attends college classes on a part-time basis at the University of South Carolina in Columbia and takes 25 percent of a full academic load, he would receive $100 per month, or 25 percent of the maximum monthly entitlement. He could commence such a program after 1 year of active duty.

I believe, however, that the feature of this bill which will have the greatest appeal to our career military people is a provision which provides for transferability of benefits. As written, the bill would enable a person eligible for education benefits to transfer these benefits to one or more of his dependents—but not to exced the 36-month/$400 level. I believe that this will provide an extremely valuable retention incentive for many of the very important middle-grade noncommissioned officers. An alarmingly large number of these small unit leaders are presently leaving the services because they cannot afford to send their children to college on the military pay they receive. This bill can provide them the assist they need to educate their children while continuing in a career that most of them prefer.

Mr. President, the Congress has moved decisively in recent years to provide our military forces with the modern, high technology equipment they need to at least keep abreast of the Soviets in a material sense. But, as we all know, we are now at a crisis point with regard to military manpower. I believe that we must now move resolutely to remedy this problem if the security of this Nation is to be assured. I believe this bill can be a major step in that direction.●

By Mr. HEINZ:

S. 900. A bill to assure that job skills training, and employment opportunities are furnished through opportunities industrialization centers and other community based organizations of demonstrated effectiveness in certain block grant programs involving the creation of urban jobs in enterprise zones, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

YOUTH SKILLS ACT OF 1981

● Mr. HEINZ. Mr. President, I am very pleased to introduce legislation today which is designed to improve the job skills of our Nation's youths, and to do so by utilizing the truly productive sector of our society—the business community—to achieve that goal. This legislation would utilize organizations such as the opportunities industrialization centers (OIC), which have already demonstrated their effectiveness, to provide unskilled young people with real jobs that will provide both a sense of self-worth and marketability in the private sector.

Mr. President, my proposal would work in the following manner. It would establish the authority of OIC and other national community based organizations of demonstrated effectiveness to develop programs of skill training and job placement to work as subgrantees, in block grant funding provided to the States for the purposes of taking school dropouts and other unemployed youth in urban and rural America, training them, and putting them in real jobs.

Additionally, my proposal will provide that OIC and other groups of demonstrated effectiveness in the delivery of employment and training services shall be eligible for subcontracts from contractors receiving Federal funds and tax incentives to create jobs through the Departments of Energy, Transportation, Commerce, Housing and Urban Development, Agriculture, and Defense.

Mr. President, I am proud to introduce this legislation today because I see a ripe opportunity offering itself to be taken advantage of, for the benefit of our unemployed, untrained, and unskilled youths, white and black, living in our cities, and in our rural areas. Our new administration has asked us to tap all of our resources in an attempt to put our country back on course, and I think that we will all agree that our greatest resource is our youth. Our administration has seen fit to dismantle programs, social programs that just have not worked. Why? Because, in a well intentioned, but unfortunately misguided way, these programs were developed and implemented in vacuums. We just did not use our resources.

The last 20 years has given us a tremendous amount of practical experience when it comes to community based programs. Some have failed, some have succeeded, but all were started with the intention of meeting a crying need. One of these programs was started in an abandoned jailhouse, one cold January day in 1964. That jailhouse being a stark presence of what could be at the end of a desperate, lonely road for many of our inner city youth.

That January day in that jailhouse was the beginning of what could be, and has now become for over 21,000 people since 1964. The possession of a marketable skill, a job, and of equal importance the sense of dignity in knowing that one can be self sufficient. This was a dream of the Reverend Leon Sullivan, a dream that has survived and lived.

It has lived through proving its worth, its willingness to work hard and long for its people, and to do its job. Mr. President, without the vision of Reverend Sullivan we would not be where we are today. I dare say that we would have a far, far heavier load to carry on our decisions regarding youth employment without the vision of Reverend Sullivan.

We have learned our lesson well, Mr. President. We need to rely on our truly productive partner in society, our business community to work with us in making our youth productive. In addition, I believe that my proposal is consistent with the administration's desire to transfer oversight responsibility for training and implementation to establish community based organizations like the Opportunities Industrialization Centers, founded and operated by the Reverend Leon Sullivan and other community-based organizations of demonstrated effectiveness.

These organizations are the prime example of community-based organizations which can and have identified the problems of youth unemployment many years ago. Rev. Leon Sullivan has long provided the vision and leadership for his great organization, and has more than proven his track record, and in turn the ability to implement this proposal.

Mr. President, we have heard a number of questions regarding our commitment to unemployed youth. We have our opportunity to prove our real commitment with this legislation. We have an opportunity to provide more than lip service, more than make-work, more than throwing money at the problem.

Mr. President, we have an opportunity to do more than waste the taxpayers money. We have an opportunity to make a difference, jointly with Reverend Sullivan's OIC and other credible community based organizations. Mr. President, we can make a difference. We can make a credible difference. Let us not let our opportunity slip from our grasp.

I urge my colleagues to join me in supporting a program that encourages local resources to work hand in hand with us in destroying the terrible plague of our youth, unemployment.●

By Mr. HATFIELD:

S. 901. A bill to preserve and protect the Georgetown Waterfront for the recreational use of the public; to the Committee on Energy and Natural Resources.

LEGISLATION RELATING TO A CERTAIN AREA ALONG THE POTOMAC RIVER

● Mr. HATFIELD. Mr. President, the legislation that I am proposing today will enable the Congress to resolve a long-standing issue in the National Capital region and fill in a gap in the protected shoreline along the Potomac River. The waterfront land south of Georgetown within the District of Columbia is the only portion of the northern bank of the Potomac between Cumberland, Md., and the city of Washington that has not been made into parkland for the use and enjoyment of the public.

Senators may be familiar with the unfortunate conglomeration of parking facilities, smoke stacks, and garbage trucks that presently line the river between the Key Bridge and Rock Creek.

The creation of a park at this 20-acre waterfront site has been blocked because the 6 privately owned acres present developers with an attractive investment opportunity should the small plot be filled with a mix of commercial and high-income residential development.

Economic realities being what they are, national interests in protecting this plot of land are in danger of being overwhelmed by the profit motive. This bill, very simply, would authorize the Secretary of the Interior to accept donation of the 6 privately owned acres or arrange with the owners an exchange or transfer of the land for Federal property of equal value. Minor differences in the relative land value could be made up by a cash payment by either party.

When my attention was first drawn to this issue 2 years ago, I was alarmed by the lack of vision being exercised in planning for the inevitable metamorphosis of the area. It appeared that everyone in authority in the National Capital region simply had given up on attempts to create a continuous, total park along the entire shoreline of the Potomac River within Washington, D.C. Federal planning guidelines, water management policies, national interests, and the needs of the citizens of the city all were pushed to the background for a time, and no thought was given to whether or not the Congress might see fit to assist in protecting the area.

For these reasons, I introduced a bill in the 96th Congress to authorize the purchase of the privately owned land along the Georgetown Waterfront and to give all the people and agencies involved in planning for the future of this important area the time necessary to think through all of the issues involved. That bill was meant to raise our sights a little higher, to enable us to consider all the options available rather than only the least offensive ones.

That process has borne fruit and the legislation which I am introducing today reflects changes that have been suggested. The new bill will place the Congress firmly behind efforts by the administration to explore exchanging land rather than making an outright purchase.

Let me explain the importance of this legislation. The Georgetown Waterfront should be preserved for the people. It is the most beautiful spot of Potomac River frontage in the Capital. The Potomac bends at this point, and the views up the river and downstream are unmatched for their scenic drama. It is a place for residents of the city, and visitors alike, to get away from the hustle and bustle of the urban environment. Such locations are becoming fewer and fewer.

Men and women of vision have preceded us in planning a city in which key land areas have been maintained for public use and to memorialize our national heritage. The Georgetown Waterfront is one of the few remaining parcels of land within the Capital City on which future generations can raise similar memorials. Some have suggested a combination of parkland and commercial development. While on its surface, this might appear to be a reasonable idea, a walk around the area makes clear that the parkland would be a narrow strip of green space between K Street and the river, 160 feet wide. The commercial development, on the other hand, would cover the only portion of the land that is wide enough to support any significant structures at all. At best, the park would be only enviable landscaping for luxury residences.

Moreover, development of the area would place enormous strain on an area that is already overly congested. Planners have been quoted as stating that existing development plans, excluding the waterfront area, will increase the population density by 10,000.

Furthermore, the area lies in the Potomac River flood plain. Since 1924 the land has been inundated 17 times, 13 times to a very substantial degree. Federal guidelines do not permit development on land such as this which is under its control.

Those who wish truly to protect for all the people this last area of abused land along the Potomac have only one option. It is the same opportunity that was seized by courageous planners in the past who made the Nation's Capital a place of beauty and a people's city. I urge my colleagues in the Senate to join me in supporting this legislation and hasten the day when the Georgetown Park will be a reality. It is inconceivable that we should allow this opportunity to preserve the riverfront, and to avoid more crowded development, to pass.●

By Mr. COCHRAN:

S. 902. A bill to assure consumers an adequate supply of cotton, rice, and soybeans at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

UPLAND COTTON, RICE, AND SOYBEAN ACT

● Mr. COCHRAN. Mr. President, today I am introducing a bill to be considered as part of the overall farm legislation which Congress will address this year. The bill contains six titles: Title I—Cotton; Title II—Rice; Title III—Soybeans; Title IV—Partial Embargo Protection; Title V—Export Credit Revolving Fund; and Title VI—A Farm Income Protection Framework.

Mr. President, before going into the specific provisions of this bill, I would like to spend a few minutes reviewing the history of farm legislation so we can have a better appreciation of the program we have today.

The primary justification for Government involvement in agriculture is that an adequate food supply is a human necessity and essential to national economic and political stability.

Unfortunately, agricultural production is subject to the vagaries of weather, insects and disease—problems which are to a large degree beyond the control of farmers.

We do not know with any degree of certainty the level of production until after the crops have been harvested each year. Often efforts to increase production by expanding acreage result in a decline because of poor yields. Conversely, a reduction in acreage could lead to increased production because of excellent growing conditions.

Farmers are at the mercy of the final outcome both here and the major producing regions around the world. Each is too small to affect the total and simply must take whatever price the market offers.

In the absence of Government programs, agriculture would be resigned to boom and bust cycles.

When supplies are large and prices low compared with cost of production, an individual farmer often expands production in an effort to increase cash receipts and lower per unit cost of production. This individual strategy simply puts further downward pressure on prices eventually forcing some farmers out of business.

This method of adjusting supply leaves us vulnerable when additional production capacity is needed to offset a series of poor crop years.

Having farmers going into and out of production because of variations of nature is not acceptable and, indeed, is dangerous if we are to continue to provide adequate supplies of food and fiber.

Legislation establishing price support and production adjustment programs was first enacted in 1933 after farm journals and farm organizations failed during the 1920's to get farmers to voluntarily reduce production and thus strengthen market prices.

Since that time, Congress has established a number of programs intended to soften the impact of production and marketing uncertainty on agriculture.

Until the 1960's Government efforts to provide stability to most agricultural commodities used price supports and direct controls over production and marketing in the form of acreage of allotments and marketing quotas.

However, during the 1960's the use of loan rates to support both prices and income resulted in levels that inter-

fered with the market. The Commodity Credit Corporation accumulated large stocks of many commodities that became extremely expensive to taxpayers.

This led to a distinction between price support and income support prices that culminated with the establishment of target prices in the Agriculture and Consumer Protection Act of 1973. This allowed loan rates to be put at levels that would allow markets to clear while providing farmers with income protection through target prices when the world supply and demand conditions resulted in low market prices.

The concept was to adjust target prices by changes in costs. This would maintain an adequate level of income protection while at the same time be an incentive to Government to keep supply in line with demand so the market prices would average above the target prices. If the Government through its set-aside and acreage diversion programs is successful, then there are no deficiency—target priced—payments.

The Food and Agriculture Act of 1977 went one step further for grains with the establishment of a farmer-held reserve program. Direct payments to grain producers in the form of storage payments and interest waivers on loans were made to encourage them to hold grain in reserve until the market price reached the release level. This allows excess grain to be pulled off the market when it is creating depressed prices and held until production can be adjusted or demand increases sufficiently to strengthen prices to the release level.

This allows us to protect the income of grain farmers while at the same time holding a sufficient quantity in reserve to meet variation due to weather.

So, over the years commodity programs have been altered as conditions change. For most commodities, we have gone from direct Government controls of acreage allotments and marketing quotas to programs that allow greater individual freedom for farmers to make decisions and for the market to allocate resources.

Over the years producers and consumers have benefited from programs that provide protection to farmers from production and marketing uncertainty.

Farmers have benefited from the price and income protection; consumers have benefited from ample supplies of food at reasonable prices, and our economy has benefited from the expansion of agricultural exports.

The obvious success of these programs from the standpoint of the general public is evident by the fact that the consumers in this country pay only about 17 percent of their income for food. This is the lowest of any country in the world. By comparison the U.S.S.R. pays 45 percent, Japan, 25.5 percent, and Great Britain, 24.4 percent.

Our comparative trade advantage for food and fiber has long been recognized, but its importance to our economy has never been greater than now. This year we expect to sell nearly $48 billion of agricultural products in foreign markets for a net agricultural trade of around $30 billion.

This means that net agriculture exports will offset about one-third of our oil imports this year. Without agricultural trade, our economy would be in even more difficulty.

Unfortunately, there seems to have been some reluctance to operate the programs to sustain an economically healthy agricultural sector. Rapid increases in input costs without corresponding efforts to increase the income support framework nor adjust supplies in an effort to get a higher market price has put farmers in the most serious financial difficulty since the 1930's.

We have an opportunity this year to make adjustments in the farm legislation. With the current budget constraints, it is going to be a challenge to come up with provisions which provide market prices sufficient to allow our farmers to operate at a fair and reasonable return. We simply must find the most efficient way to keep the agriculture economy strong.

Let me turn now to the specific bill I am introducing today. As I mentioned in my opening remarks, it contains six titles. I would like to briefly highlight each.

TITLE I—COTTON

The bill continues the market oriented approach that has served the cotton industry well in recent years, while at the same time has reduced Government costs.

It is a 4-year bill, applicable to the 1982 through 1985 crops of upland cotton.

Loan rates: It continues the price support loans program under which the loan level is set at 10 to 15 percent below the average market prices for cotton in both the United States and foreign markets.

The bill increases the minimum loan from 48 to 55 cents per pound.

Target prices: Cotton does not have a farmer-held reserve program to absorb stocks when prices are depressed. Thus, it is necessary to maintain target prices to provide the same degree of protection.

Target prices have been a part of the cotton program since 1973. Prior to then the direct Government expense for income support to cotton farmers averaged around $800 to $900 million per year. Since target prices were included there has never been a deficiency payment. This is an indication to me that the program is working well.

Target prices are continued in the bill with adjustments based on cost of production. The bill changes the cost from a cost-per-pound to a cost-per-acre basis. This removes yield variability from the computation.

Under the current procedure, the average yield per acre is included in the computation. This results in abnormally high cost per pound when yields are low and low cost per pound when yields are higher than normal. Basing the adjustment on per acre cost will provide a more stable and reasonable adjustment path.

Special import quota: It continues the provisions under which a special import quota is triggered whenever the market price exceeds 130 percent of the average market price in the previous 36 months.

Since this measure was enacted in 1977, two special quotas have been imposed. Both have been in the last 12 months. Less than 15,000 bales were entered mainly because prices are usually high because of short supplies relative to demand.

The longer staple lengths of cotton—1⅛ inches and up—coming in under the special quota are subject to a duty of 3.5 cents—drops to 1.75 cents in January—per pound. This duty created concerns from the milling industry because it added unexpected cost. This bill would make imports under the special quota free of duty.

National program acreage: The national program acreage concept is continued in the bill. This acreage level is computed each year to represent the acreage needed to meet expected domestic and export demand and any desired change in stocks. It is then prorated to individual farms based on production history. This level of acreage then becomes the basis for program participation.

This bill simply changes the date which the Secretary must announce the national program acreage level from December 15 to November 1. This corresponds to the final date for announcement of the loan level and is desirable since most farmers make plans in the fall for the next year.

Acreage set-aside: Under current law the Secretary has the authority to establish a set-aside requirement and to impose a limitation on the acreage that can be planted to cotton. The penalty for noncompliance is the loss of eligibility for loans and target price protection. Most analysts believe that the set-aside is the most cost effective way to achieve an acreage adjustment when necessary because there are no dificiency payments if the program is successful and market prices strengthen.

The current set-aside approach needs to be improved because it is based on the acreage planted in the same year that the set-aside is being imposed. Thus a farmer could actually expand his plantings of cotton—set aside the required percentage based on that planted acreage and still be in compliance.

The bill changes the set-aside provision to assure that the reduction imposed comes from cotton acreage. This is achieved by specifying that the percentage reduction must be made from last year's plantings. It also contains some flexibility for the Secretary to make adjustments to account for normal crop rotation and poor weather in the previous year.

Paid diversion: The bill continues the authority of the Secretary to use a paid acreage diversion approach if deemed necessary.

Offsetting and cross-compliance: Farmers were caught off guard and in many cases penalized by the Secretary's use of cross-compliance procedures authorized under the 1977 act. Offsetting compliance refers to the situation when a farmer has two farms and is required to be in compliance on both farms to receive program benefits on either. Cross-compliance refers to the situation when a farmer plants more than one program crop and has to be in compliance on all crops to be eligible for benefits on any commodity.

This bill eliminates these requirements.

Seed cotton loans: The Secretary has

for several years used his discretionary authority to offer producers recourse loans on seed cotton prior to ginning and marketing of cotton. A recourse loan is one which must be repaid, that is, the individual does not have the option of letting the Government take over the cotton in lieu of loan repayment. The latter type loan is called a nonrecourse loan and is the type provided on regular cotton loans.

This bill requires the Secretary to make seed cotton loans.

Disaster payments: Cotton disaster payments would be discontinued except in those areas where crop insurance is not available.

TITLE II—RICE

The rice provisions of the bill will complete the transition of the rice program from the acreage allotment and marketing quota program to a market oriented program where all rice producers who participate in the program would be eligible for program benefits.

Under the 1977 act, a farmer could produce and market rice without penalty, but only farmers with rice allotments were eligible for program benefits and then only on that produced on the allotment acreage.

Target prices: Target prices are continued. However, the bill provides for adjustments based on cost per acre rather than cost per pound as is the case under current law. The remainder of the adjustment mechanism remains the same as current law.

Rice loan: The rice loan level would continue to be based on 75 percent of the target price. However, the bill raises the floor from $6.31 per hundredweight to $8.00.

Acreage adjustment mechanism: The bill terminates rice acreage allotments and replaces them with a national program acreage concept, which is the same as cotton, wheat, and feed grains under the 1977 act.

The bill gives the Secretary authority to restrict price acreage by requiring rice farmers to reduce planting from last year. He also has discretion to make further adjustments to reflect normal crop rotation and weather.

Disaster payments: Rice disaster payments would be discontinued except in those areas where crop insurance is not available.

TITLE III—SOYBEANS

The Government has never been heavily involved in the soybean industry, with the program consisting only a loan rate to help in orderly marketing. This title continues that concept.

Soybean loan rate: The bill establishes a market price formula similar to cotton to determine the loan rate. The formula is 75 percent of the average Chicago cash price on the preceding 5 years. The bill also puts a floor of $5.02 for the loan.

Prohibitions: First. The Secretary shall not require participation in any production adjustment program for soybeans or any other commodity as a condition of eligibility for price support loans.

Second. The Secretary may not establish a reserve storage program for soybeans.

Third. The Secretary may not impose an acreage adjustment program for soybeans.

TITLE IV—EMBARGO PROTECTION

Under existing law, if exports of a commodity are embargoed because of short supply the Secretary is required to increase the loan rate to 90 percent of parity.

This bill provides for compensation to farmers if a partial embargo is imposed for any other reason. There is no compensation if there is a total trade suspension or if the exports to the country or area are less than 3 percent of total U.S. export for the commodity embargoed.

The compensation provided for in the bill under a partial embargo would be based on the market prices just prior to the embargo. A payment would be made on the quantity sold during the embargo times the difference between the price prior to the embargo and the price for which the product was sold.

If a payment limitation is imposed, then a farmer could receive a Commodity Credit Corporation loan equal to the pre-embargoed average market price.

It also requires the Secretary to compensate firms for losses in connection with sales contracts which cannot be carried out as a result of the suspension.

TITLE V—EXPORT CREDIT FUND

Until 3 years ago, USDA administered with Commodity Credit Corporation funds and export credit program. Since then the administration has substituted a loan guarantee program.

The bill provides for the establishment of an export credit revolving fund utilizing repayments from previous export credit loans.

Furthermore additional funds could be added through the appropriations process.

TITLE VI—FARM INCOME PROTECTION

The program provisions for each commodity provide the Secretary with sufficient variables or policy levers to keep supply and demand for agricultural commodities at a level that will provide market prices where farmers can operate at a fair and reasonable return.

This title of the bill specifies the way in which Congress expects the Secretary to run the program.

The language is as follows:

It is the purpose of this title to establish a farm program framework under which the supply and demand for wheat, feed grains, upland cotton, and rice will be maintained at levels designed to achieve market prices for commodities that permit the producers of such commodities to operate at a fair and reasonable profit.

In carrying out the purpose of this title, the Secretary of Agriculture shall utilize the authorities conferred upon him under existing laws, including the provisions of this act, the commodity loan and purchase programs, producer storage reserve programs, and programs under the Agricultural Trade Development and Assistance Act of 1954.

The Secretary of Agriculture shall formulate a specific program for each year to carry out the purpose of this title during such year and publicly announce such program not later than March 1. The Secretary shall include in such announcement the specific authority he proposes to utilize, and how such authority is to be utilized, in order to achieve, during the marketing year concerned, a market price for each commodity named in subsection (a) equal to or greater than the established (target) price for such commodity.

Mr. President, this bill provides the administration with all the tools needed to maintain a healthy and prosperous agricultural economy. If they are used properly, the result will be achieved in the marketplace with minimum cost to Government.●

By Mr. QUAYLE:

S. 903. A bill to amend title 18, United States Code, to provide increased penalties for any person convicted of using a firearm to commit certain Federal crimes or carrying a firearm during the commission of such crimes, and for other purposes; to the Committee on the Judiciary.

S. 904. A bill to amend title 18 to provide penalties for the assault or murder of Presidential or Vice Presidential staff members; to the Committee on the Judiciary.

LEGISLATION RELATING TO CRIMES COMMITTED WITH FIREARMS

● Mr. QUAYLE. Mr. President, all Americans were shocked by the events of last week. Once again, an American political leader was the target of an assassin's bullet.

Fortunately, President Reagan and the other three victims of that horrible incident survived and are reported to be recovering well, However, our sense of outrage and horror lingers on, as well it should.

I am today introducing two pieces of legislation that will express our outrage and, hopefully, help to deter the repetition of such senseless acts of violence. The first is an amendment to title 18, section 294 of the United States Code that will provide increased penalties for any person convicted of using a firearm or a knife to commit certain Federal crimes or carrying a firearm or a knife during the commission of such crimes. In the case of a first conviction, the increased penalty will consist of a mandatory 5 years imprisonment in addition to the punishment provided for the commission of whatever felony or crime is involved. A second conviction will carry with it an additional and mandatory 10 years imprisonment. In the case of a third or subsequent conviction, this bill provides for an additional and mandatory 15 years to life imprisonment.

Mr. President, in the wake of last week's incident, we have heard the predictable calls for strong gun control legislation. I have never been convinced of the wisdom of such legislation. I do, however, believe that strong and mandatory punitive measures, such as I am proposing today, can be an effective deterrent against crimes committed through the use of firearms.

The second bill I am introducing today is an amendment to title 18, section 1751 of the United States Code to extend the protection of the Presidential Assassinations Act to staff members who travel with the President or the Vice President on official business. As the tragedy that befell President Reagan's press secretary, James Brady graphically

illustrated, these staff members are often in danger equal to that of the President and the law enforcement officers assigned to protect him. I see no reason to exclude such staff members from the protection of the full legal penalties of the Presidential assassination statute.

The bill also makes mandatory the sentence imposed on those individuals convicted of violating the Presidential assassination statute. As in my other bill, mandatory sentencing means that such individuals are ineligible for parole, probationary or suspended sentencing. They will serve out the full term of the sentence imposed by law.

Mr. President, our feelings of cold rage at the attempted assassination of the President should not diminish in the coming months, but should be broadened to include all acts of murderous violence taking place daily in our society. In a recent column, George Will suggested that such feelings of rage about assaults on the social order "not only are justified but are indispensible to civilization." Mandatory sentencing is one way to express our rage, and to provide a strong deterrent to such tragic crimes.

I urge my colleagues to support these measures.●

By Mr. PRESSLER:

S. 905. A bill to require the inspection of imported meat and meat food products, to require the grading of meat and meat food products, to require the Secretary of Agriculture to establish a labeling system for meat and meat food products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

MEAT INSPECTION, GRADING, AND LABELING ACT OF 1981

● Mr. PRESSLER. Mr. President, today I am introducing a bill, the Meat Inspection, Grading, and Labeling Act of 1981, which would require the inspection and grading of imported meat and meat food products. It would further require the Secretary of Agriculture to establish a labeling system for meat and meat food products.

In a recent trip to South America, I had the opportunity to visit the meatpacking industry and government inspection system in Argentina, a large meat exporter, and saw what a helter-skelter system they have. In that country, they do not have meat inspectors in the plants at all times, and their overall inspection system is greatly inferior to that of the United States. Yet, we import meat from all around the world and have no additional inspection of this meat. Why should domestically produced meat have to meet rigid inspection requirements while we import poorly inspected or noninspected meat from other countries?

The bill I am introducing today will address this problem. The bill, by amending the Federal Meat Inspection Act, would require that:

First. All carcasses, parts of carcasses, meat or meat food products of cattle, sheep, swine, goats, horses, mules, buffalo, or other equines capable of human consumption be inspected at the port of entry into the United States;

Second. Any meat products, or processed meat, either be inspected, or if it cannot easily be inspected, be labeled as uninspected imported meat;

Third. Any meat that does not pass inspection be labeled as inspected and condemned, with the option of permitting its entry for use as fertilizer or for similar purposes;

Fourth. The Secretary of Agriculture establish a fee on imported meat and meat food products to cover the costs of such inspection, certification, testing, and labeling, and that the Secretary would also be empowered, if the fees are not paid, to revoke the importer's privilege to import meat;

Fifth. All meat inspected under this act be labeled as either domestic or imported, any meat food products containing imported meat be labeled as containing imported meat, and all imported meat labeled also indicating the country of origin—these labels remaining on the product until it reaches the final consumer; and

Sixth. Imported meat be graded as prime, choice, standard or utility.

The purpose for introducing this legislation is to insure that all meat and meat products available to the American consumer be subject to similar inspection, labeling, and grading requirements. It is important that the American consumers have high-quality meat products and also that they be well-informed about the quality and grade of meat they are purchasing. This bill would provide this without additional cost to the U.S. taxpayer as the meat exporter must pay for the cost of inspection.

Mr. President, I urge my colleagues to join me in supporting this measure. Mr. President, I ask unanimous consent that the text of the legislation be printed in full in the RECORD.

S. 905

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Meat Inspection, Grading, and Labeling Act of 1981".

INSPECTION OF IMPORTED MEATS

SEC. 2. Section 20(a) of the Federal Meat Inspection Act (21 U.S.C. 620 (a)) is amended by striking out "No" and inserting in lieu thereof "(1) Except as provided in paragraph (4), no", and by adding at the end thereof the following new paragraph:

"(2) Except as provided in paragraph (3), no carcasses, parts of carcasses, meat or meat food products of cattle, sheep, swine, goats, horses, mules, buffalo, or other equines which are capable of use as human food may be imported into the United States unless tests have been conducted, at the point of entry into the United States, on such carcasses, parts of carcasses, and meat and meat food products, including the internal organs of the animals from which such articles came, to determine whether such articles (A) contain any substance which would be prohibited under this Act if found in a carcass, part of a carcass, meat or meat food product of any animal (referred to above in this paragraph) produced in the United States and capable for use as human food, or (B) contain a level of any substance which is in excess of the maximum level which would be permitted under this Act in a carcass, part of a carcass, meat or meat food product of any animal (referred to above in this paragraph) produced in the United States and capable for use as human food.

(3) Any meat food product consisting in whole or in part of meat from any animal named in paragraph (2) which was processed and packaged outside the United States may be imported into the United States without having been subjected to the tests required under paragraph (2) if the Secretary determines that the conducting of such tests is impracticable. Any such meat food product imported into the United States shall bear labeling in accordance with regulations issued by the Secretary which indicates that such meat food product has been imported into the United States without having been subjected to the tests described in paragraph (2).

"(4) Any carcass, part of a carcass, meat or meat food product which is tested under paragraph (2) and found to be adulterated may be imported into the United States if—

"(A) such carcass, part of a carcass, meat or meat food product is labeled, marked, stamped, or tagged in accordance with regulations issued by the Secretary as 'Inspected and condemned'; and

"(B) such carcass, part of a carcass, meat or meat food product is destroyed for food purposes and is distributed or sold in accordance with regulations issued by the Secretary only for use as fertilizer or other similar purposes.

"(5)(A) The Secretary shall prescribe such assessments and fees on imported meat and meat food products as he determines necessary to cover the costs of inspections, certifications, testing, and labeling (or other marketing) required under this section.

"(B) In establishing the level or rate of assessments and fees to be imposed under this section, the Secretary shall take into consideration the volume of exports, the value thereof, and such other factors as he deems appropriate in order to achieve a fair and equitable allocation of such assessments and fees among exporters.

"(C) The Secretary may suspend or revoke the privilege of any person or plant to export meat or meat food products to the United States if such person fails to pay the assessments or fees for which he is responsible under this section.".

MANDATORY LABELING SYSTEM

SEC. 3. Section 7 of the Federal Meat Inspection Act (21 U.S.C. 607) is amended by adding at the end thereof the following new subsection:

"(f)(1) The Secretary shall establish a system for the labeling of all carcasses, parts of carcasses, meat or meat food products of cattle, sheep, swine, goats, horses, mules, buffalo, or other equines which are inspected under this Act. Such system shall require that—

"(A)(i) except as provided in subclause (ii), all such articles which originate in the United States bear labeling indicating that such articles are 'domestic', and all such articles which originate in a country other than the United States bear labeling indicating that such articles are 'imported'; and

"(ii) any meat food product containing imported meat bear labeling clearly indicating that such product contains imported meat;

"(B) the labeling of all such articles under clause (A) indicate the country of origin of the imported meat or the imported meat contained in the article.

"(2) The Secretary shall provide that the labeling required pursuant to paragraph (1) be affixed to a carcass, part of a carcass, meat or meat product at the time of inspection of such carcass, part of a carcass, meat or meat food product under this Act. If any person

other than the ultimate consumer divides a carcass, part of a carcass, meat or meat food product or breaks a package or container containing a carcass, part of a carcass, meat or meat food product and such carcass, part of a carcass, meat, meat food product, package, or container bears labeling as required by paragraph (1), such person shall affix labeling, as provided in regulations issued by the Secretary, to each piece of such carcass, part of a carcass, meat or meat food product or to each package or container in which any such carcass, part of a carcass, meat or meat food product is placed to provide the information required by paragraph (1).

MANDATORY GRADING REQUIRED

SEC. 4. Section 203(h) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1622(h)) is amended—

(1) by inserting "(1)" after "(h)";

(2) by striking out ", except that no person shall be required to use the service authorized by this subsection"; and

(3) by adding at the end thereof the following:

"(2)(A) In carrying out paragraph (1), the Secretary shall establish and carry out a system for grading the quality of imported carcasses, parts of carcasses, and meat and meat food products of cattle, sheep, swine, goats, horses, mules, buffalo, and other equines which are capable of use as human food. Such system shall provide for the following grades: (i) prime, (ii) choice, (iii) standard, (iv) utility, and (v) such other grades as the Secretary may by regulation establish.

"(B) For purposes of this paragraph—

"(i) the term 'meat food product' has the same meaning as in section 1(j) of the Federal Meat Inspection Act; and

"(ii) the term 'capable of use as human food' has the same meaning as in section 1(k) of such Act.".●

By Mr. HUMPHREY (for himself and Mr. LEVIN) (by request):

S. 906. A bill to authorize certain transactions involving the acquisition and disposal of strategic and critical materials for the national defense stockpile; to the Committee on Armed Services.

STRATEGIC AND CRITICAL MATERIALS TRANSACTION AUTHORIZATION ACT OF 1981

● Mr. HUMPHREY. Mr. President, by request, for himself and the junior Senator from Michigan (Mr. LEVIN), I introduce for appropriate reference, a bill to authorize certain transactions involving the acquisition and disposal of strategic and critical materials for the national defense stockpile.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the bill.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 906

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Strategic and Critical Materials Transaction Authorization Act of 1981".

SEC. 2. There is hereby authorized to be appropriated the sum of $2,140,000,000 for the acquisition of strategic and critical materials under section 6(a) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)).

SEC. 3. The President is hereby authorized to dispose of materials now held in the national defense stockpile established by section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b) which have been determined to be excess to the current requirements of the stockpile in the following quantities:

(1) 1,000,000 pounds of iodine.

(2) 1,500,000 carats of industrial diamonds crushing bort.

(3) 710,253 pounds of mercuric oxide.

(4) 50,000 flasks of mercury.

(5) 6,000,000 pounds of mica, muscovite splittings.

(6) 25,000 pounds of mica, phlogopite splittings.

(7) 139,500,000 troy ounces of silver.

SEC. 4. Any acquisition using funds appropriated under the authorization of section 2, and any disposal under the authority of section 3, shall be carried out in accordance with the provisions of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.).

GENERAL SERVICES ADMINISTRATION,
Washington, D.C., March 19, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith for referral to the appropriate committee is a draft bill prepared by the General Services Administration that would authorize disposal of various materials from the National Defense Stockpile, and authorize appropriation of the disposal proceeds for the acquisition of strategic and critical materials for the stockpile.

The quantities of materials for the disposals have been determined to be excess to stockpile needs.

The Office of Management and Budget advised that there are no objections to the submission of this legislative proposal to the Congress and that the enactment of the bill would be in accord with the President's program.

Sincerely,

RAY KLINE,
Acting Administrator.●

By Mr. DOLE (for himself and Mr. JEPSEN):

S.J. Res. 62. Joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981 as "National Cystic Fibrosis Week"; to the Committee on the Judiciary.

NATIONAL CYSTIC FIBROSIS WEEK

● Mr. DOLE. Mr. President, I take great pride in introducing a resolution that will touch the lives of thousands of American infants, children, and young adults whose lives are being destroyed by a disease called cystic fibrosis. This resolution is very simple in concept—it authorizes the President to proclaim the third week of September of this year as "National Cystic Fibrosis Week"—but its impact will be felt in ways that few of us who have never experienced the pain and trauma associated with this disease could understand.

As chairman of the Senate Finance Committee, I feel a deep and personal responsibility to these young people to build on the good work that we initiated last year with the passage of a similar resolution. By setting aside another special week devoted to the problems and needs of those afflicted with CF, we can facilitate efforts to bring their message to the forefront of the public's attention. It is only by developing a base of knowledge and understanding through public education activities, that we can realize the dream of the conquest of cystic fibrosis.

During the past few years, many of us have had the opportunity to vote for legislation designed to support research into the many aspects of cystic fibrosis. Although medical science has not yet found a cure or long-term control for CF, advances in medications, therapy, and diagnostic procedures have extended the life expectancy of people with cystic fibrosis from 10 years to 21.

The disease is still fatal, but the periods of relative good health have been greatly increased, thereby allowing the person with CF to live a more normal life. Research must continue, but this will be possible only if resources are made available through public and private support.

Last summer I was privileged to have working on my staff a young intern by the name of Keith Jones who suffered from the effects of cystic fibrosis. Not only was Keith a hard worker, but he was an inspiring example of a human being who always managed to find the positive side of life and planned ahead for the future. It is with regret that I have to report now that Keith did not live to fulfill some of the dreams that he had. His life ended earlier this year, but I do not think that anyone who knew him will ever forget the way he touched all our lives.

The resolution that I am introducing today does not require a commitment of Federal funds. It provides only a mechanism by which the Cystic Fibrosis Foundation and other concerned citizens can reinforce their public education efforts. Last year, the foundation used the opportunity afforded by National Cystic Fibrosis Week to disseminate information about the disease to people all over the country through an intense media campaign and special public education activities. The project was a great success, but it was only a beginning. Ignorance continues to prevail to the detriment of those who have the disease and those who have yet to be born with this genetic defect.

Mr. President, I would like to take this opportunity to request that my colleagues join me in the battle to fight cystic fibrosis by cosponsoring this resolution. Many thousands of American children and young adults afflicted with this terrible disease have everything to gain.

At this time, I would like to insert in the RECORD some information about cystic fibrosis which was provided by the Cystic Fibrosis Foundation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Fact Sheet]

CYSTIC FIBROSIS: THE DISEASE AND THE FOUNDATION

For a quarter of a century, the Cystic Fibrosis Foundation has been the leading force in the battle against cystic fibrosis (CF). Although significant progress has been made toward improved clinical and psychological management of CF patients, this disease, the most common genetic killer of children and

young adults in America, remains a mystery. At present, there are no known means of cure, control, to prevent cystic fibrosis. Furthermore, there is no workable method of identifying carriers of the CF genetic trait.

Despite these facts, the outlook for those affected by CF has steadily improved. Through the diligent efforts of the handful of parents, friends, and physicians who founded the Cystic Fibrosis Foundation in 1955, as well as the thousands of people who have become involved since that time, CF is beginning to gain attention and support from both government and private sectors. The best measure of their success has been the doubling of the life expectancy of children born with CF during the last decade. Even with this progress, half the children born this year with CF will not live past the age of 21.

WHAT IS CYSTIC FIBROSIS AND WHAT IS ITS IMPACT?

Cystic fibrosis is a chronic, degenerative genetic disease involving the lungs and the digestive organs, as well as other major organs, of the body. It causes intermittent but progressive debilitation and eventual premature death. It is characterized by a severe cough, extreme shortness of breath, malnutrition, growth retardation, and respiratory and heart failure. CF requires daily, time-consuming, expensive treatment involving both physical therapy and multiplicity of medication. The continued need for care and the knowledge of early death cause emotional stress and severe financial strain on patient and family members, and drain the services and resources of the public and private sectors.

CF is the most common, presently incurable, inherited disorder in the Caucasian population. The disease is genetically transmitted; when both parents carry the gene, each child has a one in four chance of having CF, a two in four chance that he or she will be a symptomless carrier, and a one in four chance to be unaffected. When only one parent carries the gene, none of the children will have CF, but each child has a 50–50 chance of being a carrier. According to current population data, approximately 10 million Americans are asymptomatic carriers of the CF trait, and between 175,000 and 200,000 carriers are believed to be born every year.

It is estimated that cystic fibrosis occurs once every 1,600 to 2,500 live Caucasian births. It is also found in non-Caucasian populations, but with less frequency. There are about 1,600 new cases per year in the United States. Patient information is available from the Cystic Fibrosis Foundation-supported CF Patient Registry, which follows patients treated in over 120 CFF-designated medical facilities—about 13,000 patients. The CFF estimates that there are at least that many individuals outside this system who are undiagnosed, misdiagnosed, or being treated by a physician who is not presently involved with the CFF Centers network.

WHAT ARE THE COSTS OF CYSTIC FIBROSIS?

The annual cost of care for the person with CF is extremely high. Estimates of cost of care for young adult patients exceed $17,000 per year, with some individual expenditures at $50,000 to $100,000 annually in the terminal years. Costs vary among patients because the severity of the disorder itself varies from patient to patient, along with the stage of the disease from diagnosis to death. Even in those instances where costs of health care are lower, they still constitute a severe financial burden for the patient and his or her family. Considering that there are from 13,000 to 30,000 patients with CF, it is estimated that, nationally, the medical costs for caring for CF patients exceed $150 million per year.

It should be noted that these costs are only direct patient care charges and do not include socioeconomic costs due to early death, unemployment, or underemployment, which exceed $500 million annually. Many individuals or families affected by CF are unable to secure health insurance and must turn to public assistance for health care.

WHAT IS THE CYSTIC FIBROSIS FOUNDATION?

The origin of the Cystic Fibrosis Foundation (CFF) can be traced to 1955 with the creation and organization of the National Cystic Fibrosis Research Foundation. Parents and families of CF patients, located in six areas of the country, had already organized locally to publicize the plight of those with the disease, to raise funds, usually for the support of local clinics, and to share personal experiences about their afflicted children.

Representatives from the six geographic areas met in New York City in 1955 to consider the possibility of forming a national foundation committed to finding a cure or preventive measures for CF. What emerged from that meeting was an organization dedicated primarily to research and education, which all recognized was the only hope for control of the disease.

Since that time, the Foundation has grown and developed into one of the nation's leading voluntary health organizations. Although its program structure and administration have changed significantly over time, its goals have remained essentially the same. The mission of the CFF is directed toward ultimately achieving a cure or control for CF by means of basic biological research and clinical studies, and for improving care for those with the disease through support of a network of over 120 Centers across the country. The Foundation promotes and supports education programs designed to alleviate the suffering of CF patients, while implementing courses of action concerned with the personal and societal impact of the disease. Although the primary target is cystic fibrosis, the Foundation activities embrace a concern for other diseases as they relate to cystic fibrosis.

WHAT IS THE STATE OF THE SCIENCE IN CF? WHAT ARE THE HEALTH CARE ACHIEVEMENTS, OPPORTUNITIES AND CONSTRAINTS?

Cystic fibrosis is presently incurable. It is believed to be caused by an inborn error of metabolism, the basic chemical nature of which is not yet understood. No reliable objective technique has been developed to identify the genetic defect in either parents or siblings. In addition, there is no medical procedure available to detect CF in an unborn child, and newborn screening for early diagnosis is plagued by many problems.

Due to improvements in treatment methods and care in recent years, however, the prognosis for patients with CF has changed. An increasing number of children with CF are surviving into their teens and twenties. Data from the Cystic Fibrosis Patient Registry indicate that the median survival time for a child born in 1966 was 11.2 years—a figure which, based on life-table study projections, increased to 21 years for an infant born in 1978. About half of the individuals with CF die between 10 and 20 years of age.

Despite improvements in the management of CF patients during the last two decades, some aspects of the disease have been defined only recently, and in other areas, virtually no new knowledge has surfaced. Not only is there a lack of basic scientific information, but also the environment for CF research is currently limited by a number of resource deficiencies, including:

A shortage of trained scientists and investigators committed to the study of cystic fibrosis;

The absence of adequate, long-term stable funding, particularly from the government sector;

A lack of materials (i.e., tissue samples, animal models, etc.) essential to the conduct of research; and

An inadequate cystic fibrosis data base, including patient characteristics and clinical data.

Therefore, significant progress in improving the clinical management of patients with CF is not likely to occur in the future without a major commitment to research. With such a commitment, current research opportunities offer promise for advances in prevention of cystic fibrosis, early accurate diagnosis, and prevention and treatment of pulmonary, cardiac, and gastrointestinal complications of cystic fibrosis.●

ADDITIONAL COSPONSORS

S. 23

At the request of Mr. DOLE, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 23, a bill to amend the Internal Revenue Code of 1954 with respect to the special valuation of farm property for purposes of the estate tax.

S. 25

At the request of Mr. ARMSTRONG, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 25, a bill to amend title 38, United States Code, to provide a new educational assistance program for persons who enlist, reenlist, or otherwise enter the Armed Forces after December 31, 1980, and a career service person's educational assistance program, and to amend title 10, United States Code, to authorize an educational leave of absence for members of the Armed Forces.

S. 46

At the request of Mr. THURMOND, the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 46, a bill to amend title 5 of the United States Code to permit present and former civilian employees of the Government to receive civil service annuity credit for retirement purposes for periods of military service to the United States as was covered by social security, regardless of eligibility for social security benefits.

S. 142

At the request of Mr. BENTSEN, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 142, a bill to increase the amount of the exemption of certain interest and dividend income from taxation, and to make permanent the exemption of interest from taxation.

S. 144

At the request of Mr. HEINZ, the Senator from Hawaii (Mr. INOUYE), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 144, a bill to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

S. 255

At the request of Mr. MATHIAS, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 255, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatient regulatory requirements prevent the marketing of a patented product.

S. 259

At the request of Mr. GOLDWATER, the Senator from Maine (Mr. COHEN), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of S. 259, a bill to repeal the earnings ceiling of the Social Security Act for all beneficiaries age 65 and older.

S. 287

At the request of Mr. HEINZ, the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 287, a bill to amend the Internal Revenue Code of 1954 to provide a system of capital recovery for investment in plant and equipment, and to encourage economic growth and modernization through increased capital investment and expanded employment opportunities.

S. 441

At the request of Mr. NUNN, the Senator from South Carolina (Mr. THURMOND), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of S. 441, a bill to provide limited assistance by the armed services to civilian drug enforcement agencies.

S. 447

At the request of Mr. RANDOLPH, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 447, a bill to redesignate the days on which Washington's Birthday, Memorial Day, and Columbus Day are celebrated to make each such day a legal public holiday.

S. 451

At the request of Mr. LEAHY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 451; a bill to require Federal agencies to take steps to mitigate losses of United States agricultural land caused by Federal programs or actions, and for other purposes.

S. 491

At the request of Mr. GLENN, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 491, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes.

S. 492

At the request of Mr. D'AMATO, the Senator from Maryland (Mr. MATHIAS), and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 492, a bill to increase the income tax exclusion of dividends and interest received by individuals.

S. 496

At the request of Mr. MELCHER, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 496, a bill to amend the Federal Mine Safety and Health Act of 1977.

S. 597

At the request of Mr. JEPSEN, the Senator from Oklahoma (Mr. NICKLES), the Senator from Wisconsin (Mr. PROXMIRE), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 597, a bill to eliminate the position of elevator operator in the Senate office buildings.

S. 613

At the request of Mr. THURMOND, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 643

At the request of Mr. JEPSEN, the Senator from Maine (Mr. COHEN), and the Senator from Idaho (Mr. SYMMS) were added as cosponsors of S. 643, a bill to amend the Internal Revenue Code of 1954 to provide explicitly for the exclusion of social security benefits from taxable income.

S. 667

At the request of Mr. CRANSTON, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 667, a bill to amend the Social Security Act to extend medicaid eligibility to certain low-income pregnant women and newborn children.

S. 734

At the request of Mr. HEINZ, the Senator from Texas (Mr. BENTSEN), the Senator from Massachusetts (Mr. TSONGAS), the Senator from South Dakota (Mr. ABDNOR), the Senator from Montana (Mr. BAUCUS), the Senator from Colorado (Mr. ARMSTRONG), the Senator from New Jersey (Mr. BRADLEY), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Mississippi (Mr. COCHRAN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Maine (Mr. COHEN), the Senator from Kansas (Mr. DOLE), the Senator from Nevada (Mr. CANNON), the Senator from Illinois (Mr. DIXON), the Senator from Arizona (Mr. GOLDWATER), the Senator from Missouri (Mr. EAGLETON), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), the Senator from New Hampshire (Mr. RUDMAN), the Senator from Pennsylvania (Mr. SPECTER), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Michigan (Mr. RIEGLE), the Senator from Vermont (Mr. STAFFORD), the Senator from Connecticut (Mr. WEICKER), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Vermont (Mr. LEAHY), the Senator from New York (Mr. D'AMATO), the Senator from California (Mr. HAYAKAWA), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Hawaii (Mr. INOUYE), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 734, an original bill to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

S. 857

At the request of Mr. TOWER, the Senator from Montana (Mr. MELCHER), was added as a cosponsor of S. 857, a bill to impose quantitative restrictions on the importation of lamb meat.

S. 858

At the request of Mr. DURENBERGER, the Senator from South Carolina (Mr. THURMOND), was added as a cosponsor of S. 858, a bill to amend the Internal Revenue Code of 1954 to provide estate tax equity for family farms and other enterprises, and for other purposes.

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Utah (Mr. GARN), the Senator from North Carolina (Mr. EAST), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of Senate Joint Resolution 29, a joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as "National Garden Week."

SENATE JOINT RESOLUTION 54

At the request of Mr. HEINZ, the Senator from Utah (Mr. GARN) was added as a cosponsor of Senate Joint Resolution 54, a joint resolution proposing an amendment to the Constitution to protect the people of the United States against excessive governmental burdens and unsound fiscal and monetary policies by limiting total outlays of the Government.

SENATE RESOLUTION 97

At the request of Mr. PROXMIRE, the Senator from Virginia (Mr. HARRY F. BYRD JR.), the Senator from Missouri (Mr. DANFORTH), the Senator from Nevada (Mr. LAXALT), the Senator from New York (Mr. MOYNIHAN), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of Senate Resolution 97, a bill establishing a maximum number of full-time Senate employees and prohibiting the construction of additional office buildings for the Senate.

SENATE CONCURRENT RESOLUTION 16—CONCURRENT RESOLUTION TO DECLARE FAIR HOUSING MONTH

Mr. MATHIAS (for himself, Mr. HEINZ, Mr. TSONGAS, Mr. PROXMIRE, Mr. DIXON, and Mr. METZENBAUM) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 16

Whereas it is the policy of the United States to guarantee to every citizen the right of equal access to housing, and

Whereas this right and the responsibilities attendant on it are set forth in the National Fair Housing Law, Title VIII of the 1968 Civil Rights Act; and

Whereas every year since 1968 the Month of April has been set aside each year for

commemoration of the Fair Housing Law; now, therefore, be it

Resolved, that the Senate (the House of Representatives concurring) Recognizes the month of April as Fair Housing Month and that the Congress of the United States hereby rededicate itself to the promulgation and practice of the letter and spirit of the Fair Housing Law so that fair housing will become a right that can be realized by every American.

FAIR HOUSING MONTH

Mr. MATHIAS. Mr. President, April marks the 13th anniversary of the enactment of the fair housing law, title VIII of the Civil Rights Act of 1968.

April 4 also marks the 13th anniversary of the tragic death of a great leader of the civil rights movement and winner of the Nobel peace prize, Dr. Martin Luther King, Jr.

The concurrent resolution I am submitting today on behalf of several of my colleagues recognizes the month of April as "Fair Housing Month" and recommits the Congress to the goals of the Civil Rights Act of 1968.

Title VIII of the Civil Rights Act prohibits discrimination in the sale or rental of housing because of race, color, religion, national origin, or sex. Over 80 percent of the Nation's housing stock is subject to the fair housing law, while the remainder is covered by the Civil Rights Act of 1866 with respect to racial discrimination.

Title VIII, while espousing the goal of equal access to housing, lacks an enforcement mechanism to provide the means for eliminating unlawful discrimination in housing in the United States.

Because of this anachronism in the law, I, along with Senators METZENBAUM, KENNEDY, WEICKER, GLENN, TSONGAS, PROXMIRE, MOYNIHAN, LEAHY, and BIDEN have again introduced legislation to provide for a speedy administrative hearing process for housing discrimination complaints. This process avoids further clogging the courts and is available at minimal cost to both parties.

The need for this legislation was amply documented in the 6 days of hearings last year by the Senate Subcommittee on the Constitution and in 8 days of hearings by the House Subcommittee on Civil and Constitutional Rights.

A companion fair housing bill passed the House in June of last year by an overwhelming bipartisan margin of 310 to 95.

My colleagues and I who have reintroduced the Fair Housing Amendments Act, S. 570, are hopeful that the bill will have expeditious action by the Senate Judiciary Committee so that we may have ample time on the Senate floor to debate this important civil rights legislation.

Enforcement powers for housing discrimination complaints have been endorsed by every Secretary of Housing and Urban Development since the creation of the Department in 1964.

Yet, here we are 13 years later, with out any enforcement teeth for title VIII of th Civil Rights Act to make its promise of equal access to housing for all Americans a reality.

If our civil rights history has taught us nothing else, it has taught us that justice is poorly served, or not served at all, where civil rights are guaranteed and the means to attain those rights are denied or frustrated.

We need only recall the travesty that poll taxes and literacy tests for decades made of black peoples' constitutionally guaranteed right to vote.

Today, less obvious but equally effective barriers stand between the right of all people to equal access to housing and their ability to achieve equal access. Equal access to justice in this country is a question that transcends political considerations. Justice is not liberal or conservative. Justice is justice. I would hope that my Senate colleagues share this view and will join me in cosponsoring S. 570 and moving that legislation quickly through this body.

SENATE RESOLUTION 109—SUBMISSION OF A RESOLUTION DESIGNATING NATIONAL MIME WEEK

Mr. D'AMATO submitted the following resolution, which was referred to the Committee on the Judiciary:

S. RES. 109

Resolved, that the Senate of the United States show its support and appreciation by proclaiming April 1 through April 7 as National Mime Week in memory of the distinguished American performer Claude Kipnis.

NATIONAL MIME WEEK

● Mr. D'AMATO. Mr. President, National Mime Week was conceived 3 years ago by a group of mime performers in Los Angeles. Senator HAYAKAWA of California first introduced this resolution at that time at the request of the Los Angeles Mime Guild. That year, Red Skelton flew to Washington to participate in the first official ceremonies marking Mime Week. This year's Washington celebration is coordinated and directed by Mr. Joe Jeff of the Wonder Co., and Mr. Gary Young of Archaesus Productions. On behalf of all the talented performers of mime, I respectfully request support for the resolution designating National Mime Week.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON INTERNATIONAL FINANCE AND MONETARY POLICY

Mr. HEINZ. Mr. President, I would like to anounce that the Subcommittee on International Finance and Monetary Policy of the Banking, Housing, and Urban Affairs Committee will be holding a hearing on the reauthorizations of the international affairs functions of the Department of the Treasury for fiscal year 1982 and the Export Administration Act for fiscal years 1982 and 1983.

The hearing will be held at 9:30 a.m., in room 5302 of the Dirksen Senate Office Building, on April 30, 1981.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on International Finance and Monetary Policy, 5300 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information on the hearing, you may contact Dr. Paul Freedenberg at (202) 224–0891.

SUBCOMMITTEE ON WATER AND POWER

Mr. MURKOWSKI. Mr. President, I would like to announce for the information of the Senate and the public that the hearing scheduled for Wednesday, April 8 at 10 a.m. on S. 306, to authorize the construction, operation, and maintenance of hydroelectric powerplants at various existing water projects, has been postponed until Tuesday, April 28, beginning at 2 p.m. in room 3110 of the Dirksen Senate Office Building.

For further information regarding the hearing, you may wish to contact Mr. Russ Brown at 224–5726.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the Committee on Rules and Administration will be holding 3 days of hearings on Senate Resolution 20, providing for television and radio broadcasting of Senate Chamber proceedings. The hearings will be on Wednesday, April 8; Thursday, April 9; and Tuesday, May 5. All three hearings will start at 10 a.m. and will be in room 301, Russell Senate Office Building.

On Thursday, April 9, the committee will also have a business meeting to consider pending legislative and administrative business at 9:30 a.m. in room 301, Russell Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Commerce, Science and Transportation be authorized to meet during the session of the Senate today to mark up the following authorization bills: Coast Guard Authorization Act; U.S. Fire Administration Authorization; title III of the Marine Protection Research and Sanctuaries Act authorizations; Earthquake Hazards Reductions Act authorizations. National Climate Program Act authorizations, and National Transportation Safety Board authorizations.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FOREIGN AGRICULTURAL POLICY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Foreign Agricultural Policy of the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate tomorrow, April 8, to hold oversight hearings on agricultural exports.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee

on Governmental Affairs be authorized to meet during the session of the Senate on tomorrow, Wednesday, April 8, to hear testimony on the nomination of Gerald T. Carmen to be Administrator of the General Services Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CIVILIANS AT MILITARY BASES

● Mr. GOLDWATER. Mr. President, a lot has been disclosed in the press in the last year about the growing shortages of civilians on our military bases. The Association of the U.S. Army has compiled a short paper on this problem, which I submit for printing in the RECORD.

The article follows:

LET THERE BE NO MISTAKE—CIVILIANS MAKE THE ARMY GO

Few people realize how dependent our armed services are upon the civilian men and women who keep the records, maintain the facilities, move the supplies and perform the most intricate maintenance on our increasingly sophisticated arsenal of weapons. If all those civilians were to disappear one day we would have to increase the number of people in uniform by at least 50 percent and would still not achieve the kind of efficiency contributed by a career civilian work force.

Over the past five years the Army has watched its civilian force shrink by about 65,000 as budget-cutters in the Department of Defense and at the White House have opted to take this instant cost savings provided by a personnel cut rather than pay the full price of military readiness. More than a year ago President Carter imposed a hiring limitation which permitted hiring just one new employee to replace two who were lost. That action alone cost the Army more than 1,000 employees a month. Now President Reagan, in his laudable desire to balance the federal budget, has imposed a total hiring freeze that the Army estimates will shrink its civilian work force by 5,000 each month as employees retire or seek other jobs.

There are many evidences of this civilian shortage throughout the Army. One of the most dramatic of these is found in the ability of the Materiel Development and Readiness Command to do its job of developing, procuring, warehousing, shipping and maintaining the Army's equipment. It no longer has enough contracting officers to deal with suppliers. Supplies no longer move through its warehouses at optimum speed and the backlog of major pieces of equipment—tanks, artillery pieces and aircraft, for example—waiting to be rebuilt is steadily increasing.

At Army bases all across the United States the shortage of civilian employees has forced commanders to divert soldiers from military training to perform inescapable housekeeping functions. Army-wide, those diversions amount to something between 25,000 and 28,000 soldiers each day or a cumulative total of about 16,000 man-years. This latter figure, of course, amounts to the total effort of a complete combat division for an entire year. The falseness of this economy is all the more obvious when one recognizes that it is far more expensive to use soldiers in support tasks than it is to employ civilians. We not only pay a price in weakened military training but also wind up paying more for the use of the soldiers because they must be fed and housed as well as paid.

The Army has made a strong plea to the new Secretary of Defense for permission to increase its civilian strength by 10,000 per year for the next three years. The secretary has seemed receptive but there is still a big hurdle ahead in the form of the White House budgeteers. Hopefully, they will see the sound logic in this departure from the federal hiring freeze.●

NRTA–AARP HEALTH POLICY RECOMMENDATIONS

● Mr. PRYOR. Mr. President, rising health care costs continue to be a major drain upon the elderly's income, despite medicare's valuable protection.

In 1980, per capita health care expenditures for the aged averaged approximately $2,500. About 40 percent of this is direct, out-of-pocket expenditures.

Older Americans are deeply concerned about the high cost of health care. Many now fear that they will be financially wiped out by a long-term, costly illness.

This is particularly true for the "old old"—those in their 80's and above— who run a substantially greater risk of being institutionalized.

These points have been made repeatedly to me by older persons in my home State of Arkansas and in other parts of our Nation.

Recently, I had an opportunity to meet and talk with the legislative council for the National Retired Teachers Association and American Association of Retired Persons. We had a frank and informative discussion in which the Council members shared their concerns and recommendations with me.

I sincerely benefitted from their firsthand experience and knowledge.

The council has developed a comprehensive approach to providing quality health care for older Americans and at a price within their reach.

The associations' policies are directed at three major objectives:

Improving the elderly's health;

Containing rapidly rising health care costs; and

Maintaining health and avoiding illness.

The council devoted special attention to two priority areas which are of great concern to me: The need to first, develop appropriate alternatives and options to nursing home care and second, improve the treatment of the mentally ill.

Knowledgeable authorities estimate that 20 to 40 percent of all nursing home residents could receive less intensive and less expensive care in their communities and homes. The harsh reality is that many elderly persons are unnecessarily or prematurely institutionalized at a substantially higher public cost. Most older Americans would prefer to remain in their homes if at all possible. And they can if our health care system can overcome its present institutional bias.

The treatment of the mentally ill is perhaps more than anything else symbolic of our Nation's neglect of older persons. Some experts estimate that only about 20 percent of the elderly who need mental health care actually receive services. Moreover, 30 percent of older Americans who are diagnosed as senile have reversible psychiatric conditions. If they could receive appropriate care, they could become better functioning and productive members of our society.

Mr. President, the NRTA–AARP Legislative Council has developed comprehensive proposals to improve the health care system for older Americans as well as younger Americans.

These recommendations take on added importance as our Nation prepares for the third White House Conference on Aging later this year.

Mr. President, I ask that the health policy statement by the NRTA–AARP Legislative Council be printed in the RECORD.

The statement follows:

HEALTH POLICY

HEALTH AND THE ELDERLY: AN OVERVIEW

The Asociations' health policy is based on three points: first, how best to improve the health of the elderly; second, how best to contain health care costs; and, third, how to focus health policy on the real challenge: how to maintain health and avoid illness.

Defining "health" in terms of the elderly must take account of the special problems that distinguished them from the nonelderly. Our definition focuses on the degree of the individual's functional independence in conducting daily activity. In this context, the elderly's access to treatment for illness is important, but so is their need for those services that will help them remain active and in good health. In addition, such efforts as biomedical research, nutritional and preventive health services and health education, are important if we are to cope with chronic illness as well as prevent and cure those diseases and conditions which disproportionately afflict older persons.

The elderly's special health problems are all the more important because the population is aging. By the turn of the century, the number of elderly over age 85, the most intensive utilizers of health and health-related support services, will have almost doubled to 3.8 million.

The types of services needed to maintain health must be promoted and geriatric medicine must be given far more emphasis—especially in programs of government assistance to medical schools and students.

OBSTACLES TO PROMOTING THE HEALTH OF THE ELDERLY: THE ACUTE CARE SYNDROME

There are obstacles to promoting improvements in the elderly's health status. One is the belief that all needed levels of care can be supplied through the present medical system. Another is escalating health care costs and the country's limited resources. A third obstacle is that health services available to the elderly are usually overlapping, confusing, fragmented and unevenly distributed.

Today's health care system is concerned almost exclusively with treatment of illness and acute care intervention. Since health status is affected far more by nutrition, housing, lifestyles and environment than by medicine, it makes little sense for the nation to allocate an increasing portion of its scarce resources to medicine for the treatment of illness after the fact. Yet that is precisely what is happening.

Because of the structure and economics of the health care system, minimal or even negative growth rates in the economy do not constrain the proportion of resources allocated to the treatment of illness in acute care, institutional settings. Health care services are taking a larger and larger share of the nation's total resource "pie," rising from 6.7% of GNP in 1967 to 9.5% in 1980. If

more resources are to be allocated to more health-effective and cost-effective measures and less to purely medical care, the health care industry must be restructured.

THE HEALTH CARE INDUSTRY: ITS GROWTH, STRUCTURE AND SHORTCOMINGS

The health care industry is one of the nation's largest economic sectors. Since Medicare began, health spending has increased at an average of 12.2% per year while the economy as a whole has grown at an annual rate of only 9.0%. In 1979, health spending totalled $212 billion—12.5% above 1978 levels.

The rapid growth of this economic sector has been due partly to the expansion of the number of elderly persons who, as a group, need and utilize health services far more than the non-elderly. However, adding much more to demand for medical services has been the expansion of the third-party payment system. By 1979, third-party payments accounted for slightly over two-thirds of personal health care expenditures, 92% of hospital expenditures, and 64% of expenditures for physician services. This growing demand for medical services has more than been met through a 50% expansion of hospital capacity, hospital personnel, and health care professionals since 1960.

Government has subsidized both the demand and supply sides of this growth. On the demand side, growth of the private third-party payment system has been promoted by the tax laws. In the current (FY '81) fiscal year, revenue loss to the U.S. Treasury as a result of the exclusion from taxable income of both employer and employee health insurance premium payments will total approximately $19 billion. In addition to this study, Blue Cross/Blue Shield plans are tax exempt in most states, further facilitating the public's purchase of high-option, first dollar health insurance coverage. On the supply side, hospital expansion has been stimulated by the Hill-Burton program and by the tax exemption of hospital construction bonds. Federal spending for the training of health professionals totalled $5 billion between 1964 and 1976.

Government subsidies to increase the supply of medical facilities, services and personnel were expected to moderate health care costs. However, because the third-party payment system insulates providers from cost considerations and makes patients sensitive only to the costs for which they are responsible, there is little restraint on the rate of increase in the charges of providers or the costs they incur. Moreover, physicians tend to overutilize hospitals, the most expensive component of the medical care system, and this overutilization is promoted by the third-party payment system which reimburses hospitals for virtually all costs incurred but does not cover costly, out-of-hospital services.

CONSEQUENCES FOR THE ELDERLY OF THE CURRENT HEALTH CARE INDUSTRY STRUCTURE

As a consequence of the structure and economics of the health care industry, over recent years, medical costs in general and hospital costs in particular have been growing much faster than prices in general. Between the years 1965 (before Medicare was in effect) and 1979, the nation's total health bill far outstripped the general rate of inflation, more than a quintupling of total costs in 14 years.

In 1980, the per capita health care bill for all persons averaged $1,078, an amount which has increased 396 percent since the inception of Medicare in 1965. For the elderly, however, the per capita health bill averaged approximately $2,500, an amount which has increased 525 percent over the same period.

While the rapid escalation in health care costs has increased the per capita health bill of the elderly, the Medicare program pays a smaller share (38 percent) of that bill than it did when the program first began. The elderly now pay 43 percent of their annual health bill out of pocket. One reason for this situation is that less than half (46 percent) of physicians participating in Medicare Part B (Supplementary Medical Insurance) are willing to accept "assignment" (i.e., accept as payment in full whatever Medicare determines to be the reasonable charge for the service or procedure provided). In fiscal year 1979 the difference between the amount of unassigned Part B claims submitted by the elderly patients and the amount Medicare actually reimbursed totalled $1.1 billion—an amount for which the elderly themselves were responsible.

To get physicians to accept assignment under Part B of Medicare requires at a minimum a simplified and uniform claims form, multiple billing listing of patients, small ($2–3) processing fees to physicians, and expedited claims processing for those physicians willing to accept assignment. Other approaches may include payment of Medicare "reasonable" fee determinations directly to physicians with Medicare collecting from the patient the 20 percent co-insurance and any applicable deductibles.

Also contributing to the elderly's large out-of-pocket expenses is the lack of or incomplete Medicare coverage for a broad array of health services and products, including custodial nursing home care; out-patient prescription drugs; dental care; home health care; eyeglasses (and examinations); hearing aids (and examinations); and routine physical examinations as well as most other preventive health services. At the same time, private health insurance covers only 6% of total per capita expenditures.

To relieve the elderly from the rapidly rising out-of-pocket expenses, gaps in the Medicare benefit package should be closed. A severe reduction in provider fraud and abuse (see subsequent discussion) could help pay for the extension of Medicare's current benefit package to include at least some of the non-covered items and services cited above. Going further, a Medicare Part C program covering such items and services could be enacted with the costs financed from a monthly premium similar to the current Part B premium ($9.60 per month), federal general revenues and/or an increased federal excise tax on tobacco and alcoholic beverages.

NEW DIRECTIONS FOR THE ELDERLY

Despite the vast sums being funnelled into health care for the elderly, major health needs are not being met. As the elderly population grows, the problem of meeting those needs will become critical. Restructuring the health care industry must be the means for controlling costs and the means for developing a comprehensive, efficient, and rational system to accommodate these unmet needs.

A properly restructured system should include such components as: (1) adequate, supervised residential facilities for those wishing to remain in their communities; (2) a range of facilities and services to provide alternatives to hospitals and nursing homes; and (3) innovative and compassionate means of caring for the terminally ill outside of the hospital or nursing home. If needed new services are to be promoted, however, the rate of expansion of the medically oriented health industry must be checked.

Over the years the Associations have consistently supported the enactment and implementation of a national health insurance program (NHI) that would carry out a complete restructuring of how health care services are delivered and financed. The ultimate objective of such a program should be the availability of adequate health care for all Americans based on need rather than on ability to pay. The NHI program we seek should contain these following essential elements:

(a) more primary health care providers, with a shift in emphasis and resources away from institutionalization and acute care services and toward preventive medicine and home health care;

(b) standards for increasing the quality and efficiency of health care;

(c) competition among providers, with profit incentives to lower costs;

(d) comprehensive benefits, including a coordinated system of long-term care services, with universal and mandatory coverage;

(e) immediate reforms in payment systems, including prospective, negotiated rate (or fee) setting for institutional care and physicians' services;

(f) financing by a combination of savings from strong cost containment legislation; employer-employee payroll taxes; increased excise taxes on alcohol and tobacco; and general revenues;

(g) a patient-oriented health care system with majority representation of consumers on policy making and administrative boards; and

(h) maximum concentration of program administration at the local level with federal and state public authorities limited in size and scope to providing budgets, guidelines, technical assistance and aiding enforcement of statutory limitations.

Because of the deteriorating situation, a restructuring of the health care system should be undertaken immediately utilizing step-by-step changes in the current financing and service delivery mechanisms. Given the extraordinarily rapid escalation in health care costs, it will only be from the substantial savings that can be generated from eliminating waste, duplication and inefficiency in the current system of medical care and from stringent cost containment that we can expect to improve health status while devoting no greater real share of the federal dollar and no greater portion of the nation's resources to the health care sector.

In this context, it is important to note that the Associations have opposed the many "quick-fix" catastrophic health insurance proposals that have been advanced to date. Usually incorporating provisions to enhance "consumer choice" (a euphemism for greater cost sharing) and health care competition while providing some degree of protection against "catastrophic" illness, these proposals have offered very little for the elderly. Not only do they ignore the major cause of catastrophic health expenses for older Americans—the cost of nursing home care—but they are likely to increase substantially the demand for costly acute care (institutional) services and further escalate the health care cost spiral. These proposals seem to ignore the fact that the elderly-like most other consumers—are ill-equipped to make rational, cost conscious purchasing decisions in the absence of comparative cost, quality and performance information. Such information for the most part continues to be denied consumers by providers hiding beneath the cloak of confidentiality.

THE GOVERNMENT'S ROLE IN CONTROLLING HEALTH CARE COSTS

Despite government efforts to control costs and spending by regulating the health industry, little success has been achieved because the powerful economic incentives contributing to the growth of health care spending have overwhelmed the regulatory effort.

Since a large part of the industry's billings are fully reimbursed, experiments have been undertaken to pay hospitals on the basis of prospectively approved budgets. While 26 states have adopted various prospective rate setting programs for reimbursing hospitals, only six states have implemented programs with strong mandatory controls. For those six states, hospital rates increased 11.2% a year from 1976 to 1978 while the 44 remaining states were experiencing rates of increase of 14.3% per year.

In view of their performance, the Associations continue to advocate the establishment of state mandatory rate review programs.

In comparison to the degree of success achieved in those six states with strong programs for containing costs, the hospital industry's own Voluntary Effort (VE) program has been largely ineffective. Statistics indicate that for 1980, the annual rate of increase in in-patient hospital expenditures was 15.1 percent, well above the VE's own goal of 11.1 percent and above *all* other items measured by the CPI. Based on third quarter 1980 data, hospital charges rose at an extraordinary 16 percent annualized rate compared to a 6.6 percent annualized rate for the all-items CPI.

While reducing hospital utilization and the number of hospital beds may be the only long range way to reduce the rate of increase in hospital costs, certainly improvements in hospital management practices such as shared services, joint purchasing, energy conservation and individualized testing procedures should be encouraged as short-term means for restraining costs. Permitting Medicare to participate fully in existing as well as new rate setting programs would also help restrain costs. Currently, the Health Care Financing Administration (HCFA), which administers Medicare, has only limited authority in this regard.

As another means for containing health care costs in the short term, both federal and state governments should do more to control and eliminate provider fraud and abuse. Although kickbacks, rebates and fraudulent billings—and the costs of these practices—have been well-documented, only 28 fraud control units have been established at the state level (under the 1977 Anti-Fraud and Abuse Amendments). The number of these units should be expanded and federal and state governments should complement this strategy by awarding competitive, fixed price contracts for such items as lab services.

The potential effectiveness of other federal and state efforts to control health care costs in the short or long term remains a matter of conjecture. For example, Professional Standards Review Organizations (PSROs) were established to assure that the services provided are medically necessary, professionally acceptable and provided in the most economical manner. Unfortunately, this "peer review" method of regulation is itself costly and the results are still inconclusive as to its net effectiveness in reducing costs.

In another effort, the 1974 National Health Planning and Resources Development Act led to development of a nationwide network of 205 local Health Systems Agencies (HSAs) and 57 State Health Planning and Development Agencies (SHPDAs) which are supposed to control the expansion of costly institutional health services, facilities and equipment by requiring "certificates of need."

The program appears to have slowed down the creation of unneeded hospital beds and the addition of ever more expensive and underutilized equipment. A recent survey by the American Health Planning Association found that, of the $8.4 billion in capital projects that were reviewed by reporting HSAs, $1 billion (or 11.9%) were disapproved. Of even greater significance may be the extent to which projects were discouraged or modified by HSA review prior to formal submission.

While the record of health planning efforts thus appears favorable, certainly more needs to be done. The Associations will continue to support the development of a more effective health planning network because we believe it has the potential to achieve the kind of change in the health care system that takes into account the concerns of all interested parties. Although the elderly have been underrepresented on health planning governing bodies, this deficiency can and should be addressed. Also, effective steps should be taken to assure that those elderly who serve on such bodies are adequately trained.

Because government regulations has accomplished much less in terms of restraining the rate of increase in health care costs and spending than was expected, increased attention is being given to new and less costly ways of delivering health services. Health Maintenance Organizations (HMOs), for example, have demonstrated significant cost savings potential. Their emphasis on prepayment, budgeting, preventive medicine, consumer education and health maintenance techniques have reduced costs. Given the record of success of HMOs legislation should be enacted to encourage greater numbers of Medicare beneficiaries to enroll in pre-paid HMO-type health plans.

COST CONTAINMENT: THE KEY TO PROGRESS

To restrain the rate of increase in conventional health care spending, the following cost containment strategy should be pursued. First, the economic incentives that are causing excessive expansion of conventional medical facilities, particularly hospitals, should be removed; and capitation grants to medical schools should be phased out in light of expected surpluses of physicians in most areas. Second, the rate of increase in hospital expenditures and physician fees should be capped to "free up" resources for other, more health-effective uses. Third, health care service delivery should be restructured away from acute care institutional settings to make available more needed but less costly services (e.g., home health services). Fourth, government regulatory programs with the potential to yield significant savings should be promoted along with effective measures to develop competition in the health care industry.

To help remove the economic incentives which have caused the explosive expansion of the supply of medical facilities and physicians, the Associations recommend the following steps:

(a) phase out tax breaks that promote the excessive expansion of hospitals;

(b) eliminate blanket tax deductions for medical insurance premiums paid by employers if the insurance fails to cover outpatient and other lower, less costly levels of care as well as provide multiple health insurance options including at least one prepaid plan or HMO (where available);

(c) stop cost-plus reimbursement under government health programs and cease employing provider-linked intermediaries/carriers in making disbursements;

(d) implement prospective budgeting, negotiated fee schedules and regional intermediaries (on the basis of competitive, fixed price contracts);

(e) do not exempt health/medical insurance corporations from antitrust laws and abolish any state or federal antitrust exemptions of medical institutions;

(f) regulate all corporations selling medical/health insurance to eliminate duplication, encourage competition, and do away with fraud and abuse in the sale of supplemental Medicare (i.e., "Medigap") insurance policies; and

(g) subsidize the training of only those health professionals who agree to work in medically underserved areas and provide incentive grants to health profession schools to encourage training and curriculum development in geriatrics; particular attention should, however, be paid to the serious shortage of nursing personnel in many nursing homes.

As stated above, the second element of the containment strategy calls for caps on the rate of increase in hospital expenditures and physicians' fees. A major part of the effort to contain health care costs must focus on negotiating—or, if necessary, mandating—less generous rates of provider reimbursement.

Hospitals have registered cost increases in excess of 12.0 percent annually for the last decade. As for physicians, they have been increasing their fees at rates far in excess of the general rate of inflation for far too long while maintaining target incomes. Strict limits on hospital growth must be imposed until surplus hospital beds are eliminated and the rate of increase in hospital expenditures is brought into line with average economic growth rates. Similarly, restrictions on physician fees must be implemented until the rate of increase in physicians' income is brought into line with that of nonmedical professionals.

The third element of the containment strategy—restructuring health service delivery—should have the effect of expanding the supply of needed services that are less costly alternatives to hospitals and nursing homes. To achieve this objective, competing forms of health care delivery such as HMOs, small clinics and ambulatory health care facilities of all kinds should be promoted to the extent possible. Greater use should also be made of para-medical personnel (for example, geriatric nurse practitioners and physician assistants)—especially in underserved rural and inner-city areas and in such neglected institutional settings as nursing homes. For the elderly, this kind of restructuring would mean better access not only to conventional medical care but also to a variety of needed non-medical, social services like homemaker/chore maintenance services and counseling services.

As for the fourth element of the containment strategy, those government regulatory efforts that have potential to be effective should continue to be supported. As evident from the earlier discussion, the results of those efforts to date have been decidedly mixed. However, the one bright spot in the regulatory effort has been the success achieved by some state through mandatory, prospective budgeting and rate setting in conjunction with certificate-of-need programs. These state efforts should be supported and expanded.

THE MAJOR DEFICIENCY IN THE EXISTING HEALTH CARE DELIVERY SYSTEM—THE LACK OF A COMPREHENSIVE LONG TERM CARE PROGRAM

From the elderly's point of view, the lack of a long term care (LTC) system that encompasses both medical and social services is the greatest deficiency in the present health care system. The elderly's access to long term care is restricted by the non-availability of services and qualified personnel, especially community and home based care, and by their inability to pay for the services if they are available.

The implications of demographic trends for long term care policy are significant since the elderly have the highest incidence of functional disability. Demand for long term care services is increasing. Yet, current demand is not even being met. Of 8 million persons estimated to be in need of assistance with daily activities, only 2.3 million currently receive long-term care under government programs. Compounding this problem is the inability of nursing homes to attract and retain skilled nursing staff. Estimates range from a 40–60 percent shortfall nationally in our nursing homes.

Over half of all nursing home costs in 1979 were paid from private sources; 46% of these costs were paid out-of-pocket. The average annual cost of a nursing home stay in 1977 was $9,614. The private pay patient, however, may be charged from 20 to 30% more than the publicly supported (mostly Medicaid) patient. It is no wonder that nursing home care is the main source of "catastrophic" health expense for the elderly. These costs constitute the single largest

health expenditure for the elderly or fully 35% of the $60 billion spent in 1980. Since Medicare currently covers less than 3% of this total nursing home bill (which was $21.6 billion in 1979), the elderly must rely on their own resources until those are depleted ("spent down") to the point where they become eligible for Medicaid assistance for nursing home care.

To the extent long term care is available, it is based almost exclusively on institutional services which continue to consume the vast majority of available resources and make it very difficult to initiate or expand an integrated and community-based service system. Part of the problem is that Medicaid and Medicare, despite last year's home health benefit liberalizations, are still clearly biased against home and community-based services. If an adequate supply of sheltered living arrangements, congregate housing, homemaker/home health care and other community-based services were available, an estimated 20 to 40 percent of the present nursing home population could be cared for in less intensive and less expensive ways. The ultimate goal therefore should be a long term care program which provides a complete continuum of care and creates in the process a network of community-based centers that would function as providers, payers, certifiers and evaluators of services.

The Associations have endorsed two proposals that would move in the direction of establishing such a program for the nation. The first would, by adding a new Title XXI to the Social Security Act, create a ten-State demonstration project that would consolidate and make available a broad array of health and supporting social services (e.g., home health, day care, respite care, and homemaker/chore services). This proposal would also implement a comprehensive pre-nursing home admission and assessment procedure for persons who are "at risk" of nursing home placement. The second proposal (called the Medicaid Community Care Act) would increase federal Medicaid matching payments to those states which create and/or develop non-institutional, community-based long term care services as an alternative to institutional care. This proposal would also require a comprehensive pre-admission assessment of persons who are Medicaid eligible and at risk of institutionalization.

Although the fate of these legislative proposals is uncertain in view of economic and federal budgetary constraints, certainly some modest steps should be taken toward achieving a long term care program for the nation. For example, with respect to home health services, Medicare's "homebound" and "skilled care" requirements should be eliminated and coverage of homemaker/chore services should be provided. In addition, a comprehensive pre-nursing home admission screening and assessment program for potential nursing home residents should be established. To facilitate access to a broader range of long term care services, Medicare beneficiaries should be encouraged to enroll in HMOs and similar alternative delivery systems. Finally, credits against federal income tax liability should be established to provide meaningful incentives for taxpayers to care for their dependent elderly in the home and to utilize elderly day care facilities.

"MEDIGAP", MENTAL HEALTH AND OTHER HEALTH POLICY ISSUES

Fraud and abuse in the sale of insurance policies (Medigap) to supplement Medicare are widespread and well documented. In the absence of effective state action and in the presence of gaps in Medicare coverage, the Associations fought successfully to secure the enactment last year of a voluntary program of federal certification with minimum standards (minimum loss ratios, no-loss cancellation provisions, standards for renewability, etc.) to govern the advertising and sale of Medigap policies. A special panel is now evaluating state statutes and guidelines to determine which state regulatory programs already meet or exceed these enacted standards. For those that do not, starting July 1, 1932 companies selling policies in these states may request federal certification. Should this legislation fail to prompt appropriate state action, additional legislation mandating federal certification of Medigap policies may be necessary.

Another area where health care policy has responded inadequately to the elderly's needs is in the area of mental health. The National Institute of Mental Health has estimated that during 1980 approximately 80 percent of the elderly who needed such care and assistance did not receive it. Moreover, as many as 30 percent of those older Americans described as "senile" actually have reversible psychiatric conditions, which if treated, would allow them to become better functioning members of society.

With respect to mental health services, there should be two goals: access to services—especially community-based services—and the avoidance of inappropriate institutionalization. To achieve these goals, comprehensive mental/physical geriatric assessment units should be established to prevent needless institutionalization and facilitate appropriate placement of the mentally infirm. This should yield savings for Medicare by reducing present levels of hospitalization. Also, changes must be made in Medicare so that community mental health centers (CMHCs) will begin to serve the elderly. Such changes should include extending Medicare provider status to CMHCs, increasing the present $250 Part B annual ceiling on outpatient mental health services to at least $1,000, eliminating the 190-day lifetime limit on inpatient psychiatric care under Part A, and incorporating periodic reassessment requirements for Medicare patients with staff utilization review requirements for CMHCs and other providers.

Progress in the mental health area was made last year with passage of the Mental Health Systems Act of 1980. Among other things, the Act will make funding available to support a broader, more coordinated range of community-based mental health services to the needy and elderly and to link the nursing home to the mental as well as physical health care delivery systems.

In response to demographic trends and an aging population, an explicit strategy for the delivery of geriatric medical care and health services to the elderly should be adopted. To facilitate this objective, health manpower monies should be appropriated for the establishment and operation of educational programs in geriatrics at schools of medicine and the other health professions.

Finally, the propriety of public disclosure of information by PSROs has been called into question. The Association believe that disclosure and dissemination of this information is essential to carry out the puposes of the PSRO porgram, assist in identifying fraud and abuse, and facilitate health planning activity. It is our belief that there is a pressing need for a greater degree of patient information and education concerning the relative costs and performance of health care providers, especially if we are to attempt to bring greater competition to the health care market place, heighten consumer cost consciousness and hold down health care costs.●

SUBPENA REPORT

● Mr. PERCY. Mr. President, today I am filing on behalf of the Committee on Foreign Relations a report explaining the committee's decision not to pursue its subpena of January 12 for a log of Presidential tape recordings compiled by the National Archives. That subpena was issued in connection with the committee's consideration of the nomination of Secretary of State Alexander Haig and related to conversations in 1974 between former President Nixon and Mr. Haig, when the latter was serving as White House Chief of Staff. On January 19 the Archivist of the United States, Dr. Robert Warner, informed the committee that, according to his own interpretation of his responsibilities under the laws of the United States, he was unable to provide the committee with the subpenaed log.

In particular, Dr. Warner cited his responsibilities under the Presidential Materials and Recordings Preservation Act of 1974 as precluding his compliance with our subpena.

On February 24, the committee resolved by a vote of 11 to 6 not to seek enforcement of its subpena and to issue a report explaining its decision. That report reflects the views of all members of the committee.

Mr. President, the committee report speaks for itself as to the actions taken by the committee and our reasons for not carrying the matter further. I simply wish to thank the members of the committee for the careful and deliberate way in which this entire matter has been considered, and to thank those people whose wise counsel to the committee was invaluable over the past several months. In particular, our former distinguished colleague, Jacob K. Javits, agreed to assist us as a special counsel during the Haig hearings and supervised the committee's handling of these difficult issues. Jack Javits was indispensable and we owe him a deep sense of gratitude.

The committee is also indebted to a series of special counsel, Fred Thompson and Michael Madigan for the majority, and Henry Schuelke and Robert Bennett for the minority, who managed throughout those long and difficult proceedings to maintain an effective working relationship.

Mr. President, I think the committee's decision, as explained in its report, is the appropriate resolution of the issue raised during the course of the Haig hearings. While we do not necessarily accept the arguments given by the Archivist for withholding the materials in question, we did not think it necessary or appropriate to involve the entire Senate and the Federal courts in a prolonged effort to enforce our subpena.

I ask that the report be printed in the RECORD.

The report follows:

REPORT OF THE COMMITTEE ON FOREIGN RELATIONS

The Committee on Foreign Relations resolved by roll call vote on February 24, 1981 not to pursue its subpoena of January 12, 1981 for a National Archives log of Presidential conversations. The vote in Committee was eleven to six, with Senators Percy, Baker, Helms, Hayakawa, Lugar, Mathias, Kassebaum, Boschwitz, Pressler, Pell and Cranston voting for the resolution, and Senators Biden, Glenn, Sarbanes, Zorinsky, Tsongas, and Dodd voting against it. The Committee also resolved to issue a report ex-

plaining its decision not to pursue the matter into court and authorized the Chairman and Ranking Minority Member of the Committee to agree upon the exact language of that report. This report has been prepared in accordance with that procedure.

The Senate Commitee on Foreign Relations does not accept the objections of the Archivist of the United States to its subpoena of January 12, 1981. However, the Committee has determined not to pursue enforcement of the subpoena. Enforcement might involve the Archivist in a contempt of Congress proceeding, which the Committee has concluded would be inappropriate under the circumstances of this case. More importantly, it is the judgment of the Committee that protracted enforcement proceedings would not be in the best interests of the Congress and the country.

In anticipation of Senate confirmation hearings on the nomination of Alexander M. Haig to be Secretary of State, the Committee on Foreign Relations commenced an inquiry with respect to General Haig at the end of the 96th Congress. As part of that inquiry, the Committee concluded that they should consider the relevance of certain materials bearing on the prospective nominee's service as White House Chief of Staff under former President Richard M. Nixon. The Committee sought to obtain an index of the tapes of conversations between President Nixon and General Haig. Those tapes are under the control of the National Archives and Records Service, headed by Robert Warner, Archivist of the United States, pursuant to the Presidential Materials and Recordings Preservation Act, Pub. L. No. 93-526, 44 U.S.C. § 2107n.

On January 12, 1981, pursuant to a decision by the Committee the previous day, Senator Percy, as Chairman, issued a subpoena directing Dr. Warner to produce a log of the conversations between President Nixon and General Haig from May 4, 1973 to July 18, 1973. This log had previously been prepared by the Archivist in an effort to facilitate identification of, and access to, the underlying materials. The subpoena for the log was issued while extensive hearings on the nomination, held by the Committee between January 9 and 15, 1981 were still in progress.[1]

As part of his responsibilities under the Act, Dr. Warner notified Mr. Nixon of the requests and subpoena, and on January 16, Mr. Nixon objected to the production to the Committee of the subpoenaed log. On January 19, 1981 Dr. Warner declined to produce the subpoenaed log. He informed the Committee by letter that while he had concluded that in almost every instance Mr. Nixon's objections were "either meritless or insufficient to prevent compliance with the subpoena," he nevertheless considered it his responsibility "to examine the nature of the congressional action and the nature of the materials being sought and to weigh the respective public interests which are served by protection or disclosure." He asserted that the Committee's exercise of its oversight function was "uncertain" and "open-ended", and in any event the log would be of "minimal value" for the Committee's purpose. Finally, he concluded that the ultimate release of the requested material would involve protracted litigation.

While the Committee acknowledges that there is a substantial issue concerning the interpretation of the Presidential Materials and Recording Preservation Act which governs access to the materials in question, the Committee cannot accept the Archivist's interpretation of the Committee's own jurisdiction in this matter. In its Resolution of January 15, 1981 the Committee expressly invoked its general oversight responsibilities for continuing its investigation after recommending confirmation of General Haig. Such investigations are consistent with historical practice. Since the investigations of Secretary of the Treasury Wolcott in 1800 and President Monroe in 1825, Congressional committees have probed allegations bearing on the continuing fitness of high executive officials for office.

Moreover, Congressional authority to examine an official's conduct in a prior office has been clear since 1826, when a committee investigated Vice President Calhoun's conduct in his prior post as Secretary of War.[2] And the relevance of prior conduct to an official's fitness to continue to serve in a position for which he had previously been confirmed by the Senate was recognized as recently as 1977, when the Senate Committee on Governmental Affairs investigated the conduct of Bert Lance, Director of the Office of Management and Budget. The Senate Committee derived its jurisdiction to conduct that inquiry both from its oversight responsibility, and its right to determine the validity of information received during the confirmation hearings.[3] The Lance inquiry, resulting in the resignation of the OMB Director, constitutes a clear example of the fundamental role of Congressional oversight investigations, regardless of whether they may appear at the outset to be "uncertain" or "open-ended."

Furthermore, the subpoena was a narrow one, seeking only the log of taped conversations rather than the tapes themselves. Indices such as that log should be furnished freely, even when the underlying indexed materials are assertedly privileged, so that further discussion, negotiation, and litigation over access can take place on an informed basis.[4] Finally, General Haig himself indicated that he had no objection to Committee access.[5]

But even assuming, as we do, that the issuance of the subpena was a reasonable first step in the effort to obtain material relevant to the inquiry, the Committee is now faced with the more difficult and far reaching question of whether to seek its enforcement. In this connection, the Committee observes initially that while some materials have been received from the Executive Branch, Mr. Nixon has continuously refused to waive his claims of privilege, and has by his actions and representations through his counsel expressed his determination to resist the release to the Committee of the material requested. For example, even though the subpena issued by the Committee was limited to an index of the conversations between former President Nixon and General Haig for the period May 4, 1973 through July 18, 1973. Mr. Nixon has made it clear that he will take full advantage of the opportunities available through litigation to prevent the Committee from obtaining it. It therefore appears that lengthy litigation would be required to obtain the index and that further litigation would be necessary to obtain any tapes determined from the index to be relevant to our responsibilities.

We are further mindful of the fact that issues of withholding information by the executive are traditionally resolved through the political process rather than through litigation. In this way, the resolution of such disputes reflects the popular will, expressed through the democratically elected branches, as well as the need for flexibility in the internal decisionmaking of the government. Judicial action should be reserved as the last resort in disputes between the branches.

Where Congress has in the past resorted to judicial action, the most common method of enforcement has been by way of contempt proceedings. In the Committee's view, however, this method would be most inappropriate in this instance, where the Archivist is acting in good faith, pursuant to his statutory responsibility to evaluate a claim of privilege asserted by Mr. Nixon. While the Committee does not accept the objections of the Archivist, it nonetheless has concluded that it would be unseemly to subject him to contempt proceedings under these circumstances.

As an alternative, the Committee might file a civil action to enforce its subpoena. However, upon consultation with the Office of Senate Legal Counsel, it appears to the Committee that such a civil suit would likely become embroiled in collateral disputes over issues of jurisdiction and justiciability, as such suits have in the past. By filing such an action, the Committee would thus confront complex and protracted litigation on issues not germane to the Committee's immediate inquiry—General Haig's qualifications to serve as Secretary of State. These difficulties may be compounded since the Archivist has represented that the index is itself misleading, and that the relevance of indexed materials to the Committee's inquiry is not apparent from its face. Further subpoenas and enforcement actions might therefore be anticipated.

The Committee continues to believe that issuance of a subpoena to obtain the archival log of White House tapes was a reasonable and justifiable step to obtain materials then considered relevant to its inquiry. Most Committee members also regarded that step as a limited one, leaving open the question of whether additional action would be taken in the event the subpoenaed material was not forthcoming. It was also recognized that a decision to pursue the matter in court would ultimately have to be made by the full Senate.

The Committee subsequently judged that confirmation of Secretary Haig should not be delayed by the effort to obtain additional information. The full Senate also apparently concluded that access to the subpoenaed material should not be a condition precedent to his confirmation, voting on January 21 to give its advice and consent to Secretary Haig's nomination by 93-6.

Litigation undertaken at this time would therefore represent a new and probably protracted phase of Committee action. Approval of the full Senate would be required to enforce the subpoena in court. The Committee has had to consider whether under present circumstances such a recommendation to the Senate would be justified. Our conclusion is that the Committee, the Senate, and the Nation would be better served by not pursuing the matter into court.●

[5] *Nomination of Alexander M. Haig*, supra, n. 1, at 29:

Sen. TSONGAS. Above all I would like to inquire, in that spirit of symbolic openness, as to whether General Haig would be opposed to the issuance of the subpoena.

General HAIG. Senator, I have no objection, no concern for access by the Committee or the Committee staff to any document, manuscript, memorandum of conversation, or sworn testimony that would shed further light on the performance of my past service to my country.

MANIFEST DESTINY

● Mr. HEFLIN. Mr. President, at this very moment the Space Shuttle Columbia stands poised on its launch pad at Cape Canaveral undergoing the final days of the countdown pointing toward its maiden voyage Friday, April 10, 1981. This massive and complex machine stands as a monument to American science and industry and represents this Nation's commitment to the conquest of space. When those mighty engines lift that incredible combination aircraft and spacecraft from the launch pad, the attention of the Nation, and indeed the world, will be fixed on that launch platform. As the Acting Director of NASA, Dr. Alan M. Lovelace, stated recently when testifying before the Subcommittee on Science, Technology, and Space of the Senate Commerce Committee:

We are on the verge of a new era of space transportation as we prepare for the imminent first launch of the space shuttle. In providing routine economical access to space, the shuttle will allow us to exploit further the unique space environment for expanded benefits in communications, weather, resource observations, science and space processing of new materials.

The Space Shuttle also has significant military applications which will enhance this Nation's defense posture.

Not since the lunar program has the space program so captured the attention of the American public as we wait with a sense of excitement for the maiden flight of Columbia. Moreover, the flight of the Columbia has captured the imagination of America's leading novelist, James A. Michener. Mr. Michener has published in the April 1981 issue of Omni magazine an article entitled "Manifest Destiny." As his readers know, Mr. Michener is a great intellect who can inspire and bring understanding about many topics. In his article, Mr. Michener has explained the drama and importance of the Space Shuttle in a superb manner. As Mr. Michener sums it up, "the Shuttle is a daring experiment, precisely the one we should be making now."

Mr. President, I would like to share Mr. Michener's interpretation of this event with my colleagues here in the Senate and with the citizens around this Nation who might not be subscribers to Omni but who regularly read the CONGRESSIONAL RECORD.

I ask that the article by Mr. James A. Michener entiled "Manifest Destiny," as published in the April 1981 Omni magazine, be printed at this point in the RECORD.

The article follows:

MANIFEST DESTINY

(By James A. Michener)

In America's exploration of space, three flights have been of supreme importance, for each proved that a major spacecraft was efficient.

On February 20, 1962, John Glenn piloted *Mercury* in a three-orbit passage around the earth, demonstrating that Americans could duplicate anything the Russians had accomplished in space up to that time.

On March 23, 1965, *Gemini* astronauts Virgil Grissom and John Young made their three orbits, in which they proved that human beings could take personal control of a space ship and change its orbit if necessary.

On October 11, 1968, the three astronauts Schirra, Eisele, and Cunningham took *Apollo* 7 on an 11-day faultless flight whose significance lay in its timing. Some 20 months earlier a disastrous fire had destroyed a predecessor *Apollo*, killing Grissom, White, and Chafee. At that time critics charged that *Apollo* was basically defective and would probably never take off. Schirra and his men proved exactly the opposite, and we were on our way to the moon.

Thirteen long years after the last of these flights America is about to launch the next in line, in some ways more vital than any of others. The space shuttle *Columbia* is scheduled to blast off from the launching pad at Cape Canaveral as this issue goes to press, inaugurating a radical new system of space exploration. Tremendous consequences depend on this effort. Our entire space program may well be determined by what happens. Astronaut Joe Kerwin, a veteran who spent 28 days aloft in *Skylab*, says, "On this one we're mortgaging the ranch."

If it succeeds, which is very likely, it will open vast new possibilities. The heavens will be explored as never before. The military will have a reliable base from which to launch their own experiments. New materials will be fabricated in a weightless environment. A reusable platform will exist. And Americans, men and women alike, will once again be voyaging in space after a period of six years during which we surrendered leadership to the Russians.

If it fails, and some ultracautious experts are suggesting it could, Congress and the public might be tempted to close down major space efforts for several decades. Financing would certainly become more difficult. Emotional support would wither. And the vital energy required for any kind of exploration would be provided not by America but by Japan, Germany, and of course Russia. The vast space centers at Huntsville, Houston, and Cape Canaveral would retrench or go into mothballs, and the brilliant engineers and scientists who built our space program would be scattered.

If such enormous consequences ride on the shuttle, what kind of vehicle is it?

Robert F. Thompson, project manager for the program says, "In 1971, when we could see that Apollo must grind to a halt, following the dramatic moon explorations, a group of experts convened to decide what to do next. Trips to Mars? Settlements on the moon? Assembling of space stations? We had the know-how to do any of these exciting things, but we realized that the politicoeconomic base had changed dramatically. Supreme and costly efforts like these would no longer be supported by public taxation. But at reasonable cost we could provide an excellent alternative, a space shuttle that would become our basic building block for the future.

"It had to have four contrasting capabilities. It must take off like a rocket, go into orbit like a space ship, return through the 2,500°F heat caused by friction with the atmosphere as if it were the blunt end of a landing capsule, and return to Earth like a powerless glider. Also, it must be aerodynamically sound, able to fly at any speed from one hundred miles an hour to Mach twenty-five. And, unlike Apollo and the others, it must be reusable."

The solution was admirable in its conceptual simplicity, horrendous in its technical complexity. As it waited on the launching pad, the three-part craft stood 154 feet high, tall as a 15-story building, capable of doing many diverse things. Today it has become a reality, standing in Florida, ready to fly. Its three parts should be understood.

First is a pair of long, sleek rockets responsible for giving the entire assembly a mighty initial thrust upward. These solid rocket boosters don't burn on ordinary fuel but on a composition of aluminum powder, perchlorate, and iron oxide with a polymer binder. They will burn synchronously for about two minutes, then detach and fall back into the ocean, from which tugs will retrieve them for repeated use in as many as 20 later flights.

Next comes the external tank, a gigantic fuel repository with two compartments, one for liquid hydrogen, the other for liquid oxygen. This massive tank carries no rocket engines; it feeds its fuel into the main engines of the third component, and after eight minutes of flight, at an altitude of 70 miles, it separates, falls into a remote part of the ocean, and sinks. It is not reusable.

The third component is called the orbiter and is the ongoing part of the shuttle, a kind of blunt-nosed heavy airplane as big as a Boeing 707. With only a minute fuel supply of its own to be used for delicate maneuvering, it coasts in an orbit some 100 miles above the earth at a speed of 18,000 miles an hour. It carries a crew of three pilots (two on the first four test flights) and a working staff of four to six nonpilots.

The crew rides forward in what would be the cockpit of a transport plane, the vast bulk of the orbiter being given over to working area for cargo and scientific experiments. After three to seven days in space the craft comes back through the atmosphere and, with no engines to propel it, glides safely to a preselected landing strip, to be checked, cleaned, refueled, and sent aloft once more. This part of the system should be good for at least 50 flights.

It is the third component the orbiter without its fuel canisters, that creates a unique problem. How can a craft that looks like an airplane be brought back through the tremendous heat caused by friction with the atmosphere? What's the problem? We and the Russians have brought scores of space vehicles safely back to Earth. But all previous craft have come back blunt end first, to dissipate the heat over a broad crude surface. The blunt end has been protected by the ablative principle, whereby a specially composed material, say, a mixture of asbestos, invented fibers, and a specifically fabricated epoxy, shields the leading face and ablates, or slowly wears away, carrying the heat with it.

I recently inspected a piece of the Skylab that fell on Australia and could scarcely believe what I held in my hand. The forward edge of this piece had been coated with an excellent ablative, which had burned at 2,500°F. It was totally charred, but its capacity to lead heat away as it burned was so efficient that material that stood one thirty-second of an inch behind the burned edge was untouched.

Ablation is one of the miracles of the Space Age: it works every time with such perfection that not a single space vehicle, so far as we know, has been lost because of excessive heating. Quietly, gently the heat has been dissipated.

Unfortunately, ablation cannot be used on the orbiter, since it does not come back through the atmosphere blunt-end-to. Nor can its components be allowed to burn off, since they will be used again and again. The orbiter must use an alternative system, the heat-sink. Normally this is a metal, preferably an alloy, that accepts heat, leading it away in various directions, especially inwardly, where it dissipates. Since the metal does not ablate, a heat-sink can be used repeatedly.

A metal heat-sink would be perfect for the orbiter, except that it would weigh far too much, if the *Columbia's* exposed areas were so protected, we would not have rockets big enough to blast it into Earth orbit. So a remarkable tile has been invented, light as a feather, reliable like the best ablative material and reusable through repeated missions.

More than 32,000 of these tiles, each

made to its own peculiar specification and size, have been attached to the exposed areas of the orbiter, and they will be responsible for protecting it as it comes plunging back through the atmosphere. Fabricating the tiles and finding a proper adhesive for holding them onto curved surfaces was such a frustrating task that the shuttle fell years behind schedule and billions of dollars above original estimates.

Criticism has been severe, but Thompson believes that much of it is ill founded. "The best brains in our business made those estimates back in 1971. Total cost, five point one billion dollars. Ready to fly in 1978. But they warned everybody, 'This is research-and-development work, and overruns or delays will be inevitable.'

"So what do we find? Our cost is now eight point three billion dollars, but most of that it attributable to inflation. The original estimate was phenomenally good.

"As to the time delay. I admit we have lagged by two years, even three, depending on how you count. But old-timers like me expect delays in an R&D program. And if the tiles hadn't delayed us, something else would have done so."

Obviously, when the shuttle lifts off, it will carry with it a tremendous burden other than its fuel and its scientific instruments. Personal reputations ride with it. National policies. Military capabilities. The outreach of science and exploration. If so much depends upon a single flight, what kind of men do you ask to fly it?

NASA has chosen as commander the man best qualified in all the world. John W. Young is a short, wiry Navy captain, fifty-one years old come September. On the day Young assumes the left-hand seat in the shuttle he will have passed eight of the most stringent weeding-out processes known. These requirements were outlined by Deke Slayton, one of the original seven astronauts and a close friend of John Young's since the early Gemini days.

"First he passed the rigid test to enter the Naval Academy. Later, as a young graduate, he had to prove that he was fit for flight training. Sixty percent fail. Next he had to pass the flight training, and twenty-five percent don't make it. Secondary flight school is tough and washes out about forty percent. After that he moved into an operating squadron, which loses about fifteen percent through death or disabling accident. He applied for test pilot school, with eighty percent rejection and another five or ten percent failing if they do get in. He has more than six thousand hours in the most advanced planes and holds world records in various types of flight.

"Now the hardest test of all. He wants to be an astronaut. Top men in the nation apply. Out of a hundred and twenty in his group, nine were selected. Two were killed; six others, fine men like Armstrong, Borman, and Conrad, left the program. And now we come to the final selection. Who is to command the shuttle on which so much depends? Now we have only Young."

What makes him especially qualified is the fact that he has been four times in outer space—Gemini 2 and 10. Apollo 10 and 16—for a total of 533 hours and 33 minutes. He is far more experienced than any other astronaut flying today, American or Russian. In each of his two second flights he served as commander, and he once spent 20 hours and 14 minutes working on the surface of the moon.

"In 1972 I was told that I was assigned to the first shuttle. Since then I've done nothing but try to master the job." Pointing to a stack of manuals almost four feet high, he says, "I keep that pile to remind myself of the mental work we have to master."

"How do the shuttle and Apollo compare in difficulty??" I ask.

"Apollo required us to know a massive amount. The shuttle is a whole magnitude more difficult. But because we've worked so long, I do believe we're better prepared than we ever were for Gemini or Apollo."

Young is not eary to know. Astronaut Mike Collins, who shared the cramped quarters of Gemini 10 with him for three days, observed, "Mysterious. The epitome of the nonhero with a country boy's Aw shucks, 'tain't nothin' demeanor. Delightful wit and a keen engineer's mind.

He is full of surprises. After going out of his way to impress you with a modest appraisal of himself, he lets you into his study and goes off to answer a phone call, and there you find a collection of astronomy books that would grace the quarters of a professor in that subject. His knowledge of flight is awesome. And his physical condition, which he maintains by jogging and attention to what he eats, is remarkable. Slayton recalls that the most important test Young ever had to face came in his first Gemini flight. "We handed him a paper bag and asked him to demonstrate that a man could have a bowel movement in outer space. When he succeeded, we knew we were home safe."

Young lives on a quiet back street near the Johnson Space Center, in Houston, with his lively, outspoken wife, Susy. In days when he did not have to concentrate exclusively on the shuttle he was in charge of the 80-odd astronauts, a kind of Dean of Men. Now he keeps to his corner office, crowded with material pertaining to the flight.

I say to him, "Suppose I've been a red-hot test pilot. I'm selected as an astronaut. How long before I can fly the shuttle?"

"Half a year mastering the local lingo, the basic structure, the navigational stars, digital processing. Then we'd want you to spend a year and a half tracing out the systems, especially the five on-board computers, our forty-nine different engines, twenty-three antennas. When you knew all that, we'd put you in the simulators for about six months. Then you'd be ready to start the hard work of preparing to fly."

"How do you feel when you hear that during the six years we've had no men aloft a Russian cosmonaut like Valery Ryumin has spent three hundred four days in their Salyut 6 space station?"

"Poor guy. Their craft was unbelievably crowded, compared to ours."

"But they're up there and we aren't."

"You're right. And it's damned worrisome. There's sure a lot to be learned up there. They've got to be mastering something. They've said that their long-range goal is manned flight to the planets."

"Any clues as to how far along they are?"

"Difficult to assess. But they're probably far ahead of where we were when we ended Apollo."

"What do you think America should be doing?"

"We must keep our men in space. It's amazing what the human eye can detect from one hundred miles up. What the human brain can absorb. It would be incredibly silly for us to abandon space to others. Especially when we're developing master capabilities."

"Is the shuttle one of those capabilities?"

"You bet it is. With this machine we can accomplish miracles. When it becomes functional, the world will experience a surge of excitement."

"I'm fascinated by one aspect. Here we have three components. Each has been tested by itself. But never as a united trio."

"They can't be. Until we put them together and actually take them up. "

"Does that concern you?"

"Of course it concerns me! But we're test pilots. This is our job. We're ready to give it a go. And remember this. The shuttle may be more complicated than a new airplane used to be, or an Apollo. But it's not inherently more dangerous. It's just one more flying machine to be tested."

Young's copilot on his first flight will be Commander Robert L. Crippen, USN, a tall Texan, forty-three years old and the handsome kind of man Hollywood might have chosen to play copilot in a movie in which John Wayne was the gruff senior. Well trained as a test pilot, Crippen served as support crew for the Russian-American joint effort *Apollo-Soyuz*, which gave him an opportunity to inspect the Soviet space effort.

"They struggle to build systems that work. then stay with them. The basic message I got was that they're determined to succeed. Technologically we're still in command, but we won't be for long if we rest on our laurels. Looked to me as if they were closing fast."

"How about their budget?"

"I'm told they spend seven billion dollars a year. Many times what we do. Whatever they have, they use elegantly. They're up there flying, and we aren't."

Crippen is an excellent complement to Young, outgoing where Young is taciturn, philosophical where Young tends to be engineering-practical. Crippen says, "We're very excited about the shuttle's future. Look, we already have complete payloads signed up for our first sixty-eight flights. We're a going concern, an eventual money-maker. All sorts of participants want to work with us. European relations, China, Arabsat, Indonesia. Scores of universities want to send experiments aloft. And many of the big industries. This isn't an experiment, it's the real thing."

He is especially pleased by the possibilities of Flight 16, scheduled to blast off on January 12, 1984. "We're going to haul this huge telescope to an orbit three hundred twenty miles up. Weighs ten tons, is forty-six feet long. It'll be like lifting Mount Palomar three hundred miles up in the air, above the smog. Who can even guess what wonders that scope will reveal?"

An outsider who visits either Houston or Cape Canaveral is overwhelmed at first by the normous gamble America is making on this first flight of the shuttle, but once he has a chance to talk with men like Young and Crippen, he becomes aware that the orbiting of Columbia is merely a first step. The true wonder of this venture lies in the intellectual variety of the payloads that will ride in subsequent flights.

At various points across the country pallets are being assembled. The size of small rooms, these will house the varied scientific instruments with which outer space will be explored and the surface of our earth analyzed. Each pallet will contain from four to six totally different devices, which will be attended by scientists who fly as passengers aboard the orbiter. (Young scientists from Europe are already in training at Houston to fly in the orbiter when their countries experiments are aboard.)

When assembled, the pallet is hoisted bodily into the bay of the orbiter and carried into space. Some, self-governing, will be lifted off their pallets by a gigantic articulated arm developed by Canadian scientists and will be thrown out into permanent orbits of their own. They will send their data back to Earth by radio signal.

A widely diverse scatter of experiments has already been allocated to the 68 flights. For as little as $3,000 a device requiring little space can be sent aloft. On certain flights room has been set aside for high-school wizards, and at repeated intervals the manifest for an entire flight says simply DOD. That's Department of Defense, which looks to the shuttle for help in its major scientific experimentation. One would-be user had an ingenious plan: Send up stamped envelopes, then sell them at whopping prices as "authentic space mail." His proposal was rejected.

It is obvious that Young and Crippen cannot possibly fly all the shuttle missions already scheduled. Who are the other astronauts in training for these flights?

The second crew, and the men who will take over the first flight if anything incapacitates Young or Crippen, are two delightful military test pilots, Joe Engle, a Kansan in the Air Force, forty-eight years old, and Dick Truly, Navy man from Mississippi, forty-three years old. It's fun to hear them.

ENGLE. Look at this pile of manuals we have to know by heart. Hydraulics, propulsion, communications, digital processing, life-support systems, environment control.

TRULY. That's so you don't cook or choke.

ENGLE. Orbital maneuvering, reaction controls, navigation, guidance, mechanical functioning, big-arm manipulation, reentry data, glide control.

TRULY. Merely the dues you pay for belonging to the club.

ENGLE. I was back-up pilot on *Apollo 14*. Had to master all that material. Shuttle is much more complex.

TRULY. We don't worry about geopolitics or the philosophical importance of the flights. Our task is to fly this machine as skillfully as possible.

ENGLE. And we have flown it. Dick and I are the men who took the orbiter aloft on that Boeing 747, cast it loose, and proved that we could glide it back to Edwards Air Force Base. We did it twice. A marvelous machine.

TRULY. In a real flight, when we decide to land, we make our decision over Australia. We glide across the entire Pacific and have ahead of us a pattern about a thousand miles left or right into which we can land, and somewhat more fore and aft.

ENGLE. This matter of direction is important. If we take off to the east, we pick up the thrust of the earth's rotation in that heading, say, one thousand extra miles an hour. That means we can carry a payload of sixty-five thousand pounds. But if we take off north-south, we lose the earth's lift and can carry only forty thousand. And if we're stupid enough to take off east-west, we actually fight against the earth's rotation, and we're limited to twenty thousand.

ENGLE. Which is why we take off from Florida and land in California.

TRULY. How do we get the orbiter back to Florida for the next take-off? We'll bring it home piggyback on top of our 747.

ENGLE. All of us are committed to this venture. We're determined to make it work.

TRULY. When Joe says that, you must remember that, as a test pilot, he flew a plane straight up to an altitude of two hundred eighty-three thousand feet. He knows what test piloting is. We're testing the machine of the future.

I've spent the last three years closely associated with the space shuttle. I've observed it in California and Florida. I've flown in some of the simulators to get as much feel of the craft as a nonengineering layman could, and I believe I appreciate the strengths and weaknesses of the adventure. I respond especially to the wonderful promise it holds for the future.

As an old naval workman on the maintenance of aircraft, I could never have approved the intricate and fragile system of using tiles as heat-sinks; delays could have been anticipated. But now I see that the tiles are marvels of engineering; I think they have an excellent likelihood of working.

Delays due to engine problems are generic in the development of any aeronautical or space machine. In World War II, I was in charge of paperwork on the PBY-5A, an amphibious plane subject to many problems because of salt water. After this plane had been absolutely certified by both the manufacturer and the Navy as sea- and airworthy and had gone into operation as a rescue plane out of Guadalcanal, we ordered 516 major alterations before it was truly flightworthy, and no one thought the number excessive.

The shuttle is a daring experiment, precisely the one we should be making now.

As a writer who wrestles with words, I am dismayed that this tremendous adventure should have been stuck with a name as drab as space shuttle. NASA, appreciating this, has taken to calling it the STS [Space Transportation System], which is worse. Back in 1971, when the plan was bruited, some genius should have invented one of those words that captivate the imagination, like Kodak, Xerox, Time, or TV. Wordsmiths play their own role in civilization.

I wish to add one comment of my own. I have spoken to no one in NASA about what I am about to propose, but I suspect that many experts have been speculating along these lines.

The first four shuttle flights will be handled by only two crewmen, Young and Crippen on the first, Engle and Truly on the second. These will be experimental flights without significant payload. After that, flights with crews of four or more will be normal.

I judge that by the time Flight 17 blasts off on January 31, 1984, it would be practical for the shutttle to carry fare-paying passengers. For something like $25,000 each, up to six civilians could be lifted to an altitude of about 150 miles above the earth, where three days would be spent in orbit at a speed of about 18,000 miles an hour. Windows would provide a good view of sky and Earth, the latter showing about 1,100 miles of surface in all directions.

Experts assure me that the ordinary civilian in good health could be prepared for such a flight in less than three weeks: "You'd want to take them up in a T-38 to adjust them to air sickness. Check them out in six or seven simulators. Use the water-immersion facility to acquaint them with weightlessness. Maybe the Low Gravity Wall at Langley. They'd have no problem with gravity, really. At takeoff they'd pull at most three g's, eyeballs in. No worse than jumping off a low stool. Reentry, they'd have to handle less than two g's, eyeballs down. After the first experimental flights, of course, the crew won't wear space suits. Just regular military-type flight suits. Civilian passengers would wear business suits."

Three men I know have already signed up for the first businessmen's special, Lowell Thomas, Walter Cronkite, and I. If the flight takes place, as I think it might, as early as 1984, Thomas will be in his nineties, I in my late seventies, and Cronkite in his late sixties. When we three elder statesmen blast off on a routine flight, the world will awaken to the fact that it has truly entered the Space Age.●

ASSISTING THE EARTHQUAKE VICTIMS IN ITALY

● Mr. D'AMATO. Mr. President, it is not often when one has the opportunity to commend a citizen whose dedication and sincere efforts on behalf of the victims of a natural disaster have resulted in giant steps toward the realization of relief for those victims.

Today, it is my pleasure to cite Mr. Charles A. Gargano, of Farmingdale, N.Y., in recognition of his ongoing efforts to assist victims of the recent earthquake in Italy. At his own expense, Mr. Gargano twice journeyed to the quake zone. The first visit, from December 15 to 21, 1980, was made in order to assess damages and to assist in the preliminary planning for the reconstruction of a six-classroom school in his hometown of Sant'Angelo dei Lombardi which was destroyed by the quake. During the second visit, he was involved in the selection of a site and contract for the school. Since that time, the school has been undergoing fabrication and is scheduled to be completed by May 1981.

In addition to his travels to Italy in the aftermath of the quake, Mr. Gargano has been the driving force behind a fundraising effort on Long Island and in New York City which has netted in excess of $100,000 on behalf of the quake victims.

In recognition of his selfless efforts, Mr. Gargano was presented with the Community Service Award by the Nassau Chapter of the New York State Society of Professional Engineers on March 13, 1981.

Mr. President, it is unselfish persons such as Mr. Gargano that we should be thankful are present during crisis situations such as the one in Italy. I recommend that we all join in commending Mr. Gargano for his most generous contributions of time and financial resources to those considerably less fortunate than he.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD the notification I have received.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., April 1, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-28, concerning the Department of the Army's proposed Letter of Offer to Korea for defense articles and services estimated to cost $20 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Director.

Transmittal No. 81-28

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Korea

(ii) Total Estimated Value:

	(Million)
Major defense equipment*	$18
Other	$ 2
Total	$20

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Twenty-one M88A1 recovery vehicles with concurrent parts support and ancillary equipment

(iv) Military Department: Army (WNY).
(v) Sales Commission, Fee, etc. Paid. Offered or Agreed to be Paid: None.
(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.
(vii) Section 28 Report: Included in report for quarter ending 30 September 1980.
(viii) Date Report Delivered to Congress: April 1, 1981.

POLICY JUSTIFICATION

KOREA—M88A1 RECOVERY VEHICLES

The Government of the Republic of Korea (ROK) has requested the purchase of 21 M88A1 recovery vehicles with concurrent parts support and ancillary equipment at an estimated cost of $20 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for modernization and progress in eastern Asia.

This sale will improve the ground defenses of the Republic of Korea since the ROK has a large number of armored and artillery vehicles but very limited recovery capability. The proposed sale will enhance the ROK's ability to retrieve inoperative armored and artillery vehicles in the event of renewed hostilities.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Bowen-McLaughlin-York Company of York, Pennsylvania.

This proposed sale will require the assignment of two Department of the Army civilians to the Republic of Korea for approximately two weeks during the estimated May 1984 delivery period for quality assurance purposes.

There will be no impact on U.S. defense readiness as a result of this sale.●

EXPORT TRADING COMPANIES—VIII

● Mr. HEINZ. Mr. President, on March 27 Secretary of Commerce Baldrige delivered a speech to the Chicago World Trade Conference which is an excellent analysis of the Nation's declining competitive position in world trade and a comprehensive summary of what the Reagan administration plans to do about it. Of particular interest right now is the Secretary's strong support for export trading companies legislation, specifically S. 734, which is scheduled for Senate floor action soon. By facilitating the formation of trading companies, this legislation will encourage the full utilization of export potential of the thousands of small- and medium-sized businesses in this country not presently engaged in exporting.

I am most encouraged by the Secretary's remarks, his strong support for this bill, and for his vision and commitment to restoring our worldwide competitive position. Mr. President, I ask that the Secretary's speech be printed at this point in the RECORD.

The remarks follow:

REMARKS BY SECRETARY OF COMMERCE MALCOLM BALDRIGE

I am pleased to be here today at one of the Nation's leading forums for the vital issues of world trade, and I want to commend the Chicago Association of Commerce and Industry and the International Business Council for sponsoring these annual World Trade Conferences, which have contributed to the formation of national policy for 44 years.

The international competitive position of the United States has steadily declined for more than two decades. In 1960, for example, the U.S. share of world trade in manufactured goods was 25 percent. In 1980, it was 18 percent. This deterioration was compounded by our soaring oil import costs.

Last year our oil imports cost us $82 billion. The result is that over the past four years we have accumulated a trade deficit of $100 billion dollars.

There has been some recent improvement in our trade position. Our exports, for instance, have grown by more than 20 percent for the last two years. Good news like this leads some in Washington to believe we have turned the corner in our trade position and that our international competitive position is and will be in good shape.

I wish I could agree with this optimistic view, but I cannot. The fact is that a great part of our recent trade improvement has stemmed from the lagging effects of the devaluation of the dollar, which cheapened our export prices and from our recent sluggish economy, which reduced imports. Both of these are short-term developments, can be temporary, and can change quickly.

We should not let them obscure our long-term decline in international competitiveness.

The growth of U.S. productivity in manufacturing has lagged behind that of our competitors for at least 20 years. Recently, U.S. productivity growth has fallen even lower. From 1960 to 1973, U.S. manufacturing productivity grew 3.1 percent annually—about half as fast as the average for our 10 major competitors. From 1973 to 1979 our manufacturing productivity growth fell to 1.4 percent annually—less than one-third as fast as our competitors. And in 1980 it was close to zero.

What makes this even more worrisome is the prospect for fairly slow growth of the world economy over the next decade. That means that all countries will be interested in expanding exports—and reluctant to accept more imports—in the years ahead. It means that international competition is going to get tougher than ever before.

When seen against this international background, President Reagan's program for economic recovery is critically important to our trade position in the years ahead.

Virtually every element of that economic program is related—directly or indirectly—to improving the competitiveness of U.S. industry in the world market.

Accelerated depreciation allowances for modernizing plant and equipment will increase productivity.

Accelerated depreciation for research and development equipment will help productivity gains.

Tax cuts will contribute to increased savings and help provide the necessary capital for the new plants.

Cuts in Government spending will contribute to investment capital by reducing the heavy Government borrowing that has crowded business borrowing out of the market by the resultant high interest rates. The lower interest rates resulting from the actions I have mentioned will provide added incentives for increased capital investment by business.

Reductions in Government regulations will also stimulate increased productive investment. Burdensome regulations have been draining billions in investment funds into less productive uses and have been raising operating costs.

Finally, we feel the Federal Reserve Bank will cooperate by targeting a slow, steady and consistent money growth.

Together, these elements are designed to increase productivity, the key economic indicator and one which has a truly dismal record in the recent past.

One major reason the competition has been moving ahead of us is their business tax policy.

For example in industrial robots, seen by many as the key to future productivity growth, Japan leads the world in the application of robotics technology and in the number of industrial robots in use—10,000, compared to 3,500 in the United States. A major reason is the whole range of tax incentives, loan guarantees, and leasing arrangements through which the Japanese Government supports the development and installation of this sophisticated equipment.

One example is depreciation. The Japanese Government provides a first-year write-off of 25 percent, which, when combined with normal depreciation—allows Japanese companies to write off as much as 45 percent of the cost of machinery and equipment in the first year of use. Japanese auto companies are among the firms taking full advantage of these tax provisions.

President Reagan's new program addresses this problem and makes proposals which will substantially improve the position of U.S. firms. For example, companies will be able to write off 52 percent of their new machinery and equipment costs over two years—plus the 10-percent investment tax credit.

Business experience has given me a keen interest in the subject of research and development and the role of R&D in building our competitiveness in the world market. I believe that increased R&D is absolutely essential if we are to maintain our lead as the world's greatest trading nation. And while the United States still accounts for the bulk of industrial nation R&D, our rate of growth in this vital area has been lower than abroad. United States R&D has fallen in relation to our Nation's GNP, while it has been rising as a fraction of GNP in competitor nations.

I am convinced that this declining emphasis on R&D has affected our trade position. For example, the U.S. share of world aircraft markets—around 70 percent in the early 1970's—declined to 58 percent by 1979. The U.S. share of world trade in telecommunications equipment fell by 50 percent during the same period. Indeed, we have gradually been losing our market share in most high technology areas.

The United States had amassed a huge store of technological knowledge since World War II, and that storehouse has been the principal source of our competitiveness. Knowledge knows no national boundaries and in this era of rapid communication, it spreads quickly throughout the world.

But we must add to our R&D storehouse as rapidly as we can. If we continue to devote less of our time, money and effort to R&D than do our competitors, we will lose the technological edge we still have—a development which would have extremely serious implications not only on our trade position, but on our standard of living as well.

The Commerce Department has also taken the lead in support of the export trading company legislation now before the Congress.

Presently 1 percent of our companies sell 80 percent of our exports; 90 percent of our 250,000 U.S. businesses do not export at all. This puts us at a severe disadvantage with our trading competitors who use their medium- and smaller-size companies to a much greater extent in foreign trade. It's "export to live" with them.

This proposed Export Trading Companies Act is especially important for small- and medium-size firms, to which we should increasingly look for increased export activity.

The largest share of U.S. exports currently comes from the industrial giants—we need to stimulate and train smaller firms in this area, much as our foreign competitors have done.

In this area, too, Japan is a leader. Two-thirds of Japanese exports are handled by trading companies and they have even transported the technique to this country as well. The sixth largest U.S. exporter is currently none other than Mitsui, one of the largest Japanese trading companies. And Japan is not alone in the use of specialized export entities—West Germany, France, and Hong Kong do likewise.

The U.S. needs our own export trading companies to provide the full range of export services to companies of any size which are interested in the export market. And these export trading companies must be large enough and experienced enough to successfully develop new markets for U.S. goods.

Some of the most logical entities to form and participate in effective export trading companies are banks, many of which already have foreign coverage through branches, agents or correspondent banks. They are already in the business of evaluating risks and researching foreign markets, but we need special legislation before banks can participate with manufacturers in export trading companies. We also need legislative measures assuring that business leaders will not run afoul of the antitrust laws in their export activities. Legislation is now before the Congress that will meet both needs, and I hope there will be speedy action on it.

If we are going to enlist more small- and medium-size firms in the export effort, we must insure that they are not hobbled by unnecessary regulations which impede their ability to compete in either the domestic or overseas markets. And these are the very firms most hurt by regulations because they often can't afford the thousand-dollar-a-day lawyers to guide them through the regulatory thicket.

So the administration has moved quickly to provide immediate regulatory relief and to establish procedures to correct and prevent misguided actions. At the Commerce Department, I have asked for a thorough review of all regulations issued, as well as a careful review of all regulations which will be developed. In addition, Commerce has been designated as the focal point for business concerns about regulations. I want all members of the business community, from the smallest firms to the largest, to know that we are prepared to listen—and what's more important—to respond to your concerns. There is a serious flaw in any regulation that turns American business away from the world market place or that makes a U.S. manufacturer uncompetitive in international trade—and we want to hear about it. I promise that we will do everything we can to change it.

Another present export disincentive is posed by the Foreign Corrupt Practices Act. The problem here is the lack of precision, clarity, and reciprocity in this well motivated act. If a small businessman in Wichita hires an agent of good repute in a foreign country, and pays him a standard commission, our businessman can still be thrown in jail if his agent contributes any portion of his commission to a foreign political party or candidate and if he, the businessman, had "reason to know" it. What does that mean? I don't know, but more importantly neither does our Wichita businessmen, and that hurts our export effort. We must clear this bill up—our friend can't afford to hire a $200,000 a year Wall Street lawyer to clear it up for him.

Another area with a high priority in our department is full implementation of the multilateral trade negotiations. We can improve our competitiveness, remove disincentives to exporting, and mount a worldwide trade promotion effort. But these will add up to very little if our firms are denied access to foreign markets.

The United States maintains the freest, fairest, most open market in the world. We are also the wealthiest. In the vast majority of cases, foreign producers have access to our market on virtually the same terms and conditions available to domestic firms.

This open system has enabled the U.S. marketplace to become a powerhouse of prosperity for nations all over the world. We want to keep it that way. But our firms can't compete in the world market while using a different set of rules from those that apply to foreign companies. So we are determined to insure that American companies will be able to utilize their competitive abilities in an open and equitable international marketplace. In short, we insist on fair trade as well as free trade.

This means that we will fully implement the provisions of the MTN in a way that maximizes the trade and economic benefits to the Uinted States. Our competitors are working night and day to gain every ounce of benefit from these agreements. Let me assure you that we will do the same in this administration.

Finally, when I took this job, I promised to represent the views of business in the councils of Government. And I'm doing just that. Those views have a right to be heard and I believe that some of our basic problems stem from the fact that they have not been heard or heeded.

In no area is it more important for these views to be heard than in the area of world trade because the whole future of this nation is bound up in our response to the global economic challenge involving trade.

Moreover, I believe this perception is coming to be shared by all Americans.

We see the direct relationship between exports and imports and the national economic welfare.

We see the meaning of world competition among workers demonstrated in the measures of the productivity of nations.

We see the race for innovation among business firms on every continent.

And we see the direct link between trade and the need for jobs for our growing work force.

As we remove the disincentives for domestic and international business growth, the achievement of that growth will then clearly be up to the private sector. We assume, too automatically, that our productivity problems center around labor productivity. I think that this could be less of a problem in the United States than is management productivity. In the 1950's and early 1960's we had the world's best managers. Between our own complacency and the rise in management expertise around the world, we now too often do a second rate job of management compared to our foreign competitors. Their feet have been held to the fire; they have responded because they have had to in order to compete. Now, with the President's program to get the Government off the backs of our private sector—it's your turn to respond—and respond aggressively if the United States is to once again become the economic model for the rest of the world.●

BYELORUSSIAN LANGUAGE

● Mr. D'AMATO. Mr. President, on March 25, 1981, the Byelorussian-American communities of the United States commemorated the 63d anniversary of the Proclamation of the Byelorussian Democratic Republic which took place in Minsk, the capital of Byelorussia in 1918. At a rally held in Brooklyn, N.Y. on March 29, 1981, to mark this anniversary, the following resolution was passed. I ask that this resolution be printed in the RECORD.

The resolution follows:

RESOLUTION

Resolved that the Byelorussian language be included in Voice of America programming.

The aforementioned resolution to be adopted by the Byelorussian-American community at the March 29, 1981 rally commemorating the 63d Anniversary of the Proclamation of the Byelorussian Democratic Republic which took place in Minsk, capital of Byelorussia, on March 25, 1918.

The Byelorussian-American community of New York is convinced that U.S. national security interests and world peace are well served when captive nations within the Soviet Union are informed of the nature of Soviet expansionism and the vitality of their respective cultural heritages in the United States. Indeed, these are major objectives of Voice of America broadcasts. For years, however, Byelorussians in the Soviet Union have not heard any VOA broadcasts in their own language.

The Byelorussian language, the language of one of the largest nationalities in the USSR and one of the oldest ethnic groups in the United States, is being discriminated against by the Voice of America which does not include the Byelorussian language in its programming. We, the participants of this rally wish to once again express our long standing frustration with this discrimination; we ask that the administration of the VOA and other concerned government agencies recognize the inequity and unsoundness of VOA policy in this matter and move to include the Byelorussian language in VOA programming. Inclusion of the Byelorussian language in VOA broadcasts would foster closer relations with the Byelorussian people and the Byelorussian-American community.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that seven such notifications have been received: three on March 27, and four on April 1, 1981.

Interested Senators may inquire as to details of these preliminary notifications at the office of the Committee on Foreign Relations, room 4229 Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 27, 1981.

DR. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington D.C., March 27, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 27, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington. D.C.

DEAR MR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a North African country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 27, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Southwestern Pacific Country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., April 1, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Southwestern Pacific country for a major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., April 1, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.●

ACT NOW TO PRESERVE SOCIAL SECURITY

● Mr. CHILES. Mr. President, on February 17 I introduced S. 484, the Social Security Reform Act of 1981. This bill is the end result of a series of hearings I conducted last year, as chairman of the Committee on Aging, to examine the options available to insure the financial viability of the social security program, a base of economic security for 36 million people.

All of us here know that Congress must eventually take significant steps to save the social security system from bankruptcy. I am concerned that if we do not adopt a comprehensive strategy very soon—one that gives as much consideration to insuring an adequate lifestyle earned by beneficiaries as the need to balance the budget—we will lose all public confidence.

If enacted, the combination of measures I advocate in S. 484 would resolve the short-term cash flow problems of the social security trust funds and wipe out the long-term deficit, in preparation for large increases in the number of retiring workers in the next century. These crucial remedies can be made without changes in the current indexing of social security benefits, a step which is of great concern to all current retirees. S. 484 would also encourage greater work opportunities for older workers, and reduce inflation and unemployment by giving employers a steady rollback in the social security payroll tax rate.

Specifically, S. 484 would:

First, remove the mandatory retirement age completely;

Second, eliminate entirely the earnings limit for those over age 65;

Third, eliminate the payroll tax paid on wages earned by any worker over age 65, for both employer and worker;

Fourth, permit interfund borrowing immediately among the OASI, DI, and HI trust funds;

Fifth, in the next century, begin to phase in an increase in eligibility age for full social security benefits from 65 to 68 and for reduced benefits from 62 to 65;

Sixth, beginning this year, fund 50 percent of medicare part A from general revenues, with a gradual increase to 70 percent. The savings would be converted to a payroll tax reduction, bringing the payroll tax rate for both workers and employers down to 5.79 percent in 1983, the level before the last big increase;
